HENRI VANHULST

Frolov, Markian Petrovich (*b* Bobruysk, 24 Nov/6 Dec 1892; *d* Sverdlovsk, 30 Oct 1944). Russian composer and teacher. He studied at the St Petersburg Conservatory in the piano class of N.N. Poznyakovskaya and in the theory class of S.S. Bogatïryov (1913–18), after which he attended the Kiev Conservatory studying piano with Blumenfeld and composition with Glière (1918–21) before returning to Petrograd to continue his piano studies with I.S. Miklashevskaya (1921–4). He taught the piano at the Kiev Conservatory and the Lysenko Institute (1924–8) and in 1928 moved to the Ural region where he taught the piano and theory at the Sverdlovsk Music School. Frolov was a founder and the first director of the Sverdlovsk Conservatory (1934–7 and 1943–4) where he taught the piano and composition. He was appointed professor in 1939 and in 1944 set up departments for Buryat-Mongol, Yakut and Bashkir music. Frolov is one of the initiators of the Ural school of composition – rooted in both the Russian tradition and in the folklore of the peoples of the Urals and Siberia – and is the composer of the first Buryat opera, *Ėnkhe – Bulat-bator*, based on Buryat folk epics.

IOSIF GENRIKHOVICH RAYSKIN

Fromentin, Philippe. French singer, possibly identifiable with FOURMENTIN.

Fromm, Andreas (*b* Plänitz, nr Wusterhausen, 1621; *d* Prague, 16 Oct 1683). German composer and theologian. He came from a family of Protestant clergymen, studied theology and became Kantor at Altdamm. In 1641 he went to Stettin (now Szczecin), where in 1649 he was Kantor at the Marienkirche and Marienstiftsgymnasium, as well as instructor in music at the Pädagogium. From 1651 he probably devoted himself exclusively to theology. On 23 October that year he became a licentiate of the University of Rostock and then went as pastor to Kölln an der Spree. He failed to carry out an order from the Elector of Brandenburg to promote the tendencies towards union between the Lutheran and the Reformed Church; on the contrary, he reacted vehemently against the latter. He next went to Wittenberg as a lecturer. In 1668 he was converted to Catholicism at Prague and justified this step in a work called *Compendium metaphysicum*. From 1668 to 1671 Fromm was a dean at Kamnitz (now Kamenice) in northern Bohemia, then he became a canon at Leitmeritz (Litoměřice). The last two years of his life he spent in the Strahov monastery at Prague, while his wife and five children were maintained in a convent.

Fromm published *Actus musicus de divite et Lazaro, das ist Musicalische Abbildung der Parabel vom Reichen Manne und Lazaro, Lucae 16. Mit gewissen Persohnen … und allerley Instrumenten … in 14. Stimmen auff 2. Chore: wie auch Dialogus Pentecostalis … mit gewissen Vocalstimmen und … Instrumenten in 10. Stimmen auff 2. Chore zum Generalbass zu musiciren* (Stettin, 1649; now inc.). The first of the two works here, the *Actus musicus* (ed. in Denkmäler der Musik in Pommern, v, 1936), is a setting of *Luke* xvi.19–21 and 24–5, with free interpolations such as the Rich Man's drinking song and the dramatization of verse 22, which depicts in biblical language his death and curse. The prologue or Evangelist and the parts of the Rich Man, Lazarus and the Angel show the influence of the Italian monodic style, though the declamatory writing tends to be rhythmically more regular. Fromm himself named Lassus and Marenzio as models for the expressive underlining of character. The frequent use of semitones to denote grief is notable, but the most remarkable feature – and a novel one, not found in, for example, Carissimi – is the employment of three-part instrumental sinfonias to represent affections, for example no.1 (with strings), 'sad', and no.3 (with flutes), 'happy and sad', underlining the contrast of rich and poor. Another innovation is the use of Protestant chorales; in nos.3 and 5 these have ornamented bass viol solos, while nos.13 and 15 are larger-scale chorale fantasias for soloists, chorus and orchestra. The work demands a staged performance in church: the participants include a 'chorus profanus', 'down in the church near the congregation' and serving partly as a symbol of Hell, and a 'chorus sacer' up in the gallery, symbolizing Heaven. The *Actus musicus* was once thought of as 'the first German oratorio', but the *Representatio harmonica conceptionis et nativitatis S Joannis Baptistae* by Bollius dates from some 30 years earlier, and Schütz had probably written all of his oratorio dialogues before Fromm wrote his work (the date of Schütz's *Vater Abraham*, whose subject matter is very similar to Fromm's, is unknown; but it probably dates from the 1620s). Fromm's work is nevertheless significant in the early history of the oratorio. The *Dialogus Pentecostalis* published alongside it provides further evidence of his dramatic leanings. The only other music he is known to have composed is a *Grabe-Lied* for the funeral on 7 October 1650 of a Pomeranian court official; it was formerly in the Stadtbibliothek, Stettin.

FRITZ FELDMANN/DOROTHEA SCHRÖDER

Frommel, Gerhard (*b* Heidelberg, 7 Aug 1906; *d* Filderstadt, 22 June 1984). German composer and teacher. In his youth he studied the violin and the piano; he also studied composition with Hermann Grabner. Frommel followed Grabner to Leipzig for further study at the conservatory (1923–5), after which he attended Pfitzner's masterclasses at the Preussische Akademie der Künste in Berlin. In 1929 he began teaching theory and composition at the Folkwang-Schule in Essen, and from 1933 to 1944 he was on the staff of the Frankfurt Musikhochschule. During the Third Reich, Frommel established the Arbeitskreis für Neue Musik in Frankfurt; it promoted music by Stravinsky, Bartók and Honegger at a time when such composers were denounced by certain sections of the Nazi musical hierarchy. His position was much enhanced after Furtwängler championed his First Symphony in the late 1930s, and Pfitzner also worked actively to advance the work of his pupil. After the war Frommel taught in Trossingen, Heidelberg and Stuttgart, settling once more in Frankfurt in 1956, where he was made professor at the Hochschule für Musik in 1960. Despite his grounding in traditional German music as represented by his teacher Pfitzner, Frommel has to some extent tempered his works with elements of Mediterranean and Asian cultures. His *Caprichos* for piano (1939), for example, were inspired

by Goya's painting *Los caprichos*, while the Piano Sonata no.6 (1956–67) was based on Japanese scales. His secular choral cantata *Herbstfeier* (1932) is not unlike Carl Orff's *Carmina burana* in its neo-primitive style. In the post-war era, Frommel never abandoned conventional tonality, unlike a number of his contemporaries. His productivity suffered during the latter part of his career, but he continued to exercise a positive influence on a younger generation of German composers.

WILLIAM D. GUDGER/ERIK LEVI

Fromm-Michaels, Ilse (*b* Hamburg, 30 Dec 1888; *d* Detmold, 22 Jan 1986). German pianist and composer. She studied in Berlin, first at the Hochschule für Musik (1902–5), then at the Sternsches Konservatorium (1905–8) with James Kwast (piano) and Pfitzner (composition); from 1911 she studied at the Rheinische Musikschule in Cologne with Carl Friedberg (piano) and Fritz Steinbach (composition). As a pianist she promoted contemporary music from an early age and at 18 played Reger's Variations and Fugue on a Theme of Bach, one of the first to do so. As a soloist with orchestra she performed with Nikisch, Abendroth, Furtwängler and Schoenberg. From 1933, during the Third Reich, she had to curtail her concert-giving because her husband was Jewish according to Nazi laws. From 1946 to 1959 she taught the piano at the Hochschule für Musik in Hamburg, and was professor there from 1957. In 1961 she won first prize for her Symphony in C minor at the third international competition for women composers.

BIRGITTA MARIA SCHMID

Fromm Music Foundation. American organization. It was founded in 1952 by Paul Fromm (1906–87), a wine importer who fled the Nazi pogroms in 1938 and settled in Chicago. In 1972 the foundation was relocated to Harvard University, but Fromm played an active role in its decisions until his death. The foundation has supported contemporary music in the United States, commissioning new works and sponsoring a variety of initiatives: concerts, radio broadcasts, recordings, seminars, a visiting professorship at Harvard University (first held by Peter Maxwell Davies in 1985) and, from 1962 to 1972, the publication of a journal Fromm helped to launch, *Perspectives of New Music*.

Fromm freely sought the advice of Copland at Tanglewood and Sessions and Babbitt at Princeton University when initiating foundation-supported projects. In planning commissions and programmes he worked closely with Gunther Schuller, a member of the foundation's board of directors and director of contemporary music activities at the Berkshire Music Center in Tanglewood, summer home of the Boston SO. From 1964 to 1983 the Fromm Foundation sponsored annual 'Fromm weeks' at Tanglewood featuring chamber and orchestral performances of contemporary music by members of the orchestra.

The foundation has sponsored hundreds of concerts of contemporary music, including the 1959 New York Town Hall concert during which Robert Craft conducted the American premières of Berg's *Altenberg Lieder* and Stravinsky's recent *Threni*; a Roger Sessions Festival held at Northwestern University in 1961; an evening of premières of commissioned works, including Babbitt's *Vision and Prayer* and Elliott Carter's Double Concerto, presented at the Congress of the IMS held in New York City in 1961; a Celebration of Contemporary Music marking the American Bicentennial in 1976, co-sponsored by the Juilliard School and the New York PO under

Boulez; and, from 1967, the annual Fromm Concerts of the Contemporary Chamber Players at the University of Chicago, under the direction of Ralph Shapey. From 1985 to 1990 it also sponsored conferences and concerts at the Aspen Music Festival.

Among the 171 works commissioned during Fromm's lifetime were compositions by John Adams, Babbitt, Arthur Berger, Berio, Carter, George Crumb, Mario Davidovsky, David del Tredici, Jacob Druckman, John C. Eaton, Lukas Foss, Philip Fried, Alberto Ginastera, John Harbison, Alan Hovhaness, Andrew Imbrie, Ben Johnston, Betsy Jolas, Oliver Knussen, Ernst Krenek, Paul Lansky, Peter Lieberson, Bruno Maderna, Donald Martino, George Perle, Steve Reich, Wallingford Riegger, Schuller, Sessions, Ralph Shapey, Morton Subotnick, Stefan Wolpe and Charles Wuorinen.

DAVID GABLE

Fromont. French firm of music publishers. It was founded in Paris about 1885 by Eugène Fromont. In 1891 the publisher Georges Hartmann sold his catalogue to Heugel and began publishing in partnership with Fromont. Under Hartmann's leadership the firm published a number of important works by Debussy, including the *Prélude à l'après-midi d'un faune* (1895), *Chansons de Bilitis* (1899) and *Nocturnes* (1900). The firm continued to publish Debussy's music after Hartmann's death on 22 April 1900, most importantly *Pelléas et Mélisande* (vocal score, 1902), which is dedicated to Hartmann's memory, and *Pour le piano* (1901). The firm continued in business until 1922, after which Fromont's publications were taken over and reissued by Jean Jobert of Paris. (*DEMF*)

NIGEL SIMEONE

Frondoni, Angelo (*b* Pieve Ottoville, Parma, 1808 or 1809; *d* Lisbon, 4 June 1891). Italian-Portuguese composer and conductor. He studied at Parma and Milan; his one-act farce *Il carrozzino da vendere* was staged at La Scala in 1833 and *Un terno al lotto* for *basso buffo* and chorus at the Teatro Carcano two years later.

In 1838, while organist at Soragna (Parma), he was contracted by the Count of Farrobo, Joaquim Pedro Quintella, as artistic director of the Teatro de S Carlos in Lisbon, where he conducted premières of two ballets in 1839 and on 22 March 1841 a revival of his *Un terno al lotto*. In 1843 he was dismissed from S Carlos by new management, but had an opera of his produced there the next year. A farce with Portuguese text, *O beijo*, given its première late in 1844, won immediate popularity. Three more operettas in Portuguese and one in French followed in 1845–9. In 1850 he conducted at the Gymnásio premières of three more, each in one act. Now firmly established as one of the two chief theatrical composers at Lisbon he continued until 1863 writing much successful stage music. From 1868 to 1873 he was artistic director and composer for the newly opened Teatro da Trindade, and in 1873–4 conducted the S Carlos opera season.

Always an ardent republican, he composed in 1846 the 'Maria da Fonte' hymn, used thereafter as the anthem of those seeking to dethrone Maria II. He also dabbled in literature with a 24-page printed poem eulogizing Lincoln (1867) and a series of choleric pamphlets, one of which (1883) denounced Wagner's *Lohengrin*. (R.V. Nery and P. Ferreira de Castro: *História da música* (Lisbon, 1991), 144)

Ballets: L'isola dei portenti, S Carlos, 21 Jan 1839; Il ritorno di Pietro il Grande da Mosca, S Carlos, 20 March 1839

ROBERT STEVENSON

Froom, David (*b* Petaluma, CA, 14 Dec 1951). American composer. He studied at the University of California, Berkeley, the University of Southern California (1976–9) and Columbia University (DMA 1984). His principal teachers included Humphrey Searle, William Kraft, Chou Wen-chung and Mario Davidovsky. A Fulbright grant enabled him to pursue further studies with Alexander Goehr in Cambridge. He has taught at the University of Utah and St Mary's College, Maryland (from 1989). His honours include awards from the Fromm and Koussevitsky foundations and the Kennedy Center.

Froom's best-known early work, the Piano Sonata (1980), exemplifies his youthful, neo-Expressionistic style. Demanding virtuosity from the performer, it is a steely, dissonant and driving composition, peppered with jazzy syncopations and angular, athletic lines. Beginning in 1991 with the harmonically voluptuous Chamber Concerto, he has steadily broadened his harmonic palette towards a greater use of consonance. Although the Oboe Quintet (1994) and *Going to Town* (1997) include triads, tertian structures do not create functional tonality in these works; gestural diversity is, however, anchored in traditional forms.

PERRY GOLDSTEIN

Frosch (Ger.). *See* FROG.

Frosch [Froschius, Batrachus], **Johannes** (*b* ?Herxheim, *c*1470; *d* after 1532). German music theorist and composer. He is not to be identified with the theologian Johannes Frosch, also called Rana. He probably studied in Heidelberg where he gained the BA in 1489 and the MA in 1493. He had close ties to Count Georg I (1498–1558) and Duke Ulrich IV of Württemberg (1487–1550), to whom he dedicated his treatise *Rerum musicarum opusculum rarum ac insigne*. It was first published in Strasbourg in 1532, although most modern reference works list only the edition of 1535 which has been published in facsimile. Although the treatise was pedagogical in purpose, the scope of its 41 folios was unusually broad. In addition to a detailed study of the elements of music and the mensural system, he discussed Greek music and cited many ancient writers, including Aristotle, Plutarch and Pliny. It is one of the few theoretical works of the century to be a valuable source for the parody technique of composition. This procedure is clearly demonstrated in *Qui de terra* (for four voices) and *Nesciens mater* (for six voices), which conclude the work. As a composer Frosch displayed a fine talent and excellent training. Among his compositions, which include German psalm motets, lieder and Latin motets, are cantus-firmus settings as well as pieces in the more contemporary imitative style. The songs are printed in collections of Schöffer (RISM 1513[2]), Forster (1539[27], 1549[37]) and Kriesstein (1540[7]); three Latin works remain in manuscript (one in *D-Kl* 24 and two in *Rp* B211–15). Frosch also wrote an astronomical treatise, *De origine et principiis naturalibus impressionum in singulis aeris regionibus nascentium* (1532). He was well known and admired by musicians. Sixt Dietrich considered him a friend and Glarean called him a distinguished musician.

CLEMENT A. MILLER/ANNA MARIA BUSSE BERGER

Frost, Robert (Lee) (*b* San Francisco, 26 March 1874; *d* Boston, 29 Jan 1963). American poet. He attended Dartmouth College (1892) and Harvard University (1897–9), and then worked as a teacher and farmer in New Hampshire. From 1912 to 1915 he lived in England, where his first two books were published. He was poet-in-residence at Amherst (Massachusetts) College from 1916 to 1920. Over 30 composers have set his work, but Frost took little interest in their settings. He seemed to agree with W.B. Yeats's notion that poetry suffered from its association with music and rebelled against the assumption that the music of words was 'a matter of harmonized vowels and consonants'. He wanted to make music out of what he called 'the sound of sense', which he later described as being like the sound of voices 'behind a door that cuts off the words'.

Of those composers who have set Frost's poetry to music, Randall Thompson is one of the best known. It was suggested that he set Frost's *The Gift Outright* for the town of Amherst's 200th anniversary, but he chose instead seven other poems, published collectively as *Frostiana*. Other composers who have set poems by Frost include William T. Ames, David Blake, Elliott Carter, Cowell, John Duke, Gruenberg, and Otto Mortensen. The most frequently set poems are *Stopping by Woods on a Snowy Evening*, *The Pasture* and *Fire and Ice*.

JOHN McLAUGHLIN

Frotscher, Gotthold (*b* Ossa bei Narsdorf, nr Leipzig, 6 Dec 1897; *d* Berlin, 30 Sept 1967). German musicologist. He studied musicology, psychology and folklore at the universities of Bonn and Leipzig (1917–22), where his teachers included Abert, Riemann and Schering. He earned the doctorate in 1922 at the University of Leipzig with a dissertation on the Berlin lieder and passed the state examination at Dresden as teacher of music theory and organ playing. In 1924 he completed his *Habilitation* at the Technische Hochschule in Danzig with a work on music aesthetics in the 18th century, and was named reader there in 1930. In 1936 he was appointed supernumerary professor at the University of Berlin and from 1939 worked for the Staatliches Institut für Deutsche Musikforschung.

Frotscher was active in the Hitler Youth, heading a department on the ceremonial uses of the organ from 1938, and edited and contributed regularly to its music journal, *Musik in Jugend und Volk*. From 1943 to 1945 he was in charge of the music history department in Berlin and taught part-time at the Staatliche Hochschule für Musikerziehung in 1944. After the war he worked for radio, and from 1950 he lectured in musicology at the Pädagogische Hochschule in Berlin. His best-known work is his *Geschichte des Orgelspiels und der Orgelkomposition* (1935–6), an enlargement of A.G. Ritter's *Zur Geschichte des Orgelspiels im 14.–18. Jahrhundert* (Leipzig, 1884). He also edited the works of many 18th-century composers, including Kirnberger, Quantz and Hasse, and wrote on German folk music, church music, music education, as well as on the application of racial studies to musicology.

PAMELA M. POTTER

Frottola. A secular song of the Italian Renaissance embracing a variety of poetic forms. It flourished at the end of the 15th century and the beginning of the 16th and was the most important stylistic development leading to the madrigal.

1. Introduction. 2. Poetry. 3. Music. 4. Performing practice. 5. Conclusion.

1. INTRODUCTION. 'Frottola' is held to derive from the medieval Latin 'frocta', a conglomeration of random thoughts, and requires both a generic and a specific definition. Generically, the term covers the full range of secular polyphonic types known to have flourished in Italy during the period in question, usually taken to be from about 1470 to 1530: hence odes, sonnets, *strambotti*, *capitoli*, canzoni etc. are all considered kinds of frottola. More specifically, the term refers to a particular type, the frottola proper or, as it is often called in contemporary writings, the *barzelletta*. That the separate types admit differentiation, indeed demand it for purposes of discussion, is confirmed by the evidence of the prints: Petrucci's fourth book (1505) is entitled *Strambotti, ode, frottole, sonetti, et modo de cantar versi latini e capituli*; in his sixth book (1505/6) the inscription *Frottole sonetti stamboti* [sic] *ode* heads the table of contents; the title of Antico's third book (1517) begins *Canzoni sonetti strambotti et frottole*.

The emergence of the frottola is an event of historic moment when gauged against the seeming lull in the activity of Italian composers during the 15th century. With the demise of 14th-century forms about 1430, native music appears to have waned: few composers are known by name from the period that immediately preceded the frottola, and none of these is of high artistic standing (with the possible exception of Bartolomeus Brollo). Yet music-making continued apace, to judge from the large number of works with Italian texts transmitted in manuscript collections (among them *E-E* iv.a.24, *Sc* 5-1-43, *F-Pn* fr.15123, *I-MC* 871, *PAVu* 362 and *PEc* 431 [G.20]). The names of northerners (e.g. Dunstaple, Isaac, Martini, Morton) are affixed to several, or may be determined from concordances, while the majority of the anonymous pieces that remain were composed, presumably, by Italians. In style and structure they embrace many incipient frottolas (usually scored *a 3*, with the melody in the soprano, prevailingly homophonic texture and syllabic delivery of text). It may be wrong, though, to look for the roots of the form in an artistic development: the frottola seems at times to take a decidedly anti-artistic stance, paring itself of the artifices that accrued to 14th-century music and of those that typified northern counterpoint. Its roots lie, instead, in the groundwork of a popular performing practice.

The custom of reciting poetry to a musical accompaniment was widespread in the 15th century. Whereas native composition seems to have declined in quality and quantity, a tradition of extemporaneous song was rising, enjoying the esteem of both popular and aristocratic circles. Towards the end of the century the Medici in Florence were particularly inclined to this kind of entertainment (Raffaele Brandolini spoke of the favour Lorenzo de' Medici accorded improvisers), and Mantua and other courts extended it their patronage. Not only were the classics presented in song (the favourite being Virgil), but many of the works of living poets seemed earmarked for such rendition. Their verses consisted of a motley assemblage of types ranging from the *canzone a ballo* (or ballata) to the *rispetto* and eclogue. Usually poet, singer and accompanist were one and the same, as in the case of the renowned Pietrobono, who on one occasion sang 'in cetra ad ordinata frotta' (Cornazano: *La sforziade*). In theatrical performance the labours might be divided, as when Baccio Ugolini acted the main part in Poliziano's *Orfeo* in Mantua in 1471, or when Atalante (Manetto Migliorotti), taught to play the lute by Leonardo da Vinci, did the same in a Mantuan performance of 1490. Others who achieved renown in improvising *ad lyram* were Raffaele Brandolini, Bernardo Accolti, Jacopo Corsi and Lorenzo de' Medici himself, whose dabbling in love-poetry was more than a casual pastime. Heading the list, though, were Il Chariteo (alias Benedetto Gareth), a Spaniard connected with the Aragonese house in Naples. The octave *Amando e desiando io vivo*, printed in Petrucci's book 9 (no.64), is an example of his music as well as his poetry. Serafino dall'Aquila (1466–1500) was another important figure whose poetry (chiefly *strambotti*) turns up in numerous settings, many of which may be assumed to be his own.

Preceding Il Chariteo and Serafino, and establishing a weighty precedent, was Leonardo Giustiniani (*c*1383–1446), statesman and poet, largely remembered today in musical circles for Dunstaple's setting of his verses *O rosa bella*. In his time he won fame for the singing of his poetry to the accompaniment of a *lira da braccio*; Pietro Bembo later attributed his renown to the 'style [*maniera*] of the music to which he delivered his lyrics' (*Prose della volgar lingua*, 1525). Rubsamen considered Giustiniani the exemplar for a host of imitators throughout the 15th century, and claimed to have uncovered examples of his lost art in four works that open Petrucci's book 6 (nos.2–5). Apart from being the only settings of his verses in the frottola literature, these works bear unique stylistic traits, namely a soprano whose melismatic passage-work may be due directly to Giustiniani's art of improvised ornamentation, the writing *a 3* in a collection basically *a 4*, and the archaic structure of cadences. Petrucci did, in fact, speak of 'giustiniane' in the inscription to the *tavola* (without designating which pieces they were), and the possibility that such music may exemplify an early practice

of *arie veneziane* led Rubsamen to posit the beginnings of the frottola at about 1450, hence narrowing the gap between 14th-century art music and the inchoate tradition of improvised song.

Descending from a popular performing practice, the new form gained from the energizing influences of the *lingua volgare* (competing with, and eventually winning out over, Latin as a literary vehicle) and the hybrid *poesia popolaresca* it engendered. The chief centre for the frottola was Mantua: there it developed and received its characteristic imprint under the patronage of Isabella d'Este (1474–1539). Daughter of Duke Ercole I of Ferrara, and after 1490 wife of Francesco Gonzaga of Mantua, Isabella was renowned for her culture and artistic sensibility. She consorted with the leading artists and men of letters of her time, winning words of praise from Leonardo da Vinci, Titian, Castiglione and many others. For Ariosto she was 'that friend of illustrious works and noble studies ... liberal and magnanimous Isabella' (*Orlando furioso*, xiii.59), and among her many merits she could claim instrumental and vocal abilities (Johannes Martini was her music teacher). Sensing the vitality of the new popular art she commissioned poets to supply her with verses which she then handed over for musical setting. Significantly, her composers were native Italians, not the northerners who had furnished the courts with music for most of the 15th century. Indeed, Italian art received a strong impetus towards development from her interest and patronage. From Mantua and the related courts of Ferrara and Urbino the novel form spread north to Florence, Milan, Pisa, Siena, Verona and Venice, eventually reaching southwards to Rome and Naples.

The major sources of the frottola are the 11 books printed by Petrucci in Venice from 1504 to 1514 (book 1 in 1504, 2–3 in 1504/5, 4–6 in 1505/6, 7–8 in 1507, 9 in 1508/9 and 11 in 1514; later editions of books 2–4 appeared in 1507/8; book 10 is no longer extant). Apart from this series 15 other frottola prints appeared from 1510 to 1531, extending the life of the frottola into the era of the madrigal and strengthening its link with the later form. Two of these prints were issued by Petrucci in Fossombrone, the rest by Andrea Antico in Rome and Venice, ?Giunta in Rome, Pietro Sambonetto in Siena, Giovanni Antonio de Caneto in Naples and Valerio Dorico in Rome; the printer-publishers of three collections remain unknown. The contents of these later sources consist mainly of reprints of pieces from the earlier Petrucci publications. Of special importance were the books of Antico, whose *Canzoni nove con alcune scelte de varii libri di canto* (1510) was the earliest dated frottola collection to be printed by someone other than Petrucci, which may have established him as a rival in this field. Unlike Petrucci, however, Antico also composed a number of frottolas of his own, many of which appear in Petrucci's books.

In addition to reprints in later publications, the frottola repertory is duplicated to a large extent in a number of manuscript sources (*I-Bc* Q18, Q21, R142; *Fc* B2440, B2441, B2495; *Fn* Magl.XIX.117, 121, 130, 141, 164–7, 178, Pal.1178, Panciatichiano 27; *Mt* 55; *MOe* a.F.9.9; *Vnm* Ital.Cl.IV.1795–8; *F-Pn* Rés.Vm.[7]676 and *GB-Lbl* Eg.3051). The Florentine manuscript Magl.XIX.141 also contains a number of *canzoni a ballo* composed for Carnival time in Florence (for modern editions of works from *I-Bc* Q21 and *Mt* 55, see bibliography).

Special interest attaches to the *barzelletta Viva el gran Re Don Fernando con la Reyna Donn'Isabella* as the earliest datable frottola to be printed (ed. in *EinsteinIM*). Its text hails the Spanish occupation of Granada in 1492 by Ferdinand of Aragon who cast out the 'falsa fè pagana' from its precincts. It may have been sung first in Naples, making its way thereafter to Rome where it formed part of a play, printed in 1493, commemorating the event as the victory of Christianity over the forces of heathenry.

2. POETRY. The literary themes of the frottola were drawn from the stereotypes of amorous verse established in the 14th century. While Petrarch took them seriously, falling back on his own experience to describe the vicissitudes of love, the frottolists did away with sentiment, emphasizing the humorous and frivolous sides of their subject matter (for some frottola texts in translation see *EinsteinIM*, iii). Much of the poetry was designed as mere words for music (*poesia per musica*), too paltry in content or trifling in quality to warrant independent consideration as literature. Its authors were mostly anonymous rhymesters, though a few examples may be traced to poets of greater or lesser renown. Serafino dall'Aquila was rivalled by Galeotto del Carretto (*c*1470–1531), who corresponded with Isabella d'Este, sending her verses of his own and recommending those of others for setting by the composers in her employ. Other poets of the same calibre represented in the frottola literature are Vincenzo Calmeta, Benedetto da Cingoli, Niccolò da Correggio and Tebaldeo. Deserving special mention are Veronica Gambara (a *barzelletta* in Petrucci's fifth book) and two figures associated with the Medici circle: Poliziano (the octave *Contento in foco*, several *barzellette*) and Luigi Pulci (a large number of *strambotti*). In time literary quality improved, as manifest in the turning away from lighter forms of verse (frottola, *oda*, *capitolo*) to those of greater weight (sonnet, canzone). This change in taste was due in no small part to the efforts of Cardinal Bembo to purify the vernacular and elevate its expression, and is signalled by an increasing number of settings of Petrarch: Petrucci's book 1 has none, book 3 one, book 7 three, but book 11 has 20. Along with Petrarch, the works of Bembo (books 7 and 11), Sannazaro (book 11) and other first-rate poets gradually enter the repertory.

In line with the generic definition above, the frottola subsumes a variety of verse forms. Most heavily represented is the frottola proper, alias *barzelletta* (perhaps a derivative of the French *bergerette*): Petrucci's first book contains 40 examples, the second 37, the third 48, and so on until the ninth with 39; it declines in numbers in books 4 and 11. Its poetry is formed of a *ripresa* of four lines (with the rhyme scheme *abba* or *abab*) and a stanza (comprising two *mutazioni* or *piedi* plus *volta*) of six or eight lines (rhyming *cdcdda* or *cdcddeea*). It descended no doubt from the ballata of the 14th century, but whereas the latter had verses of seven or 11 syllables in iambic metre, the frottola is restricted to lines of eight syllables (the *ottonario*) set in trochaic metre. It was sung to one or another of two musical units (*A* and *B*), each of which divides into two phrases. A typical scheme is the following:

poetry: *ab ba cd cd da*
music: *A B A A B*

with the *ripresa* repeated as a whole or in part after each stanza. Moreover, variant structures are not uncommon. In more developed examples, in fact, the stanza may be

differentiated from the *ripresa* by music of its own. But generally the two parts are related by most or all of their music.

Still another form of the frottola proper, presented in earlier writings as a variant of the *oda* (see *EinsteinIM*, and Schwartz), is that whose lines scan as iambic heptasyllables (*settenari*). The *ripresa* rhymes as in the *barzelletta* (*abba*, though sometimes *aaaa*), while the stanza is limited to four lines, the last of which returns to the initial rhyme of the *ripresa* as did the last in the *volta* of the eight-syllable type: *ccca* (first stanza), *ddda* (second), *eeea* (third) etc.

The *strambotto* (or *rispetto*, later the *ottava rima*) figures most heavily in Petrucci's book 4 (47 examples). It is absent from the first three books but appears with six settings in book 5, nine each in books 6, 7 and 8, seven in book 9 and eight in book 11. Its poetry consists of eight lines of equal length (11 syllables) in iambic metre. They divide into four couplets according to the rhyme scheme *abababcc*, thought to have been invented by Boccaccio in the 14th century. There are also a few examples of the Sicilian octave, *abababab*. Compared with the frottola, the *strambotto* shows an increase of sentiment and sobriety, relying frequently on the rhetorical figures of simile and metaphor. Its rather simple verse forms engendered an equally simple musical structure in which two phrases setting the first couplet return for the succeeding three, resulting in a fourfold *AB*. Yet other *strambotti* consist of more than two units: either the last couplet received music of its own or, more rarely, the octave was through-composed (as in no.14 by Tromboncino and no.15 by Cara in Petrucci's book 9). Rather exceptional is the form displayed by nos.12 and 17 (both by Tromboncino) in book 4: there the music to lines 1–4 returns for lines 5–8.

The *oda* (no connection with the Horatian ode) comprises an indeterminate number of stanzas, each of four lines in iambic metre. Lines 1–3 are heptasyllabic, but the fourth may vary in length from four or five to seven or 11 syllables. Basic to the rhyme scheme is the linking of stanzas through a common rhyme, thus: *abbc cdde effg* etc. Another ordering of rhymes, though less frequent, is *aaab bbbc* etc. Unlike the frottola proper, the *oda* has no refrain, which distinguishes it from the seven-syllable *barzelletta* types mentioned above. In most of Petrucci's books the *oda* is second to the frottola in numbers (11 in book 1; nine in book 2; nine in book 3; 14 in book 4). Its musical structure is strophic, the four lines of each succeeding stanza being set to the same strophe of music. The strophe may be composed as four separate phrases (*ABCD*) or as three, in which case the second is repeated in a musical pairing of the inner poetic rhymes (*ABBC*). Einstein characterized the *oda* as 'the most primitive form' of frottola.

The *capitolo* (or *capitulo*) is none other than the *terza rima* of Dante's *Commedia* or Petrarch's *Trionfi* serving as the basis of more menial types of verse. Like the *oda*, it may run to an indeterminate number of stanzas. Each has three lines, 11 syllables long, in iambic metre, but the last may sometimes add a verse. In the manner of *terza rima* the poetry rhymes in chain form (*aba bcb cdc ... xyxz*). Musically, the three lines are written as three distinct phrases, which return as a unit for each succeeding stanza; where the last one constitutes a quatrain, the extra line is likely to be sung to music of its own. The rudimentary structure of poetry and music lent itself to the development of schematic melodies that could be used for different *capitoli*: Cara's *Nasce la speme mia* (book 9 no.2), for example, is headed 'Aer de capitoli'. Though the *capitolo* plays a relatively insignificant role in Petrucci's collections (one example in book 1, two in book 4, one in book 6, two in book 7, etc.), it was widely employed around 1500 as the standard form of the dramatic or lyric eclogue.

The sonnet consists of 14 iambic hendecasyllables, grouped as two quatrains and two tercets rhyming *abba abba cde cde*. The length of the sonnet posed a problem for the composer, which he solved more often than not by resorting to repetition schemes, as in Brocco's setting of Petrarch's *Ite caldi sospiri* (Petrucci's book 3 no.30, labelled 'El modo de dir sonetti'): *ABBC*, *ABBC*, *CDE*, *CDE*, i.e. *AABB*. An even simpler scheme is based on the repetition of three phrases, thus: *ABBC*, *ABBC*, *ABC*, *ABC*. The first sonnet to appear in Petrucci's books is Francesco d'Ana's setting of Niccolò da Correggio's *Quest'e quel loco amor* (book 2 no.3): it has music for a single quatrain and a single tercet, each restated once. (For other examples, see book 5 no.8 and book 6 nos.10 and 32, all three with the inscription 'per sonetti'.) The structure of Cara's *S'io sedo al ombra, Amor* (book 5 no.58), with music to lines 1–4 only, to be adapted to the ten lines that remain, is plainly unorthodox. In these and other sectional forms the ends of phrase units tend to be marked by long notes.

Structurally looser than any of the above-mentioned types is the canzone, whose lines freely alternate seven and 11 syllables in iambic metre, particularly in the verses that follow the initial *ripresa*. Like the sonnet, the canzone assumed increasing importance in later collections (e.g. book 11 and the print *Musica di Meser Bernardo Pisano sopra le canzone del Petrarcha*, 1520), pointing the way in its seriousness and literary pretensions to the madrigal. In fact, in the freedom of its verse form and musical construction, a single stanza of a canzone is virtually a madrigal, the only difference being that the frottolists retained the strophic form in which additional stanzas were sung to the music of the first. An example is Tromboncino's setting of Petrarch's *Si è debile il filo* (Petrucci's book 7 no.5).

A number of pieces seem to qualify as villottas, a form whose origins are controversial. Torrefranca (*Il segreto del Quattrocento*, 1939) traced it to the first half of the 15th century and maintained that it reached the peak of its development about 1480 (a claim that cannot be substantiated). More likely is the division into an earlier variety, contemporaneous with other frottola types, in which a popular tune appears in the refrain or is used as a kind of cantus firmus (see book 4 nos.80, 81), and a later one, from about 1525, in which various folksongs are woven together in music of a more imitative and more distinctly vocal character. Poetically the villotta consists of a single stanza that is irregular in the number, length and rhyme scheme of its lines; it is likely to use nonsense syllables (e.g. *Torela mo vilan* in *I-Bc* R142 no.4). Musically, it incorporates one or more popular tunes, exploits contrasts of metres (duple, triple) and textures (homophonic, imitative), and may conclude with a *nio*, a section whose rhythmic pace accelerates (*see* VILLOTTA).

The sporadic settings of Latin verse found in the frottola repertory are due in large part to humanistic impulses: Isabella d'Este, for example, indulged her love of Virgil by ordering music to his poetry. Such settings include

Horatian odes (e.g. *Integer vitae*, book 1 no.47); portions of the *Aeneid* (e.g. *Dissimulare etiam sperasti*, composed by Filippo de Lurano, book 8 no.13); Tromboncino's setting of Dido's letter to Aeneas (*Aspicias utinam quesit* from Ovid's *Heroides*, in Antico's book 2 no.40), which, according to Einstein, is 'the first love letter in music'; newly written humanistic odes (e.g. *In hospitas per alpes*, book 1 no.46); and an elegy by Propertius (*Quicunque ille fuit* set by Cara in Antico's book 3 no.21). Some of them were composed schematically, as in the 'Aer de versi latini' of Caprioli that may be fitted to a distich in elegiac metre (book 4 no.62). Occasionally Latin was used for purposes of travesty (e.g. *Rusticus ut asinum* in *F-Pn* Rés.Vm.^{7}676 no.64) or religious mockery: a frottola of Honophrius Patavinus (book 6 no.60) starts with 'Sed libera nos de malo' (from *Pater noster*) then switches to Italian (cf Josquin's *In te Domine speravi*, book 1 no.56 and Tromboncino's *Vox clamantis in deserto*, book 3 no.58). A *pièce d'occasion* was Lurano's music to *Quercus juncta columna est* (book 9 no.1), composed for the wedding festivities of Marc'Antonio Colonna.

Pieces with Spanish text point to connections with Spain through the outpost of the Spanish court in Naples. (Il Chariteo, Serafino, Sannazaro and numerous others, musicians as well as poets, took up Neapolitan residence.) 12 frottolas found their way into the Cancionero de Palacio (*E-Mp* 2, 1–5); conversely, Antico's second book of frottolas includes an ample selection of villancicos. The Tromboncino frottola *Nun qua fu pena magiore* (Petrucci's book 3 no.55) seems, moreover, to rework text and music of a villancico by Juan de Urrede, *Nunca fue pena mayor* (from the above *Cancionero*). As in Latin settings, Spanish was sometimes discarded after the opening for a continuation in Italian (e.g. Tromboncino's *Muchos son que van perdidos*, Caneto's print of 1519, no.19). According to Einstein the vogue of Spanish-texted pieces may have had something to do with the many Spanish harlots in Rome during the papacy of Leo X (see *Venimus en romeria*, Petrucci's book 6 no.55).

3. Music. The two leading composers of the frottola were Bartolomeo Tromboncino (*d* after 1534) and Marco Cara (*d* 1525), both from Verona and affiliated to the court of Isabella d'Este. Einstein described Tromboncino as 'the musician most favoured by the poets': a large number of his texts were furnished by Galeotto del Carretto and one is by Michelangelo (*Come harò, donque, ardire* in Caneto's print of 1519, no.21). Even more renowned was Cara, however, whom a Venetian legate named in 1515 as among the foremost singers to the lute (Sanuto, *Diarii*, xxi, 282). Castiglione commended him for the 'soft harmony' of his voice, noting that it 'enters into souls, impressing them gently with a delightful passion' (*Libro del cortegiano*); Cara reciprocated by providing music for the Castiglione sonnet *Cantai, mentre nel cor lieto fioria* (Antico's book 3 no.34).

Apart from Tromboncino and Cara, about whom little enough is known, stand a multitude of other frottola composers, known often by no more than their names or initials. Amateurs, professionals, commoners and aristocrats all contributed to the repertory. Most came from northern Italy (Michele Pesenti or P. Michele, not to be confused with Michele Vicentino, Giovanni and Nicolo Brocco, Peregrinus Cesena), Brescia (Antonio Caprioli), Padua (Giovanni Battista Zesso), Venice (Francesco d'Ana, from 1490 second organist at S Marco, and Andrea Antico), Milan and Vicenza, though surprisingly few came from Mantua itself. Among the north European composers who wrote frottolas are Josquin (while in the employ of Cardinal Ascanio Sforza), Alexander Agricola, Loyset Compère, Eneas Dupré, Carpentras and Jean Japart. Native composers who came to the fore during the transitional years that led to the madrigal were Sebastiano Festa, Giacomo Fogliano, Bernardo Pisano and Ruffin. Sometimes poet and composer were one and the same: seven works in Petrucci's first book carry the indication 'Michaelis cantus & verba'.

Generally, little attempt was made by frottola composers to express the content of the text. Even in those examples where the setting seems to follow closely upon the poetry, the relation dissolves with the delivery of different stanzas to the same music. The disparity of expression between verse and music is most evident in the setting of frivolous conceits to a solemn four-voice texture or of an occasionally soulful text to lively rhythms and skipping melodies. On the other hand, poetry and music relate closely in the coordination of verse and phrase lengths, of rhymes and musical repeats, and of verbal accentuation and rhythms. Further, the restricted number of poetic motifs corresponds to the small store of musical ideas from which entire pieces evolve.

Slight differences may be seen between the settings of one verse type and another as befit changes in form (iambs or trochees, *settenari* or 11-syllable lines) and content (the triviality of the *barzelletta* or the sentimentality of the *strambotto*). Also, a simpler frottola of three or four voices, handled homophonically, may be distinguished from more highly developed examples *a 4* whose voices tend towards rhythmic and melodic independence (ex.1).

Ex.1

or ... or ... or ... etc

Referring to the compositional elements in turn, the following generalizations may be made. The melodies have a narrow range with occasional leaps of 5ths or octaves, a predilection for repeated notes, both within the phrase and in the feminine cadences that typify the *ottonario*; the main tune is in the soprano, not in the tenor, and clear phrasing veers towards period structure with pairs of three- or four-bar phrases joining to form larger groupings. The rhythm is simple and straightforward with emphasis on strong beats and a tendency to fall back on a restricted number of patterns (ex.1); cadences are sharply profiled. The text is set predominantly syllabically in the *barzelletta* and *oda* but with a freer correlation of words and music in *strambotti*; duple metre is prevalent (for two works prefixed by a triple metre sign, see Petrucci's book 3 no.56 and book 5 no.23). Writing *a 4* is the norm (with the exception of the bulk of earlier frottolas *a 3*, six pieces *a 3* in book 6, one each *a 5* in books 4 and 5, four *a 5* in book 8 etc.); phrases begin and end chordally. There is a tendency towards polarization of the texture into the outer voices, the top carrying the melody and the bottom serving as bass, with the inner parts designed to serve as harmonic filler. The texture is basically homophonic, even in examples whose middle voices are in a state of rhythmic bustle (Einstein dubbed a

frottola of this kind an 'accompanied monody'); imitative writing is infrequent, limited to openings of phrases and the definition of broken triads, and extended pedal points (usually inverted, sometimes double) occur at the close of works. Strong harmonic support is lent by the bass, which often proceeds by 4ths and 5ths with seeming tonal function; emphasis is on basic triads (I, IV, V) as harmonic mainstays. Open 5th chords are infrequent, whether within the phrase or at the close of sections; there are many cadences, used for structural purposes, the full authentic form gaining the ascendance. More 4ths are used and there is freer treatment of dissonances than in the Netherlandish chanson; harmonic considerations are implicit in the division into outer and inner voices and in the frequency of root-position triads on strong beats.

There were several special procedures to which the frottolists resorted on occasion: the borrowing of popular melodies either singly (e.g. the tune *De voltate in qua e do bella Rosina*, made to serve as refrain of *Poi ch'el ciel e la fortuna*, book 1 no.38) or severally (e.g. *Fortuna d'un gran tempo*, *Che fa la ramacina* and others that come together in a quodlibet by Lodovico Fogliano, book 9 no.48); the use of pre-existing material as a cantus firmus, apt to occur in any voice (the soprano of Tromboncino's *Non val aqua al mio gran foco*, book 1 no.20, becomes the alto of Cara's *Gliè pur gionto el giorno*, book 1 no.11, and the bass of Michele's parody *L'aqua vale al mio gran foco*, book 1 no.32; a frottola by Erasmus Lapicida in book 9 no.4 has as its top voice the soprano (reworked) of Cara's *Pietà, cara signora* from book 1 no.15 and, as its tenor, the soprano (reworked) of Tromboncino's *La pietà chiuso ha le porte* from book 2 no.26; etc.); the imitation of the sounds of animals ('cucurucu' – the crowing of the rooster, in *Quasi sempre avanti*, book 7 no.44; 'turluru' – the cooing of pigeons, in Tromboncino's *Hor ch'io son de preson fora*, book 5 no.61; etc.), of laughter ('hi hi hi', book 9 no.29), of a bagpipe (a *barzelletta* of Rossino di Mantua, book 2 no.28, is inscribed with the words 'sounding of the bagpipe in lower register', the bass being restricted to the notes C, G and F) or of solmization syllables ('Sol la re re mi', in Cara's *A la absentia*, book 5 no.46; *Mi fa sol, O mia dea*, book 4 no.27; etc.); 'eye-music' (*Rusticus ut asinum*, *F-Pn* Rés.Vm.⁷676 no.64, has the peasant's 'Alas, why must you die, mule?' notated in black values); word-painting (for example at 'fugge', 'correre', 'aria' and 'vento' in Antonio Caprioli's *Ognun fuga amore*, book 4 no.63), though this of infrequent occurrence and of questionable significance when the setting is strophic.

Of forms related to the frottola the *canto carnascialesco* is its Florentine counterpart and the *lauda* its extension into the semi-sacred sphere. The former differs from the frottola in its more irregular verse forms, which include *canzoni a ballo* by Lorenzo, Poliziano and others, as well as topical poetry rife with obscenities and political overtones. Unlike the frottola, the *canto carnascialesco* was intended for outdoor performance as part of the *carri* and *trionfi* of Carnival season and includes more striking contrasts in its metrical changes, sections of dance-like character in triple metre and occasional interpolations of duets and trios. Yet it shares with the frottola its strophic form and general features of style. Many composers of the frottola also wrote *laude* (e.g. Tromboncino, Cara, Giacomo Fogliano, Luprano), and the *lauda* depended considerably on its secular model for its forms and style. Their close musical relationship led to a vigorous practice of textual substitution (e.g. *Sancta Maria ora pro nobis*, a *lauda* in Petrucci's *Laude libro secondo* of 1508, sung to the octave *Me stesso incolpo*, book 4 no.30): many *laude*, in fact, are frottolas in disguise ('travestimenti', as Ghisi designated them), generally of the *strambotto* type. Following the religious upheaval launched by Savonarola in Florence, *canti carnascialeschi* were similarly refitted to sacred texts and were performed in sacred processions or as part of the Lenten *sacre rappresentazioni*. (See CANTI CARNASCIALESCHI and LAUDA.)

4. PERFORMING PRACTICE. A small number of collections provide adaptations of frottolas for specific performing media. Those for voice and lute include two books of *Tenori e contrabassi intabulati col sopran in canto figurato per cantar e sonar col lauto*, arranged by Franciscus Bossinensis and printed by Petrucci in 1509 and 1511, and *Frottole de Misser Bortolomio Tromboncino et de Misser Marcheto Carra con tenori et bassi tabulati et con soprani in canto figurato per cantar et sonar col lauto*, printed by Petrucci about 1520. In these the soprano is notated as in the original, the alto omitted and the tenor–bass pair intabulated for lute. Several adaptations for lute solo are included in J.A. Dalza's *Intabulatura de lauto* (book 4, 1508), which retain the soprano and bass and draw variously on the alto and tenor for harmonic filling. There are 26 transcriptions for organ alone in Antico's *Frottole intabulate da sonare organi, libro primo* (1517) in which the originals (vocal models can be found for all but one) acquire idiomatic instrumental features; the collection is, moreover, the first organ tablature printed in Italy.

The fact that the top voice in the frottola is in many instances the only one to carry a full text, plus the fact that the lower voices cannot always be fitted to it, lead one to infer that frottolas were published to accommodate a variety of optional performing media, depending perhaps on what performers were available. To the two possibilities of solo voice with accompaniment on a plucked string instrument (lute, vihuela), called by Castiglione 'cantare alla viola', and of solo instrument should be added a third: a fully vocal rendition, with or without instrumental doubling: the frontispiece to Antico's *Canzoni nove* shows four male singers reading from a choirbook *a cappella* (see illustration).

Frontispiece to Andrea Antico's 'Canzoni nove' (Rome, 1510): woodcut possibly by Giovanbattista Columba

Such options may also have included an arrangement for solo voice with lower parts consigned to viols, winds or even a keyboard instrument; or a vocal performance in which instruments participated in interludes or postludes. Composers may have written works with a specific medium in mind (here the analysis of the music often assists in pointing to a solution), but this probably did not prevent the music from being adapted to other performing media.

A large number of frottolas seem to have been destined for use in the theatre. Some formed part of *intermedi* or courtly entertainments; others were separate insertions in drama (comedy, tragedy) or settings of its monologues or choral portions. Del Carretto's eclogue *Beatrice* (in homage to Isabella d'Este's sister, recently deceased) was presented at Casale in 1499 with interludes composed by Tromboncino. In his diaries (iv, 229) Marin Sanuto reported a performance of Plautus's *Asinaria* (Ferrara, 1502) with 'una musicha mantuana dil tromboncino' and, on the following day, music by the same composer introducing *Casina*, another Plautus play. Pastoral or dramatic eclogues were commonly recited to musical accompaniment (e.g. *Tirsi* at the court of Urbino in 1506). Any of the media mentioned above may have been used.

5. Conclusion. Taken individually, frottolas strike one as meagre fare: their poetry is often trite and their music modest. Yet the frottola as a genre is important, primarily because it effected a renewal of music in Italy after years of stagnation and instilled a new vitality into the processes of composition generally. Chordality, rhythmic precision, a clear syllabic delivery, an incipient feeling for tonal functions and harmonic colour, overall simplicity of means and directness of expression: these features, combined with the more artful procedures of the northerners, led in time to the madrigal. But they also extended beyond the peninsula to renew the compositional basis of northern music, as reflected in the development of its secular and sacred forms in the 16th century. The frottola established a new norm of four-part writing; it presupposed a novel concept of simultaneous composition. In those works in which the soprano dominates and lower parts support (e.g. Ludovico Milanese's *Ameni colli*, book 8 no.32), as well as in those so performed as to introduce such a division between voice and accompaniment, the frottola may be regarded as an antecedent of Baroque monody. Although its stylistic means were later diverted into more artistic channels (the madrigal), they were retained throughout the century, more or less continuously, in the lighter forms of the villanella and its offshoots.

DON HARRÁN (text), DON HARRÁN/JAMES CHATER (bibliography)

Frouvo [Frovo], **João Álvares** (*b* Lisbon, 16 Nov 1608; *d* Lisbon, 29 Jan 1682). Portuguese theorist and ?composer. He was a nephew of the antiquarian Gaspar Álvares de Lousada. He studied at Lisbon Cathedral choir school with Duarte Lobo, and became its choirmaster in 1647. He had meanwhile become King João IV's music librarian, and he continued to hold that post as well. His fame rests on his *Discursos sobre a perfeiçam do diathesaron, & louvores do numero quaternario* ('Essays on the perfections of the 4th and praises of the number 4') (Lisbon, 1662), which appears to have been substantially complete by 1649. It was commissioned by the king, and the subject was determined because his name (João) was of four letters, he was the fourth of that name on the throne, the name of God in Latin and Portuguese is a word of four letters, there are four seasons, and for other such reasons. The excellent 100-page work shows how much richer the royal library must have been than the 1649 catalogue of it reveals, for Frouvo quoted a bewildering number of composers, ranging from Machaut through men such as Tristão da Silva, Andreas da Silva, Josquin, Pierre de La Rue, Mouton, Clemens non Papa and Sermisy to Lassus, and the theorists he cited include Philippe de Vitry, Marchetto da Padova, Prosdocimus de Beldemandis, Vicentino, Galilei, Descartes and Avella. To prove the 4th a consonance next in order after the 5th he fell back not only on Boethius and Johannes de Muris but also on Iberian theorists such as Juan Pérez de Moya and Juan Vélez de Guevara. But he admitted that others abroad such as Pietro Aaron, Pietro Pontio and Morley, as well as those at home such as Bermudo and Francisco de Cervera, had demurred. The treatise also includes a section praising João IV's *Defensa de la música moderna* (1649) and a rebuttal of an anonymous tract crediting Morales's *Missa 'Mille regrets'* with being the first work in which three black breves are treated as the equivalent of two white ones. The numerous music examples in the extant copies of the treatise in the British Library and the National Library, Lisbon, consist of hand-copied notes on a printed staff. The National Library at Lisbon also owns Nicolaus Roggius's *Musicae practicae, sive Artis canendi elementa* (Hamburg, 1566, 4/1596) in a copy made by Frouvo after he had given his own printed copy to João IV, as well as a copy in his hand of Francisco Tovar's *Libro de música prática* (Barcelona, 1510). There is, however, no trace now of Frouvo's two-volume *Speculum universale in quo exponuntur omnium ibi contentorum Auctorum loci, ubi de quolibet musices genere disserunt, vel agunt* (second volume dated 1651, 589 pages), a treatise on practical music, or of the many villancicos and Latin compositions in as many as 17 and 20 parts with which Barbosa Machado credited him.

ROBERT STEVENSON

Frübert, Joseph. *See* FRIEBERT, JOSEPH.

Frugoni, Carlo Innocenzo [Innocenzio] (*b* Genoa, 21 Nov 1692; *d* Parma, 20 Dec 1768). Italian poet and librettist. Born into an aristocratic family, he was actively involved in the Order of the Somaschi until 1731. However, it was his reputation as a poet which led to appointments at the court of the Farnese in Parma in 1725 and, after a brief period in Venice during the War of the Austrian Succession, as court poet to Duke Philipp of Bourbon (in Parma) in 1749. There his work was admired by Guillaume du Tillot, the duke's theatrical director. Du Tillot later arranged Frugoni's successive appointments as secretary of court theatrical productions.

Most of Frugoni's librettos for the court theatre in Parma were reworkings of earlier librettos by others. He also provided Italian translations for French operas performed at the theatre: Francoeur and Rebel's *Zélindor, roi des sylphes* (1757), the pasticcio *Gl'Incà del Perù* (1757), Mondonville's *Titon et l'Aurore* (1758) and Rameau's *Castor et Pollux* (1758). Du Tillot's interest in producing a blend of French and Italian opera at Parma coincided with Algarotti's recommendations for the reform of Italian opera as expressed in his *Saggio sopra l'opera in musica* (1755). To Frugoni fell the task of producing Italian 'reform' librettos based on two of Rameau's operas, which Traetta then set to music for production in Parma: *Ippolito ed Aricia* in 1759 (taken from Pellegrin's drama of the same name) and *I tindaridi* of 1760 (an adaptation of P.J. Bernard's earlier French libretto *Castor et Pollux*). In these works Frugoni still adhered closely to the traditional design of an Italian aria opera. Departures lay in the mythological plots, which had long been out of fashion in Italian opera, and the French-inspired choruses, programmatic orchestral music, ballet and spectacle. Although Jommelli's French-inspired operas for Stuttgart in 1755 (*Enea nel Lazio* and *Pelope*) preceded these efforts towards a Franco-Italian synthesis in Italian opera, Frugoni's librettos were the first specifically designed to reform Italian dramaturgical practices. Traetta also set Frugoni's *Le feste d'Imeneo*, a *festa teatrale*, for the wedding of Crown Prince Joseph of Austria and the Infanta Isabella in 1760. In 1769 Frugoni provided a similar vehicle for Gluck, *Le feste d'Apollo*, which incorporated his *Orfeo* (1762, Vienna) as the final act. A complete edition (15 volumes) of Frugoni's works was published in Lucca in 1779–80.

WENDY N. GIBNEY, MARITA P. McCLYMONDS

Frühbeck de Burgos, Rafael (*b* Burgos, 15 Sept 1933). Spanish conductor of German-Spanish parentage. Born Rafael Frühbeck, he took an additional name from his birthplace to identify himself as Spanish when conducting abroad. He trained at the Bilbao and Madrid conservatories, principally as a violinist, then became a conductor with a zarzuela company in Madrid. After military service as an army director of music (1953–6) he studied conducting at the Musikhochschule in Munich under G.E. Lessing and Kurt Eichhorn. He returned to Spain as conductor of the Bilbao SO from 1958 to 1962, when he became music director of the Spanish National Orchestra, a post he held until 1978. He was the first conductor to perform the *St Matthew Passion* in Spain, and regularly included avant-garde music by Spanish and other composers in his Madrid concerts. He was, in addition, Generalmusikdirektor at Düsseldorf (1966–71), concentrating on symphonic rather than operatic performance, and from 1974 to 1976 was music director of the Montreal SO. Frühbeck has been a guest conductor with many leading orchestras in Europe, Israel, Japan and the USA, and in Britain was closely associated with the New Philharmonia, particularly with its chorus, in the late 1960s and early 1970s. From 1980 to 1990 he was principal guest conductor of the National SO, Washington, DC. In 1991 Frühbeck became music director of the Vienna SO, and from 1992 to 1997 he was music director of the Deutsche Oper, Berlin, his first major operatic post. In 1994 he was appointed music director of the Berlin Radio SO.

Frühbeck made fine recordings with the New Philharmonia Orchestra and Chorus of such works as *Carmina burana*, *Elijah* and Mozart's Requiem; other recordings include Schumann's *Der Rose Pilgerfahrt*, the complete orchestral and stage works of Falla and many zarzuelas. His recording of *Carmen* (1970), one of the first to include the original spoken dialogue, is noteworthy for its well-sprung excitement, freshness and sensitivity – qualities that continue to inform Frühbeck's work. His Spanish honours include the Gran Cruz de la Orden del Mérito Civil.

ARTHUR JACOBS/NOËL GOODWIN

Frühling, Carl (*b* Lemberg [now L'viv], 28 Nov 1868; *d* Vienna, 25 Nov 1937). Austrian composer and pianist. He studied the piano with Anton Door and counterpoint, composition and musicology with Franz Krenn at the Gesellschaft für Musikfreunde (1887–9). He then worked as an accompanist, partnering such performers as Huberman, Sarasate and the Rosé Quartet, and as a teacher. A victim of the rampant inflation in Austria after World War I, he spent his final years in straitened financial circumstances.

Frühling's early piano works are in the mould of salon pieces. He soon graduated to more ambitious chamber forms: despite a certain eclecticism, works such as the Piano Quintet op.30 and the Clarinet Trio op.40 are firmly within the Romantic tradition and eschew modernist tendencies. His lieder are predominantly lyrical in tone, with occasional touches of gentle humour. As well as sensitive settings of Theodor Storm, Christian Morgenstern and Jens Peter Jacobsen, they include songs to texts by poets of his immediate Vienna circle, such as Carl Schiller, Max Roden, August Eigner and Rudolf List. (*MGG1*, F. Racek)

□

Frumerie, (Per) Gunnar (Fredrik) de (*b* Nacka, 20 July 1908; *d* Mörby, 9 Sept 1987). Swedish composer, pianist and teacher. At first he studied the piano with his mother and then, from the age of 12, with L. Lundberg. Studies at the Stockholm Conservatory (1923–8) were followed by periods in Vienna and Paris (1928–31) under von Saurer and Cortot (piano), and E. Stein and Sabaneyev (theory). In 1945 he was appointed piano teacher at the Stockholm Musikhögskolan, becoming professor in 1962. A man of impulsive and florid temperament, he absorbed the most varied influences. Compositions from the 1930s show a striving for formal strictness (often following Baroque models), a result of his contact with Parisian neo-classicism. The opera *Singoalla* immediately distinguished him as a composer of powerful music drama. Later important works include the ballet *Johannesnatten*, based on naive religious paintings, and the choral pieces *Fader vår* and *Åtta psalmer ur Psaltaren*. He has few Swedish equals in the field of song. The clarity, purity and sparseness that from the first characterized his songs and chamber pieces also mark the orchestral works of the 1960s and 1970s, particularly the wind concertos. Frumerie, an outstanding and colourful pianist, wrote much for his instrument, the best such works being the

two piano quartets, the Piano Trio no.2 and the First Sonata, built on a theme composed during his Paris stay.

ROLF HAGLUND

Frustra (It.). *See* WHIP.

Frutolfus of Michelsberg (*b* Bavaria, mid-11th century; *d* Michelsberg, 17 Jan 1103). Theorist and compiler. He was presumably a lay priest before entering the Benedictine Michelsberg Abbey in Bamberg, an abbey that possessed a rich library (Lehmann, pp.348ff). Heimo of St James of Bamberg declared himself to be his disciple. The date of his death is recorded in the *Chronicle* which he had begun to compile. He bequeathed a number of books to his monastery, including books of chant and musical theory.

Frutolfus was above all a compiler; he collected texts from the Michelsberg library and presumably himself copied the extracts that he was later to include in his own works. We know his handwriting from two autograph manuscripts: his *Chronicle of the World* (*D-KA* 505), and the *De divinis officiis* (*BAs* Lit.134, Ed.V 13). This latter work consists of passages taken from the works of Amalarius of Metz, Hrabanus Maurus and Pseudo-Alcuin's *De divinis officiis* (10th century).

Frutolfus's musical treatises are likewise compilations which owe much to his predecessors, in particular to Boethius and to Berno of Reichenau. His treatise, preserved only in one early manuscript (*Mbs* Clm 14965[b]), entitled *Breviarium* (i.e. 'abridgment') is comparable to the anonymous *Breviarium* which gives a résumé of the *Epistola de harmonica institutione* by Regino of Prüm. Frutolfus discussed the origins and names of the pitches (following the Greek terminology of Boethius), the monochord, the proportions that govern consonances, tetrachords, modes, intervals and names of notes. The final chapters are made up of borrowings from verse texts by known authors (Hermannus Contractus, Henricus of Augsburg etc.) and also by anonymous writers.

The theoretical treatise is followed by a tonary in verse, which is an abridged version of the full tonary, and a number of shorter texts (measurement of the monochord, table of neumes, Guidonian hand, measurement of organ pipes, measurement of bells). The tonary that closes the Munich manuscript is complete, each tone being preceded by theoretical remarks taken from the *Breviarium*. Pieces from the chant repertory are then listed and classified according to their final *differentia*; the whole repertory, apart from hymns, is included. Sequences from the Mass and Great Responsories from the nocturnal Office are also included, even though in principle a tonary should contain only antiphons. This enormous work was never recopied in its entirety, though the abridged verse tonary had greater success, for it was transcribed into 12 south German manuscripts.

MICHEL HUGLO

Fry, Tristan (*b* London, 25 Oct 1946). English percussionist. One of the most talented percussionists of his generation, Fry studied with Peter Allen and joined the LPO at the age of 17. He was a founder member of the

Nash Ensemble and the Pierrot Players, and appeared frequently with the John Dankworth Orchestra at Ronnie Scott's Jazz Club. In 1972 he became principal timpanist of the Academy of St Martin-in-the-Fields. His versatility is indicated by the wide range of musicians with whom he has worked, from Britten, Boulez and Stockhausen to Frank Sinatra and the Duke Ellington, Count Basie and Buddy Rich bands. Fry was at the forefront of the percussion revolution in the 1960s and 70s, partly through his work with the London Percussion Ensemble. He has played in many film scores, including *Amadeus*, has hosted his own TV series and has made numerous recordings, ranging from Bartók's Sonata for two pianos and percussion and a solo disc of 20th-century percussion works to several discs with the pop group Sky, of which he was a founder member.

JAMES HOLLAND

Fry, William Henry (*b* Philadelphia, 19 Aug 1813; *d* Santa Cruz, Virgil Islands, 21 Dec 1864). American composer. One of five sons in a wealthy and well-established Philadelphia family, he demonstrated musical talent at an early age: an overture composed when he was 18 earned him a medal and was given a public performance. Another overture was performed in 1833, while he was studying with Leopold Meignen, at which time Fry heard operas by Auber, Boieldieu, Herold, Rossini, Mercadante, Halévy and Bellini and began an opera (now lost), *The Bridal of Dunure*. By 1838 he was at work on a three-act opera, *Aurelia the Vestal*, to a libretto by his brother Joseph; it was completed in 1841 but is not thought to have been performed. Fry's next opera, *Leonora*, was performed in Philadelphia in 1845 and again, in a revised version, in December 1846. In 1858 it was again revived, in a substantially revised four-act version in Italian as *Giulio e Leonora*. Fry's last opera, *Notre Dame of Paris*, was given a gala production at Philadelphia in 1864 as a benefit performance for war wounded. He remained unsuccessful in his attempts to interest European impresarios in his operas, despite having them translated into Italian in order to facilitate performances abroad.

Fry's operas trace his development from a composer primarily influenced by the melodic style of Bellini and the Italian school to one increasingly influenced by Meyerbeer and French grand opera. While *Aurelia and Notre Dame* remain Italian in spirit, they approach the French style by including an optional large-scale ballet. The operas use an orchestration similar to that of Bellini's *Norma*, and each also calls for an onstage military band.

Fry also wrote numerous orchestral works, many of which bear descriptive titles. One such work, *Santa Claus* (*Christmas Symphony*), which was given its première on Christmas eve 1853 by Jullien's orchestra, carried with it an extensive synopsis, printed in the programme. From 1846 to 1852 Fry served as a European correspondent for the *New York Tribune*, then returned to New York, and as music critic for the *Tribune* became the leading champion of a native American musical art, filling his columns with words whose ardour often distorted his perspective. In 1852–3 he gave a widely publicized lecture series in New York in which he encouraged American composers to break free of European domination and seek inspiration from their own, New World environment.

Fry was perhaps the first native American to attempt the larger forms of composition, and his importance in the history of American opera rests primarily on *Leonora*, the first grand opera by an American composer to be staged in the USA. His music, however, despite an emphasis on American elements, remains rooted in the French and Italian operatic and German symphonic traditions of the early 19th century. His greatest influence on American musical life was as a journalist and music critic; his admonitions encouraged such composers as Bristow to turn to native sources for ideas and inspiration, and provided a climate that fostered the work of Farwell, Cadman, MacDowell and others.

DAVID E. CAMPBELL/JOHN GRAZIANO

Frye [ffry, ffrye, Frey, Frie], **Walter** (*d* before June 1475). English composer. His period of activity is surmised from the similarity of his style to that of Plummer and Bedyngham. Frye may have been the 'Walter cantor' in charge of the lay choir at Ely Cathedral in 1443/4 and 1452/3, who had left by 1465/6. A Walter Frye, very likely the composer, joined the London Gild of Parish Clerks in 1456/7 (see H. Baillie, *PRMA*, lxxxiii, 1956–7, pp.15–28, esp. 20). Frye is next found in the service of Anne of Exeter, elder sister of Edward IV and Margaret of York (A. Wathey, unpublished research). Anne paid him an annuity of £10 from late 1464 until at least 1472, and he may have been in her employ from the late 1450s. After the attainder of her husband in 1461 Anne appears to have spent most of her time at her brother's court; Frye's period of service with her also took in the marriage

of her sister to Charles the Bold, Duke of Burgundy. The composer's connection with Anne makes it almost certain that he was the Walter Frye whose will, drawn up on 12 August 1474, was proved at Canterbury on 5 June 1475, since one of his executors was Treasurer of the duchess's household. There is, however, no mention of music in the will. Legacies to his brother John of Wells[-by-the-sea], to Nicholas Kene, former rector of Blakeney (both on the north Norfolk coast) and to John de Boston (Lincolnshire) suggest that his family came from that area; legacies for unpaid tithes to the church of St Gregory by Paul's (a parish surrounding St Paul's Cathedral) and smaller amounts to the rector of All Hallows the Less, London, and the vicar of Chertsey, show where he must have lived.

Frye's works survive almost exclusively in continental manuscripts, and this can be attributed to two factors: first, the connection of Anne of Exeter with Charles the Bold, which explains the transmission of his works in Burgundian sources; and secondly the general scarcity of English manuscripts with songs or mass music from the period between 1450 and 1475 and the fact that surviving sources do not often name composers. His musical style is relatively free from continental influences and is much closer to the older styles represented in the Ritson Manuscript (e.g. MB, iv, 1952, 2/1958, nos.89, 90, 97, 109, 113, 115). Nevertheless, his shorter works enjoyed a remarkable vogue in Italy, the Tyrol, southern Germany, Bohemia and even Hungary, and seem to have exercised their charm on the later chansons of Binchois and Du Fay.

Three of these shorter works, *Tout a par moy, So ys emprentid* and *Ave regina celorum*, between them occur 42 times in 26 different sources, only one of which is English; *Ave regina* also appears with notation in three paintings. These compositions were quoted by musical theorists and rearranged and plagiarized by later composers; but it is the masses, which survive in unique copies, that seem to have influenced the music of Busnoys and Obrecht. A fragmentary Kyrie by Frye survives in the Lucca fragments (*I-La* 238; see *StrohmM*, p.164); John Hothby may thus have known his sacred music at first hand when he listed Frye's name among those of eminent musicians in his *Dialogus in arte musica* at Lucca in the late 1470s (ed. A. Seay, *JAMS*, viii, 1955, pp.86–100, esp. 95).

The settings of the Ordinary of the Mass with manuscript ascriptions to Frye are all based on tenor cantus firmi, and the three complete cycles are further unified through motto themes. All possess the euphony through the use of full triads characteristic of English music from the time of Dunstaple; the duets comprise smooth but rapid successions of consonances, springing from discant style, with frequent breve rests in both voices simultaneously (another English trait). All the Credo settings omit parts of the text, but, since the bassus of the Credo in the *Flos regalis* Mass has a cue for the missing 'Confiteor', these omissions may be simply the result of scribal editing and not, therefore, authorial.

The earliest of Frye's masses is probably the three-voice *Nobilis et pulcra*. The chant is drawn from a responsory, with verse, for St Catherine of Alexandria; it normally lies at the bottom of the texture and is sometimes lightly ornamented at cadences. The Gloria, Credo, Sanctus and Agnus Dei each present the chant in a different rhythm, after the manner of the Mass *Rex seculorum* ascribed to Dunstaple; but Frye introduced an element of isorhythm, since the tenor of the Kyrie is virtually identical with that of the Gloria, and the openings of the tenors of all the movements are closely related. (The unusual pairing of Kyrie and Gloria may have been undertaken because they are sung in the liturgy in uninterrupted succession.) The movements of this mass have no introductory duets, but within each there are duets for every combination of voices; Frye avoided clear formal divisions when one pair of voices gives way to another.

The four-voice Mass *Flos regalis* is based on a chant of uncertain origin, which is used, without ornamentation, in a different rhythmic guise in each movement. (The tenors of Sanctus and Agnus are similar, however.) It is normally carried by an inner voice. The four-voice writing is remarkably assured, compared with the contemporary four-voice compositions in *GB-Lbl* 3307; the three lower voices cross a great deal, and many of the cadences converge on to a full triad. In the duet sections, the various combinations of upper and lower voices are exploited with great virtuosity; the duet writing is decidedly original in its use of ostinato patterns, sequences, variation and occasional melodic or rhythmic imitation.

Despite its isorhythmic technique, the three-voice Mass *Summe Trinitati* seems the most modern of Frye's complete masses (but see Kirkman for a different interpretation). The cantus firmus is a Trinity Sunday responsory, also used for the reception of a king and queen; it lies in the tenor and rarely crosses below the contratenor. The whole mass is in duple metre. The chant occurs in almost identical rhythm in each movement, though sections of it are omitted in the Sanctus and Agnus Dei. A motet (in *I-TRmp* 88) with the otherwise unknown text *Salve virgo mater pya* (apparently a Marian sequence) has the same motto opening as this mass and is built on the same tenor. Its form corresponds most closely to the Credo of the mass, but its upper voice has much nearer affinities with that of the Gloria and recalls the links between the Kyrie and Gloria of the Mass *Nobilis et pulcra*. This suggests that the motet may in fact be a contrafactum of a Kyrie, since continental copyists often omitted the Kyries of English tenor masses: the Trinity Sunday Kyrie prescribed by the Sarum use was *Conditor Kyrie omnium*, whose verses accord well with the length of the motet.

The (almost complete) upper voice of a short Kyrie ascribed to Frye in the Lucca fragments fits note for note against the tenor of Frye's song *So ys emprentid*, if four bars' rest is interpolated at one point, and it paraphrases the upper voice of the song in several places. A three-voice setting is suggested by the modest scale of the movement; a contratenor is required to make good the harmony at two cadences and to complete a short duet. The setting covers only the even-numbered Kyrie invocations; it is the earliest known English mass movement on a secular tenor.

Andrew Kirkman has suggested that an anonymous short votive mass in *B-Br* 5557 may also be by Frye.

Only one other sacred piece by Frye is unquestionably not a contrafactum: the three-voice setting of the prose *Sospitati dedit*, for Matins of St Nicholas (in *GB-Cmc* Pepys 1236, ed. in CMM, xl, 1967), which is Frye's only known work to survive exclusively in an English source. The chant is fitfully paraphrased in both the upper and lower voices. The 'Deo gracias' and 'Amen' in Kenney's edition can hardly be part of the piece, since the setting of

'Sospes regreditur' (bars 69–75) indicates a return to the antiphon in which this prose is embedded and since the additions are in the wrong mode.

Two of Frye's English songs survive also with sacred Latin texts; one must, therefore, question the origin of his other short pieces in a similar style even if they survive only with sacred texts. An example is his three-voice *Ave regina celorum mater Regis angelorum*, even though 13 manuscripts and three paintings all contain this text, and a further source (Berlin, Kupferstichkabinett, 78 C 28) without text has the illuminated initial 'A'. It is in ballade form and may have originated with an English text, despite Reese's shrewd observation that some manuscripts repeat a phrase of the text and thus convert the well-known antiphon into a responsory that fits the music better. Later composers added various other voices to this piece, and its tenor was borrowed by Obrecht for a motet and mass of the same title; Agricola in turn borrowed Obrecht's tenor as the basis for his *Salve regina*. Frye's *Ave regina celorum*, whatever its original form, played an important part in establishing the taste for the song-motet or *sainte chansonette*.

The three-voice composition *O florens rosa* also occurs with the text *Ave regina celorum ave domina*: two different copyists may each have supplied his own contrafactum text. Of its three sections, the first and last end alike, as would be the case in an extended ballade; the idiom appears to have been closely modelled on Dunstaple's *O rosa bella*. The three-voice *Trinitatis dies*, with a text unknown elsewhere, appears to be a rondeau: the intermediate cadence is even marked with a *corona*. Its rhythmic freedom, within a prevailing duple metre, suggests a late date. A two-voice work without text ascribed to Frye in *CZ-Ps* DG.IV.47 is in the form of a ballade; each half of the work begins with Frye's favourite device of a rising minor 3rd followed by a stepwise descent (generally to the tonic). *Alas, alas, alas is my chief song*, a three-voice English ballade, occurs also with the contrafactum text *O sacrum convivium*; its relationship with the lovely *Alas departyng* (a two-voice piece) does not seem as close as Bukofzer (1942) claimed.

The English text of the three-voice ballade *So ys emprentid* survives only in the Mellon Chansonnier, and even there it is incomplete. Two other manuscripts present an incomplete French text, *Soyez aprentis en amours*, which resembles the sound but not the sense of the original, and Ramis de Pareia cited the song under this title in his *Musica practica* of 1482 (ed. J. Wolf, Leipzig, 1901/*R*, p.65); this reference was repeated over 60 years later by Pietro Aaron, but with an example not from Frye's song, in his *Lucidario* of 1545 (book 2, f.7*v*). The song occurs also in four further chansonniers, with a quite different French text, *Pour une suis desconforté*, and in yet another source with the sacred text *Sancta Maria succurre miseris*; it is Frye's only song with an English concordance (*GB-Ob* 191). Besides Frye's own Kyrie on this ballade, a three-voice isomelic mass by Guillaume Rouge is based on its tenor; but the latter, unlike Frye's Kyrie, does not preserve the original rhythm. This tenor is borrowed also for the four-voice motet *Stella celi extirpavit*, another work in which isomelic variation is used, and the first half of the tenor is repeated at the end in a new rhythmic guise; the style of this work is very English, unlike Rouge's mass, and the two works hardly constitute a mass-motet cycle as Snow has claimed. Bent (*JAMS*, xxi, 1968, pp.137–56, esp.148) reported that a similar tenor is employed for a Christmastide *cantio* in *CZ-Ps* DG.IV.47, *Nobis instat carminis odas laudibus* (an acrostic on 'Nicolaus').

The rondeau *Tout a par moy* survives in nine manuscripts. All of them present the same text; although one manuscript contains an ascription of the piece to Binchois, the style as well as two other ascriptions suggests that Frye was the composer. Since this piece occurs with the French text in the Mellon Chansonnier (ed. L.L. Perkins and H. Gavey, New Haven, CT, 1979), in which three English songs have their correct English texts, it is likely to have originated as a French setting. (The poem was popular and was quoted and copied in a number of non-musical sources, including two poems by Jehan Molinet, *Dialogue du gendarme et de l'amoureux* and *Oraison à la Vierge Marie*.) According to Tinctoris, the work was performed by Gerardus of Brabant, singing the tenor and the upper voice simultaneously (Weinmann, p.34); the theorist made his own two-voice arrangement of the work, as did Alexander Agricola (for three and four voices) and an anonymous composer (for five voices). Josquin, in his Mass *Faisant regrets*, used the first four notes of the second half of Frye's tenor as a cantus firmus and borrowed an ostinato figure from Agricola's version; but since he quoted the entire upper voice (not used by Agricola) in his Agnus Dei, he must have known Frye's song also in its original form.

WORKS

Edition: *Walter Frye: Collected Works*, ed. S.W. Kenney, CMM, xix (1960) [K]

MASS SETTINGS

Mass 'Flos regalis', 4vv (without Ky), ed. in EECM, xxxiv (1989)
Mass 'Nobilis et pulcra', 3vv (Ky troped 'Deus creator omnium'), ed. in EECM, xxxiv (1989)
Mass 'Summe Trinitati', 3vv (without Ky), ed. in EECM, xxxiv (1989)
Kyrie 'So ys emprentid', ?3vv (only frag. upper voice survives, unpubd, *I-La* 238)

Missa sine nomine, 3vv, *B-Br* 5557 (anon., attrib. Frye in Kirkman)

MOTETS

Ave regina celorum mater Regis angelorum, 3vv with three different 4th voices (that in *I-TRmp 90* added in a later hand); to sources listed in K, add *D-Mbs* Cim. 352b (olim Mus.ms.3725), ff.158*r*–*v*; *Mbs* Clm5023, 2vv; *Pl-Kj* B40098); *SK-BRmp* Inc.33 (formerly Hungary, Kassa [Kaschau], Dominican Library), ed. and facs. in Rajeczky, 230ff; for paintings including the work see facsimiles in Grandmaison and Carapezza; 4 kbd arrs. ed. in EDM, xxxviii (1958), 214–5, and xxxix (1959), 399, 415–6. It may well also be the missing Ave regina listed in the index of *I-MC* 871, see Pope and Kanazawa
O florens rosa, 3vv
Salve virgo mater pya, 3vv, anon. (perhaps a contrafactum of the missing Ky from the Mass 'Summe Trinitati')
Sospitati dedit, 3vv, also ed. in CMM, xl (1967) and Sparks (inc.); the Deo gracias and Amen in K can hardly be part of the piece
Trinitatis dies, 3vv (perhaps a contrafactum of a rondeau)

BALLADES

Alas, alas, 3vv
Myn hertis lust, 3vv, probably by Bedyngham to whom it is twice ascribed; to sources in K add *D-Mbs* Clm 5023 ('Ave verum gaudium forma', 2vv) and *I-APa* Notarile di Amandola 918, f.18*v* (1v only, textless)
So ys emprentid, 3vv, perhaps by Bedyngham; to sources in K add *D-Bkk* 78 C 28 (without text), *GB-Ob* Rawl. C.813 (frags. of text only) and *I-APa* 918, f.18 (1 v only, textless)
Textless ballade, 2vv, ed. in Plamenac (1960)

RONDEAUX

Tout a par moy, 3vv, perhaps by Binchois; K includes text for refrain only, though the complete poem is in five music MSS as well as *Le jardin de plaisance* (ed. E. Droz and A. Piaget, Paris, 1910–25, i, pp.lxxvii, ccii), *F-Pn* Rothschild 2798 [I. 6.17] and *D-Bkk* 78 B 17 (ed. in M. Löpelmann: *Die Liederhandschrift des Cardinals de Rohan*, Göttingen, 1923, no.138); kbd arr. as 'Tant apart', ed. in EDM, 1st ser., xxxix (1959), 410

BRIAN TROWELL

Fryklöf, Harald (Leonard) (*b* Uppsala, 14 Sept 1882; *d* Stockholm, 11 March 1919). Swedish composer, organist and teacher. He studied the organ, counterpoint and composition with Lindegren at the Swedish Royal Academy of Music, the piano with Andersson (1904–10) and orchestration with Scharwenka in Berlin (1905). In 1908 he was appointed organist of the Stockholm Storkyrka and teacher of harmony at the conservatory. A self-critical composer, he was particularly concerned with form; his music frequently has a Regerian richness of harmony. The most imaginative of his compositions is the *Sonata alla leggenda* for violin and piano. He published a study, *Harmonisering av koraler i dur och moll jämte kyrkotonarterna* (Stockholm, 1916).

WORKS

(*selective list*)

Orch: Konsertuvertyr, op.1, 1908

Vocal: 2 sånger, op.4, 1v, orch, 1911; Lovsång, chorus; Ps lxxxix, chorus

Inst: Fuga, op.3, org, 1909; Doppel-Canon, org, 1910; Symfoniskt stycke, org; Passacaglia, org; [8] Mindre pianostycken; Fuga, c♯, pf; Impromptu, A♭, pf; Sonata alla leggenda, vn, pf, 1919

Songs for 1v, pf: [3] Sånger, pt 1 (E.A Karlfeldt, J.L. Runeberg, V. Krag), 1905–6; [2] Digte (T. Lange), op.2; Idag vill jag tacka dig [Today I will thank you] (S. Lidman); [3] Sånger, pt 2 (Runeberg, S. Lidman, V. Ekelund), 1910–11

ROLF HAGLUND

Fryklund, (Lars Axel) Daniel (*b* Västerås, 4 May 1879; *d* Hälsingborg, 25 Aug 1965). Swedish musicologist and collector. He studied Romance languages at Uppsala University, where he took the doctorate in 1907, and was a music pupil of I.E. Hedenblad and L.J. Zetterqvist. Subsequently he taught French in schools in Sundsvall (1910–21) and Hälsingborg (1921–44). He devoted himself to a scrupulous study of the history and etymology of various instruments, but is best known for his unique music collection, the largest private collection of its kind in Sweden, now housed in the Musikmuseet and Statens Musikbibliotek (Stockholm) and the Helsingborg Stadsmuseum. It includes 900 instruments, books, posters and music editions, and 10,000 music manuscripts, autographs and letters. Of special interest are the Marseillaise collection of 3000 items, the correspondence of Fétis and the August Bournonville collection. A catalogue of this collection can be found in *Collection Fryklund 1949* (Hälsingborg, 1949). Fryklund was elected an associate of the Swedish Royal Academy of Music in 1932.

LYNDESAY G. LANGWILL/VESLEMÖY HEINTZ

Fubini, Enrico (*b* Turin, 1 Nov 1935). Italian musicologist, aesthetician and historian of ideas. He studied both philosophy and music at Turin University, where he graduated in philosophy in 1959. He later became professor of musical aesthetics, and has taught the history of modern and contemporary music at the university. He was appointed to the editorial boards of *International Review of the Aesthetics and Sociology of Music* (1970), *Musica/Realtà* (1980) and *Revista Italiana di Musicologia* (1992); in 1998 he became editor of *Revista Italiana di Musicologia*.

Fubini discusses music in a broad cultural context. He does not restrict himself to a narrow range of explicitly philosophical texts, but includes in his compilations and histories any documents which have a bearing upon the discussion of musical values at a given time. These synoptic writings give a perspective of continuity to the debates held in different periods of European musical history. His disciplinary approach, as a historian of ideas, is distinct both from that of a historical musicologist, who is most interested in whether a given debate influences the course of music history, and from that of an analytical philosopher, for whom questions about the identity and expressive qualities of music can be abstracted from any historical context and treated in general terms. His historicism is consistent with that of Benedetto Croce, who viewed all philosophical problems as historically situated, and in his aesthetic thought he accordingly places importance on detailed descriptions of the historical circumstances in which ideas arose.

NAOMI CUMMING (text), TERESA M. GIALDRONI (writings)

Fuchs, (Leonard Johann Heinrich) Albert (*b* Basle, 6 Aug 1858; *d* Dresden, 15 Feb 1910). German teacher and composer of Swiss birth. His early training in Basle in the piano (Ernst Reiter), the violin (Adolf Bargheer) and music theory (Samuel de Lange and Selmar Bagge) prepared him for advanced study at the Leipzig Conservatory (1876–9), where he was taught by some of the most famous teachers of his day including Reinecke, Jadassohn, Ernst Friedrich Richter and Oskar Paul, winning a prize for his motet *Salvum fac regem*. After his graduation he assumed a conducting post at Trier (1880), and after a period of travel he settled in Oberlössnitz, near Dresden (1883), and began to concentrate on composition. His piano sonata op.11 won first prize in an international competition under the protectorate of the Spanish Queen Regent and brought him the title of honorary professor at the Valencia Conservatory. In 1889 he was appointed director of the recently founded conservatory in Wiesbaden, which under his leadership developed into an important institution; its distinguished staff included Riemann (1890–95), who brought with him his pupil Max Reger. Fuchs left in 1898 to teach music theory and voice at the Dresden Conservatory, where he served as professor from 1908 until his death. From 1901 he also conducted the Robert Schumann-Singakademie, which in 1906 performed his *kirchliche Tondichtung* (freely translated as dramatic oratorio) *Selig sind, die in dem Herrn sterben* op.42.

Fuchs's compositions, mainly songs and chamber music by now almost forgotten, have an appealing melodic spontaneity and colourful harmonic language, particularly evident in the lieder collections *Minneweisen* op.18, and the *15 Lieder* op.31. He also wrote some fine choral music, including the dramatic oratorio *Das tausendjährige Reich* op.48. More interesting are his editions of vocal works by Porpora, Pergolesi and other early 18th-century Italian composers, and his *Taxe der Streich-Instrumente* (1907), an inventory of master string instrument makers which went through several editions in its first two decades. The many-sided Fuchs also wrote music criticism for the *Dresdener Zeitung* and assembled an impressive collection of early instruments.

EDWARD F. KRAVITT

Fuchs, Aloys [Alois] (*b* Raase [now Rázová, nr Brantál, Moravia], 22 June 1799; *d* Vienna, 20 March 1853). Austrian musicologist. From 1811 he attended the school of the Franciscan friary at Opava, where he had lessons in organ and cello and sang in the choir. After studying philosophy (1816–19) and law (1819–23) at the University of Vienna, he worked from 1824 as an official in the war office, an assistant to Kiesewetter, and later as a drafting assistant (1834–8) and a chancery clerk (1838–

53). As a bass he sang occasionally in the court chapel choir from 1825 and became a member of the choir in 1836. In 1829 he was appointed a member of the board of the Gesellschaft der Musikfreunde.

As a scholar and collector, Fuchs was of great importance to musicology. His music library, which he built from 1820, was particularly rich in autographs, among them works by Bach, Handel, Haydn, Gluck, Mozart, Beethoven and other German and Italian composers of the 18th and early 19th centuries. It also contained rare 17th-century printed editions of music, theoretical treatises on music and a collection of portraits of musicians. Generous gifts to the Gesellschaft der Musikfreunde in Vienna and to other institutions have changed the extent and the contents of the whole collection considerably. This is recognizable from Fuchs's numerous handwritten catalogues which were constantly renewed from 1830. The fate of the collection after Fuchs's death has led to controversy. The earlier view that the collection was dispersed by retail sales is incorrect. The greater part went to the Deutsche Staatsbibliothek in Berlin; lesser amounts were acquired by the Benedictine Abbey at Göttweig (Lower Austria); others were sold through second-hand booksellers (e.g. Fidelis Butsch of Augsburg), individual items going to the USA and Russia. That Fuchs also acted as agent for other collectors of autographs, and that he made or commissioned copies from his own collection, has contributed materially to the misunderstanding regarding the fate of his possessions and his legacy.

As a musicologist, Fuchs performed his most valuable services in musical palaeography and in the guardianship of musical monuments. The numerous catalogues which he compiled of works (by Gluck, Haydn, Mozart and others) were epoch-making and even now retain their value as sources. His published articles are devoted chiefly to the lives and works of Gluck and Mozart.

OTHMAR WESSELY

Fuchs, Carl (Dorius Johannes) (*b* Potsdam, 22 Oct 1838; *d* Danzig, 27 Aug 1922). German critic, pianist, conductor and composer. The son of an organist, he studied music from an early age. In 1859 he enrolled at the University of Berlin, studying theology and later philosophy; during this time he took piano lessons from Hans von Bülow. For a time he was torn between his interests in philosophy and music; having decided upon the latter he studied

thoroughbass with Carl Friedrich Weitzmann and composition with Friedrich Kiel. For two and a half years he taught the piano privately in Berlin before accepting a position at Kullak's Neue Akademie der Tonkunst in 1868. With the singer Clara Werner (whom he married in 1870) he gave concerts in Berlin, Pomerania and Silesia and became organist at the Nikolaikirche in Stralsund in 1869. In his dissertation *Praeliminarien zu einer Kritik der Tonkunst* (University of Greifswald, 1871) he analysed the enjoyment of music from the point of view of Schopenhauer's philosophy. Returning to Berlin in 1871, he performed as a pianist and was active as a writer (e.g. for the *Musikalisches Wochenblatt*). In 1874 he moved to Hirschberg, where he founded and conducted a music society. Settling in Danzig in 1879, he was active as a pianist, teacher, organist (from 1886 at St Peter und St Paul and from 1887 at the synagogue) and music critic (especially for the *Danziger Zeitung*, 1887–1920). He was named professor in 1904.

In spite of his many-faceted musical activities – especially in Danzig, whose importance as a musical centre increased through his initiative – it is as a writer that Fuchs made his most important contribution, on subjects ranging from musical expression and ornamentation to style and aesthetics. Particularly noteworthy are *Die Zukunft des musikalischen Vortrags* (Danzig, 1884), *Die Freiheit des musikalischen Vortrags* (Danzig, 1885), *Praktische Anleitung zum Phrasieren* (Berlin, 1886), in collaboration with Hugo Riemann, and *Takt und Rhythmus im Choral* (Berlin, 1911). His friendship and correspondence with Nietzsche, whom he met in Berlin in 1872, contributed significantly to his views on musical aesthetics. His compositions include *Hellas* (1868), a set of piano pieces on modern Greek themes.

GAYNOR G. JONES/CHRISTOPHER FIFIELD

Fuchs, Georg-Friedrich (*b* Mainz, 3 Dec 1752; *d* Paris, 9 Oct 1821). French composer and clarinettist of German birth. After learning to play the clarinet, bassoon and horn, he studied composition with Haydn and Christian Cannabich. He played in several German military bands and became the band-leader at Zweibrücken. In 1784 he moved to Paris and in 1793 became a musician of the highest rank in the Garde Nationale. He taught solfège at the Paris Conservatoire from its opening in 1795, but was relieved of this post during the reform of 1800. He spent the rest of his life working for various Parisian publishers (including Imbault, Naderman and Sieber), arranging all sorts of compositions for diverse combinations of instruments. His own works include pieces for military band, fanfares, a few orchestral works, and numerous chamber works, most of them involving a clarinet. His arrangements reveal considerable craftsmanship.

WORKS

printed works published in Paris unless otherwise stated

Orch: Conc., cl, orch, op.14; Fl Conc. (1798), lost; Sinfonie concertante, hn, cl, orch, no op.; Hn Conc., mentioned in *FétisB*, 4ème concerto, hn, mentioned in *MGG1*

Sextet, cl, bn, hn, vn, va, db, op.34

Qts: 3 for cl, vn, va, b, op.2; 3 quatuors concertants, cl, cl/vn, va, b, op.5 (1793), arr. 2 cl, hn; 3 quatuors concertants, cl, vn, va, b, op.6 (1793); 3 for cl, vn, va, b, op.7; 3 [6] quatuors concertants, hn, cl, bn, b, op.A–B (1798); 3 for hn, vn, va, b, op.3l, 1 ed. in Flores musicae, xxvi (Lausanne, *c*1982); 3 quatuors concertants, cl, vn, va, b, op.37, lost; 3 quatuors concertants, hn, cl, bn, vc, no op., ?arr. of op.31; 3 for 2 cl, 2 hn; qts opp.13, 19 mentioned in *FétisB*; arrs.

Trios: 3 for fl, cl, bn, op.1, lost; 3 for hn, cl, bn, op.1 (1802); 6 for 3 hn, op.44, lost; 3 [6] trios concertants, 2 vn, vc, op.45, bks 1–2 (1797); 3 trios concertants, cl, vn, vc, op.64; 12 nocturnes, 2 hns, bn; 6 for 3 cl, no op.; 3 for 2 cl, bn, no op. and 3 for 2 cl, vn, no op., mentioned in Riemann; other trios for cl, hn, bn mentioned in *FétisB*

Duos: 3 for cl, vn, op.1 (1792), lost; 24 sonatines faciles, 2 fl, op.1 (1802); 6 for cl, bn, op.4 (1793); 6 for cl, hn, op.5 (1793); 3 duos concertants, 2 fl, op.5 (Leipzig, ?1818); 6 for cl, bn, op.6; 3 for cl, hn, op.6, lost; 6 for 2 cl, op.7, lost; 3 for 2 cl, op.10, lost; 3 for cl, vn, op.13, lost; 3 for cl, vn, op.14, ed. B. Päuler (Winterthur, 1987); 3 for cl, vn, op.15; 3 for cl, vn, op.18, lost; 3 for fl, cl, op.19 (?1799), ed. J.G. Mullers (Winterthur, 1990); 6 for 2 vn, op.19; 3 for fl, cl, op.20; 6 for 2 cl, op.22 (1798), lost; 12 for 2 cl, op.28 (1797), lost; Duos, 2 cl, mêlés de valzes, allemandes et polonaises, op.29; for cl, hn, op.32, lost; 6 for cl, hn, op.36; 6 for cl, hn, op.37, lost; 3 duos concertants, 2 fl, op.51; 3 for 2 fl, op.65; 3 duos concertants, bk 4; ?3–18 more for cl, vn

Military music: 1e [–5e] harmonie caractéristique, 4 cl, 2 hn, 2 bn, tpt, ?serpent, perc (1792–4): untitled, Le siège de Lille, Le siège de Thionville, L'entrée de Custine à Mayence, La bataille de Gemmappes et l'entrée à Mons; La bataille de Marengo [ded. Napoleon Bonaparte]; Airs patriotiques, cls, 2 hn, 2 bn, 2 fl, tpt, perc (1798), lost; [104me] Suite militaire, marche pas redoublée et fanfares à plusieurs instruments à vent; other works

Other works: potpourris, variations on popular tunes; numerous arrs. of popular operatic themes, ww

FRÉDÉRIC ROBERT

Fuchs, Ignacije. *See* LISINSKI, VATROSLAV.

Fuchs, Johann Leopold [Fux, Leopol'd Ivanovich; Fux, Ivan Ivanovich] (*b* Dessau, 2 Nov 1785; *d* St Petersburg, 3/15 April 1853). German composer, pianist and writer on music. At the turn of the 18th century he moved from Germany to Russia, where he was highly thought of as a music teacher in St Petersburg: among his pupils were Glinka, Yury Arnol'd, Modest Rezvoy and others. In connection with his teaching work, Fuchs wrote textbooks on composition, harmony and piano playing. Some of his large-scale vocal compositions were performed at St Petersburg Philharmonic Society concerts: his cantata (or oratorio) *Bog* ('God'), on a text by Gavriil Derzhavin (23 March 1831), and the oratorio *Pyotr Velikiy* ('Peter the Great'), performed in Platon Obodovsky's Russian translation of the original German text by F.A. Gelbke (23 March 1842). Most of Fuchs's other works, which include quartets and quintets, remained unpublished and are lost.

WORKS

Vocal: Bog [God] (cant. or orat, G. Derzhavin), 4vv, chorus, orch, 1831; Peter Velikiy [Peter the Great] (orat, F.A. Gelbke), 3vv, chorus, orch, 1842

Inst: Str Qnt, op.2 (Leipzig, n.d.); Pièces et exercises appartenant à l'ouvrage: Méthode d'enseigner le piano et les principes de la musique (Moscow, 1851); other chbr works

WRITINGS

Praktische Anleitung zur Komposition, sowohl zum Selbstunterricht, wie auch als Handbuch für Lehrer, nebst einer besonderen Anweisung für Komponisten des russichen Kirchengesanges (St Petersburg, 1830, 2/1841 as *Neue Lehrmethode der musikalischen Komposition, mit besonderer Rücksicht auf die praktische*

Anwendung der gegebenen Regeln [in Ger. and Russ.]; Russ. trans of 1st edn, 1830)
Anweisung für junge angehende Lehrer und Lehrerinnen, den ersten Unterricht auf dem Piano-Forte in einer stufenweisen Folge zu ertheilen (St Petersburg, 1834, 2/1844) [in Ger., Fr. and Russ.]
Harmonielehre für Damen, enthaltend alle Vorkenntnisse, die eine gute Clavierspielerin oder Sängerin als Erleichterungsmittel zum Entziffern, Präludieren und zum richtigen Vortrage bedarf (Leipzig, 1843, 2/1844; Fr. trans., 1843)

BORIS SHTEYNPRESS

Fuchs, Johann Nepomuk (*b* Frauental, Styria, 5 May 1842; *d* Vöslau, nr Vienna, 5 Oct 1899). Austrian conductor, teacher, editor and composer, brother of Robert Fuchs. He studied theory with Simon Sechter in Vienna and was appointed Kapellmeister of the Bratislava Opera in 1864. He then worked as an opera conductor in Brno (where his only opera, *Zingara*, was first produced in 1872), Kassel, Cologne, Hamburg, Leipzig and finally, from 1880, at the Vienna Hofoper. In 1873 he married the singer Anthonie Exner in Kassel. Fuchs became a professor of composition at the Vienna Conservatory in 1888 and succeeded Hellmesberger as its director in 1893; the next year he received the title of assistant Hofkapellmeister for his work at the court opera. He played an important part in preparing the Schubert Gesamtausgabe, editing the dramatic works and some of the orchestral music. He also edited operas by Handel, Gluck and Mozart and wrote songs and piano pieces.

R.J. PASCALL

Fuchs, Joseph (*b* New York, 26 April 1900; *d* New York, 14 March 1997). American violinist and teacher, brother of LILLIAN FUCHS. He graduated in 1918 from the Institute of Musical Art in New York where he studied with Franz Kneisel. In 1926 he was appointed leader of the Cleveland Orchestra but resigned in 1940 to pursue a solo career. After a successful New York début in 1943, he was co-founder there of the Musicians' Guild, a chamber music organization which he directed until 1956. He toured extensively in Europe, appearing at the 1953 and 1954 Prades festivals, and in South America, the USSR, Israel and Japan; he also played as a soloist with every important orchestra in the USA. A Ford Foundation grant in 1960 enabled him to commission Piston's Violin Concerto, the première of which he gave that year in Pittsburgh. Fuchs also gave the first performances of concertos by Lopatnikoff (1944–5), Ben Weber (1954) and Mario Peragallo (1955); Martinů's *Madrigaly* for violin and viola, dedicated to Fuchs and his sister (1947); the revised version of Vaughan Williams's Violin Sonata, with Artur Balsam (1969); and the posthumous American première of Martinů's Sonata for two violins and piano (1974). Fuchs became a violin professor at the Juilliard School of Music in 1946, and in 1971 he received the Artist Teacher's Award from the American String Teachers' Association. He played a Stradivari violin, the 'Cadiz' of 1722. His style of playing was vigorous and large-scaled, with a masterful technique and a rich, warm tone.

BORIS SCHWARZ/R

Fuchs, Lillian (*b* New York, 18 Nov 1902; *d* Englewood, NJ, 6 Oct 1995). American viola player, composer and teacher, sister of JOSEPH FUCHS. She studied the violin with Svecenski and Kneisel, and composition with Goetschius, at the New York Institute of Musical Art (now the Juilliard School), winning several awards on graduation. Her New York début in 1926 was as a violinist, but she soon turned to the viola, and was a member of the Perolé String Quartet from 1927 to the mid-1940s. As well as appearing regularly in the chamber concerts of the Musicans' Guild with her brothers Joseph (violin) and Harry (cello) (*b* 1908; *d* Cleveland, 1986), she toured extensively as a solo violist in the USA and in Europe, and played at the 1953 Casals Festival at Prades. Several viola works were written for her, including a Sonata (1955) by Jacques de Menasce; Martinů's *Madrigaly* (1947) for violin and viola, Duo no.2 for violin and viola (1950) and Sonata (1956) for viola and piano; and Quincy Porter's Duo for viola and harp (1957). She played a viola by Gaspare da Salò, handling it with ease, in spite of her small stature, and with flawless technique, obtaining a rich and expressive tone. Renowned as a chamber music coach, Lillian Fuchs taught at the Manhattan School of Music from 1962, the Aspen Summer Institute, Colorado, from 1964, and the Juilliard School of Music from 1971. Her own published works for solo viola include 12 Caprices (1950), *Sonata pastorale* (1956), 16 *Fantasy Etudes* (1961) and 15 Characteristic Studies (1965), also a *Jota* and *Caprice fantastique* for violin and piano. She arranged Mozart's Violin Concerto in G (K216) for viola and provided it with cadenzas (1947), and she was the first to perform and record Bach's six Cello Suites on the viola. With her brother Joseph she made outstanding recordings of Mozart's Sinfonia concertante and Duos for violin and viola. Her twin daughters (*b* 1935) are professional musicians: Carol Amado (violin) and Barbara Mallow (cello).

BORIS SCHWARZ/R

Fuchs, Marta (*b* Stuttgart, 1 Jan 1898; *d* Stuttgart, 22 Sept 1974). German soprano. She studied in Stuttgart, Munich and Milan. She made her début as a mezzo in Aachen in 1928, where she stayed until 1930, and was then engaged by Fritz Busch for the Dresden Staatsoper; among her roles were Octavian, Amneris, Azucena, Eboli and Ortrud. Gradually she assumed dramatic soprano roles, the first being Kundry (1933, Amsterdam; 1933–7, Bayreuth). She became the most important soprano at Bayreuth during the 1930s, succeeding Leider as Brünnhilde (1938–42)

and sharing Isolde with her in 1938. She sang at Covent Garden with the Dresden company in 1936 (Donna Anna, the Marschallin and Ariadne), and in Paris (1938) with the Berlin Staatsoper, of which she was also a member. Fuchs had a warm and expressive voice, and was among the most impressive interpreters of Brünnhilde of her day, as her recording of Act 2 of *Die Walküre* confirms. She was also an accomplished singer of lieder, and made notable recordings of Schubert's *Erlkönig* and Wolf's *Geh, Geliebter*. (*GV*; L. Riemens)

LEO RIEMENS/ALAN BLYTH

Fuchs, Melchior. *See* VULPIUS, MELCHIOR.

Fuchs [Fux], **Peter** [Pietro] (*b* ?Vienna, 22 Jan 1753; *d* Vienna, 15 June 1831). Violinist and composer active in Austria. His death certificate records that he was born in Vienna, but there are suggestions of a Bohemian origin: he is traditionally held to have learnt the violin in Prague, and Dittersdorf in his autobiography mentioned having heard him and Pichl play violin concertos there; according to Dlabač (1815), he was well known in Prague as a brilliant violinist. Dittersdorf engaged Fuchs, Pichl and others for the private orchestra of Bishop Adam Patachich at Grosswardein (now Oradea, Romania), where Fuchs stayed until the orchestra was disbanded in 1769. On 6 January 1781 he was appointed at Eszterháza under Haydn; from 1 March 1782 to his death he played second violin in the court chapel and theatre orchestras at Vienna, where he was also a teacher and soloist at the Tonkünstler-Societät, of which he became a member in 1791. He married F.L. Gassmann's daughter Anna Maria (1771–1852), an opera singer.

Fuchs's violin compositions reveal something of his virtuoso abilities as well as the influence of the Italian violin school, particularly in the orchestral dances with solo violin. It is uncertain whether the sacred works attributed to 'P. Fux' in the Göttweig *Katalogus musicalium* are his.

CAMILLO SCHOENBAUM

Fuchs, Robert (*b* Frauental, nr Deutschlandsberg, Styria, 15 Feb 1847; *d* Vienna, 19 Feb 1927). Austrian composer, teacher, organist and conductor, youngest brother of Johann Nepomuk Fuchs. He studied the flute, the violin, the piano, the organ and thoroughbass with his brother-in-law at an early age. In 1865 he moved to Vienna and earned a meagre living as a répétiteur and teacher, becoming the organist at the Piaristenkirche the following year; he studied composition at the conservatory with Dessoff. After his early G minor Symphony had met with an indifferent reception in 1872, he had a decisive success with his Serenade no.1 (1874). In 1875 he was appointed conductor of the orchestral society of the Gesellschaft der Musikfreunde and professor of harmony at the conservatory (he later taught theory and counterpoint there). He was also organist of the Hofkapelle from 1894 to 1905.

Fuchs taught a generation of musicians that included Ernst Decsey, Mahler, Sibelius, Franz Schmidt, Schreker, Wolf and Zemlinsky. He was a friend of Brahms, who gave him early encouragement as a composer and introduced him to Simrock. Brahms thought highly of his work, being particularly impressed by the Symphony no.1 in C, for which Fuchs was awarded the Beethoven prize in composition by the Gesellschaft der Musikfreunde in 1886; he said of him in 1891: 'Fuchs is a splendid musician; everything is so fine and so skilful, so charmingly invented, that one is always pleased'.

R.J. PASCALL

Fuchs, Theodor (*b* Sassin [now Šaštín, Slovakia], 4 Feb 1873; *d* Bucharest, 9 May 1953). Romanian composer and pianist of Czech descent. Settling in Romania as a child, he studied with Eduard Wachmann at the Bucharest Conservatory (1880–84) and Julius Epstein, J.N. Fuchs, Robert Fuchs and Wilhelm Rauch at the Vienna Conservatory (1884–90). After three years working as a conductor and pianist in the Czech lands he returned to Bucharest to work as a piano teacher, opera conductor and concert pianist, though his chief passion remained composition. A recital partner of violinists including Elman, Enescu, Huberman, Kreisler and Thibaud, he was greatly valued for his technical capabilities and expressive nuance. He also edited the review *Arta muzicală* (1911–12).

WORKS
(*selective list*)

Dramatic: Moscoso (op, 2, Fuchs), 1908; Bobrică (comic op, M. Brociner), 1912; Păunaşul codrilor [Outlaw of the Woods] (musical fairy tale, N.N. Lenguceanu), 1924
Inst: Ursitoarele [The Fates], sym. poem, 1903; Sym. no.1, 1912; Pf Conc., 1932; Sonata, hp, pf, 1943; Pf Qnt; Rapsodia Română, pf; Str Qt; other chbr works, pf pieces
Choral works, solo vocal pieces

OCTAVIAN COSMA

Fuchswild, Johannes (*b* ?Ellwangen, 2nd half of the 15th century). German composer. From 1508 to 1512–13 he was a singer in the court chapel at Stuttgart. It is not known whether he left Stuttgart when the chapel was disbanded in 1514 or whether he left later, for it is possible that like other members of the chapel he had another living in Stuttgart. He may be identifiable with 'Johannes Fochss de Elbangen' who matriculated at Leipzig University in 1483 and obtained the bachelor's degree in 1485. Altogether four four-voice songs by Fuchswild have survived in printed collections and in manuscript. A keyboard arrangement in Fridolin Sicher's organ tablature (*CH-SGs* Cod.530) may be by Fuchswild. Of his songs, the two printed by Schöffer (RISM 1513^2) have a certain melodic vigour. His compositional technique, similar to that of his contemporaries, is versatile if not without awkward passages. In deference to an older style he used free motivic connection between parts rather than strict imitation, and in the song *Kein Trost auf Erd* there are elements of an ostinato treatment of motifs in the bass part.

WORKS

Ich stund an einem Morgen, 4vv, *CH-Bu*, ed. in SMd, vi/1 (1967); Kein Trost auf Erd, 4vv, 1513^2/*R*, ed. in Cw, xxix (*c*1955); Mich freudt ein Pild, 4vv, 1513^2/*R*, ed. in Cw, xxix (*c*1955); Sei klug mit Fug, 4vv, 1539^{27}, ed. in EDM, 1st ser., xx (1942/*R*)
Org intabulation with superscript 'Fuchs wil', *SGs* Cod.530, may be by Fuchswild

HANS-CHRISTIAN MÜLLER/CLYTUS GOTTWALD

Fučik, Julius (Arnošt Vilém) (*b* Prague, 18 July 1872; *d* Berlin, 25 Sept 1916). Czech bandmaster and composer. From 1885 to 1891 he studied at the Prague Conservatory with Bennewitz (violin), Milde (bassoon) and Dvořák (composition), and from 1891 to 1894 he played under J.F. Wagner in the band of the 49th Austro-Hungarian Regiment stationed at Krems. Afterwards he returned to Prague, playing the bassoon at the German Theatre and later in the symphony orchestra of the National Ethnographic Exhibition, and also playing in the Czech Wind Trio. He joined the orchestra at the National Theatre at Zagreb in 1895 and was bandmaster in the Croatian town of Sisak. In 1897 he was appointed bandmaster of the 86th Austro-Hungarian Regiment, stationed initially at Sarajevo and from 1900 in Budapest. During this time he composed several highly successful marches, notably *Einzug der Gladiatoren* and also some fine waltzes of almost symphonic proportions. In 1910 he was made bandmaster of the 92nd Regiment at Theresienstadt (now Terezín), playing in Prague during the winter and touring Bohemian towns during the summer. After his retirement in 1913 he married and settled in Berlin, where he formed the Prager Tonkünstler-Orchester and a music publishing firm, Tempo Verlag. His activities were cut short by the outbreak of war and the onset of cancer.

WORKS
(*selective list*)

Almost 300 dances, marches and ovs. incl. the following pubd in Prague, Vienna or Budapest (1897–1913) generally for orch/band/pf: Sarajevo, op.66, march; Einzug der Gladiatoren, op.68, Triumph Marsch; Traum-Ideale, op.69, waltz; Triglav, op.72, march; Unter der Admiralsflagge, op.82, concert march; Il soldato, op.92 [after E. di Capua], march; Frühlingsbotschaft, op.114, waltz; Vom Donau-Ufer, op.135, waltz; Sempre avanti, op.149, march; Regimentskinder, op.169, march; Fest und treu, op.177, march; Winterstürme, op.184, waltz; Escarpolette, op.197, slow waltz; Der alte Brummbär, op.210, comic polka, bn, orch; Unvergessliche Stunden, op.212, waltz; Florentiner-Marsch, op.214; Marinarella, op.215, ov.; Die lustigen Dorfschmiede, op.218, march; Donausagen, op.233, waltz; Hercegovac, op.235, march; Furchtlos und treu, op.240, march; Miramare, op.247, ov.; Im Traumland, op.270, waltz; Fanfarenklange, op.278, march
Requiem, op.283, other sacred music, chamber pieces, vocal works

ANDREW LAMB

Fuenllana, Miguel de (*b* Navalcarnero, nr Madrid; *fl* 1553–78). Spanish vihuelist and composer. He was blind from birth. The earliest evidence of him is the printing licence for *Orphenica lyra* (Seville, 1554/*R*1981; ed. C. Jacobs, Oxford, 1978), issued on 11 August 1553 by crown prince Philip, which affirms his presence at court in Valladolid. On 29 March 1554, now resident in Seville, Fuenllana contracted with Martín de Montesdoca to print 1000 copies of *Orphenica lyra*. The edition was completed on 2 October, though Wagner has shown the surviving copies to represent two variants of the same impression. In 1555, Fuenllana is described as a citizen of Seville in a legal action initiated to suppress a fraudulent edition of the book. According to Bermudo (*Declaración*, 1555), Fuenllana was in the employ of the Marquesa de Tarifa at this time, but he would have left her service by 1559 after the appointment of her husband, the Duke of Alcalá, as viceroy of Naples. From 1560 until June 1569 he served Isabel de Valois (*d* 1568), third wife of Philip II, with an annual salary of 50,000 maravedís. On 15 May 1574 Fuenllana entered the service of Don Sebastián of Portugal in Lisbon, with an initial contract for three years and an annual salary of 80,000 reales. Contradictory evidence clouds his life after 1578. Anglés claimed that Fuenllana's descendants received retrospective payment from the court in 1591 for money owed to their deceased father, while Jacobs cites a petition of 20 August 1621 presented to Philip IV by Doña Catalina de Fuenllana claiming that her father served Philip II and Philip III for more than 46 years, thus perhaps until 1606. Fuenllana's instrumental mastery was recognized by Bermudo who had witnessed him perform and cited him as a 'consummate player', praise echoed by Cristóbal Suárez de Figueroa (*Plaza universal*, 1615).

Divided by genre into six books, *Orphenica lyra* contains 160 works for six-course vihuela, nine for five-course vihuela, and another nine for four-course guitar. Approximately one third of the works are original compositions: 51 fantasias, 8 tientos, 2 duos, counterpoints on secular melodies and hymn chants, a gloss on Sermisy's *Tant que vivray*, and an original motet *Benedicamus patrem*. Among the 119 intabulations are found motets, mass movements and other sacred works by Francisco Guerrero, Morales, Josquin and Gombert, 12 madrigals by Arcadelt and Verdelot, 12 villancicos by Vásquez, 6 *villanescas* by Pedro Guerrero, and 7 works by Flecha (including three complete *ensaladas*). The texted works are presented either with the voice 'to be sung if desired' printed in red ciphers as part of the tablature or with the vocal part notated separately in mensural notation. Fuenllana offers concise information on performing practice, including detailed descriptions of various aspects of instrumental technique, particularly plucking techniques: he is among the earliest to advocate alternation between the index and middle fingers. His explanation of placing the modes on 'any part of the vihuela' also suggests an instrument in equal temperament. Fuenllana's music is notable for its high level of technical difficulty. Although he seems to have been a progressive with regard to technique, his aesthetic values appear more conservative. With only a few exceptions, the intabulations are unadorned reductions of their vocal models, because he was 'of the opinion that with glosses and ornaments the truth of a work is obscured'. The 51 fantasias display an exceptional mastery of instrumental composition and demonstrate Fuenllana's acknowledged debt to vocal style. Characteristic mid-century imitation is predominant, the remainder being non-imitative polyphony. The fantasias are built of episodes of 20–30 semibreves welded into cohesion by their narrative continuity. In most cases, successive episodes are linked by their internal logic into two or three larger periods that produce clearly discernible architectonic symmetry. Of the 23 fantasias paired with motets, two (nos.14 and 23) are parodies, which do not quote literally from their models but rework their materials with remarkable ingenuity. Fantasias 34 and 50 are based on an ostinato, while no.51 is based on idiomatic *redobles*. The tientos are short idiomatic works that present a modal cycle with some inexplicable anomalies.

JOHN GRIFFITHS

Fuentes, Pascual (*b* Aldaya, 15 May 1721; *d* Valencia, 26 April 1768). Spanish composer. In 1731 he was admitted as a boy chorister to Valencia Cathedral, where he remained until his appointment as a tenor in the Albarracín Cathedral in 1746. He then became choirmaster in the parish of S Andrés, Valencia, until 8 June 1757, when he was named choirmaster of Valencia Cathedral, a post he held until his death.

Ripollés passed severe judgment on Fuentes's music, a verdict that has been repeated (notably in *LaborD*, and by Jaime Moll in *MGG1*). His criticisms are only partly valid, however, and Ripollés himself was later to modify them; moreover, he did not take into account the works on Latin texts, some of which are of particular artistic merit (notably the Lamentations and motets). They include seven masses, 12 psalms, 13 settings of the *Miserere* and eight of the *Magnificat*, four Lamentations and 33 motets, as well as 128 villancicos, mostly in Spanish (all in *E-VAc*; other works in *SEG*, *VAcp* and *ORI*). A *Beatus vir* setting for ten voices is in the fifth volume of *Lira sacro-hispana*, and Ripollés printed a six-part villancico to St Catherine, *Ah de todo el abismo*.

JOSÉ LÓPEZ-CALO

Fuentes Matons, Laureano (*b* Santiago de Cuba, 3 July 1825; *d* Santiago de Cuba, 30 Sept 1898). Cuban composer. He probably began his musical studies with his sister, and then studied the violin with Carlos Miyares and harmony and composition with Juan Paris and Juan Casamitjana. He became leader of the Santiago de Cuba Cathedral orchestra at the age of 15, and also played for visiting opera companies. He began to compose sacred music at an early age, and in 1842 had a *Salve regina* performed. Around this time he also set up a small orchestra and established his first music school. In 1844 he became conductor and director of the Philharmonic Society orchestra in Santiago. A collection of his writings was printed as *Las artes en Santiago de Cuba* (Santiago de Cuba, 1893), and though this work contains some inaccuracies it is of considerable historic value.

Fuentes Matons's *La hija de Jefte*, first performed in 1875, was the first opera by a Cuban composer to be staged in that country (he had already written a number of zarzuelas). He subsequently revised the work, extending it from two acts to three; it was fully completed by 1895, and in 1917 was staged under the title *Seila*. His works also include masses and other sacred works with orchestra, the symphonic poem *América* (1892), chamber music, songs, piano pieces and dances, and were influential at a national level.

VICTORIA ELI RODRÍGUEZ

Fuga (Lat.: 'flight', from *fugare*: 'to flee', 'to chase'). The Latin (and Italian) cognate of the English 'fugue'. In its Latin form the word first came to be associated with music in the 14th century, when musicians used it, along with the French 'chace' and the Italian 'caccia', to designate canon (*see* CANON (i)). The earliest writers to discuss these pieces, beginning with Jacobus of Liège in the first half of the 14th century, indicated that they were so designated because the words referred to fleeing or chasing and thus pointed up the way in which the various imitative voices in a canon 'fled before' or 'chased after' each other while performing the same notes. As non-canonic types of imitation began to appear in 15th-century composition, the words 'chace' and 'caccia' fell from use, but 'fuga' continued to be applied, along with another Latin word, 'imitatio'. Zarlino may deserve the principal credit for cementing the relationship between imitative counterpoint and the words 'fuga' and 'imitatio', and from his time onwards 'fuga' (in Latin and Italian) and eventually its various cognates ('fugue' in French and English, 'Fuge' in German) have enjoyed an association with imitative counterpoint in its myriad guises. This complex development is outlined in detail in the article FUGUE. At no point along the way do musicians seem to have recognized any particular distinction between these various cognates, which they used in whatever form suited their purposes. (German writers, for instance, long used the Latin form, even when writing primarily in German.) Present-day writers almost always use their own language's spelling of the word. (J. Haar: 'Zarlino's Definition of Fugue and Imitation', *JAMS*, xxiv, 1971, pp.226–54)

PAUL WALKER

Fuga, Sandro (*b* Mogliano Veneto, 26 Nov 1906; *d* Turin, 1 March 1994). Italian composer and pianist. He studied at the Turin Conservatory with Matthey (organ, diploma 1924), Gallino (piano, diploma 1925) and Perrachio and Alfano (composition, diploma 1928). Until 1940 he was a concert pianist, making appearances in Italy and abroad; he subsequently devoted himself to composition and teaching. He taught principally at the Turin Conservatory from 1933 onwards (between 1951 and 1952 he was at the Milan Conservatory), and he was director of the institution between 1966 and 1977. He won the Premio Trieste (1953) and the Premio Marzotto (1958). He was a member of the Accademia di S Cecilia in Rome.

Fuga's work is firmly anchored in the Classical-Romantic tradition, with a particular predilection for Brahms; he was fundamentally undisturbed by the 20th-century developments in musical language. His best works are those in which solid choral writing and a broad sense of structure serve in the expression of a fervent religiosity (e.g. the two *Concerti sacri*) and a strong sense of human involvement (e.g. *Ultime lettere da Stalingrado*).

VIRGILIO BERNARDONI

Fuga contraria (Lat.). *See* COUNTER-FUGUE.

Fuga legata, fuga sciolta (It.: 'tied or bound fugue' and 'loose fugue'). 'Fuga' was restricted in meaning by Zarlino (*Le istitutioni harmoniche*, 1558) to imitative counterpoint in which the imitating voice(s) reproduced precisely

the rhythms and intervals of the leading voice; all other imitative counterpoint exhibiting inexactness in whatever way was to be called *imitatione* (*see* FUGUE). He further applied the adjectives *legata* and *sciolta* to distinguish imitative counterpoint in which the imitation was maintained throughout the composition (*legata*) from that which carried through for only part of the piece (*sciolta*). Thus for Zarlino *fuga legata* designated what would now be described as a strict canon in which all intervallic relationships are maintained at all times by all participating voices, and *fuga sciolta* that which begins canonically with all intervals maintained by the following voices but which breaks off at some point during the course of the piece. Zarlino's attempt to define 'fugue' based on strictness of imitation was backward-looking, and his contemporaries and successors largely ignored it, even while retaining the terminology he had coined. The most important reinterpretation took place in Germany, where musicians subsumed all imitative counterpoint under the word *fuga* and, for a while at least, ignored *imitatione*. Thus, the Germans took Zarlino's terminology in its Latin form (*fuga ligata* and *fuga soluta*) and defined the words as, respectively, canon in general and all non-canonic imitation. The expressions survived with similar meanings as late as the second half of the 18th century, when Padre Martini subdivided his *fuga reale* (i.e. fugue with a real answer) into canonic (*legata*) and non-canonic (*sciolta*).

PAUL WALKER

Fugara. *See under* ORGAN STOP.

Fuga sciolta. The term applied by Zarlino (1558) to imitative counterpoint in which the imitation is not maintained throughout. *See* FUGA LEGATA, FUGA SCIOLTA.

Fugato (It.: 'fugued', past participle of *fugare*). A term that generally refers today either to a piece of music that resembles fugue in some ways but lacks certain necessary characteristics of a true fugue, or to a loosely fugal passage within a predominantly non-fugal movement. The term *contrapunto fugato* is found occasionally in 16th- and 17th-century music, most commonly in the context of a single line, written above a cantus firmus, in which a brief theme is brought back several times in different ways. The modern use of the term, as a noun and with the two meanings given above, was first proposed in the treatise *L'arte armonica* (1760) by Giorgio Antoniotto, an Italian-born theorist and composer living in England. Because there has been since the late 18th century far from universal agreement among musicians about the necessary and sufficient conditions for 'true' fugue, there has also been and remains disagreement about what does or does not merit the designation *fugato*. *See* FUGUE, especially §7.

PAUL WALKER

Fuge (Ger.). *See* FUGUE.

Fugère, Lucien (*b* Paris, 22 July 1848; *d* Paris, 15 Jan 1935). French baritone. After failing as a sculptor, he began his singing career in Parisian cabarets, making his début at the *café-concert* Ba-ta-clan on 3 March 1870. On that occasion he introduced to the public Planquette's celebrated march *Le régiment de Sambre-et-Meuse*. At the end of 1873 he was engaged by the Bouffes-Parisiens, and in 1877 by the Opéra-Comique where, until 1910, he sang more than 100 roles, over 30 of them in first performances, including that of the Father in *Louise*. He was also famous as Papageno and Figaro, and as Leporello which he sang at Covent Garden in 1897. In 1900 he was Sancho Panza in the Paris première of Massenet's *Don Quichotte* (the score of which the composer dedicated to Fugère) at the Gaîté-Lyrique, and appeared there regularly from 1910 to 1913. He returned to the Opéra-Comique in 1919 in Messager's *La basoche*, celebrating his artistic jubilee there in 1920. He appeared only once at the Opéra, in a gala performance on 1 April 1919. De Curzon described him as 'a basse-chantante of easy baritone range, with a ringing clarity in the lower register and a skilful refinement in the upper', and praised his 'comic verve filled with originality, the subtlety of which never allows it to fall into caricature or vulgarity'. The recordings he made in 1902 are much in demand with collectors. In 1929 he wrote, with Duhamel, a *Nouvelle méthode pratique du chant français par l'articulation*. It was sharply criticized by H. Malherbe for being a hazardous and complicated system for 'gymnasts, pugilists, painters and mimes', but at least it served Fugère, who at the age of 85 sang Rossini's Bartolo to triumphant acclaim at the Théâtre de la Porte-St-Martin.

HAROLD ROSENTHAL

Fugger. German family of merchants and bankers. Under their patronage the ancient imperial city of Augsburg flourished during the Renaissance as a centre of art, literature and music. The first documented evidence of the Fuggers' interest in music comes from the generation of the brothers Ulrich (1441–1510), Georg (1453–1506) and Jakob 'the Rich' (1459–1525). Ulrich compiled in 1463, evidently for his own use, a small manuscript volume of the rudiments of music, and together with Jakob initiated a family chapel for the Augsburg Carmelite church of St Anna. Its organ was built in 1512 by Jhan Behaim of Dubrau, Bohemia. The paintings by Jörg Breu the Elder on the smaller wings of the organ case, which depict the discovery of music, include figures that are believed to represent Henricus Isaac and Ludwig Senfl. One of Jakob Fugger's organists at St Anna was Paul Hofhaimer, who also served Maximilian I. There were strong financial connections between the Habsburgs and the Fuggers during this period, and musicians who served the imperial household – for example Nicolas Mayoul in 1492 – were frequently paid by the Fuggers. Jakob Fugger also endowed another Augsburg church, St Moritz, with a canonry and preaching position, which was held from 1525 to 1528 by Hofhaimer's pupil Othmar Luscinius.

During the later 16th and early 17th centuries, many important musicians lived and worked at Augsburg with the support of the descendants of Georg Fugger's sons Raimund (1489–1535) and Anton (1493–1560). The extent of this patronage is shown by the fact that over 40 printed collections of music were dedicated to them. Raimund's son Johann (Hans) Jakob (1516–75), who played an important role in bringing Lassus to Munich, left the family firm in 1564. In the following year he became superintendent of music at the Bavarian court;

there, together with Duke Albrecht V, he founded the Bavarian court library, one of the finest German libraries of the Renaissance, which was based largely on his own collection and contained a great deal of music. This was the origin of what is now the Bayerische Staatsbibliothek. Johann Jakob's youngest brother, Raimund (1528–69), also owned a sizable music library, as well as a large collection of musical instruments. Another brother, Georg (i) (1518–69), and his son Octavian II (1549–1600) owned manuscript books of lute music; Octavian's book bears an inscription indicating that he used it while studying at Bologna in 1562. On the occasion of his wedding in 1579, he was presented with a large choirbook containing works by Kerle, Lassus and Melchior Schramm, which had been copied by Johannes Dreer of the Augsburg monastery of St Ulrich and St Afra. Entries in Octavian's account books include numerous payments to musicians, and the lutenist Melchior Neusidler, whose works include a *Fuggerin Dantz*, spent his last years (1583–90) in his service. Neusidler was present, together with other important Augsburg musicians, H.L. Hassler probably among them, at the wedding of Octavian's sister Ursula (1562–1602) in 1585; shortly afterwards Hassler entered Octavian's service.

Of Anton Fugger's four sons, Johann (Hans) (i) (1531–98) and Jakob (i) (1542–98) were the most active as music patrons. Johann owned instruments and books, and a series of his letters dated 1575 indicates his knowledge of the clavichord. Jakob established a family chapel in the church of St Ulrich, to which in 1580–81 he donated an organ built by Eusebius Ammerbach, and in 1587 he also gave an organ to St Moritz. In 1584 he chose Gregor Aichinger as his official organist, and he later sponsored his study with Giovanni Gabrieli in Venice. Johannes Eccard and Narcissus Zängel were among the other musicians he employed, and he and his brother Johann attracted nearly a third of all the dedications of music books to the Fugger family. Aichinger wrote a madrigal for the marriage in 1597 of Jakob's daughter Veronica (1578–1645) to her first cousin, Albrecht (1574–1614), son of Johann's brother Marcus (i) (1529–97); for the wedding in 1598 of Johann's son Marcus (ii) (1564–1614) a motet was composed by Christian Erbach, who was in Marcus's service. Marcus organized a pious fraternity called the Sodalitas Corporis Christi, which Aichinger, who was a member, honoured with a dedication in 1606. Hassler performed at the wedding of Marcus's brother Christoph (1566–1615) in 1589, and Aichinger contributed a madrigal to it. In 1590 Christoph sent Hassler's brother Jakob to Italy to study music. Both Hasslers were among the composers who dedicated collections to Christoph. The youngest son of Johann Fugger (i), Jakob (ii) (1567–1626), met Aichinger at the University of Ingolstadt in the late 1570s, and they remained close friends. Aichinger's *Tricinia Mariana* mentions a later meeting in Rome, where Jakob was cordially received by Pope Sixtus V. For Jakob's ordination at Augsburg in 1592 Aichinger wrote a choral dialogue. Jakob later became Prince-Bishop of Konstanz, where he was the patron of Hieronymus Bildstein. Aichinger's several dedications to the sons of his patron, Jakob Fugger (i), indicate his continued association with the family. After his death in 1628 his position at St Ulrich went to Elias Fabricius, who in 1626 had become organist to Jakob's son Maximilian (1587–1629).

The devastation of the Thirty Years War severely limited both the financial power of the Fuggers and the importance of Augsburg as a centre of culture, and in the ensuing years the Fuggers patronized music only sporadically. In the late 18th and early 19th centuries the branch of the family at Babenhausen sponsored music actively and assembled a large library (now lost).

PRINTED COLLECTIONS DEDICATED TO THE FUGGER FAMILY

dedicatees' names follow in square brackets

G. Aichinger: Sacrae cantiones (1590) [Jakob (i)]; Liber secundus sacrarum cantionum (1595) [Jakob (i)]; Tricinia Mariana (1598) [Jakob (ii)]; Ghirlanda di canzonette spirituali (1603) [Jakob (ii)]; Lacrumae (1604) [Georg (iii)]; Fasciculus sacrarum harmoniarum (1606) [Hieronymus (ii)]; Solennia augustissimi corporis Christi (1606) [Marcus (ii)]; Divinarum laudum ... pars II (1608) [Karl]; Teutsche Gesenglein (1609) [Maria Eleonora, wife of Johann (ii)]; Triplex liturgiarum fasciculus (1616) [Marcus (iii), Jakob (iii)]; Encomium verbo incarnato (1617) [Maximilian]; Quercus dodonaea (1619) [Hieronymus (ii)]
B. Ammon: Breves et selectae quaedam motetae (1593) [Jakob (i)]

WILLIAM E. HETTRICK

Fughetta (It.: diminutive of *fuga*: 'small fugue'). A term used since the late Baroque period for a short, less ambitious fugue. Probably the first important use of the word was J.S. Bach's in the collection of chorale settings for organ which he published in 1739 as book 3 of *Clavier-Übung* and in which he offered two settings of each chorale, one extended and with obbligato pedal, the other brief and for manuals only; included among the latter are three miniature fugues, between 15 and 35 measures in length, which Bach designated 'fughetta'. No constructional principles seem to be implied by the choice of terminology: the diminutive is reflective simply of length. Among later composers to write such miniature fugues, Schumann chose the German equivalent, *Kleine Fuge*, for a piece in his *Album für die Jugend*.

PAUL WALKER

Fuging tune [fuguing tune, fugue tune]. An Anglo-American psalm tune or hymn tune, designed for strophic repetition, which contains one or more groups of contrapuntal entries involving textual overlap. The spelling adopted here conforms to 18th-century American practice and helps to differentiate the form from the fugue.

The fuging tune originated in Britain in Anglican parish churches as a way of elaborating metrical psalmody, taking hold among country choirs in the period 1745–65. During the 1770s, as dissenting congregations eased their opposition to choir singing, fuging tunes began to appear in collections intended for Calvinist use. In the American colonies, James Lyon's *Urania* (Philadelphia, 1761) was the first tunebook to contain fuging tunes, all of them taken from British publications. Beginning in the 1770s colonial composers took up the form, and by the mid-1780s it was flourishing in Congregational meeting-houses in New England in the hands of native psalmodists including William Billings, Lewis Edson, Daniel Read and Timothy Swan.

Many favourite fuging tunes during the form's American heyday (1783–1800), including Edson's 'Bridgewater' and Read's 'Sherburne', were settings of a four-line stanza for four-part chorus with the melody in the tenor. The first two lines proceed in block chords to a cadence; the third begins with overlapping voice entries, each part singing the same text if not precisely the same contrapuntal subject; chordal texture is restored for the repeat of the fourth line; and the second section is repeated to create an *ABB* form. Although reformers after 1800 attacked the fuging tune as irreverent and crude, it persisted in print and performance in rural areas and the southern USA, retaining popularity well into the 20th century.

RICHARD CRAWFORD

Fugs, the. American avant-garde folk group. Formed in 1964 and disbanded in 1969, its core personnel were Ed Sanders (*b* Kansas City, MO, 17 Aug 1939; guitar and vocals) and Tuli [Naphtali] Kupferberg (*b* New York, 28 Sept 1923; percussion and vocals), with a number of other New York musicians, especially Ken Weaver, Peter Stampfel and Steve Weber. They were arguably the clearest link between the styles and subcultures of the beatniks and the punks. Sanders and Kupferberg were poets and activists, and their lyrics were often obscene, satirical and politically charged. The Fugs were among the first counter-cultural bands to sing openly about drugs, sex and rebellion. Their music was brazenly and happily amateurish; some of them could barely play their instruments, a few of which, such as the erectophone, were newly invented. Musically, they drew upon such diverse precedents as folk songs, Sacred Harp singing, Jewish melodies and rock and roll. The Fugs appeared at anti-war demonstrations and promoted greater freedom of speech and action through their concerts and their recordings, the first of which was issued by Folkways. They established precedents that were important for psychedelic rock and punk, and were significant influences

on later musicians such as the Velvet Underground and Frank Zappa. They reunited several times during the 1980s and 90s.

ROBERT WALSER

Fugue (from Lat. *fuga*: 'flight', 'fleeing'; Fr. *fugue*; Ger. *Fuge*; It. *fuga*). A term in continuous use among musicians since the 14th century, when it was introduced, along with its vernacular equivalents *chace* and *caccia*, to designate a piece of music based on canonic imitation (i.e. one voice 'chasing' another; the Latin *fuga* is related to both *fugere*: 'to flee' and *fugare*: 'to chase'). Like 'canon', fugue has served since that time both as a genre designation for a piece of music and as the name of a compositional technique to be introduced into a piece of music. Imitative counterpoint in some fashion has been the single unifying factor in the history of fugue, but as compositional approaches to imitation changed so did the meanings and usages of the word 'fugue'. Between 1400 and 1700 the word held a wide variety of meanings and was employed in a great many contexts, with the idea of fugue as a compositional technique predominating. By the early 18th century musicians had come to prefer its use as a genre designation, in which guise fugue has continued until the present. It is generally distinguished on the one hand from canon, which involves the strictest sort of imitative counterpoint, and on the other from mere imitation, which involves the least strict.

Despite the prominence of fugue in the history of Western art music and its virtually continuous cultivation in one form or another from the late Middle Ages until today, there exists no widespread agreement among present-day scholars on what its defining characteristics should be. Several factors contibute to this lack of consensus: (1) between the late Middle Ages and the late Baroque a great variety of genre designations – ricercare, canzona, capriccio, fantasia, fugue itself, even motet – came and went in which techniques of imitative counterpoint figured prominently. Thus the history of fugue cannot adequately be accounted for if only pieces called fugue are studied. (2) If all pieces called fugue were collected together and compared, no single common defining characteristic would be discovered beyond that of imitation in the broadest sense. (3) Since the early 19th century genre designations have been defined largely if not exclusively by their formal structures. Formal structure, however, is not in the end a defining characteristic of fugue. As a result, there has been prolonged argument about whether fugue is a form at all (and, by extension, whether it is a genre) as well as whether any particular formal model should be considered necessary (most often recommended in this context is a ternary model vaguely reminiscent of sonata form; see Dreyfus, 1993). (4) There has developed, beginning in the mid-17th century, a theoretical, textbook model for fugue, most often associated with Fux's *Gradus ad Parnassum* and, thanks in large part to Cherubini, with the teaching of the Paris Conservatoire. The appropriateness of this model as a standard, and of its characteristics as necessary and sufficient for the genre, has been a topic of considerable debate. The most commonly recommended alternative to this model has been the fugues of J.S. Bach, especially those of *Das wohltemperirte Clavier* (the '48'). (5) Although it is generally agreed that a great deal of fine fugal composition appeared before Bach and Fux, reliance on post-1700 models has caused disagreement and uncertainty about how to define and evaluate fugal works composed before 1700.

The historical survey beginning in §2 below is preceded by a detailed analysis of the C minor fugue from book 1 of the '48' as it is commonly presented by English speakers. This particular fugue is frequently cited as a paradigm, and it is through just such an analysis that over the years many musicians have encountered fugue for the first time. The analysis introduces the most important standard fugal terminology and demonstrates the kind of norm that many musicians consider essential to define the genre. The emphasis throughout the survey that follows will be on the changing nature and uses of fugal composition and the various meanings of the word as understood by musicians of each era.

1. A CLASSIC FUGUE ANALYSED. The fugue in C minor from book 1 of Bach's '48' (ex.1) is now generally described by English speakers as follows.

The fugue is for three voices, which may be labelled soprano, alto and bass, and the independence and integrity of each are strictly maintained until the last two bars, when chords are introduced to lend fullness and finality. A single voice, the alto, begins the fugue by stating the 'subject'. The subject is in the tonic key: it begins on the tonic note C, emphasizes the dominant note G (downbeat of bar 2) and ends on the mediant note (downbeat of bar 3). Once the subject has been stated in its entirety, the second voice (the soprano) enters with the same subject, but transposed to the key of the dominant. This second statement is termed the 'answer'. Such a transposition often requires, as here, that the original intervals of the subject be altered in order to keep the answer close to the tonic key. More specifically, whereas tonic note is answered by dominant note (i.e. transposed up a 5th or down a 4th), dominant note is answered by tonic rather than by supertonic. In this particular answer, the second note is an exact intervallic reproduction, producing F♯ and signalling the key of the dominant, G minor, but the fourth note is changed from D (supertonic) to C (tonic). All other intervals from the fifth note to the end of the answer are exact renderings of the subject's intervals. An answer of this sort, in which intervals are altered to remain close to the tonic key, is called a 'tonal answer'. Any answer in which no intervals of the subject are altered is called a 'real answer'.

While voice 2 states the answer, voice 1 continues with counterpoint against it. This counterpoint may, as here, be material that returns frequently during the course of the piece, usually as counterpoint to the subject, or it may present material that never returns. Especially in the former case, this thematic material is called a 'countersubject'. Both answer and countersubject conclude on the downbeat of bar 5, at which point both continue in counterpoint for two bars without stating either the subject or the countersubject in complete form. These two bars constitute what is often called a 'codetta'. Although neither thematic unit is present in its entirety, the material in voice 2 is a melodic sequence based on the opening

motif of the subject, and voice 1 contains scalar passages reminiscent (although in contrary motion) of the countersubject. The final voice enters with the subject (in its original, not its answer, form) at the beginning of bar 7, accompanied by voice 2 with the countersubject. Voice 1 states yet another countersubject, though one that is treated rather freely during the course of the fugue. All three – subject, countersubject 1 and countersubject 2 – end with the downbeat of bar 9.

The opening eight bars make up the fugue's 'exposition'. Standard requirements of a fugal exposition are that (1) the voices enter one by one with the subject, each waiting until the preceding voice has completed its statement before entering; (2) each voice enter with the subject, in either subject or answer form, only once (occasionally the first voice to enter may restate the subject at the end of the exposition); and (3) the entries alternate between subject and answer statements. Additional options are that (1) the first statement of the answer may be accompanied by a countersubject, which is then stated in turn by all voices (except the last) as accompaniment to the next statement of the subject; and (2) there may be a codetta between statements 1 and 2 and statement(s) 3 (and 4).

An exposition is the most strictly regulated portion of a fugue. The remainder is understood to be an alternation between sections in which the subject is stated in its complete form by one or more voices and sections in which it is not present in its complete form. The latter, called 'episodes', may or may not take any of their motivic material from the subject or countersubject. Complete statements of the subject may take place in keys other than the tonic, in which case episodes serve to modulate to and from those keys. Statements may also incorporate some learned contrapuntal device that alters the subject in some way but leaves it complete and recognizable. These devices include augmentation (the slowing down, generally by a factor of two, of the original note values), diminution (halving or quartering the note values), inversion (stating the subject upside down) and stretto (introducing a second statement before the first has finished). It is generally understood that the fugue will end with some sort of statement of the subject in the tonic key. Any material following that statement is termed a coda.

Beginning with bar 9, Bach's C minor fugue proceeds as follows: there are four episodes (bars 9–10, 13–14, 17–19 and 22–6). Each takes its thematic material from the opening five-note motif of the subject and the scalar passages of quavers and semiquavers in the two countersubjects. These motifs are generally treated in melodic sequence. In addition, the first two episodes modulate to and from the key of the relative major, E♭. The complete statements of the subject that appear in between involve in each case subject and two countersubjects distributed among the three voices. In bars 11–12 (in E♭) the soprano carries the subject, in 15–16 the alto, in 20–21 the soprano again, and in 26–8 the bass. After a brief connecting passage the final statement of the subject, in its original form and at its original pitch, is stated by the soprano over a C pedal point in the bass and accompanied by a few full chords in the alto. The entire fugue appears in ex.1. Most elements of a 'textbook' fugue are present in Bach's C minor fugue. One of its most attractive features is its thematic tightness, that is, the presence of material from the subject or one of the countersubjects in virtually any voice at any point in the fugue. Also present is a modulation to a related key with the subject stated in that key. What this particular fugue lacks is the use of any of the contrapuntal devices enumerated above.

2. Medieval and Renaissance vocal music.

(i) 14th and 15th centuries. The words 'fuga', 'chace' and 'caccia' all denote the chase or hunt, and in the 14th century all acquired the same musical meaning, namely a piece of music consisting either entirely or principally of two or more voices in canon. Canonic technique was, along with *Stimmtausch*, the earliest type of imitative counterpoint in Western music, and it may therefore fairly be said that the word 'fugue' has been associated with imitative techniques since their first formulation. By the 15th century, 'chace' and 'caccia' had largely fallen from use and 'fugue' became the term of choice for any piece in which all voices participated in the canonic performance of a single melodic line (see, for example, the fugues by Oswald von Wolkenstein).

As early as the mid-15th century, however, 'fugue' had begun to take on new meanings. As canonic technique came increasingly to be incorporated into pieces that also included non-canonic voices, musicians often continued to apply the word, though not to the piece as a whole; they reserved it instead for the canonic voices. Also at this time, musicians began to use 'fugue' to designate the compositional technique itself. Johannes Tinctoris, in his dictionary of musical terms written about 1472, defined it as 'the sameness [*idemtitas*] of the voice parts in a composition. The notes and rests of the voice parts are identical in [rhythmic] value, name [i.e. hexachord syllable], shape and sometimes even location on the staff'. Here fugue is not a piece of music or group of voices governed by canonic technique; it is the technique itself, the quality of having made the voice parts identical. Perhaps the best-known use of the word in this sense is Josquin des Prez's *Missa ad fugam*, or 'mass by means of fugue'.

(ii) 16th century. During the 15th century, as composers gradually abandoned the compositional process of writing one voice at a time above a cantus firmus in favour of the simultaneous composition of all voices a few bars at a time, the point of imitation began to replace canonic writing as the pre-eminent technique of imitative counterpoint. To write a motet or mass movement using this technique, the composer first created for each phrase of text a musical phrase that fitted its Latin declamation well. The piece then proceeded as a series of imitative sections, each devoted to its own textual/musical phrase which was treated in a manner similar to (if much freer than) the fugal exposition described in §1 above. These imitative sections, usually referred to today as 'points of imitation' but called 'fugues' by musicians of the time, might also alternate with occasional homophonic sections for contrast. A classic early example of a piece composed in this manner is Josquin's four-voice *Ave Maria . . . virgo serena*. Musicians never adopted the word 'fugue' as a genre designation for such pieces, however. The first composers to import point-of-imitation technique into instrumental music – beginning with the *Musica nova* (1540[22]) of Julio Segni, Willaert and others – chose instead the designation 'ricercar', a word meaning 'to seek out' or 'to search'. Throughout the 16th century, only the

strictly canonic piece might bear the genre designation 'fugue'.

North of the Alps, composers of the post-Josquin generation, most notably Clemens non Papa and Nicolas Gombert, made point-of-imitation technique the cornerstone of their style. As described by the German theorist Gallus Dressler, an enthusiast for the music of Clemens, in his manuscript treatise *Praecepta musicae poeticae* dated 1563, a 'fugue' (i.e. point of imitation) that appeared at the beginning of a piece needed to be constructed in such a way that the mode of the composition was made clear at the outset. This meant that the melodic motion of the voices should emphasize the important modal notes of final, dominant, mediant and psalm tone tenor(s), and that the imitation should show a certain clarity of structure. As a result the opening 'fugue' of a 16th-century motet resembles in many respects the exposition of an 18th-century fugue: its voices are most likely to enter on final (tonic) and dominant, its theme is also likely to feature those notes prominently, and each voice is likely

Ex.1 Bach: Fugue in C Minor from *Das wohltemperirte Clavier* (the '48') book 1

to wait until the previous one has completed its thematic statement before entering.

Dressler borrowed the tripartite division of beginning (*exordium*), middle (*medium*) and end (*finis*) from classical rhetoric to describe a composition's overall structure, and indicated that 'fugues' appearing in the body of the piece (i.e. the *medium*) could be handled much more freely than the opening one (which Dressler defined as the *exordium*). This freedom extended to the allowing of thematic entrances on notes other than final and dominant, the greater altering of the theme from statement to statement, the incorporation into the theme of notes 'outside the mode', and considerable use of stretto. For the *finis*, however, the composition should close with a strong reaffirmation of the mode.

Here again certain parallels can be drawn, this time between the structure of a motet and that of an 18th-century fugue: both begin and end 'in the key' (or mode) and with greater regularity but may wander (i.e. touch on other notes or keys) and behave more freely in the body

of the composition. Most of the motets of Clemens and Gombert fit Dressler's model well.

South of the Alps, meanwhile, Clemens's and Gombert's Flemish contemporary Adrian Willaert and his Italian pupil Gioseffo Zarlino took a different attitude towards imitative counterpoint and attempted instead to preserve Tinctoris's 15th-century definition of fugue as exact imitation. In his *Istitutioni harmoniche* (1558) Zarlino subdivided imitative counterpoint into four categories, for which he coined the expressions *fuga legata*, *fuga sciolta*, *imitatione legata* and *imitatione sciolta*. Whereas musicians in the north had already begun to label all imitative counterpoint 'fugue', Zarlino insisted that the word be reserved exclusively for instances in which the following voice (which he called *consequente*) reproduced exactly all the intervals and rhythmic values of the preceding voice (*guida*). *Imitatione* should refer to instances when the *consequente* did not reproduce the *guida* exactly. The adjectives *legata* and *sciolta* then distinguished further between, respectively, passages in which the *consequente* continued to imitate the *guida* from beginning to end of the piece, and those in which the imitation was broken off at some point. Zarlino also allowed for both *fuga* and *imitatione* in contrary motion, for which he offered the modifier *per arsin et thesin* (which was a Greek expression literally designating upbeats and downbeats).

Zarlino pointed out that *fuga* was possible only when the *consequente* was a perfect interval from the *guida*. This requirement was a direct descendant of Tinctoris's insistence that the solmization syllables of the two voices be identical, which restricted the imitation to the three hexachords. However, a perfect interval does not guarantee exactness of imitation. For instance, any imitative counterpoint written at the 4th or 5th can be melodically exact only so long as the voices remain within the bounds of their respective hexachords. Thus, if Zarlino's distinction between exact and inexact replication is to be strictly maintained, it must be conceded that his technique of imitation can take place at any interval, perfect or imperfect.

Scholars are not in full agreement about whether Zarlino meant to allow for the technique of *imitatione* at a perfect interval, but in any case the theorist himself seems to have recognized a conflict between categories of imitative counterpoint based on the degree of exactness of replication and those based on imitation at perfect as opposed to imperfect intervals. To address this problem, Zarlino created a final category, which he called 'part fugue and part imitation' but admitted was often called fugue. The example he offered involves two voices that imitate each other canonically at the 5th. At only three places does the second voice answer inexactly, and in each case the inexactness consists of an F answered by a B natural rather than the B♭ that would be required for precise replication.

Willaert's music reflects Zarlino's thinking closely in its penchant for introducing imitative counterpoint horizontally into a composition voice by voice. The point of imitation almost never serves as the building-block for Willaert's mature works as it does for the works of Clemens and Gombert, whereas canon is frequently encountered (see, for example, *Verbum supernum* and *Praeter rerum seriem* from *Musica nova*, 1559). Nevertheless, despite Willaert's prestige and the lasting influence of Zarlino's writings, the wave of the future was not canon but the point of imitation, which allowed a much more flexible treatment of the words and thus fitted better with humanistic ideals about text expression and clarity of declamation. In the end, therefore, Zarlino's role in the history of fugue is a peculiar one. On the one hand, the traditional idea of fugue as precision of imitation and its manifestation in canonic writing quickly faded. Yet, at the same time, the categories of imitative counterpoint which he invented lived on, though with very different meanings from those intended by their creator.

As the 16th century drew to its close, the rise of humanism, with its emphasis on clarity of text, caused many musicians, especially in Italy, to question altogether the suitability of fugal techniques in vocal music, since their use virtually ensured that different words were being sung simultaneously by the various parts. By the 1580s, when Vincenzo Galilei began to call for the abandonment of fugal writing, it was apparent that the most important and innovatory genre of music was the Italian madrigal, in which fugue played no significant role. Even such conservative composers as Palestrina and Lassus began, partly under the influence of Counter-Reformation concerns for textual clarity, to show much greater caution in introducing points of imitation into their motets, in contrast to its almost ubiquitous presence in the works of Clemens and Gombert. Introduce it they did, however. In fact, Lassus continued to be cited by German theorists writing about fugue throughout the first half of the 17th century, and in the 1660s Christoph Bernhard chose Palestrina's offertories to illustrate his chapters on fugue. The first major composers of vocal music in the new Baroque style, however, all but abandoned fugal techniques for their *seconda pratica* music. (A piece such as Monteverdi's *Piagne e sospira*, from the fourth book of madrigals, is a rare exception.) Fugue found no place in the new genres of opera, monody or cantata, nor, surprisingly, did it play a role in the early development of the oratorio. Even such a retrospective collection as Schütz's *Geistliche Chor-Music* (1648) is of little significance in the history of imitative counterpoint. It was not until towards the end of the 17th century that fugue once again re-entered the sphere of vocal music in a significant way. By that time, a great deal had changed.

3. 16TH-CENTURY INSTRUMENTAL MUSIC. Although histories of Western music tend to emphasize a sharp division in musical style about 1600, the history of fugal techniques in instrumental music cuts across this divide. A direct and continuous line of development can be traced from the ricercares of Segni's *Musica nova* of 1540 to the fugues of *Das wohltemperirte Clavier*. Surprisingly, this development has been less well mapped out than one might expect. Perhaps the most troublesome of the several difficulties inherent in the study is the issue of genre and terminology. Very few of these pieces written before 1700 were designated as fugues, and other designations abound. The best way to approach this body of music and to tie all the compositions together is to consider fugue in its guise as a compositional technique.

From its inception the imitative ricercare seems to have carried connotations of learnedness – that is, it served either as compositional study or, in Newcomb's phrase, as 'intellectual chamber music'. Michael Praetorius, writing at the beginning of the next century, described its

function as follows (his use of 'fugue' is discussed below, §4(i)):

Fugue: Ricercar

Fugues are nothing more than ... repeated echoes of the same theme on different degrees [of the scale], succeeding each other through the use of rests... In Italy they are called ricercars. RICERCARE is the same thing as 'to investigate', 'to look for', 'to seek out', 'to research diligently' and 'to examine thoroughly'. For in constructing a good fugue one must with special diligence and careful thought seek to bring together as many ways as possible in which the same [material] can be combined with itself, interwoven, duplicated, [used] in direct and contrary motion; [in short,] brought together in an orderly, artistic and graceful way and carried through to the end.

Because some collections were published in partbooks, some in open score, and a few in keyboard score, earlier scholars (e.g. Apel) attempted to uncover a stylist distinction between those collections intended for instrumental ensemble performance (i.e. in partbooks) and those intended for keyboard (in score or keyboard notation). More recently, Newcomb has argued against such a distinction and has noted instead consistency of style and purpose that cuts across the differences of format. Interest in the later classic fugue has also led scholars frequently to overemphasize the presence of monothematicism in these works. The 16th-century ricercare makes much better sense if understood as the instrumental counterpart to the motet in both seriousness of purpose and severity of contrapuntal style; indeed, it represents the first genre of purely instrumental music able to challenge the sophistication of Netherlandish vocal polyphony.

Furthermore, because it had no text, the instrumental ricercare escaped the humanistic criticism levelled at vocal fugue, and composers felt free to embrace the genre and to continue to explore new possibilities. Most 16th-century ricercares proceed, like the imitative motet, as a series of points of imitation, each based on its own theme. Also reminiscent of the motet in these cases is a frequent emphasis on the opening point as the longest and most systematic. The two genres differ in several respects, however. To compensate for the ricercare's lack of text, composers sought out a more purely musical solution to the problem of continuity and structural logic, for which they turned to techniques of thematic manipulation. A point may be quite long in comparison to its vocal counterpart, therefore, with many more thematic statements. A much less tidy compartmentalization of themes each to its own point is found, and considerably greater and more systematic use of the contrapuntal devices of augmentation, diminution, inversion and stretto is to be expected.

Adding to the impression of these ricercares as systematic pieces for study or the display of compositional skill is their frequent publication in collections devoted to the genre, usually by a single composer, and often organized with exactly one ricercare in each mode. Towards the end of the 20th century several such collections of 16th-century ricercares once thought lost were rediscovered, and a re-evaluation of the genre was undertaken by Newcomb, who identified two distinct 'schools' of ricercare composition in the 16th and early 17th centuries, the first centred in Venice, the second in Ferrara and, later, Naples. The most important composers in the first group are Willaert, Girolamo Cavazzoni, Buus, Padovano, Merulo and Andrea Gabrieli; the second includes Luzzaschi, Jacques Brunel, Macque, Mayone and Frescobaldi. Although these works differ in significant respects from the classic fugue of the 18th century, they certainly represent the oldest instrumental works to merit detailed study in a history of fugue.

4. 17TH CENTURY. During the first half of the 17th century, fugue as a compositional technique might have seemed to many musicians to be well on its way to the historical scrap-heap as the most pre-eminent composers focussed increasingly on opera, cantata and oratorio. And yet Monteverdi had staked his defence of modern music on the premise that the old style and its technical basis remained valid and worthy of attention. Certainly the ricercare's role as compositional study, and its absence of text, made it well suited for continued cultivation of the *stile antico*. In addition to its museum-piece status, however, fugue continued to evolve, especially in the hands of organists and violinists. By around mid-century most of the characteristics of the classic fugue as we recognize it today were in place, and as the century progressed to its conclusion they gradually reintegrated themselves into most genres of music and most parts of Europe.

(i) Fugue and genre in organ music, 1600–20. The imitative ricercare had been throughout the 16th century an Italian phenomenon, cultivated exclusively by composers – either Italian or northern – working in Italy. By the early years of the new century, however, this monopoly had come to an end as keyboard composers working in Germany and the Low Countries also began to produce fugal works characterized by rigorous handling of counterpoint, extended length, carefully controlled dissonance and strictly maintained part-writing. With the wider geographic cultivation of this genre came a variety of labels for such works. The most important Italian composer of such pieces in the early 17th century, Frescobaldi, used at various times the designations fantasia, ricercare, canzona and capriccio. Roughly speaking, these four can be grouped according to the nature of their thematic material into the slower and more ponderous (fantasia and ricercare) and the quicker and livelier (canzona and capriccio). The first important German composer to cultivate the serious fugue was Hassler (a pupil of Andrea Gabrieli), who, judging from surviving manuscripts, chose two designations, ricercare and fugue. In the Low Countries Sweelinck and Peeter Cornet preferred 'fantasia'.

It is not certain how the various composers came to choose such a variety of titles for pieces that are more alike than different. Sweelinck presumably chose 'fantasia' under the influence of the English, who preferred that designation for most of their untexted pieces without vocal models. (Frescobaldi's use of the term followed shortly after a visit he made to the Low Countries.) Praetorius's definition of ricercare quoted above implies that 'fugue' was appropriated because of its connotations of seriousness and sophistication. 'Fugue' may have appealed also to the Germans because of its international character, as opposed to the very Italian 'ricercare'. Frescobaldi's use of 'canzona' and 'capriccio' introduces yet another layer into the terminological morass. In both of these cases, the kind of lively thematic material traditionally associated with the *canzona alla francese* is treated with the contrapuntal sophistication and length of the ricercare.

Probably the most significant compositional trend to emerge in serious fugal works at the beginning of the 17th century was an emphasis on monothematicism. Because monothematicism could easily lead to tediousness in a long work, however, composers sought to maintain interest by varying their treatment of the theme as the work progressed. Two approaches predominated. For the first a series of sections, neatly dovetailed to create a continuous flow from beginning to end, proceeds with either a new counter-theme or a new contrapuntal device applied to the principal theme in each new section. A classic example is Sweelinck's *Fantasia chromatica*. See Table 1.

In the second category, best exemplified by many of Frescobaldi's works, the sections are fewer but not dovetailed and the principal theme is rhythmically transformed from one to the next, usually including at some point a change of metre from duple to triple. Such pieces are sometimes referred to as 'variation canzonas' or 'variation fugues'.

Both these types show many elements of the later classic fugue: severity of contrapuntal style, strictness of part-writing, greater regularity of exposition than in the old ricercare (about which more below), thematic hierarchy with a single principal theme, and emphasis on learned devices. Overall structure, however, differs considerably. Whereas the classic fugue proceeds as a series of well-defined sections alternating between episodes and self-contained groups of thematic statements, the early 17th-century 'learned fugue' proceeds as a kind of continuous unfolding of contrapuntal possibilities with only a few major cadences to mark off sections.

Certain German musicians of the early 17th century also began to designate contrapuntally free, short pieces fugues. These works traced their ancestry to the lively Parisian chansons of the previous century, instrumental intabulations and arrangements of which Italian composers had designated *canzone alla francese*. Both the chanson and the canzona often consisted of a short series of brief sections, each beginning with simple imitative entries but quickly lapsing into chords or melody-and-accompaniment texture. The Zarlinian rules of counterpoint were more often flouted than followed, and keyboard canzonas often showed in addition little regard for strictness of part-writing and frequent lapses into stock keyboard figuration. Bernhard Schmid the younger, in his *Tabulatur Buch* of 1607, included 12 pieces written by Andrea Gabrieli, Adriano Banchieri and other Italians that he described as 'Fugues or, as the Italians name them, Canzone alla francese'. A similar tablature book was published in 1617 by Johann Woltz, who included in it 20 fugues from the pen of Simon Lohet, a Netherlander who had served as organist to the Württemberg court in Stuttgart until his death in 1611. Although modest in nearly every respect, Lohet's are the first group of non-canonic pieces to be called fugues. It is characteristic of this experimental age that 'fugue' could serve as a genre designation for these simple, almost banal works while Hassler and Praetorius were reserving it for pieces of the most sophisticated, serious sort.

(ii) Theory: terminology, structure. Zarlino's attempt to restrict the word's meaning to imitative counterpoint in which the imitation is exact failed to take hold, despite later Italian theorists' attempts to preserve his terminology. What these later writers did instead (inadvertently, it appears) was to keep Zarlino's restriction of fugue to the perfect intervals but to suppress the ideal of exactness of imitation. Because the two are not always identical, the end result of their change of emphasis was that exact imitation came to be replaced by the relationship between fugue and mode. In other words, for early 17th-century theorists the technique of fugue took place at a perfect interval not in order that the intervals might remain identical but in order to emphasize final and dominant notes of the mode.

To this restriction was then added, by Girolamo Diruta in 1609, the theory of tonal answers. Both Zarlino and Dressler had insisted that modal clarity was important in the beginning of a work, Zarlino by insisting that the voices begin on final and dominant of the mode, Dressler by advising the composer to see to it that the thematic material emphasized those and other important modal notes. Diruta, a disciple of Zarlino, took these admonitions one step further and insisted that they be applied not only to the opening theme but to its answer as well. As a result, given that theme and answer were to begin on final and dominant (in either order) and were to emphasize important modal notes, and given that the octave was divided unevenly into a 5th and a 4th, then the answer had to be altered such that 5th was answered by 4th and 4th by 5th. The rather general advice of the mid-16th-century musicians had become by the early 17th century a specific, strict edict.

Progressive musicans of the time quickly adopted Diruta's theory. Marco Scacchi, for instance, used it repeatedly in his *Cribrum musicum* of 1643 to fault Paul Siefert's handling of the *stile antico* in a collection of psalm settings published in 1640. Siefert's defence that he was simply doing what his teacher, Sweelinck, had taught him was probably true, given the freedom with which most 16th-century composers handled such imitation, but by the 1640s the majority of musicians considered tonal answers a virtual necessity to ensure modal clarity. Schütz's early collection of double-choir psalms (published only a few years after his study with Giovanni Gabrieli) and his *Geistliche Chor-Music* of 1648 (possibly published as a practical response to the Scacchi–Siefert

quarrel) contain numerous instances of opening tonal answers and not a single real answer.

Musicians in the north had never accepted Zarlino's definitions of fugue and imitation, and continued instead to experiment with their own subdivisions of imitative counterpoint. They generally referred to all imitative counterpoint as fugue, which most writers divided into canonic (variously called *fuga ligata*, *totalis* or *imaginaria*) and non-canonic (*fuga soluta*, *partialis* or *realis*). Sethus Calvisius further subdivided the latter into *fuga ejusdem modulationis* and *fuga diversae modulationis*, or fugue of either similar or diverse melodic motion, which he understood to mean, respectively, imitative counterpoint in which the melodic contour of the theme was maintained (whether exactly or approximately) by the answering voices and that in which imitation was perceived to be present even though melodic contour was not maintained (his example was the opening of the Lassus motet *Inclina Domine*). Joachim Burmeister, by contrast, categorized the techniques of non-canonic imitation based on rhetorical terminology, although he seems to have fitted fugal techniques to his chosen rhetorical figures rather than subdividing fugal techniques first and then naming them. Those figures he chose to relate to fugue were *metalepsis*, for which he chose imitation with two themes; *hypallagē*, imitation in inversion; and *apocopē*, imitation of a very brief head-motif. Calvisius even went so far as to allow 'fugue' to designate virtually any repetition of musical material in a composition, including ostinato technique and the answering back and forth of polyphonic textures in double-choir music. Others were more restrictive. Burmeister, for instance, insisted that only if all voices of the texture participated in the imitation of a theme should the name 'fugue' be used.

None of these schemes for subdividing non-canonic imitation took firm root, however, and the Italian theory of fugue as imitative counterpoint handled according to proper treatment of the mode began to find wide acceptance. With this understanding of fugue as a basis, the south German writer Wolfgang Schonsleder distinguished in 1631 between 'long [fugues] that are worked out' and 'short ones or imitations', and he suggested as paradigms works by Palestrina and Frescobaldi for the former category and duets by Monteverdi for the latter. With this division of imitative techniques into canon, fugue and imitation, the essence of our understanding of these words is in place.

All the above definitions refer to fugue as a compositional technique involving imitative counterpoint. The word continued to be applied also to pieces of music, but here again there was no universal agreement. Musicians had of course inherited from the late Middle Ages the idea of fugue as canon, to which in the Renaissance they added fugue as a point of imitation. The former category proved surprisingly durable and was still being used by German school treatises as late as the early 18th century. (It is interesting to speculate whether Bach's first encounter with the word was when he sang canons while a schoolboy in Ohrdruf.) Fugue as a single point of imitation also survived the Baroque. Praetorius, for instance, defined motet style as the alternation of 'harmonies and fugues' and the canzona as a textless piece 'with brief fugues and artful fantasies'. Keyboard composers in the early 17th century (e.g. Lohet in south Germany and Heinrich Scheidemann in the north) sometimes wrote short pieces entitled 'fugue' that consisted of nothing more than a single point of imitation. Well into the 18th century French organists designated as fugues similarly brief imitative works, and Henry Purcell understood the word thus in his discussion of fugue published by Playford in 1694. Perhaps the last such use of the word can be traced to early 19th-century New England, where William Billings and his colleagues took up the form of the 'FUGING TUNE', which had first become popular in 18th-century English parish churches.

As already noted, German musicians at the beginning of the 17th century introduced 'fugue' as a genre designation for non-canonic pieces widely disparate in style and intent. One final meaning of the word turns up in Italy about 1600, where a few musicians used it to refer to the thematic material of an imitative piece (e.g. 'Ricercar primo tono con tre fughe'). Perhaps the most famous composer to use the word in this way was Monteverdi, whose six-voice *Missa da capella* (1610) is composed with ten 'fugues', derived from Gombert's motet *In illo tempore*, which are spelt out even before the piece begins.

The origin of the textbook fugue's structural principles, until recently obscure, can now be traced with some certainty. In the early years of the 17th century the two most common models were the motet, with its series of points of imitation each based on a different theme, and the extended keyboard fugue, with its longer sections, few cadences, and almost continuous presence of the theme. What was lacking was a series of much shorter points of imitation (or, in modern terms, groups of thematic statements) all based on the same theme but set apart from each other in some way.

The earliest theoretical source to describe such a scheme is a manuscript treatise, *Sequuntur regulae compositionis*, surviving in several copies and now thought to be the work of Antonio Bertali, a north Italian violinist and Kapellmeister of the imperial court in Vienna from 1649 to 1669. Bertali's text treats the study of counterpoint as a progression of species counterpoint leading to the writing of fugue, as does Fux's classic *Gradus ad Parnassum*. Bertali's treatise outlines for fugal composition the following structural plan: (1) once a theme has been selected, it should be assigned to an appropriate mode. (Note the inversion of the modern approach, which is to select the key first, then devise a theme for it.) (2) The opening point of imitation brings in the theme in systematic fashion in all voices (beginning on final and dominant of the mode), after which free counterpoint leads to the first cadence. (3) Successive points of imitation, all of course based on the same theme, should be distinguished in some fashion, for which the author recommends exchanging starting notes among the voices or switching the order of entry of the voices. (4) In the body of the composition, the theme may be brought in on notes other than final or dominant. (5) Stretto is particularly prized, but only in the middle or towards the end of the piece, since it generally requires thematic alteration and does not allow for careful treatment of mode. (6) The whole piece will generally consist of four or five such sections, with the theme presented prominently at the very end. Here, then, we find most elements of the modern fugue: carefully worked-out opening point of imitation (i.e. exposition), groups of thematic statements separated from each other (by free counterpoint), variety among the thematic groups, possible movement

to closely related keys for later groups (described as 'beginning the theme on other notes'), fondness for stretto and prominence of the theme at the end of the piece. Lacking only are the countersubject and the well-defined episode.

This model obtains, not in keyboard works of the period, but in pieces entitled canzona or sonata and composed by Bertali's north Italian violinist colleagues. The fugues found in these works do not generally form the entire piece, but rather one section (often the first) of a multi-section work. One of the first composers of such pieces may be Tarquinio Merula, whose *Primo libro delle canzoni* of 1615 already includes several. Massimiliano Neri and Giovanni Legrenzi also wrote sonatas incorporating such fugues. The contibution of all these composers to the history of fugue merits further study.

(iii) Second half of the century. Much remains to be learnt about the history of fugal composition in the second half of the 17th century, and this lack of knowledge has led some scholars to attribute to Bach and Handel innovations in fugal writing with which they should not be credited. Only in the realm of keyboard music is there a relatively complete and well-rounded picture of the music of the time. There is, however, no questioning that, with respect to fugal composition, the years 1650–1700 witnessed the gradual but complete passing of the mantle from Italy to Germany, where it largely remained into the 20th century. Several factors contributed to this transfer: Italy's gradual abandonment of interest in keyboard music and inexorable move towards paramountcy of opera; Germany's continued fascination with counterpoint (even in the music of such early Baroque composers as Schütz); and the eagerness with which German musicians learnt from such Italian teachers as Frescobaldi and Bertali.

Perhaps the key figure in this transfer of fugal 'authority' from south to north was the Stuttgart-born Johann Jacob Froberger, who studied with Frescobaldi, worked for the Holy Roman Emperor in Vienna (at the same time as Bertali), and during the 1650s travelled widely to other parts of Germany, France and even England. The four autograph manuscripts of keyboard works that Froberger presented to the Emperor Ferdinand III in the years around 1650 include easily the best fugal compositions written at a time when most of Europe's leading composers were absorbed with opera, cantata and oratorio. Froberger's fugues follow closely the example of Frescobaldi and comprise the same four genre designations of ricercare, fantasia, canzona and capriccio, understood in the same way. Of even greater historical significance than the quality of these works may be Froberger's role in awakening interest in fugal composition among composers north of the Alps. Inspired by Froberger's example the Frenchman François Roberday published in 1660 a volume of *Fugues, et caprices* explicitly modelled after the composer's variation fugues and even including one of Froberger's own pieces. French composers did not follow Roberday's lead, but in Germany Froberger's influence bore spectacular fruit. Through his personal contacts with Schütz's pupil Matthias Weckmann as well as others, he reawakened the interest of the Germans in large-scale fugal composition. In north Germany, where Weckmann spent most of his career, this led to significant experimentation with fugue and invertible counterpoint. In central Germany, where Froberger's music circulated widely in manuscript, the interest in fugal writing led directly to Bach and Handel.

The unbroken tradition of serious fugal composition begun in the 1540s continued through this period and, indeed, well into the 18th century. Composers retained the two types developed by keyboard composers early in the 17th century – namely, Sweelinck and Hassler's continuous piece in a single metre with contrapuntal devices, and the 'variation fugue' cultivated by Frescobaldi and Froberger. Italians who composed such extended fugal works include Fasolo, Battiferri, Fabrizio Fontana and Pasquini. Among the many German contributions one might mention as particularly significant the set of 12 ricercares compiled by Poglietti and keyboard fugues (variously designated) by Weckmann, J. Krieger and N.A. Strungk (a complete list is given in Riedel, 1979).

Also during this half-century fugue took on a much greater significance within the genre of toccata and its sometime equivalent, praeludium. Improvisation and freedom had traditionally been among the genre's principal characteristics, but since the 16th century many keyboard works entitled toccata had included relatively freely imitative sections interspersed among the more improvisatory passage-work. Froberger also began to bring a contrapuntally freer version of the variation fugue into this genre, with the two or more fugal sections based on rhythmic variants of the same theme. Undoubtedly the best such pieces are the organ praeludia of Buxtehude. Although it was not the model he ultimately chose for most of his fugal writing, Bach himself wrote a few pieces incorporating fugue in this manner (e.g. the E major Praeludium BWV566).

Probably the most important innovation in fugue during the period under discussion was developed in the north German cities of Hamburg and Lübeck by a circle of musicians that included Weckmann, Buxtehude, Reincken and Christoph Bernhard. In the 1660s and 70s these men discovered a common interest in the compositional potential of combining fugal writing (to which they had been awakened most probably by Froberger) with invertible counterpoint, about which they had learnt through Zarlino's *Istitutione harmoniche* as taught by Sweelinck to their teachers Jacob Praetorius (ii) and Heinrich Scheidemann. This combination led to two significant and related innovations: the idea of countersubject and the so-called permutation fugue.

An incipient form of both phenomena can be seen in the fugue from the fifth suite of Reincken's *Hortus musicus* (1688) for instrumental ensemble, whose structure is shown in Table 2 (where A represents the opening

theme, B the second theme, 'xxx' free counterpoint, and *dux* and *comes* the two forms, subject and tonal answer, of theme A). Though tediously formulaic, Reincken's fugue employs Bertali's groups of thematic statements (five altogether), with variety from one to the next provided by the exchanging of starting notes (S I begins the first group with the *dux* form, but begins the second with the *comes* form). To this is added a second theme that accompanies every statement of the first theme except the opening one. If episodes were to be added between groups of thematic statements, and the scheme in general loosened up, the result would bring Reincken's model very close to the classic 18th-century fugue.

If instead the formulaic nature of Reincken's model were emphasized by the addition of further themes and the elimination of the free counterpoint, the resulting scheme would be close to that of the earliest Bach vocal fugues, called by modern scholars permutation fugues. The opening fugue from BWV182, *Himmelskönig, sei willkommen*, for instance, is constructed as shown in Table 3 (A, B, C and D refer to the themes, T and D to entries of theme A on tonic and dominant). The permutation fugue consists of fugue and canon in equal measure. Characteristic of the former is the presence of a fugal exposition, complete with tonal answer, properly spaced entries and strict alternation of tonic and dominant for entries. Characteristic of canon is the near absence of non-thematic material, in that each voice continues with the same material as every other once it has stated the opening theme complete, and returns to the opening theme once it has fully stated all themes. Although the first known piece to fit this description appears to have been composed by Johann Theile for instructional purposes and is found in his treatise *Das Musikalisches Kunstbuch*, Bach was among the first to employ the technique successfully in a musical context.

5. THE GOLDEN AGE: EARLY 18TH CENTURY. C.P.E. Bach, writing to Forkel about his father in 1775, remarked: 'Through his own study and reflection alone he became even in his youth a pure and strong fugue writer'. His models, according to Carl Philipp Emanuel, included Froberger, Kerll, Pachelbel, Frescobaldi, J.C.F. Fischer, Strungk, Buxtehude, Reincken, Bruhns and Böhm. Among the results of this study were the following: (1) although his earliest fugues bear a variety of designations, including Canzona (BWV588), Capriccio (BWV993), Praeludium (BWV566) and even Imitatio (from the Fantasia BWV563), Bach seems early on to have settled on fugue as the designation of choice for all pieces based on non-canonic imitation. This choice is not entirely expected; it may reflect the influence of Pachelbel, the teacher of Bach's older brother (and first teacher) Johann Christoph and the only composer listed above who preferred that designation. (2) After some experimentation with other models for fugal writing, Bach settled for his keyboard or organ fugues on the model ultimately derived from Bertali, but including by this time frequent use of a countersubject and episodes and eventually incorporating tonal harmony and modulation to related keys. (3) Bach paired most of his keyboard fugues with preludes. Praetorius had described in 1619 the practice of improvising a toccata or prelude before a written-out fugal piece, and only towards the end of the 17th century did a few composers begin to attach written-out preludes to their fugues. Bach's preference for this practice ensured that wherever his keyboard fugues have been admired the prelude and fugue has served as one of the most important genres to incorporate fugal writing. (4) For his earliest vocal fugues, Bach chose in place of this model the permutation fugue, which he probably encountered through the treatises of Theile.

The mature Bach employed fugue in his music for organ, for keyboard (harpsichord) and for voices. The harpsichord fugues are in general relatively brief and tight in construction; they would seem to have been intended primarily for study and teaching. Those for the organ are usually grander and more expansive; they would seem to have been intended for public performance. For his mature vocal fugues (e.g. in the B minor Mass) Bach eventually abandoned the permutation fugue model in favour of that of the keyboard fugues.

Like all masterly bodies of music, Bach's fugues resist easy summary, generalization and classification. A few attempts have however been made to subdivide these works further. Kunze proposed that the fugues of *Das wohltemperirte Clavier* be categorized on the basis of musical style: *fuga pathetica*, with predominantly slow movement and expressive of a certain affect; ricercar-fugue, the 'artful' fugue reminiscent of the old ricercare; dance-fugue, based on certain dance idioms; *Spielfuge*, characterized by idiomatic instrumental writing; and choral- or motet-fugue, which brings together instrumental structure and vocal style. Stauffer has applied Kunze's plan to the organ fugues, adopting two of the categories (dance-fugue and *Spielfuge*) but offering in place of the others the *allabreve* fugue (i.e. derived from the *stile antico*) and the art fugue (emphasizing learned devices). More recently Dreyfus has questioned the idea of categorization based on style and has proposed instead subdivisions derived from Mattheson's *Der vollkommene Capellmeister* and based on the use of contrapuntal procedures: simple fugue, based on only one theme and without invertible counterpoint; double fugue, based on two or more themes treated invertibly; and counterfugue, involving the application of contrary motion, augmentation or diminution to one of the themes.

In contrast to the almost universal esteem accorded Bach's fugues since at least the early 19th century, those of Handel have been somewhat neglected. Handel's focus on opera and oratorio, and the relative paucity of keyboard music from his pen, result in a very small number of pieces designated 'fugue', the most prominent being the *Six Fugues or Voluntarys for the Organ or Harpsichord* issued by Walsh in 1735. Handel's most important contributions to the genre are probably those in the choruses of his oratorios, which differ in only small ways from the keyboard fugues (two of the six keyboard fugues of 1735, for instance, ended up arranged as choruses in *Israel in Egypt*). In general, Handel's treatment of fugue is freer and less rigorous than Bach's: the part-writing (at least of the keyboard fugues) is often loosely handled, the counterpoint is sometimes allowed to relax into thematic statement accompanied by chordal texture,

thematic statements are less recognizably grouped, episodes less clearly defined, thematic material less economically used. These characteristics have not universally been considered signs of inferiority: writing in 1789, Burney (*History*) called Handel 'perhaps the only great Fuguist exempt from pedantry'. Marpurg in his treatise on fugue (1753–4) subdivided the genre into strict (*fuga obligata*) and free (*fuga libera* or *soluta*) which he associated, without expressing particular preference, with Bach and Handel respectively.

The third great figure of this era for the history of fugue is J.J. Fux, whose *Gradus ad Parnassum* (1725) remains a classic of fugal theory. The book is written, in Latin, as a dialogue between the author (as pupil) and Palestrina (as teacher); its goal, however, is the writing not of a *stile antico* motet but of late Baroque fugue, especially Fux's preferred genre, the fugue with two themes. Fux is probably most famous today for his use of the pedagogical progression from species counterpoint to fugue, but he probably also deserves credit for popularizing the terms 'subject' and 'countersubject', which he used, in their Latin forms, for the two themes of a fugue. His model for fugal composition, like his use of species counterpoint, derives ultimately from Bertali, although Fux recommends a tripartite structure of only three groups of thematic statements. This model seems intended purely as a way of getting the student started; Fux's own use of fugue in his music is considerably more imaginative than his somewhat formulaic plan would lead one to expect.

6. LATE 18TH CENTURY. The golden age of fugue was brilliant but short-lived. By the 1750s, during which decade both Bach and Handel died, Enlightenment ideals had brought fugue once again (as had humanistic ideals at the beginning of the Baroque) into disrepute, this time as pedantic and unnatural. Never again would the genre play the central role it had enjoyed in music of the early 18th century. At the same time, however, musicians continued to find fugue and counterpoint important for a composer's training, just as they had a century and a half earlier, and fugue even made an occasional appearance in music in the new style. In the latter case, its most common role was that of finale, a role it had long played in the Mass, where 'et in secula seculorum' and 'amen' fugues were a well-established tradition. In addition, composers began to experiment with the insertion of brief fugal imitation, sometimes only a single point of imitation, into works in sonata form and other forms.

Fugue retained its prestige longest in Vienna, aided by the aura surrounding Fux's bestselling treatise as well as the conservative musical tastes of the city's Habsburg patrons. The technique figures relatively prominently in the works of most composers, both German and Italian, associated with the Viennese court and churches during the third quarter of the 18th century. G.J. Werner (Haydn's predecessor at the Esterházy court), G.C. Wagenseil, M.G. Monn, F.L. Gassmann, Nicola Porpora (Haydn's teacher) and F.X. Richter all incorporated fugues into their instrumental music for chamber ensemble and larger orchestra. Perhaps the most significant of all Viennese contributions to fugue was that of J.G. Albrechtsberger, Beethoven's teacher, who not only assigned fugue a prestigious role in his compositions but wrote one of the most admired counterpoint treatises of the day. Elsewhere interest in fugue waned rapidly. A handful of composers in northern Italy, most notably F.M. Veracini and CA. Campioni, continued to cultivate fugue under the influence of the Bologna theorist G.B. Martini. In Germany J.S. Bach's fugal legacy was carried forward not primarily by his sons but by his students and admirers, in particular F.W. Marpurg and J.P. Kirnberger.

With the establishment of the so-called Viennese Classical style by Haydn, Mozart and Beethoven, however, fugue's central role in music came to an end as sonata form and the symphony orchestra quickly rose to a position of dominance. Nevertheless, none of the three composers entirely abandoned fugue. Haydn's study of the technique seems to have been accomplished on his own using primarily Fux's *Gradus ad Parnassum*. In addition to a number of fugues in his masses, fugues serve as finales to several of his instrumental works, including three of the op.20 string quartets, the quartet op.50 no.4 and the symphonies nos.3, 40 and 70. These fugues are finely wrought works in the late Baroque style and suggest that Haydn would probably have been comfortable writing many more if his patrons had desired them. Mozart learnt fugal composition not through any treatise but through the study of other composers' works: first Haydn and the earlier Viennese instrumental composers, then in 1782 J.S. Bach (the '48') and Handel (probably the *Six Fugues or Voluntarys*, among other works), to both of which he was introduced by Baron von Swieten. As a result, we find in Mozart fugal finales to string quartets à la Haydn (K168, 173 and 387), as well as independent fugues or preludes and fugues in late Baroque manner, including the Prelude and Fugue for keyboard K394/383*a* and the Fugue for two pianos four hands K426, later arranged for string quartet as K546. Of course, fugal finales also appear in Mozart's sacred music, including the C minor Mass K427/417*a*, and the Requiem. Mozart's most important contribution to the history of fugue, and certainly his most innovatory, is probably the insertion of fugal imitation into works in sonata form. This category includes perhaps his two best-known instrumental movements incorporating fugal imitation: the finale of the 'Jupiter' Symphony and the overture to *Die Zauberflöte*.

As in so many facets of composition, Beethoven pushed back the boundaries of fugue while integrating it into the new style. He was introduced both to the '48' (through his teacher in Bonn, Neefe) and to a systematic study of counterpoint and fugue (through his later teacher Albrechtsberger). Perhaps the most traditional are the fugal finales Beethoven included in the *Missa solemnis*; among his instrumental works, by contrast, scarcely a single fully worked-out, traditional fugue is to be found. Instead we find such offerings as the 'Finale: alla fuga' of his variation set op.35, on the theme of the last movement of the 'Eroica' Symphony. Here Beethoven's fugal finale begins conventionally enough, but, in a manner reminiscent of Buxtehude's praeludia, the counterpoint eventually begins to break down and is finally abandoned about two-thirds of the way through the movement. The composer acknowledged his freer approach to fugue in two of his most famous efforts, the finale to the Hammerklavier Sonata op.106, and the *Grosse Fuge* op.133 (originally conceived as the finale to op.130). He headed the first 'Fuga . . . con alcune licenze', the second 'tantôt libre, tantôt recherchée'. Like Mozart, Beethoven also introduced fugal imitation into sonata form movements, for instance in place of the first theme group (in the finale of

the string quartet op.59 no.3) or as a part of the development (in the opening movement of op.59 no.1).

Fugue emerged from its golden era accompanied by no particular consensus with regard to its rules, definitions or how it ought best to be handled. Musicians who wrote about fugue and counterpoint in the second half of the 18th century continued to focus on the styles and techniques of the late Baroque, but they brought to the task a variety of approaches. One of the most famous of these writers was G.B. Martini of Bologna, renowned as a teacher of counterpoint and sought out by Mozart and many others. In his *Esemplare, o sia Saggio . . . de contrappunto* of 1774–6, Martini subsumed all imitative counterpoint under the general heading fugue, which he subdivided into *fuga reale* (i.e. with a real answer), *fuga del tuono* (with a tonal answer) and *fuga d'imitazione* (freer sorts of imitation). He further subdivided the former into canonic (*legata*) and non-canonic (*sciolta*). Here we see fugal terminology at the crossroads: words and pairings traceable all the way back to Zarlino (*fuga legata* and *sciolta*) side by side with newly paired expressions central to our modern theory (real versus tonal answers). The tripartite division (with additional subdivision) obscures to some extent the more apt one of canon, fugue and imitation, and certainly shows Martini's respect for traditional Italian terminology. In Austria Fux's *Gradus ad Parnassum* continued to find favour among musicians. Beethoven's teacher Albrechtsberger (*Gründliche Anweisung zur Composition*, 1790) was only the best-known of a number of Austrian pedagogues who, either directly or indirectly under Fux's influence, likewise wrote texts on counterpoint and fugue.

Meanwhile the predominant influence on fugal theory in Germany remained J.S. Bach and his many pupils. Whereas Bach's most progressive sons, Carl Philipp Emanuel and Johann Christian, showed in their compositions little interest in fugue, two members of the Bach circle with more conservative bent, F.W. Marpurg (*Abhandlung von der Fuge*, 1753–4) and J.P. Kirnberger (*Die Kunst des reinen Satzes*, 1771–9), made important contributions to its theory. Marpurg, author of the first full-length treatise to include 'fugue' in its title, divided imitative counterpoint as we do today into canon, fugue and imitation. He insisted that fugue was 'actual, proper or regular' only if it was constructed according to the rules; otherwise, it was 'figurative, improper or irregular'. Five essential characteristics defined fugue, and these required proper handling for a piece to earn the designation 'proper': *Führer* (*dux*) and *Gefährte* (*comes*), *Wiederschlag* (i.e. regularity of opening imitation between *dux* and *comes* forms), *Gegenharmonie* (i.e. good counterpoint accompanying the theme) and *Zwischenharmonie* (episodes). Even when these five elements were handled in 'proper' fashion, Marpurg allowed for still further subdivision of proper fugue into strict (à la Bach) and free (à la Handel). Also worth mentioning is Marpurg's borrowing from Mattheson of the word *Durchführung* (still used by German speakers today) to designate the fugue's sections marked off by its episodes. One notices immediately in Marpurg's use of 'Harmonie' the ever greater focus of the time on vertical sonority rather than horizontal part-writing.

7. The Romantic era. In the early 19th century the fugue became the subject of intense debate while musicians struggled to reconcile its myriad definitions and manifestations and to determine its role in contemporary composition. Nevertheless, it was the general consensus that fugue was the quintessential contrapuntal genre and as such was only with difficulty susceptible to integration into the modern style. One musician who did attempt to update the technique in light of post-Baroque compositional innovations was the Czech-born Antoine Reicha: contemporary and colleague of Beethoven, pupil of Haydn, Salieri and Albrechtsberger, and teacher of Berlioz, Liszt and Franck. In 1803 in Vienna Reicha dedicated a set of 36 fugues for piano to his teacher Haydn; for a new edition two years later he added an introduction entitled *Über das neue Fugensystem* defending their construction. In this introduction Reicha dismissed Martini's three principal categories of fugue as irrelevant to contemporary composition and identified the following characteristics as necessary for a fugue: the leading of the theme through all voices, proper contrapuntal texture, derivation of all musical ideas from the theme alone, and the maintenance of a contrapuntal character throughout the piece. As might be expected from a composer interested in more adventurous Romantic harmony, Reicha rejected the traditional relationship between fugue and tonality, including the handling of the fugal answer and any restrictions on modulation during the course of the piece. In a later treatise, written after he had been appointed to the Paris Conservatoire, he also tried to bring the ubiquitous periodicity of Classical-style music into the fugue by describing its structure as a series of periods well delimited by phrases: these periods included an opening one called 'exposition' and, following an intervening episode, another called 'counterexposition'. Reicha's innovations were not widely accepted, however; Beethoven, who himself treated fugue relatively freely, expressed the probably common opinion that in Reicha's collection of 36 fugues 'the fugue is no longer a fugue'. Reicha's colleagues at the Paris Conservatoire, Cherubini and Fétis, later expressed similar criticisms. When their ideals prevailed, the last serious attempt to update fugal theory died, and the teaching and writing of fugue became once and for all an act of homage to the past.

Writing about fugue meanwhile continued apace. Authors included Fétis (1824), Cherubini (1835), Weinlig (1845), E.F. Richter (1859), Riemann (1890–94), Prout (1891) and many others. Fugal theory came to focus increasingly on one of two strains: either fierce, partisan debate about what constituted a 'proper' fugue, principally for the purpose of evaluating music of the past, or the establishment of a rigid model to be followed to the letter by any student wishing to master the ideal fugue. The latter came eventually to be known as the school fugue or *fugue d'école* and to be associated most closely, as it still is today, with the Paris Conservatoire. André Gédalge's *Traité de la fugue* (1901) offers the definitive outline of the school fugue. The model is laid out in great detail and is widely understood to bear no relationship at all to 'real' composition outside the academy.

Beethoven's judgment concerning Reicha's fugues and his ambivalence about the freedoms allowable in his own fugal composition mirror the widespread uncertainty of the time towards the question of fugue's definition and essential characteristics. Marpurg had allowed for strict and free fugues, and some early 19th century musicians (e.g. Koch) simply expanded the latter to encompass

such innovatory works as Mozart's overture to *Die Zauberflöte*, in which fugal texture is by and large maintained but within a movement structured according to sonata form. Others (e.g. J.A. André) vigorously rejected such (as they saw it) terminological looseness. For André, the *sine qua non* of fugue was the opening fugal answer at the 5th. Other musicians since André have identified their own essential characteristics, including most commonly contrapuntal rigour or overall compositional structure (i.e. form). Most pieces designated 'fugue' by 19th-century composers have probably at some time been declared unworthy of the name for one or another reason; even Bach's fugues themselves have occasionally been measured and found wanting.

Adding to the terminological confusion is the 19th-century introduction of the word *fugato*, an Italian past participle meaning 'fugued', which was occasionally used during the 16th and 17th centuries in the expression *contrappunto fugato* (literally 'fugued counterpoint', perhaps best rendered in English as 'fugal counterpoint'). In 1760, however, Giorgio Antoniotto, an Italian-born musician living in England, published a treatise in English in which he introduced the word as a noun meaning imitative counterpoint that is not proper fugue (what earlier musicians had called simply 'imitation'). *Fugato* subsequently came to be the term most commonly applied to brief passages of fugal imitation within non-fugal movements, as well as to any fugal piece (even if designated 'fugue' by its composer) that fails the test for proper fugue. In both of these senses, the word remains current today.

As fugal theory became more and more orientated towards the past (and, by extension, towards the analysis of earlier music), composers turned increasingly to the fugues of past composers, rather than to the theoretical pronouncements of their teachers, for inspiration. Chief among their models were the keyboard fugues of Bach, which, despite the disappearance of most of the rest of his works from public consciousness, had never really faded from the view of the musical cognoscenti. It is no accident that Schumann, Liszt and Reger all wrote fugues on the notes B–A–C–H, or that both Schubert and Beethoven showed their greatest interest in fugue late in life, as they searched for new ideas and models, rather than early in their careers, when their teachers' precepts were fresh in their minds. In the end, only Chopin among all the major composers of the 19th century seems to have shown no interest whatsoever in counterpoint and fugue.

Perhaps the single exception to this new role of fugue as historical revival or archaeological relic was its traditional, well-established place as finale in sacred vocal music. Prominent examples from the century include, in addition to those of Beethoven's masses, the final chorus of Mendelssohn's *Elijah* and the end of the third movement (on the words 'Der Gerechten Seelen sind in Gottes Hand') of Brahms's *German Requiem*. Berlioz, on the other hand, criticized this convention and chose to use fugue in more innovatory ways in his Requiem. Verdi introduced a brilliant spoof of the tradition by closing his final opera, *Falstaff*, with a fugue on the words 'Tutto nel mondo è burla' (the whole world is a joke). Meanwhile, the fugal finale in instrumental music, a much more recent tradition, faded in importance. Among its few post-Beethoven appearances one might name the Variations and Fugue on a Theme of Handel op.24 of Brahms and the fourth movement of Bruckner's Symphony no.5.

With the decline of interest in sacred music generally and the instrumental fugal finale in particular, the writing of independent fugues, or preludes and fugues, came increasingly to attract composers' attention, just as it had Mozart's. Beethoven's most contrapuntally rigorous fugue is probably the opening movement of the C♯ minor Quartet op.131, Schubert's the Fugue in E minor for piano four hands, written in the year before he died. Both Mendelssohn and Schumann showed keen interest in wrriting fugues, the former as an outgrowth of his interest in the revival of Bach's music, the latter as a kind of artistic stimulus to his creative juices. Clara Schumann went so far as to refer to her husband's *Fugenpassion*, and he enthusiastically instructed her using Cherubini's counterpoint treatise. One can see in all of these compositions their creators' attempts to rein in or adapt the current stylistic preference for beautiful, singing melody and adventurous harmony within a genre designed first and foremost for contrapuntal display and technical sophistication.

By the second half of the century fugue had found its most comfortable niche within the genre of prelude and fugue, and increasingly within the realm of organ music. These fugues might take the form of studies (e.g. the organ fugues of Brahms), showpieces (the preludes and fugues of Liszt), continued fascination with the Baroque (the works of Reger), or simply occasional essays (the *Prélude, fugue et variation* for organ op.18 of Franck). Of course fugue also retained its reputation for learnedness. In order to characterize Beckmesser's pedantry Wagner introduced fugal counterpoint into *Die Meistersinger* (see bars 138–50 of the overture, reprised in association with Beckmesser in Act 3) and in *La damnation de Faust* Berlioz included a fugue in parody of German learnedness. Of all of these men probably the most consistently successful composer of fugue was Brahms, who also proved most capable of integrating past and present.

8. 20TH CENTURY. The indissoluble bond between fugue and tonality, traceable back to Dressler and Clemens in the 16th century and strongly reaffirmed in the 19th, made the genre uncongenial to those 20th-century composers who had abandoned tonal harmony. A rare early use of fugue in atonal music occurs in 'Der Mondfleck' from *Pierrot lunaire* (1912), a movement that Schoenberg described as 'fugue between piccolo and clarinet on the one hand, canon between violin and cello on the other'. Schoenberg's understanding of the difference between the two techniques is clear: the canon carries through from beginning to end, whereas the fugue involves a theme, two bars long, which is stated several times in the two voices, with intervening free counterpoint, and to which the contrapuntal devices of inversion and stretto are applied. Nevertheless, as Schoenberg and Webern began to explore thematic transformation as yet another way to avoid the sensation of a recognizable tonality, fugue found itself all but excluded from 12-note music. The composers of the Second Viennese School favoured both counterpoint and classical forms, but canon, not fugue, was the preferred imitative technique. In fact, possibly the best-known fugue associated with these composers was not an original composition but Webern's arrangement of the six-voice ricercare from Bach's *Musical Offering*.

Perhaps the most significant atonal fugue from the first half of the century is the triple fugue in Act 2 scene ii, bars 286–365, of Berg's *Wozzeck* (1917–22). Opera and fugue had traditionally had little to do with each other, but Berg exploited the technique brilliantly by assigning a fugue subject to each of the scene's three characters and using various contrapuntal combinations to parallel the dramatic action. The fugue is laid out in several well-defined sections: exposition of theme 1, exposition of theme 2, combination of themes 1 and 2, transition based on theme 2, exposition of theme 3, combination of all three themes, and coda on themes 1 and 2. Even allowing for the absence of tonality (the first five thematic statements enter on F♯, F♯, E♭, D and G), the handling of the imitation itself is free and untraditional, much more so than Schoenberg's in 'Der Mondfleck'. Berg's three expositions do not present their themes in the customary orderly fashion, integrity of voices is not maintained, and thematic alteration, although seldom drastic, is omnipresent.

The so-called neo-classicism of the 1920s and 30s brought fugue back into favour. Each of the movement's adherents sought to put his own individual stamp on the tonal harmony he inherited, and that desire led to a variety of tonal plans for both the imitative entries and the fugue as a whole. Whereas Stravinsky, in the second-movement fugue of his *Symphony of Psalms* (1930), presented a regularly laid-out fugal exposition with entries alternating between tonic and dominant, Bartók chose, for the opening fugue of his Music for Strings, Percussion and Celesta (1936), to take successive entries around the circle of 5ths, with odd-numbered entries proceeding around the circle in one direction and even-numbered entries in the opposite direction. These early attempts at reinterpreting fugue in 20th-century terms led to further experiments, including later 12-note fugues by Schoenberg (the finale of his Variations on a Recitative op.40 (1941) for organ and the *Genesis* Prelude op.44 (1945) for orchestra and chorus without text). Also falling within the category of 'neo-classical' are two major collections of fugues inspired by the example of Bach's '48': Hindemith's *Ludus tonalis* (1942) and Shostakovich's 24 Preludes and Fugues (1950–51).

The principal compositional trends since World War II – total serialism, aleatory music and minimalism – have proved inhospitable to fugue. Accordingly, interest in fugue during the second half of the 20th century came to rest almost exclusively with composers seeking to emulate past compositional styles and scholars engaged in the study of the history of imitative counterpoint.

PAUL WALKER

Fugue d'école (Fr.: 'school fugue'). A prescriptive model for writing fugue developed within the Paris Conservatoire in the 19th and 20th centuries. Important contributions to the writing of fugue were made by Fétis (1824), Cherubini (1835) and Dubois (1901), but André Gédalge's *Traité de la fugue* (Paris 1901; Eng. trans., 1965) is acknowledged as the classic text. As enumerated by Gédalge, the structural components of the *fugue d'école*, generally translated into English as the 'scholastic fugue' or 'school fugue', are eight in number: (1) the subject, (2) the answer, (3) one or more countersubjects, (4) the exposition, (5) the counter-exposition, (6) the episodes (in French, *développements* or *divertissements*), (7) the stretto, and (8) the pedal point. This model follows the main outlines of the 'classic' fugue as outlined in FUGUE, §1, but the prominence of a counter-exposition and of pedal point are far beyond their actual presence in fugal repertories of the past. Although Gédalge urged every modern composer to undertake the study of fugue, he readily acknowledged that the ultimate goal was not 'expressly to write fugues, but to acquire the technical mastery that only fugal writing can bring'. It is widely though not universally understood, therefore, that Gédalge's treatise, while deriving much of its detail and many of its musical examples from fugal writing of the past, is not primarily intended as a guide to the study and analysis of that repertory. The list of 20th-century composers who learnt this model while studying at the Paris Conservatoire includes most French composers since 1900.

PAUL WALKER

Fuguing tune [fugue tune]. *See* FUGING TUNE.

Führer, Robert (Jan Nepomuk) (*b* Prague, 2 June 1807; *d* Vienna, 28 Nov 1861). Czech composer and organist. While still a chorister at Prague Cathedral he was taught by Vitásek (1817–24). From 1823 he was assistant organist at the cathedral and in 1826 became second organist; after Vitásek's death in 1839 he succeeded him, giving up his organ post at the Strahov Monastery, which he had held since 1829. In 1830 he became one of the first teachers at the Prague Organ School, but his irregular life caused his dismissal in 1845. He then settled in Salzburg as an organist and theatre conductor (1846–9) and lived briefly in Munich (1849), Braunau am Inn (1851), Gmunden (1853–5) and other German and Austrian towns. He also toured Austria and Hungary with the violinist Gärtner and competed with Bruckner at the Mozart celebrations in Salzburg in 1856. He stayed longer in Aspach and Ried, where he wrote many compositions. After his imprisonment in Ried and Garsten (1859–60) he went to Vienna, where he lived for the rest of his life in penury.

Führer was a prolific composer and wrote over 400 works, mostly sacred. The finest include his Mass in A♭ (1843), the Requiem in G (1846) and the oratorio *Christus im Leiden und im Tode*. He also wrote many secular cantatas, songs and organ works. The extensive publication of his works (in Prague, Munich, Augsburg, Vienna and Innsbruck) and the appealing early Romantic lyricism of his style account for his wide popularity during his life; his works can still be heard in Bohemian and Austrian churches. His writings include three books all published in Prague in 1847: *Der Rhythmus*, *Die Tonleitern der Griechen*, and *Praktický návod, jak psáti skladby pro varhany* [Practical instructions on how to write pieces for the organ].

JOHN TYRRELL

Führer Orgelbau. German firm of organ builders. Alfred Führer (*b* Wilhelmshaven, 8 Nov 1905; *d* Wilhelmshaven, 27 May 1974) was first apprenticed as a cabinet maker (1920–24) and then trained as an organ builder with P. Furtwängler & Hammer, Hanover, between 1924 and 1927. He worked as a journeyman with companies in

Switzerland and the USA (1929–30) and again with Furtwängler & Hammer (1931–3). In 1933 he set up an organ workshop in Wilhelmshaven, restoring, rebuilding and repairing organs, mainly in the district of Oldenburg-Wilhelmshaven, the former duchy of Oldenburg. After the war the business gained great prestige in northern Germany, particularly in the northern part of Lower Saxony and Bremen. During his lifetime Führer built 760 instruments. In 1974 his nephew Fritz Schild (*b* Bohlenbergerfeld, 18 Aug 1933) became managing director. He had served his apprenticeship with Führer and then worked in the Netherlands, France and the USA from 1958 to 1959, returning to work with Führer as a voicer between 1960 and 1974.

Organs built by Führer include Wilhelmshaven-Bant (1953/1967); Pauluskirche, Bielefeld (1957); St Ansgarii-Kirche, Bremen (1958); St Marien, Delmenhorst (1961); Jever (1966), and St Lamberti, Oldenburg (1972). His most important restorations were to the 1697 Kayser organ in Waddewarden (1933/1966), the 1699 Schnitger organ in Ganderksee (1934/1966) and the 1698 Schnitger organ in Dedesdorf (1947/1957). Schild's organs include those at St Viktor, Damme (1975); Bunde (1979); Christengemeinschaft, Bremen (1981); Totentanz-Orgel, Marienkirche, Lübeck (1986); Staatliche Hochschule für Musik, Hamburg (1992), and Seoul, Korea (1994). He is best known for his restorations of organs by Huess (1650) in Langwarden (1974/1976); Busch (1739) in Jade (1977); Kayser (1694) in Hohenkirchen (1974/1977); Fürtwangler (1858–9) in Buxtehude (1979); Klepmeyer (1766) in Hammelwarden (1969/1992); and Berner (1767) in Sillenstede (1967/1994).

Alfred Führer built organs with slider chests and tracker action in accordance with the principles of the *Orgelbewegung*. From 1933 onwards he carried out major restoration work on historic organs in northern Germany. Fritz Schild has continued the firm's traditions whilst improving the quality and scope of its restoration work; the firm has worked on Baroque and 19th-century instruments, including those employing historical temperaments.

UWE PAPE

Fuhrmann, Georg Leopold (bap. Nuremberg, 2 Sept 1574; *d* Nuremberg, Dec 1616). German publisher, bookseller, engraver, editor and lutenist. According to the foreword of his *Testudo gallo-germanica* Fuhrmann attended 'German and French high schools and universities'; there are records of him studying in Jena (1597), Marburg (1599), Tübingen (1601) and Basel (1604), where he received a broad education. He then worked in Nuremberg, where in 1608 he took over the typographical workshop of his father, Valentin, who had published mathematical and theological works and was also known for publishing music and theoretical works. Composers whose music was published by Fuhrmann include Melchior Franck, J.A. Herbst and Demantius.

For musicians Fuhrmann is of particular interest for his anthology of lute music *Testudo gallo-germanica, hoc est: novae et nunquam antehac editae recreationes musicae, ad testudinis asum et tabulaturam* (RISM 1615[24]/R1975, published in Nuremberg). It comprises 180 pages and includes a German translation of Anthoine Francisque's *Instruction pour réduire toutes sortes de tablatures de luth en musique et réciproquement*. The music, which is for nine-course lute in G, spans the entire continental, as well as the English, repertory of the period and is therefore one of the most important sources of lute music of the early 17th century (some pieces ed. A. Quadt in *Aus Tabulaturen des 16.–18. Jahrhunderts* (Leipzig, 1966, 6/1990), *Lautenmusik aus der Renaissance*, i (Leipzig, 1968) and in Boetticher). There are pieces by English composers such as John and Robert Dowland, several lesser-known Italians, French composers such as Charles Bocquet, Poles, and particularly Germans, among them Elias Mertel, Valentin Strobel (ii), Georg Wesper and Hans Leo Hassler, who had worked in Nuremberg and who is represented by 20 pieces, a larger number than any other composer. The collection, which is in French lute tablature, offers a cross-section of current forms and there is a high proportion of arrangements of vocal models. Fuhrmann himself played here a prominent role as intabulator.

WOLFGANG BOETTICHER

Fuhrmann, Martin Heinrich [Frischmuth, Marcus Hilarius] (*b* Templin, Uckermark, bap. 29 Dec 1669; *d* Berlin, bur. 25 June 1745). German organist, Kantor and writer. References in his own writings to hearing church music performed in Kyritz (in the Prignitz) and Penzlau suggest that he may have been a student in those towns. Later he studied with Buxtehude's pupil F.G. Klingenberg (from Stettin), organist at the Nikolaikirche in Berlin. Fuhrmann said that in 1690 he took some of his own compositions for examination by his music teacher, M.P. Henningsen, Kantor at the Marienkirche, Berlin. No music by Fuhrmann, however, seems to survive. Later, probably about 1692, he studied in Halle, where he was deeply influenced by the organ virtuosity of F.W. Zachow (Handel's teacher), whom he 'listened to each Sunday with a real hunger and thirst' (*Satans-Capelle*, p.55). Fuhrmann visited Leipzig at about this time, working briefly with Schelle on contrapuntal exercises. He stated (ibid., p.52) that in 1694 he became an organist in Soldin. By the next year he had found a post as Kantor in Berlin, where in 1704 he was appointed Kantor at the Friedrich-Werder Gymnasium, a position he retained for the rest of his career.

Fuhrmann was a learned and widely experienced musician and theorist. His views on numerous aspects of contemporary music education, especially practical musicianship, as well as the kaleidoscopic references to the state of sacred and secular music in Germany during the early 18th century, deserve attention. He often praised the excellence of German musicians of his day, and in a far-sighted reference he coined as the three great German Bs Buxtehude, Bach and Bachelbel (*sic*!; ibid., p.55). Johann Rosenmüller was, in his view, 'the *alpha* and

omega musicorum' (*Musicalischer-Trichter*, p.41). In comparing the 'world-famous' Bach, whom he had heard play the organ, with the Italian masters Frescobaldi and Carissimi, Fuhrmann concluded that if one placed the art of the two Italians on one scale and that of Bach on the other, the latter would outweigh the former two, sending their scale flying up into the air (*Satans-Capelle*, p.32).

Fuhrmann had read most of the important theoretical works by German writers of the later 17th and 18th centuries, including Beer, Printz, Kuhnau, Kircher, Neidhardt and Werckmeister. Most of Fuhrmann's books are written in a satirical, frequently obscure style with intricate rhetorical imagery. He probably modelled his prose on the satirical writings of Printz and Kuhnau, to whom he often referred. Fuhrmann's most effusive praise is reserved for 'the two pillars of Apollo's palace on Parnassus' (ibid., p.30), Johann David Heinichen and, above all, Johann Mattheson. The latter, often involved in Fuhrmann's discussions, is characterized as the greatest writer on music of any period. Two of Fuhrmann's works, *Das in unsern Opern-Theatris* and the *Gerechte Wag-Schal*, are largely defences of Mattheson in the latter's verbal battle with Joachim Meyer (*Unvorgreiffliche Gedancken über die neulich eingerissene Theatralische Kirchen-Music*, 1726), who had condemned the use in churches of cantatas written in the operatic style. Fuhrmann, who expressed reservations about the secular nature of the theatrical style as used in church music, nevertheless did not adopt the position of some of his contemporaries, who urged the banning of the operatic style from church music: 'I will not propose that one drive out all cantatas from the church, like dogs, but only those that are rich and fat in the spirit of the opera' (*Satans-Capelle*, p.45). However, in the *Satans-Capelle* particularly he attacked the immorality of many opera texts, citing in particular three 'obscene' Hamburg operas by Telemann: *Die verkehrte Welt*, *Miriways* and *Der Galan in der Kiste*. He also denounced the castrato as a creation of the Devil (ibid., p.39) and criticized the Hamburg opera's reliance on the figure of Harlequin.

Among his six books, the most important and best known to his contemporaries was the *Musicalischer-Trichter* (1706). Fuhrmann believed all musicians must be trained in the three branches of musical knowledge: *musica theoretica*, the rules of music; *musica practica*, the application of the rules to singing and playing; and *musica poetica*, the art of composing. The *Musicalischer-Trichter* is largely an explanation of *musica practica*, and in it he gave considerable information concerning the art of singing. He did not, unfortunately, fulfil his promise to write a work on *musica poetica*. Of the ten chapters, the seventh ('Von allerhand Manieren welche ein künstlicher Sänger auch verstehen muss') and the eighth ('Von allerhand Vitiis musicis so ein künstlicher Sänger meiden muss') are the most important. In the chapter on *manieren*, Fuhrmann listed 15 vocal ornaments, illustrating each with music examples. Although some of these are familiar from works such as Printz's *Compendium musicae* (Dresden, 1689), Fuhrmann's chapter is not simply a restatement. He gave concise and frequently original interpretations for *accento*, *trill*, *trilletto*, *tremolo*, *tremoletto*, *variatio*, *groppo*, *messanza*, *passaggio*, *circulo*, *tirata*, *salto*, *syncopatio*, *anticipatione della syllaba* and *anticipatione della nota*. In the eighth chapter, dealing with 15 errors common among singers, there are pertinent discussions of voice production, faulty musicianship and over-zealous applications of improvised ornamentation as well as a criticism of grotesque gestures. The work ends with a brief though informative lexicon of musical terms along with definitions of types of vocal and instrumental compositions and various musical instruments. As an appendix, he added his method for teaching students who know the rudiments of music to sight-sing in a series of private lessons taking just three months. Fuhrmann was well acquainted with the contemporary musical scene, and must have travelled even after his Berlin appointment, especially to Hamburg where he heard many opera performances and probably became acquainted with Mattheson. His treatises are a rich and almost untouched source of information for the study of the final decades of the German musical Baroque.

THEORETICAL WORKS

Musicalischer-Trichter, dadurch ein geschickter Informator seinen Informandis die Edle Singe-Kunst nach heutiger Manier . . . einbringen kan (Frankfurt an der Spree, 1706, rev. 2/1715 as *Musica vocalis in nuce, das ist Richtige and völlige Unterweisung zur Singe-Kunst*)

Musicalische Strigel, womit . . . diejenigen Superlativ-Virtuosen aus der singenden und klingenden Gesellschaft, so nicht Chor-mässig als Künstler die Gräntzen des Apollinis seines musicalischen Reichs, sondern Thor-mässig als Hümpler die Plätze des Apollyonis seiner Music-kahlen Barbarey vermehren (Athen an der Pleisse, n.d.)

Das in unsern Opern-Theatris und Comoedien-Bühnen siechende Christenthum und siegende Heidenthum, auf Veranlassung zweyer wider den musicalischen Patrioten sich empörenden Hamburgischen Theatral-Malcontenten (Canterbury, 1728)

Gerechte Wag-Schal, darin Herrn Joachim Meyers . . . sogenannte anmasslich Hamburgischer Criticus sine Crisi und dessen Suffragatoris, Herrn Heinr. Guden . . . Superlativ Suffragium, und Herrn Joh. Matthesons . . . Göttingischer Ephorus . . . genau abgewogen(Altona, 1728)

Die an der Kirchen Gottes gebauete Satans-Capelle (Cologne, 1729)

Die von den Pforten der Hölle bestürmete, aber vom Himmel beschirmete evangelische Kirche (Berlin, 1730)

GEORGE J. BUELOW

Fujieda, Mamoru (*b* Hiroshima, 10 Jan 1955). Japanese composer. After graduating from the Tokyo College of Music (1980), he studied composition and computer music with Yuasa, Mumma and Feldman at the University of California, San Diego, gaining the doctorate in 1988. He returned to Japan in 1989 and began to collaborate with Takahashi, Goldstein, Oliveros and the Deep Listening Band, the experimental theatre company Renniku Kōbō, the sculptress Mineko Grimmer, the *butoh* dancer Setsuko Yamada, and other avant-garde artists. His work has been performed at festivals in North America, Asia, Australia and Europe. In 1984 he received an Asian Cultural Council grant; the National Theatre of Japan commissioned him to write *Tengoku no natsu* (1988) and *Yoru no uta I* (1993). In 1993 he organized SoundCulture Japan, a festival of sound art; he was music director (1991–6) of Interlink, a Tokyo festival for new American music sponsored by the American embassy in Japan. In 1994 he began a collaboration with the botanist Yuji Dogane to present ecological sound installations combining alternative tunings with melodic patterns derived from digital data from plants. He is music director of the Monophony Consort, an ensemble specializing in the performance of new types of traditional Japanese music and the music of Partch, Harrison, Cage, Riley and others. Fujieda is best known for his experimentation

with computer-controlled music, alternative tunings and sound installations.

JUDITH ANN HERD

Fujii, Tomoaki (*b* Kyoto, 16 June 1932). Japanese ethnomusicologist. He studied musicology and aesthetics at Nagoya University (BA 1955, MA 1957). He worked at the Meijō University of Nagoya, and entered the National Museum of Ethnology in Osaka as associate professor when it opened in 1974, becoming full professor in 1981. As the first representative of music at the museum, he set the direction of music there, guided field research teams, and organized many international meetings. He retired from the museum as deputy director general in 1996, to work as professor and deputy director general at the Chūbu Institute for Advanced Studies in Nagoya. He prepared the video series *Sekai minzoku ongaku taikē* ('An audio-visual anthology of world music') (Tokyo, 1988), *Sin-sekai minzoku ongaku taikē* ('A new audio-visual anthology of world music') (Tokyo, 1994), and *Tenti gakubu* (Tokyo, 1997), an anthology of the music and dance of 55 nationalities in China. Fujii is one of the most active ethnomusicologists in Japan in terms of field research and visual anthropology.

YOSIHIKO TOKUMARU

Fujiie, Keiko (*b* Kyoto, 22 July 1963). Japanese composer. She studied composition and theory to postgraduate level at Tokyo National University of Fine Arts and Music. Among her many awards are the first prize in the 1986 Japan Music Competition for her Clarinet Concerto, the Young Composers' Award of the Asian Composers' League in 1990 for the first movement of her String Trio, and the Otaka Prize, of which she was the first female recipient, for *Beber* in 1995. Citing the compositional methodology of Yoshio Hachimura as an influence, Fujiie avoids imposing an external structure on a piece, and instead manipulates the energy of each musical event, thereby allowing its structure to form organically. Her works, neo-romantic in style and complex in texture, remain free of the influence of western tendencies. In *Pas de deux I* (1987) the vitality of ballet informs such textural complexity; in *Bodrum Sea* (1992) and other works for guitar, lyrical melodic writing alternates freely with intricate atonal patterns. Using a technique reminiscent of collage, various musical idioms unfold in *Beber*, a work inspired by the Chilean poet Gabriela Mistral. In her monologue opera *Niña de cera* (1996), Fujiie delicately expresses the character's changing psychological state.

YOKO NARAZAKI

Fujikawa, Mayumi (*b* Asahikawa, 27 July 1946). Japanese violinist. She learnt the violin with her father and then at the Toho School, Tokyo, continuing her studies in Belgium and Nice, where she spent three summers as a pupil of Leonid Kogan. In Brussels in May 1970 she won the Grand Prix Henri Vieuxtemps by a unanimous vote of the jury. The next month she took second prize at the International Tchaikovsky Competition in Moscow and was engaged for a tour of the Soviet Union. In 1971 she made her American début with the Philadelphia Orchestra under Eugene Ormandy. She was immediately re-engaged for several more concerts and since then has returned to the USA every season. In 1974 she made her London début with the LSO and she has regularly appeared with all the London orchestras. In 1991 she took the violin part in Mozart's Sinfonia concertante at the Proms. She has also played at the Edinburgh Festival and in other major European cities such as Vienna, Salzburg, Hamburg, Munich, Berlin, Brussels and Amsterdam. After a concert with her in London, Lorin Maazel invited her to play in New York and Cleveland. She has also been heard in Boston, Pittsburgh and Chicago. Until 1990 she seldom revisited Japan, being based mainly in London, but she now goes back to Japan at least once a year to perform concertos with the major orchestras there; and she has made special appearances with the semi-professional orchestra in her home town. Fujikawa is chiefly known as an exponent of the Mozart concertos, all of which she has played on BBC TV and recorded; they suit her refined, lyrical style of playing particularly well. However she has often played chamber music with the pianist Michael Roll and the cellist Richard Markson. Her other recordings include the sonatas of Fauré and Prokofiev.

TULLY POTTER

Fukač, Jiří (*b* Znojmo, 15 Jan 1936). Czech musicologist. He studied musicology with Jan Racek and Bohumír Štědroň at Brno University (1954–9) and took private lessons in the piano and composition. He took the doctorate in 1967 with a dissertation on the music of St František, the church of the Knights of the Cross in Prague, and in 1991 completed the CSc with a dissertation on the study of musical semiotics and the theory of communication, and the *Habilitation* with a dissertation on the meta-ionic and intersemiotic aspects of music. In 1961 he joined the music department at Brno University, becoming assistant professor in 1964. From 1971 to 1989, as a politically unacceptable person, he was unable to teach, and worked in the department of lexicography. He became *docent* in 1990 and professor in 1994. In 1990 he became head of the Institute of Musicology at Brno University. He joined the board of the Brno International Musical Festival in 1966, and was co-founder of the annual Brno musicological colloquia; in collaboration with the pedagogical faculty at Nitra, Slovakia, he was co-founder of the music education conferences held there. In 1969 he became founder-editor of the journal *Opus musicum*. He was president of the Czech Society for Musicology from 1990 to 1992, and in 1993 joined the board of the Czech Music Council and became a visiting lecturer at Vienna University. His research interests include the history of music in Central Europe from the 18th century to the 20th, aesthetics and semiotics, the sociology of music and music teaching, and music terminology and lexicography. He has contributed to many European dictionaries, and was co-editor, with Jiří Vysloužil, of *Slovník české hudební kultury* (1997).

KAREL STEINMETZ

Fukushima, Kazuo (*b* Tokyo, 11 April 1930). Japanese composer and musicologist. Self-taught in composition, in 1953 he joined the Jikken Kōbō (Experimental Workshop), a group organized by Takemitsu, Yuasa and others. He was recognized as a composer of ability when his *Ekagura*, composed for the flautist Ririko Hayashi, won a prize at a contemporary music festival at Karuizawa in 1958. The title, meaning 'concentration' in Sanskrit, describes the music's character precisely: expressionistic, rhapsodic and extremely intense, it is a virtuoso display of avant-garde idioms. Stravinsky recommended it for performance at the Los Angeles Monday Evening Concerts in 1959. In 1961 Fukushima was invited to Darmstadt to lecture on nō plays and modern music in Japan, and in 1963 he received a travelling fellowship from the Japan Society of New York. Returning to Japan, he took an appointment to teach music at Ueno Gakuen College, Tokyo. In 1973 he founded and became the director of the Nihon Ongaku Shiyō-shitsu (Research Archives for Japanese Music) within the College. His books and articles on Japanese music, particularly gagaku (court music) and *shōmyō* (Buddhist chant), reflect his primary research interest. As a composer, he has received many awards, including prizes at the ISCM Festivals of 1964, for *Hi-kyō*, and 1967, for *Tsuki-shiro*.

Most of Fukushima's works are for relatively small instrumental ensembles. In both gagaku and nō music flute-like instruments are important; similarly, in his own work the flute has a prominent part, and he has had occasion to work closely with such leading flautists as Hayashi and Gazzelloni. One of his most successful pieces is *Mei* for solo flute (1962), which explores various possibilities of sonority and rhythm characteristic of traditional Japanese music. For example, such devices as glissandos and overblowing, as well as the use of free rhythm, were evidently suggested by the performing techniques employed with the *fue* and *shakuhachi*. In nature Fukushima's compositions are often meditative, their titles revealing associations with Buddhist philosophy or other oriental thought.

MASAKATA KANAZAWA

FulBe music. The music of the FulBe (Fulɓe), nomadic cattle-owners of West Africa. Although they call themselves FulBe, they are known by a number of different names as a result of their dissemination and of colonial influences. For instance, they were called Fellata in early travel literature, Peul by the French and Fulani (a Hausa term) in the anglophone literature of Nigeria. In the GAMBIA and in SIERRA LEONE, they are known as Fula.

1. History and ethnography. 2. Professional musicians. 3. Domestic and other secular musical traditions.

1. HISTORY AND ETHNOGRAPHY. The origins of the FulBe are obscure, but their early habitat in West Africa seems to have been around the border areas of modern MALI and SENEGAL. Various migrations and conquests have produced a gradual, mainly easterly movement over many centuries, resulting in distribution over a wide band of West Africa (fig.1). Their search for grazing led some as far west as southern Mauritania, others as far east as the Sudan (where they are also referred to as Fellata).

Some FulBe still live a traditional nomadic life, with annual movements from dry-season to wet-season grazing grounds and back, and are found as minority groups

1. Map of West Africa showing the distribution of the main dialect areas of the FulBe

scattered over the rural areas of many West African territories. Others have gradually adopted a more settled way of life, combining agriculture with the care of cattle. Occasionally the processes of settlement, concentration and military conquest have, over the centuries, led to the existence of long-established, fully organized FulBe communities, varying in size from small villages to towns as large as Labé and Dalaba in Guinea, Kaédi in Mauritania and Matam and Podor in Senegal in the west; Djenne and Bandiagara in Mali, Dori and Djibo in Burkina Faso in the bend of the Niger; and Birnin Kebbi, Gombe, Yola and Jalingo in Nigeria and in Cameroon Maroua and Garoua in the east. The settled Tukulor (Toucouleur) of Fouta Toro in northern Senegal are often treated as a distinct group. But their speech is a dialect of Fulfulde, and, although strongly Islamic, their culture has much in common with that of other FulBe. They are probably best regarded as a particular and distinctive group of FulBe.

Some leading FulBe have left their mark on history, especially in the 19th century: they include Usman 'bii Foo'duye (Usman 'dan Fo'diyo in the Hausa form), the Islamic reformer whose *jihād* led to the establishment of FulBe dynasties in the Hausa emirates of northern Nigeria (although as they were in a minority their FulBe culture was submerged); Saikou Ahmadu, who curbed the power of the Bambara empire and in 1815 founded Hamdallaye as the headquarters of the FulBe empire of Masina; and al-Hajj Umar, the Tukulor from Fouta Toro whose conquests in the middle of the century extended to Masina in Mali and Fouta Djallon in Guinea.

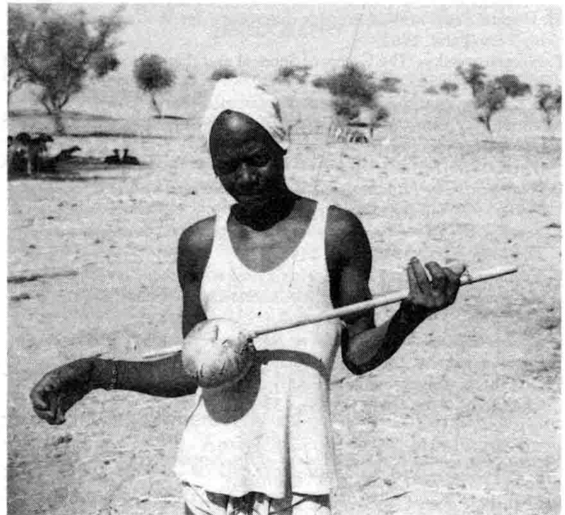
In most areas of concentration, as among the nomadic herdsmen, Fulfulde is still the principal language, and in Adamawa and northern Cameroon it has become a lingua franca for the many smaller ethnic groups there; but in other places, such as the northern Nigerian emirates, Fulfulde has tended to give place to Hausa, except among the nomads. While the FulBe were originally animists, many were converted to Islam several centuries ago; Islam has played a large part in their history and most of them regard themselves as Muslims, although vestiges of animism persist, especially in traditions concerning their cattle.

With such a wide geographical distribution and such variations in the mode of life, as well as certain cultural differences between distinct groups of nomadic FulBe, it is difficult to generalize about FulBe music. Nevertheless two important general distinctions can be made: firstly between the music in which the FulBe themselves take part and that of the professional musicians who sing and play for them; and secondly between the hymns and songs (both religious and secular) that have developed from the Arabic Islamic tradition and the everyday songs that are integral to the traditions of FulBe herders.

2. PROFESSIONAL MUSICIANS. While some professional musicians are regarded as FulBe – at least by outsiders – most professional musicians associated with the FulBe seem to be descendants of non-FulBe who have in many areas lived for centuries in symbiosis with them. This relationship originates in the caste system, which survives to some extent in the western part of the FulBe zone. As described by H. Gaden for Senegambia in 1911, most craftsmen and artisans in a FulBe entourage were not pure FulBe (*rim'be*, sing. *dimo*), but belonged to one of the castes – ranked in order of precedence but generalized under the term *nyeeny(u)'be* (sing. *nyeenyo*). Three of these groups were musicians – *maabu'be* (sing. *maabo*), who were weavers as well as singers, *wammbaa'be* (sing. *bammbaa'do*) and *awlu'be* (sing. *gawlo*) – the *wammbaa'be* being those with the longest and closest association with the FulBe, while the others were of Sarakolle (Sarakole or Soninke), Mandinka or Wolof origin. The French term *griot*, in the FulBe context, refers to singers in any of these three categories.

Both *wammbaa'be* and *maabu'be* were, and to some extent still are, basically court musicians, singing the praises of chiefs and other wealthy patrons, their genealogies and their ancestors' exploits, and epics of the FulBe past. While some of them may still be attached to individual patrons, others are peripatetic, moving from

2. End-blown flute of guinea-corn stalk, played by a FulBe herdsman, Niger



one chief's court to another. Tinguidji is a modern *maabo* of Burkina Faso, whose version of the Silāmaka and Poullōri epic has been transcribed and translated by Christiane Seydou; he still regards himself as essentially a court musician, singing for the FulBe nobility. The *awlu'be*, on the other hand, are traditionally less closely associated with the 'court' circles, praising and entertaining the FulBe people in general and using a wider range of instruments. While *wammbaa'be* and *maabu'be* are essentially solo singers, *awlu'be* sometimes perform in groups.

The typical instrument used by both *wammbaa'be* and *maabu'be* is the *hoddu* (lute, usually with three strings), on which they accompany their own singing and also play evocative solo interludes; some *wammbaa'be*, however, play the *nyaanyooru* (single-string bowed lute or fiddle; *see* GOGE). While the main instrument of the *awlu'be* is a drum, they are sometimes supported by such percussion instruments as: gourd rattles containing pebbles or covered with a network of cowries; hemispherical gourds (*horde*, 'calabash') held against the chest and struck with finger rings; or sistra consisting of gourd sherds threaded on a stick, which are called *laala* (and other names based on *laalawal* or *laalagal*, 'piece of broken gourd').

In such easterly states as Niger, Nigeria and Cameroon, the roles of the various professional musicians are less clearly differentiated, and *bammbaa'do* is a general term for a professional musician. In Cameroon the instruments used by the court musicians of the settled FulBe chiefs, like those of the FulBe dynasties in the Hausa emirates of Nigeria, seem to be those associated more with the Hausa and other local peoples. In Nigeria professional drummers have a specialized role in accompanying children's dance-songs, and at the traditional 'castigation' contests known as *soro* (borrowed into Hausa as *sharo*), which are a test of manhood; here they sing the praise of the young men taking part and provide the instrumental music that helps to build up the individuals' morale and the general tension. Certain drums, such as the *kootsoo* or *kotso* (small hourglass drum), are regarded by the Hausa as typically FulBe instruments.

3. DOMESTIC AND OTHER SECULAR MUSICAL TRADITIONS. Apart from the music of the professionals, Muslim FulBe enjoy the many poems (*gime*, sing. *yimre*, from the root *yim-*, 'sing'), primarily on religious themes, but later also on more secular topics, which have been composed in Fulfulde since the end of the 18th century or the beginning of the 19th.The earliest of these came from Fouta Djallon in Guinea and Sokoto in Nigeria. Originally based on Arabic models, these are mostly in regular quantitative metres of Arabic type, in stanzaic form with end-rhyme or internal rhyme, or both. They are sung or chanted, without accompaniment, to tunes that often involve melisma. Usually written down in Arabic script, these poems are disseminated either orally or by copying from a teacher's or a friend's manuscript. They are sung in private or in small groups for the pleasure and edification of the singer or his friends, and on special religious occasions. They have also become a speciality of blind beggars.

In addition to these older and mainly religious poems, new compositions continue to appear at all levels of society. The modern adaptation of this genre to secular subjects is found as far apart as Guinea and Cameroon, but still sung solo without accompaniment. Apart from these specialized songs, the FulBe, particularly those who still herd cattle, have the same range of songs as many other peoples of Africa, including work-songs (for example women's pounding songs, sung with or without refrain to the rhythmic sound of pestle on mortar); lullabies and love songs; herders' songs (often in praise of cattle, sung while the cattle are being grazed); children's dance-songs; and songs associated with various traditional dances, mainly for youths and girls. All such secular songs are

3. Two-string spike bowl-lute of the cattle-raising FulBe, Niger

called *gimi* (sing. *gimol*, also from the root *yim-*), as distinct from the *gime* mentioned above.

In such dances as the *ruume*, *yake* and *geerewol* of the Wo'daa'be (Wodaabe) of Niger and some groups in northern Nigeria (some dances being circular, some linear, some for youths, some for girls and some for both), the restrained leisurely movements are accompanied by choral unison singing and percussive rhythms provided by any of the following: clapping (by dancers or by girl spectators), the thumping of the dancers' staffs on the ground and occasionally the jingle of men's metal anklets. Other musical accompaniment is rare.

The instruments of the cattle-raising FulBe are mainly played solo for their own enjoyment, particularly while herding; they consist mainly of flutes, two-string lutes, single-string bowed lutes and a type of jew's harp. The flutes are usually end-blown, made of wood, bamboo or guinea-corn stalk adorned and strengthened with leather bands, and they have up to four holes (fig.2). A two-string spike bowl-lute seen in southern Niger was similar to a Hausa *gurmi*, having a wooden neck, a gourd resonator covered with a leather sound-table, and a bridge of guinea-corn stalk (fig.3); while a jew's harp played in interludes between songs by a youth from Maroua (north-west Cameroon) was fashioned from pieces of wood, palm frond, guinea-corn stalk and tough grass.

D.W. ARNOTT

Fulbert of Chartres [Fulbertus Episcopus Karnotensis] (*b* *c*960; *d* Chartres, 1028). French scholar and liturgical innovator. Although little is known about his early life, a biographical poem by his student Adelman of Liège links him with Reims at a time when he would have been a student of Gerbert d'Aurillac. Fulbert became Bishop of Chartres in 1006; his surviving letters record events from the early and last years of his period of office (most letters from the years 1008–19 have been lost). The final years of his life were shaped by a single event: in 1020, on the eve of the Feast of the Blessed Virgin Mary, the cathedral of Chartres burnt to the ground along with much of the town. Fulbert began an ambitious campaign to rebuild the church, and although the new building was not dedicated until 1038, the foundations and the crypt that survive as part of the present cathedral were completed within his lifetime.

As a composer, Fulbert appears to have been principally concerned with the elevation of the Feast of the Nativity of Mary, not only as an act of personal devotion, but also to bring greater glory and prominence to his church. The pieces that were earliest ascribed to him, and which appear in most authoritative collections of his work, are three chants for this feast, *Ad nutum Domini*, *Solem justitie Regem* and *Stirps Jesse Virgam produxit*. The chants are, unlike many newly composed responsories of the period, not based on a standard series of formulae, but rather freely conceived, lending them their distinctive musical character and possibly explaining their widespread acceptance and popularity. Other liturgical chants that may well have been composed by Fulbert and his school include the hymns *Deus pater piissime* and *Chorus nove Jerusalem*, the sequence *Sonent regi* and several offices. His renown as a teacher of the liberal arts also gave him at least a minor role in the development of music theory in the 11th century.

Fulbert's fame from the late 11th century onwards, although much of it is purely legend, is nonetheless important. In particular, the final melisma of *Stirps Jesse*, the extended musical phrase on 'Flos filius', became well known as a frequently-used tenor for organa and motets in Paris and elsewhere, and its connotations were firmly fixed through the attribution to Fulbert and a particular brand of Marian devotion. His fame as a composer is attested in the late 12th-century Codex Calixtinus (*E-SC*), where several chants are (probably erroneously) ascribed to him. The chronicler William of Malmesbury, writing in the late 12th century, praised his music for the devotion that it inspired.

MARGOT E. FASSLER

Fuld, James J(effrey) (*b* New York, 16 Feb 1916). American collector and writer on music. He received the BA from Harvard College in 1937 and graduated from the Harvard Law School in 1940 and practised law in New York. His interest in first editions has led him to an investigation of the various techniques for dating printed music and identifying first editions and he has built up a private collection of over 1700 first editions of classical, popular and folk music, which includes Palestrina's *Missa Papae Marcelli* (1567), Bach's *Goldberg Variations* (1742), Handel's *Messiah* (1767) and Gluck's *Orfeo* (1764), as well as operas by Gilbert and Sullivan, a large collection of Americana (with works by Gershwin, Berlin and Kern) and popular tunes such as *Three Blind Mice* (1609). He has also collected orginal librettos, programmes, posters and playbills of historical interest and autographs of most major composers after 1700. As compiler of *The Book of World-Famous Music* (1966), Fuld brought together a large body of information, often difficult to find elsewhere, concerning the origins and first editions of music as varied as *Happy Birthday* and the Beethoven Violin Concerto.

PAULA MORGAN

Fulda. City in Germany. It grew up around the Benedictine monastery founded by St Boniface in 742, and is renowned for the collection of medieval manuscripts in the Landesbibliothek. A 'Hildebrandslied' written into a theological treatise survives from the 9th century; at that time music in the abbey was directed by Abbot Hrabanus, a disciple of Alcuin. With its ancient churches and cathedral, Fulda maintained a prominent place in ecclesiastical music throughout the Middle Ages. In the 16th century the Prince-Abbot Johann von Henneberg introduced Georg Witzel to Fulda as a councillor, and the latter produced a Catholic hymnbook. In 1572 the Jesuits established a school in Fulda and in 1584 Pope Gregory XIII founded a Seminarium Pontificium in the city. During the Counter-Reformation the College of the Society of Jesus paid special attention to traditional Gregorian chant, in which students were examined. Athanasius Kircher, author of the *Musurgia universalis*, was born in Geisa, near Fulda, in 1602 and educated in the city. In 1704 the Prince-Abbot Adalbert von Schleifras laid the foundation stone of a new cathedral in Fulda, which was consecrated in 1712. A university was founded in 1733 and controlled jointly by the Dominicans and the Jesuits until the latter were removed in 1805.

In the 18th century secular fashions emboldened Bishop Heinrich von Thüngen to establish a 'theatre for amateurs'. Bishop Heinrich von Bibra, ruler of Fulda from 1759 to 1788, sent his Konzertmeister, Caspar Staab, to study in Mannheim and Stuttgart in 1760; he also founded the Landesbibliothek, which, after the secularization of church properties by Wilhelm of Nassau-Weilburg during the Napoleonic wars, was able to acquire priceless manuscripts from the neighbouring Weingarten Abbey. At this time civic music was stimulated by Michael Henkel, organist, teacher in the Gymnasium and composer. During the 19th century numerous choral societies were formed, including the Cäcilia – a mixed-voice choir primarily for the performance of oratorios – and three male-voice ensembles: the Liedertafel, Winfridia and Liederkranz.

Since the 17th century more than 150 organ builders have been recorded in Fulda, responsible for various churches, schools, seminaries and other institutions in the city. For much of the 19th century the firm founded by Martin Hahner, and continued by his son, was responsible for the maintenance of the great organ (and two other organs) in the cathedral. This contract ended when a new organ by William Sauer was erected in 1877. In recent times much work has been done in Fulda by the firm Kreienbrink, which between 1956 and 1969 built organs in the Lady Chapel of the cathedral and in several other churches and religious foundations.

PERCY M. YOUNG

Fulda, Adam von. *See* ADAM VON FULDA.

Fuleihan, Anis (*b* Kyrenia, Cyprus, 2 April 1900; *d* Stanford, CA, 11 Oct 1970). American composer, conductor and pianist. He moved to the USA in 1915 and attended the Polytechnic Institute of Brooklyn; he became an American citizen in 1925. Largely self-taught in composition, he studied music theory with Harold Milligan and Louis

Loth and piano with Alberto Jonas, making his début in New York in October 1919. For several years he toured the USA and the Near East as a recitalist and concerto soloist. He lived for two years in Cairo, returning to the USA in 1928. From 1930 to 1939 he worked as a conductor for radio and was on the staff of G. Schirmer. His work as a composer, beginning with ballet music written for Adolf Bohm, the Neighborhood Playhouse in New York and the Denishawn dance company, received great impetus with the performance of his suite *Mediterranean* under Goossens at Cincinnati in 1935. In 1939 he won a Guggenheim Fellowship in composition. Barbirolli introduced his Symphony no.1 (1936), his Piano Concerto no.2 (1938) and the *Symphonie concertante* (1940) with the New York PO. From 1946 Fuleihan toured and held a series of teaching, administrative and conducting posts: professor of composition and piano at Indiana University (1947–53), director of the Beirut Conservatory (1953–60) and conductor of the Beirut Orchestra (1955–60). In 1952 he received a Fulbright fellowship to Egypt. In 1963 he organized the Orchestre Classique de Tunis, directing it from its inception until 1965.

Fuleihan received many commissions, and his orchestral works have been performed often by major American orchestras. Extreme dissonance marked his early style, along with an orientalism which, after his studies in Near Eastern folk music (1924–8), he came to regard as 'synthetic'. In later works he sought a more authentic engagement with Eastern musical traditions. Fuleihan's style after 1935 has been described as neo-romantic. His orchestral writing displays a mastery of tone-colour; the piano works are characterized by technically difficult and brilliant passages using percussive techniques.

BARBARA A. RENTON

Fulgentius, Fabius Planciades (*fl* late 5th century–early 6th). Latin Christian author of African origin. Fulgentius belongs with Cassiodorus and Isidore of Seville as a transmitter of predigested classical culture to the Middle Ages. His works include an account of Virgil's *Aeneid* as a moral and Christian allegory, a glossary of obscure Latin words, and the three books of the *Mitologiarum*, a compendium of classical myths in fanciful allegorical interpretations. The *Mitologiarum* was used by Walter Odington in his *Summa de speculatione musice* (ii, 1) and paraphrased in a treatise (probably from the 12th century) by an anonymous Carthusian (*CoussemakerS*, ii, 460–62). Parts of the *Mitologiarum* appear in the Rome manuscript containing a number of musical treatises and the *Tractatus de sphaera* of Johannes de Sacrobosco (*I-Rv* B81) and in the Florence manuscript that includes musical treatises and Macrobius's commentary on *Somnium Scipionis* (*I-Fl* Ashburnham 1051).

Fulkerson, James Orville (*b* Manville, IL, 2 July 1945). American composer and trombonist. He studied the trombone and composition at Illinois Wesleyan University (BM 1967), and composition with Martirano, Gaburo, Hiller and Brün at the University of Illinois (MM 1968). From 1969 to 1972 he was a fellow at the Center for Creative and Performing Arts at SUNY, Buffalo, and has held residencies at the Deutscher Akademischer Austauschdienst in Berlin (1973), the Victorian College of the Arts, Melbourne (1977–9), and Dartington College of the Arts, Devon (1981–6). He was a lecturer in composition at the University of Nottingham (1987–90) and moved to the Netherlands in 1990, composing, teaching, and touring as a soloist and with the Barton Workshop ensemble. As a trombonist he specializes in new music, extended techniques and live electronics, and has had over 150 works written for him. His own nearly 200 works reveal a wide range of styles and influences often in the same work, in particular the radicalism of Cage, Feldman's sound world, the minimalism of LaMonte Young and Riley, and a recent interest in neo-Romanticism and postmodernism. *Folio* (1971), for instance, is a page of text instructing the pianist to perform three normally short tasks in 'suspended motion' for an hour; the *Co-Ordinative Systems* series (1972–6) are unusual graphic scores; while *Force Fields and Spaces* (1981) is a solo trombone work with tape delay that makes use of both the experimental sounds of a trombone played with a tenor saxophone mouthpiece, in part I, and pulsating motivic cells (like Riley's *Dorian Winds*), in parts II–IV. He is a frequent collaborator with his dancer-choreographer wife, Mary Fulkerson.

WORKS

Stage: Raucasity and the Cisco Kid . . . or, I Skate in the Sun, solo inst, tape collage, film, slides, 1977–8; Vicarious Thrills, amp trbn, pornographic film, 1978–9; Cheap Imitations II: Madwomen, soloist, tape, films, 1980; Force Fields and Spaces, trbn, tape, tape delay, dancers, 1981; Cheap Imitations IV, soloist, tape, films, 1982; Put your Foot down Charlie, 3 dancers, spkr, elec gui, elec pf, amp sax, elec trbn, 1982; Rats Tale, 6 dancers, trbn, spkr, sax, gui, banjo, pf, 1983; several other mixed-media works, television and film scores, theatre pieces, incid music, dance music

Dance: Paganini, spkr/actress, fl, cl, vn, vc, pf, 1984; Supreme Fictions, spkr/actress, fl, tpt/hn, va, elecs, 1984; The Marionette Theatre, live instrumentalist, tape, 1989; D1, D2, D3, elec score, 1989; Used, Abused and Cheap Imitations II, spkr, variable ens, tape, 1990; Curtain, 1991, collab. D. Fulkerson; Faust (after F. Pessoa), tape, 1992; Antigone, tape, 1993; Eden, elec score, 1995

Orch: more than 12 works, incl. Gui Conc., 1972; To see a thing clearly, 1972; Orch Piece, b cl, b trbn, pf, str, 1974; Conc., amp vc, chbr orch, 1978; Sym., 1980; Conc. (. . . fierce and coming from far away), 1981

Vocal and inst: Co-Ordinative Systems nos.1–10, 1972–6; Music for Brass Insts nos.1–6, 1975–8; Suite, amp vc, 1978–9; Suite, vn, 1983; The Archaeology of Silence, Mez, 1990–1; Studs II, 4 perc, 1993; The Cry of the Unconscious (F. Pessoa), B-Bar, fl, perc, 1993; many other pieces for solo inst or ens incl. Space Music nos.1–3, Patterns nos.1–12, Metamorphosis nos.1–3; Str Qts I–V

Other elec: Stations, Regions, and Clouds no.3, trbn, tape, 1978; Antiphonies and Streams no.2, trbn, live elecs, 1979; Fields and Traces, trbn, tape, live elec, 1980; Elective Affinities, amp vc, amp trbn, tape, live elec ens, 1980; Elective Affinities II, S, 4 trbn, vc, perc, tape, 1982; Interesting Actions, Objects, and Texts, shakuhachi, tape, film, slides, elecs, 1985; Elective Affinities III, trbn, live elecs, 1987; For Morty (in memoriam Morton Feldman), trbn, pf, elecs, tape, 1987; Stones, tape, 1989; Temenos II, trbn, tape, 1989; Sym. no.2 (Used, Abused, and Cheap Imitations III), b gui, 2 perc, MIDI ens, 1992–4; Wood-Stone-Desert, tpt, live elecs, tape, 1996; tape pieces

Vocal works incl. He was Silent for a Space, chorus, perc, 1978

Principal publishers: Edition Modern (Munich), Media

STEPHEN MONTAGUE

Full cadence [full close]. *See* PERFECT CADENCE.

Fuller, Albert (*b* Washington DC, 21 July 1926). American harpsichordist, organist, conductor and educator. He began his musical education as a chorister at Washington National Cathedral, studying the organ there with Paul Callaway. After attending Johns Hopkins University he continued his education at Yale, studying the harpsichord with Ralph Kirkpatrick and theory with Hindemith, receiving the MMus degree in 1954. After research in French Baroque keyboard music in Paris on a Ditson Fellowship, he returned to New York, where he made his début as a harpsichordist in 1957. European concert appearances followed in 1959, since when he has made frequent tours in North America and Europe as soloist and chamber musician. His extensive repertory encompasses the major styles and national schools of the 18th century, with particular emphasis on French music and the sonatas of Domenico Scarlatti, and he has edited the *Pièces de clavecin* of Gaspard Le Roux. His performing style is clear, precise and colourful within the limitations of the classical harpsichord. In 1964 he was appointed professor of harpsichord at the Juilliard School of Music, later joining the organ faculty and coaching chamber music. He has also taught at the Yale School of Music (1977–80). Fuller has conducted operas by Handel and Rameau, including the first American production of *Dardanus* (1975), and has made many recordings of 18th-century harpsichord music.

HOWARD SCHOTT

Fuller, Blind Boy [Allen, Fulton] (*b* Wadesboro, NC, *c*1909; *d* Durham, NC, 13 Feb 1941). American blues singer and guitarist. He was brought up in the rural black South, Rockingham, North Carolina. In 1926 he became partially blind and about two years later he lost his sight completely. He then left home and worked as a street musician, first in North Carolina, where he worked the tobacco towns with Sonny Terry, and later in Memphis. Fuller was the outstanding exponent, though not an innovator, of the eastern or Piedmont style of blues. Influenced by Blind Blake, Blind Gary Davis and Buddy Moss, he formulated an eclectic style, playing fast runs and swinging rag rhythms on the guitar (often against cross-rhythms on a washboard) to accompany his gritty singing. Davis played for him on the traditional *Rag Mama Rag* (1935, Voc.), one of his earliest successes. Fuller adapted old songs such as the British ballad *Our Goodman*, which became *Cat Man Blues* (1936, Voc.). Although he was probably at his best with fast ragtime themes such as *Step it up and go* (1940, Voc.), he was also a master of slow blues, for example *Weeping Willow* (1937, Decca). Generally he played with finger picks, but on *Homesick and Lonesome Blues* (1935, Voc.) he used a slide to brilliant effect. From late 1937 Fuller was regularly accompanied by the virtuoso harmonica player Sonny Terry in pieces such as *Pistol Slapper Blues* (1938, Voc.) and the ribald *I want some of your pie* (1939, Voc.), one of Terry's favourite themes. He also accompanied Terry on several brilliant harmonica improvisations, notably *Harmonica Stomp* (1940, OK).

PAUL OLIVER

Fuller, David (Randall) (*b* Newton, MA, 1 May 1927). American musicologist, harpsichordist and organist. He attended Harvard University (BA 1949, AM 1950), received the John Knowles Paine Travelling Fellowship (1960–61), and gained the doctorate in 1965 with a dissertation on 18th-century French harpsichord music. He studied the organ with Biggs, William Self and André Marchal, and the harpsichord with Albert Fuller (no relation). His teaching career included positions at Robert College (Istanbul), Bradford Junior College, Dartmouth College, and SUNY, Buffalo, where he was professor of music (1963–97). French music of the 17th and 18th centuries, performance practices of this period, and automatic musical instruments are his main areas of interest. His publications include editions of the keyboard works of Armand-Louis Couperin (1975) and of two ornamented organ concertos by Handel, op.4 nos.2 and 5, as played on an early barrel organ (1980). He was joint editor of *A Catalogue of French Harpsichord Music, 1699–1780* (1990) and he has written articles for a number of scholarly journals. With William Christie he has recorded Couperin's *Simphonie de clavecins* and the second *Quatuor pour deux clavecins*. Fuller's erudite, polished and witty writing shows him to be an exemplary musicologist. He is also a sensitive performer on the harpsichord and organ.

LARRY PALMER

Fuller Maitland, J(ohn) A(lexander) (*b* London, 7 April 1856; *d* Carnforth, Lancs., 30 March 1936). English critic, editor and musical scholar. Poor health disrupted his early nonconformist education and apart from three terms at Westminster School he was, by necessity, taught privately. His musical education began in 1872 when he took piano lessons with Ernst Pauer. In 1875 he entered Trinity College, Cambridge, where he became friends with Stanford and W.B. Squire, whose elder sister he married in 1885, and with whom he participated fully in the flourishing activities of the Cambridge University Musical Society. After graduation in 1882 he studied the piano with Dannreuther and Rockstro; both took a keen

interest in early music, but it was Rockstro who introduced him to harpsichord playing.

Although Fuller Maitland cultivated a reputation as an exponent of the piano and harpsichord, it was in the field of antiquarian studies and musical journalism that he found his true vocation. He was invited by Grove to write articles for his *Dictionary of Music and Musicians* (1878–90), and he was appointed music critic of the *Pall Mall Gazette* (1882–4). In 1884 he moved to *The Guardian* before succeeding Hueffer at *The Times* in 1889, holding the post until his retirement in 1911.

Fuller Maitland's editorial and scholarly work was prolific and varied. Besides the many articles written for the first edition of *Grove*, he was the assistant editor and he edited the appendix to that edition. He was later the general editor of the second edition (1904–10). He produced important editions of early English keyboard music, notably the Fitzwilliam Virginal Book (1894–9, with Squire) and a volume of 15th-century carols with Rockstro. Other publications include editions of Purcell for the Purcell Society, on whose editorial committee he served as a member, and, with Lucy Broadwood, a pioneering collection of *English County Songs* (1893), which contributed indirectly to the foundation of the Folk-Song Society in 1898.

Fuller Maitland was an energetic participant in the Bach revival; his translation, with Clara Bell, of Spitta's biography of Bach (1884–5), and his contribution of *The Age of Bach and Handel* (1904) to The Oxford History of Music added significantly to the momentum of Bach scholarship in England. He also demonstrated his interest in the 19th century with books on Schumann (1884), Joachim (1905) and Brahms (1911). His championship of the British musical 'renaissance' is evident in *English Music in the XIXth Century* (1902) and *The Music of Parry and Stanford* (1934). Though inclining by his own admission towards conservatism, he came to appreciate the work of Debussy, Strauss and especially Vaughan Williams and Holst after his retirement.

A Door-Keeper of Music (1929), his autobiography, provides a fascinating chronicle of the 'intellectual aristocracy' at the turn of the 20th century. In recognition of his work he received the honorary DLitt from Durham (1928), was made a Fellow of the Society of Antiquaries and an associate of the Belgian Académie Royale des Beaux-Arts. He was also a prominent member of the Musical Association and on the council of the RCM. In 1936 the Fuller Maitland Collection, comprising 7000 volumes of music and music literature, including some manuscripts, was bequeathed to Lancaster Central Library.

JEREMY DIBBLE

Full organ (Ger. *volles Werk*; It. *organo pleno*, *pieno*). An organ registration. Perhaps because the early monastic BLOCKWERK organ apparently created a loud and undifferentiated noise, 'full organ' in the sense of 'loud organ' has always meant the use of as few (or as many) stops as will make the maximum of impression with the minimum consumption of wind. Before the invention of stop actions, the undivided *Blockwerk* of Principals was itself the full organ throughout north-west Europe; since then, with the introduction of flute and reed stops and the separation of the *Blockwerk* into several single or multiple ranks, organ makers have been careful, when allowed, to specify which stops are likely to give the best effect. Each school has its own kind of full organ, some having more than one, depending on the period and the kind of music concerned. In France, for instance, the organ in the church of St Michel, Bordeaux (1510), was given seven new *jeux*, the loudest of which was apparently a *grand jeu*. The classical GRAND JEU comprised the reeds and the *jeu de tierce* of both Great organ and *Positif*, and the PLEIN JEU was based on the diapason or principal ranks, including mixtures, of both Great organ and *Positif*. In Italy, the *ripieno* (or *pieno*) was based on single ranks, excluding flutes (Antegnati, 1608) and sometimes including (Principal) Tierce ranks.

The character of the congregation-accompanying *Hoofdwerk* in Flanders and the Netherlands, changed in character from vocal (Krewerd, 16th century) to bright and sharp (Arp Schnitger, 17th century) and to French style (Gouda, 1736). In England the terms 'full organ' and 'Great Organ' were inevitably practically interchangeable since there were very rarely any manual couplers. William Russell's Voluntaries (first book, 1804) specified 'Full Swell' as well as 'Full Organ'; his second set (1812)

has 'Full Organ without the Trumpet'. John Marsh (1791), a sensitive player, suggested five 'kinds of the full Organ' to be obtained by adding stops to the basic Great chorus. The Spanish *plé* (16th century) indicated the chorus in general, and *lleno* (17th century) the main Mixture.

From *das Werck* at Haguenau (1491; the total chorus Mixture excluding the Diapason and Zimbel) to Mattheson's treatises of 1721, the German organ progressed towards an ideal of heavier and thicker *plena* for massive effects in Preludes, Toccatas and Fantasies, in which reeds were not used. Praetorius and Werkmeister insisted that the narrower-scaled (strings) and wide-scaled (flutes) 'families' of stops should not be used together.

PETER WILLIAMS, MARTIN RENSHAW

Fumagalli. Italian family of musicians.

(1) **Disma Fumagalli** (*b* Inzago, nr Milan, 8 Sept 1826; *d* Milan, 9 March 1893). Pianist and composer. He studied the piano (with Antonio Angeleri) and composition at the Milan Conservatory; from 1857 until his death he was professor of the piano there. He became an honorary professor of the Congregazione Pontificia and of the Accademia di S Cecilia in Rome and a member of the Società Filarmonica of Florence. His daughter Carla (*b* Milan, 8 Sept 1858; *d* Brembate, nr Bergamo, 8 Oct 1949) studied with him and became a noted concert pianist. His 334 compositions, all for piano, follow the style of his younger brother (2) Adolfo Fumagalli, showing less talent but with a mastery of technique and the *stile brillante*; they are quite unaffected by the movement, then becoming strong, that aimed at the revival of Italian instrumental music along Classical lines. They include nocturnes, capriccios, divertimentos, scherzos, fantasies on opera themes and, above all, exercises and studies, among them the *Preparazione alla Scuola della velocità op.209 di C. Czerny: 12 nuovi studi diteggiati* (Milan, n.d.). Noteworthy are *La rassegnazione* op.22 (Milan, n.d.), the Concerto in A♭ op.83 for piano and string orchestra (Milan, 1856) and the *Canto della filatrice* op.334 (Milan, n.d.), his last composition.

(2) **Adolfo Fumagalli** (*b* Inzago, 19 Oct 1828; *d* Florence, 3 May 1856). Pianist and composer, brother of (1) Disma Fumagalli. After studying with the organist Gaetano Medaglia in Inzago and then at the Milan Conservatory from 23 November 1837 to 7 September 1847 under Pietro Ray (counterpoint) and Angeleri (piano), he made a successful début in Milan in 1848. He then embarked on a very well-received series of concert tours in the major cities of Italy, France and Belgium. In 1854 he returned to Italy, where he alternated between concert tours and composing until his death. He was considered the most gifted of the brothers and one of the principal virtuosos of the first half of the century. In Belgium he was called the 'Paganini of the piano' because of his technical mastery, especially in the left hand, and the brilliance and expressiveness of his tone. Rossini praised him for his cantabile playing, and the critic Filippo Filippi observed in him 'the growing originality of ideas constructed most simply and most faultlessly, restraint in ornamentation ..., freedom from the commonplace and banal'. Today his compositions, which number more than 100, seem rather loosely constructed and mannered salon pieces, in spite of their idiomatic piano writing and their merit as studies.

WORKS

all for piano

Les clochettes, conc., with bells, op.21 (Milan, *c*1849–50)
La pendule, polka-mazurka, caprice fantastique, op.33 (Milan, *c*1849–50)
Laura, polonese di concerto, op.76 (Milan, ?1851)
L'école moderne du pianiste: recueil de morceaux caractéristiques, 18 pieces in 3 bks, op.100 (Milan, 1855–6), incl. Le réveil des ombres, danse fantastique; Le papillon, étude de salon; Sérénade barcarolle; also caprices, bolero, ballade, mazurka
15 pieces in *L'arte antica e moderna: scelta di composizioni per pianoforte*, xvi (Milan, ?1863)
Numerous transcriptions; concert fantasies on opera themes, incl. Gran fantasia di concerto [on I puritani], op.28, ed. (Milan, ?1880); Casta diva, cavatina dall'opera di Bellini, Norma: étude pour la main gauche, op.61 (Leipzig, n.d.); Presso la tomba, duettino dai Vespri siciliani, op.112 no.2 (Milan, ?1856); others from La favorite, Lucia di Lammermoor etc.

(3) **Polibio Fumagalli** (*b* Inzago, 26 Oct 1830; *d* Milan, 21 June 1900). Organist, pianist and composer, brother of (1) Disma Fumagalli. He studied the organ, the piano and composition at Milan Conservatory, where in 1873 he was appointed professor of the organ, a post which he held until his death. For more than 20 years he was *maestro di cappella* at the church of S Celso in Milan and a much sought-after piano teacher. He wrote some chamber music, including a *Trio de bravoure* op.281, for flute, oboe and clarinet with piano accompaniment, songs and more than 200 piano and organ works, such as *Ascetica musicale*, a collection of 15 organ pieces op.235 (Milan, n.d.), an organ Toccata and Fugue op.298 (New York, n.d.) and two organ sonatas opp.269 and 290.

(4) **Luca Fumagalli** (*b* Inzago, 29 May 1837; *d* Milan, 5 June 1908). Pianist and composer, brother of (1) Disma Fumagalli. He studied at the Milan Conservatory, where he was taught the piano by Angeleri, and became a highly successful concert pianist and composer in Italy, Paris (1860) and the USA. For a time he was head of the piano faculty of the Philadelphia Conservatory and on returning to Milan devoted himself to teaching and composing. After his brother Adolfo he was the best-known member of the family. His numerous piano compositions are pleasant and elegant, tending sometimes more towards intimacy than brilliant display, and complying with the instrumental renaissance of the latter part of the century in Italy. Besides the usual transcriptions and paraphrases of operatic arias, his original compositions for the piano include *Crâneries et dettes de coeur: 14 studi fantastici* (Milan, n.d.). He composed one opera, *Luigi XI* (libretto by Carlo d'Ormeville; Florence, Pergola, 29 March 1875), a *Sinfonia marinaresca* and other orchestral works. Ricordi published his edition of all Beethoven's piano sonatas and some works by Clementi and others.

(5) **Mario Fumagalli** (*b* Milan, 4 Sept 1864; *d* Rome, 17 Sept 1936). Baritone and actor, son of (4) Luca Fumagalli. He studied singing, but was forced to abandon his career when he lost his voice. He became a theatre director and a teacher of acting at the S Cecilia school in Rome. In his final years he was also librarian of the Conservatorio di S Cecilia.

FRANCESCO BUSSI

Fumet, Dynam-Victor (*b* Toulouse, 4 May 1867; *d* Paris, 2 June 1949). French composer. He entered the Paris Conservatoire in 1885, and studied composition with Guiraud and the organ with Franck, supporting himself by work at the cabaret Le Chat Noir. There in 1887 he met Satie, who replaced him as conductor in 1890. Fumet almost certainly influenced Satie's early music and ideas: he had an active interest in alchemy and the occult, as well as strong anarchist sympathies, from which his nickname 'Dynam[ite]' derived. During the 1880s he was a friend of Kropotkin and Louise Michel, and he also contributed to the anarchist journal *La révolte*. Both Fumet and Satie founded their own religious sects, yet both died within the Catholic faith (which in Fumet's case was much stronger, with Léon Bloy as an influence on his spiritual ideas). Fumet was a brilliant improviser on both the piano and organ, becoming Franck's assistant and then organist at Ste Clotilde. After a period in South America and ten years at Juilly College, he became organist and choirmaster at Ste Anne in Paris between 1910 and his death.

Fumet's music was largely within the Romantic tradition of Liszt and Wagner; much remains unpublished. He also had a strong interest in Renaissance music and Gregorian chant, though he disliked stylistic archaism. His art, like Debussy's, sprang from melody, and his modulations are often free and unpredictable. However, in contrast to his improvisations, his finished compositions are refined and polished, and he often wrote his own texts. There is a certain mysticism and joyous intensity in his religious music, but his overall aim was simplicity, sobriety, sincerity and purity, and an independent reconciliation of old and new styles.

WORKS
(*selective list*)

ORCHESTRAL

La lumière sur le sentier; Le sabbat rustique, 1904; Le cantique du firmament, 1910–11; Transsubstantiation, 1913–20; 'Eli, Eli, lamma sabacthani?', 1914–40, arr. pf, 1922; Les trois âmes, 1915–17; Le triptyque des légendes, 1918; Le conciliabule des fleurs, 1921; Libération, 1921; Marche funèbre (1922); Notre mirage, notre douleur, 1922; Vénus sortant des eaux, 1934; Aria, 1938; Hiératique, 1940; Le sommeil d'Adam, 1940; Tourbillon, 1940; Voie lactée, 1941; La prison glorifiée, 1943

VOCAL

Choral: 4 choruses, female chorus, pf, before 1914: Les glaneuses 'Choeur égyptien' (1897), Joies floréales, Les anges du soir, Les voix mystiques; Sancta Genovefa (orat), 1918; La messe mariale; La messe du Christ-Roi; Mass; La messe des oiseaux, female chorus; O doux printemps aimé, 1924; Pater noster, mixed chorus (1939); Un bel ange du ciel (carol), mixed chorus, org, 1945 (1956); Il est tout petit (carol), S, female chorus/children's chorus, org, ?1945 (1957); Les saisons, 1946; Printemps; Ave Maria; Cantiques à Marie; Requiem Mass, 1948

Solo vocal (1v, pf, texts by Fumet unless otherwise stated): Berceuse (1890); Ave verum, Mez, org (1899); Le verbe des nuits (1899); O salutaris, T/S, org (1899); Un dimanche: Petite légende (1904); Je me languis (1907); Légende marine (1907); Refloraison (1907); Sérénade faunesque (1907); Trouble d'âme (1907); Verbe d'amour: Diction symphonique (1907); Sur les ailes de notre amour (J. Daniel), waltz (1949)

CHAMBER AND SOLO INSTRUMENTAL

Les enlisements d'en-haut, pf, *c*1885 (1897) [Andante from Sym., b]; Douloureux pèlerinage, pf, *c*1885; Les libellules, waltz, pf, 1899, arr. orch, arr. ROBERT ORLEDGE

Funck [Funccius], **David** (*b* Joachimsthal [now Jáchymov], Bohemia, 8 Jan 1648; *d* nr Arnstadt, ?1699). German composer, writer on music, instrumentalist, poet and teacher of Bohemian birth. His biography has often been confused with that of his father, also named David (1615–69), who was Kantor at Joachimsthal and took a similar post at Reichenbach im Vogtland when the younger David was two years old. The son is said to have been a baccalaureate at Reichenbach in 1669 or 1670 and he appeared as a disputant at the promotion of Johannes Riemer at Halle in 1673, but evidently Funck did not take a university degree himself. Several incidents in his life induced his earlier biographers to fill in gaps with anecdotal detail and to present Funck as an ingenious but morally deficient personality. According to the funeral sermon for his mother, he was employed as secretary to a dowager Duchess of Neuenburg (or Neuburg; her identity has not yet been established) around 1680. She took him with her to Italy in 1682, but when she died there (or perhaps just released him) in 1689 Funck returned to Reichenbach where he earned his living by giving music lessons and writing occasional poetry. A lost Passion which he composed about 1690–94 won him great acclaim and may have helped him to obtain, in 1694, the post of organist and teacher at the Lateinschule at Wunsiedel in Franconia. In January 1699 Funck, suspected of sodomy, fled from there; a council document relating to this event refers to him as a 'wicked man' ('böser Mensch'). Funck's further whereabouts are uncertain; legend has it that after a brief stay at Schleiz, where he gave a concert at the court, he set forth on foot towards Arnstadt but was found frozen to death in the open country.

Funck was known as a virtuoso on the violin, viola da gamba, guitar and clavichord. Of his vocal and instrumental compositions, only the *Stricturae viola di gambicae, ex sonatis, ariis, intradis, allemandis* (Leipzig, Jena and Rudolstadt, 1677) have survived, comprising 43 dances and other pieces for four equal viols (from which M. Seiffert assembled a Suite in D, ed. in *Organum*, 3rd ser., xxxiv, 1938; one allemanda in E. Mohr: *Die Allemande*, ii, Zürich, 1932). Among the partly homophonic, partly contrapuntal settings, a saraband with variations deserves special attention. A theoretical essay, *De proportione musica veterum et nostra disputationem academicam* (Jena, 1673), still clinging to the old speculative theory of music, is also extant, but Funck's short *Compendium musices* (Leipzig, ?1670), in the German language, was lost in the 19th century.

DOROTHEA SCHRÖDER

Funcke, Friedrich (*b* Nossen, Saxony, 1642; *d* Römstedt, nr Lüneburg, 20 Oct 1699). German composer and writer on music. After attending school at Freiberg and Dresden he studied theology at Wittenberg in 1660–61 and soon after became Kantor at Perleberg. In 1663 he applied for the post of Kantor at the Johanneum, Hamburg, but the appointment went to Christoph Bernhard. In 1664 he succeeded Michael Jacobi as Kantor at St Johannis, Lüneburg. During his 30 years in this post he made his mark on the musical life of Lüneburg but was involved in numerous disputes with the school and church authorities over his continual struggle to improve conditions for the performance of church music. He also campaigned energetically to have the Latin liturgical hymns replaced by German congregational hymns. In 1672 his salary was withheld for six months because he allowed the music for his brother-in-law's funeral to be accompanied on a regal, which had never been permitted at the burial of a distinguished citizen. In 1684 the municipal senate objected to his working simultaneously as a proofreader at the publishing house of Stern. From 1683 on he applied repeatedly for livings, but only in 1694 did he leave to become pastor at Römstedt, where he remained until his death.

Most of the numerous compositions that Funcke had to write for civic festivities and the weddings and funerals of leading citizens have vanished. His surviving funeral odes for five- or six-part choir and continuo show a concern for flexible structures, engendered by the use of varying combinations of voices, and for the employment of harmony and dynamics to interpret the text. His cantata for New Year 1684 contains various solo verses between the opening and closing choruses. In his *Danck- und Denck-Mahl*, a large-scale concerto in ten sections commemorating the storm that damaged the tower of St Johannis, tutti and concertino passages alternate within the choruses. The accompaniment consists of either four strings and bassoon or cornetts and trombones, at the behest of the text, the descriptive details of which – downpour, lightning, thunder, earthquake – are most effectively portrayed in the music.

Birke convincingly ascribed to Funcke an anonymous *St Matthew Passion* which has particular significance in the history of the oratorio Passion. It must have been written later than the *St Matthew Passion* by his sometime Lüneburg colleague Christian Flor, which has an identical text; but it was not influenced by Johann Theile's *St Matthew Passion*, which he came to know in 1674. Funcke's Passion exists in two versions. The first contains unaccompanied recitatives for the Evangelist, which are modelled partly on the formulae of older Passions and partly on Luther's German Mass but also reveal the beginnings of text expression. In the second version the recitatives are provided with a continuo part, which is probably not by Funcke himself. 21 accompanied turbae give dramatic emphasis, and 12 solo sections and 9 sinfonias are interpolated as moments of quiet meditation on the events of the Passion. In his *St Luke Passion* (1683), of which only the text survives, Funcke must have taken a considerable step towards the Passion oratorio, for the compiler of the text not only inserted reflective passages but occasionally altered the Gospel text and elaborated on it. According to Walter the surviving texts of other lost works by Funcke are important as sources for the history of the cantata and oratorio. Of his lost school textbook on singing it is known only that he rejected solmization and used letter names for notes and intervals.

MARTIN RUHNKE

Function (Ger. *Funktion*). A term used in harmonic theory, especially by Riemann, to denote the relationship of a chord to tonal centre. The relationship is defined in his *Vereinfachte Harmonielehre oder die Lehre von der tonalen Funktionen der Akkorde* (London and New York, 1893, 2/1903; Eng. trans., 1896) in terms of subdominant, dominant and tonic harmonies only, and chord progressions are seen there as being made up of these three functions in varying guises. Thus, for example, the chord of the supertonic is seen as having the function of subdominant, and this is rationalized by reference to its being the relative minor of the chord of the subdominant. In this way, even a complex dissonant chord can be 'reduced' to one of the three basic functions.

See also HARMONY; TONALITY; ANALYSIS, §II, 3.

□

Fundação Calouste Gulbenkian (Port.). *See* GULBENKIAN FOUNDATION.

Fundamental bass [radical bass] (Fr. *basse fondamentale*; Ger. *Fundamentalbass*). A term used by Rameau in his *Traité de l'harmonie reduite à ses principes naturels* (Paris,

1722; Eng. trans., 1971) to denote the imaginary bass line produced by linking together the roots of chords in a progression; it differs from the actual sounding bass line (the *basse continue*, or basso continuo) wherever chords are presented in INVERSION. Rameau saw the fundamental bass as the generator of the HARMONY, and for him the strength of a harmonic progression depended on that of the fundamental bass: he wrote that 'it should proceed by consonant intervals, which are the 3rd, the 4th, the 5th and the 6th'.

The English expression 'fundamental bass' – a direct translation of Rameau's 'basse fondamentale' – was used by Pepusch (1730), Holden (1770) and other 18th-century writers, and has remained in use since that time. The original French version was also adopted into English at an early stage, for example by John Holden in his *Essay towards a Rational System of Music* (Glasgow, 1770). □

Fundamental line. *See* URLINIE.

Fundamental structure. *See* URSATZ.

Fundament instrument. A term used by Michael Praetorius (*Syntagma musicum*, ii, 1618) to designate instruments capable of sounding all the parts of any piece, such as 'the organ, regal, harpsichord, virginal, lute, harp, double cittern, pandora, penorcon and the like', in contrast to melody instruments, which can play only a single part, and those instruments, like the *lira da braccio* and the *lira da gamba*, which can play only some parts. Praetorius stated that he used the term 'fundament instrument' because such instruments 'must be used as a foundation when a single part is sung or played together with them'. He may have borrowed the usage from Agostino Agazzari (*Del sonare sopra 'l basso*, 1607) who used the term in a slightly different way. According to Agazzari the instruments of the 'fondamento' are those that play the chords of the figured bass, such as the harpsichord or the organ in works for large forces; Agazzari distinguished these instruments from those of the 'ornamento', which also form part of the continuo group but serve merely to enrich its texture, such as the lute, theorbo, harp, *lirone*, cittern and spinet, except that in works for a few voices or only a single voice that group of instruments may serve as the 'fondamento'.

EDWIN M. RIPIN

Funghetto, Paolo (Luca). *See* FONGHETTO, PAOLO.

Fungoni, Papebrochio. Pseudonym of an Italian composer of two works performed in Naples in 1737 and 1738. The first, a sacred opera named *La Teodora* with words by G. Federico (libretto, *GB-Lbl*), was produced in the monastery of S Chiara at the end of Carnival 1737. The second was a comic opera in dialect called *La rosa* (text, P. Trinchera), presented at the Teatro Nuovo in the autumn of the following year. Since there is no other record of a composer called Fungoni, and since furthermore the comic-opera libretto (*GB-Lbl* and *I-Nc*) refers to him as a native of the Canary Isles (a description well worthy of a character in *opera buffa*), the name is almost certainly fictitious. A much altered version of this opera libretto was produced under the title *Don Paduano* at the Teatro della Pace, Naples, in 1745 with music by Nicola Logroscino. But this does not establish a connection between Logroscino and Fungoni, whose identity remains uncertain, even if, according to Sartori, the composer's real name was Domenico Antonio di Piore. (*SartoriL*)

MICHAEL F. ROBINSON/FRANCESCA SELLER

Funk. An African-American popular music style. It features syncopated interlocking rhythm patterns based on straight quaver and semiquaver subdivisions, a vocal style drawn from soul music, extended vamps based on a single and often complex harmony, strong emphasis on the bass line, and lyrics with frequent spiritual themes and social commentary. The use of the term for a musical style inverts the negative colloquial meaning of strong aromas, particularly of a bodily and sexual nature.

1. Origins. 2. 1973 onwards.

1. ORIGINS. While the adjective 'funky' was applied to gospel-influenced jazz in the 1950s, and appeared in song titles as early as 1967, for example *Funky Broadway* by Dyke and the Blazers, it did not become widespread as a term for a specific genre until the mid-1970s. The increased use of the term in the late 1960s coincided with a shift in African-American politics from the integrationist stance of the Civil Rights movement, associated with the rise of soul music, to the more radical stance of the Black Power Movement, a shift heralded by James Brown's funk recording *Say it loud, I'm black and I'm proud* (1968). In the 1960s Brown did the most to develop what came to be known as funk (fig.1), but elements of it can be found in recordings of the 50s: Professor Longhair's *Tipitina* (1953) and the Hawkettes' *Mardi Gras Mambo* (1954), both from New Orleans, blended Latin rhythms with the texture and harmonic patterns of rhythm and blues, while Ray Charles's *What'd I say* (1959) presented an innovative synthesis of Latin rhythms, blues-based harmonic progressions and gospel vocal techniques. Brown's 1962 recording of *Think* from *Live at the Apollo*, with its rapid tempo and aggressive cross rhythms, intensified the

1. James Brown

2. George Clinton

polyrhythmic implications of the earlier proto-funk recordings, while *Out of Sight* (1964) and *Papa's got a brand new bag* (1965) brought these innovations into the recording studio. He refined his approach in *Cold Sweat* (1967) by substituting open-ended vamps based on a single harmony for harmonic progressions, and by accenting strongly the first beat of every or every other 4/4 bar, freeing the instruments to play any number of syncopated patterns in which the beats are implied rather than stated.

Other bands created their own forms of funky soul music, including Booker T. and the MGs, the Bar-Kays, the Meters, and Charles Wright and the Watts 103rd Street Rhythm Band. The first band to absorb Brown's rhythmic approach and extend it was Sly and the Family Stone, who joined his rhythmic and textural innovations with a fragmented doo-wop vocal style featuring rapidly alternating voices, and with aspects of psychedelic rock, a fusion evident in their first successful single, *Dance to the Music* (1967). The psychedelic influence, particularly that of Jimi Hendrix, was felt by other funk bands, most notably Funkadelic (*Maggot Brain*, 1971) and the Isley Brothers (*That lady*, 1973).

The early 1970s witnessed a further spread, refinement and diversification of the funk style. The role of the bass expanded with Brown's new bass player, William 'Bootsy' Collins, in songs recorded during 1970 such as *Sex Machine* and *Superbad*. Also, Larry Graham of Sly and the Family Stone created an innovative thumb-popping bass guitar technique particularly evident in an early 1970 release, *Thank you falettinme be mice elf agin*. The band War added a prominent Latin element to the funk sound (the songs *Slippin' into Darkness*, 1971, and *Cisco Kid*, 1972), while Tower of Power brought syncopated horn lines to a new level of complexity (the album *Bump City*, 1972).

2. 1973 ONWARDS. The sudden popularity during the period 1973–5 of Kool and the Gang, the Ohio Players, Earth, Wind, and Fire and Parliament, in conjunction with the enormous success of Stevie Wonder, marked the beginning of funk as a distinct genre. Kool and the Gang's trio of hit songs *Funky Stuff*, *Jungle Boogie* and *Hollywood Swinging*, brought the funk sound to the pop audience with jagged, syncopated horn lines, party whistles and chanted group vocals. The Ohio Players scored a number one hit with *Fire* in 1974, a song that featured a hypnotic bass line, salacious group vocals, horn riffs, Latin-flavoured percussion and fuzz-toned guitar lines. Earth, Wind, and Fire fused jazz, soul, Afro-Caribbean rhythms, and Pan-African themes (signified musically by a trademark use of the kalimba), making their album *That's the Way of the World* one of the most popular of 1975. Stevie Wonder embarked on a new phase with the song *Superstition* (1972), a funk classic which marked his status as the most popular black recording artist of the period. By 1974 funk had influenced a number of jazz artists in the development of jazz fusion as evidenced in recording by Miles Davis (*Bitches Brew*, 1969), Herbie Hancock, (*Headhunters*, 1973), the Crusaders (*Southern Comfort*, 1974) and Weather Report (*Black Market*, 1976).

Parliament, with mastermind George Clinton (fig.2), began a string of recordings with *Up for the Down Stroke* (1974) that succeeded on the rhythm and blues charts through the 1970s, including *Tear the roof off the sucker (Give up the Funk)* (1976), *Flash Light* (1977), *One Nation Under a Groove – Part 1* (by Funkadelic) and *Aqua Boogie (a Psychoalphadiscobetabioaquadoloop)* (both 1978). Clinton created a particularly striking form of funk, emphasizing a clear backbeat, often reinforced with electronic hand claps. He thickened the texture with a wealth of contrasting, overlapping parts, featuring 'Bootsy' Collins' extroverted bass lines, Bernie Worrell's innovative synthesizer work that included the use of the synthesizer bass on *Flashlight*, horn players from Brown's band and gospel-rooted group vocals. Clinton expanded the Parliament stage show into a spectacle that set new standards for grandiosity in black popular music. With

the album *Mothership Connection* (1975), he began to develop a cosmological narrative that proselytized the redemptive power of funk, and has continued to influence numerous hip hop musicians.

While groups such as the Commodores, the Gap Band, Rick James, Cameo and Slave achieved success in the late 1970s and early 80s, they were largely overshadowed on rhythm and blues radio by the overwhelming popularity of disco music, itself a simplified form of funk. Funk's influence, however, was felt in its psychedelic rock–funk form through artists such as Prince and Living Colour, and in Michael Jackson's *Thriller* (1982), which blended aspects of funk with disco, pop and heavy metal. The legacy of funk cuts across a wide range of popular forms, and is most obvious in hip hop, which has adopted funk's rhythmic approach and recycled many of its rhythmic patterns via sampling.

DAVID BRACKETT

Funk, Joseph (*b* Pennsylvania, 6 April 1778; *d* Singers Glen, VA, 24 Dec 1862). American composer and tune book compiler. A Mennonite, he compiled for the German-speaking denominations of the Shenandoah Valley *Die allgemein nützliche Choral-Music* (Harrisonburg, VA, 1816), a shape-note tune book that contained chiefly chorales but also included four folk-hymn tunes taken from Davisson's *Kentucky Harmony* (1816). In 1832 he published in Winchester, Virginia, *A Compilation of Genuine Church Music*, a book of mostly Anglo-American tunes, which had reached ten editions by 1860. By the fifth edition (1851) the title had become *Harmonia sacra, being a Compilation of Genuine Church Music*, and its notation had changed from four- to seven-shape. A 25th edition, *The New Harmonia sacra: a Compilation of Genuine Church Music* (1993), is still in use among Mennonites of the Shenandoah Valley. Funk's other shape-note publications include *A Map or General Scale of Music* (published in Mountain Valley [now Singer's Glen], printed in Philadelphia, 1847) and a monthly periodical, the *Southern Musical Advocate and Singer's Friend* (July 1859–April 1861). His grandson Aldine S. Kieffer was a leading publisher of shape-note tune books in the Shenandoah Valley after the Civil War. Alice Parker's opera *Singers Glen* (1978) is based on Funk's life.

Funky jazz [funk]. *See* SOUL JAZZ.

Furchheim [Forcheim, Forchheim], **Johann Wilhelm** (*b* ?1635–40; *d* Dresden, 22 Nov 1682). German composer, violinist and organist. He spent his life at the Saxon electoral Hofkapelle at Dresden. He is first heard of there as a boy in 1651, when he was being trained as an instrumentalist. He was a violinist there from 1665, and from 1667 to 1676 he directed the church music and *Tafelmusik*. In 1680 he became Konzertmeister and in 1681 vice-Kapellmeister. From time to time he also acted as court organist. A more famous violinist, J.J. Walther, was one of his colleagues from 1674 to 1681. An earlier colleague was Adam Krieger, whose posthumous *Neue Arien* (1667) he helped to edit; he also composed ritornellos for the ten songs added to the second edition (1676). In his E minor sonata for two violins and basso continuo the instruments have finely spun lines and sometimes play together, sometimes singly. The other four manuscript sonatas, for five to seven instruments, anticipate aspects of the 18th-century sonata; in the six- and seven-part ones the violins form a self-contained group. These works have a well-defined melodic structure and expressive harmony. Furchheim's church music is widely recorded in inventories of about 1700, but only a single work is now known to be extant.

WORKS

INSTRUMENTAL

Musicalische Taffel-Bedienung, 2 vn, 2 va, vle, bc (Dresden, 1674); 2 sonatas ed. in Collegium musicum, lx (Leipzig, 1935); 1 sonata ed. P. Rubardt (Halle, 1952)
Auserlesene Violinen-Exercitium, bestehend in unterschiedlichen Sonaten benebenst angehengten Arien, Balletten, Allemanden, Couranten, Sarabanden und Giguen, a 5 (Dresden, 1687), lost
5 sonatas, D, e, E♭, a, A, 3–7 insts (cornetts, vns, vas, vle, bn, bc), *S-Uu*
Suite, b, a 5, *S-Uu*; ed. in Organum, iii/26 (Leipzig, 1930, 3/1958)

VOCAL

Lobe den Herren, meine Seele, 4vv, 2 clarinos, 2 cornettinos, bn, bc, *D-Bsb*
Over 20 other sacred works, mostly with insts, listed in inventories of *c*1700

EDITIONS

A. Krieger: Neue Arien, 2, 3, 5vv, 2 vn, 2 va, bc (Dresden, 1667, enlarged 2/1676 with 10 addl works, with ritornellos by Furchheim), ed. in DDT, xix (1905/*R*) [collab. D. Schirmer]

KARL-ERNST BERGUNDER

Furiant (Cz.: 'a proud, swaggering, conceited man', pl. *furianty*). A Czech couple-dance, in moderate to fast

tempo, in triple time with hemiola-type syncopations. The hemiolas generallyoccur at the beginning, helping momentarily to confuse the metre, rather than as part of a cadential formula. A *furiant* typically begins with two 3/4 bars stressed, however, as three bars of 2/4, followed by two ordinary 3/4 bars. It is one of the constituent dances of the BESEDA.

The word 'furiant' first occurs in the 1770s in a broadside ballad *Chvála sedláků* ('In Praise of Farmers') and in Jan Antoš's *Opera de rebellione boëmica rusticorum* (1777), used there in the sense 'disturber of the peace', 'rebel'. A folksong with hemiola characteristics and with a text featuring the word 'furiant' was first recorded in Rittersberk's collection, though with a German text: 'Furiant, furiant, furiant, du bist mein lieba Monn' (Prague, 1825; ed. in Markl, 549). A Czech version with the same tune, but set to satirical words about an arrogant peasant, 'Sedlák, sedlák, sedlák', can be found in K.M. Jiříček's manuscript collection *Zpěvník* ('Songbook'; 1845–62; *CZ-Pnm*) and in Erben (1842, text; 1862, tune, ex.1 and other early collections of Czech folksong.

The early history of the *furiant* is unclear. Markl suggests a French origin ('Fou-riant'), possibly going back to the Napoleonic wars. German theorists record a dance called a 'Furie', operatic in origin (*Walther ML*), whose character (fast and furious) was suggested by its name. Türk (1789) mentions 'sharp accents'; both he and Quantz (1752) define its metre as either in common time or in 3/4. There are several reasons why this may be a different dance from the Czech *furiant*: the character of the German 'Furie' is 'fiery' (Quantz), the speed fast and the metre either duple or triple, whereas the earliest Czech accounts of the *furiant* imply a dance in moderate or slow tempo of a whimsical, hesitant or even humorous nature (Zvonař), and with the metre alternating in some way. Zvonař (1863) provided the first precise description of the dance's metrical structure. Jungmann (1835) defines it as 'a dance whose first half resembles a *skočná* [i.e. in 2/4] with arms akimbo, the second is danced almost as a German dance [i.e. a ländler]', a description taken further by Waldau (1859): 'the dancer imitates a proud puffed-up farmer: his arms akimbo, he stamps with his feet, pulls his skirt outwards'. His partner has to mark time until, in the second half they dance a 'serious and slow *sousedská* in the metre of a ländler'. By 1869, when Smetana added a named *furiant* to *The Bartered Bride*, the tempo had become 'Allegro energico' (the tune is clearly modelled on ex.1). Thereafter the *furiant* was commonly used by Czech nationalist composers. In addition to replacing the scherzo with a *furiant* in his Seventh Symphony, Dvořák used named *furianty* in his *Slavonic Dances*, in piano works (B85, B137) and as movements of chamber works

Ex.1

[Farmer, once again farmer, farmer is a big shot: he has a belt on his belly and a tulip on his fur coat.]

(B80, B155). Examples are also found in 20th-century works by Křička, Vítězslav Novák and Weinberger.

JOHN TYRRELL

Furió, Pedro (*b* Alicante; *fl* 1734–80). Spanish composer. His earliest documented post was as a singer at the parish church of S María, Elche (1734); since he was already a priest he was then probably about 27 years old. His next recorded posts were as *maestro de capilla* at S Miguel in Andújar (1750), the collegiate church of S Sebastián, Antequera (4 Dec 1750), the royal chapel in Granada (1755), the parish church of S Martín in Valencia (1756), Guadix Cathedral (1770) and at León (1770). In 1767 he was appointed singer, though not *maestro de capilla*, at the cathedral of Santiago. His last known position, from 20 March 1775, was as *maestro de capilla* at Oviedo Cathedral, which he seems to have left in 1779 or 1780. His compositions, all in manuscript, survive in various Spanish churches and cathedrals. Particularly important are a book of masses 'in stile antico' in León Cathedral, and a collection of Lamentations for Holy Week, in ornate bel canto style, in Santiago.

JOSÉ LÓPEZ-CALO

Furlana. *See* FORLANA.

Furlanetto, Bonaventura ['Musin'] (*b* Venice, 27 May 1738; *d* Venice, 6 April 1817). Italian composer. Of poor parents, he spent his childhood in the parish of S Nicolò dei Mendicoli, a district of Venice known for its fishermen and artisans, with which he always identified and where he chose to be buried. Musically he was almost self-taught, although he had some instruction from his uncle, Nicolò Formenti, who was an amateur organist, and from Giacopo Bolla, a priest. He studied literature and philosophy with Jesuit teachers, but had difficulty qualifying for the priesthood until the patriarch of Venice interceded for him, having been impressed by his music performed at S Nicolò. Later he renounced the ministry, but continued to wear ecclesiastical dress.

Of Furlanetto's earliest surviving music, a *Laudate Dominum* of 1762 (in *F-Pc*) shows competence in the conservative style and a *componimento sacro* of 1763, *La sposa de' sacri cantici*, in the theatrical. The latter, written for the oratory of S Filippo Neri, Venice, was well received and was revived there in 1767, 1773 and 1784. Even more successful was his oratorio *Giubilo celeste al giungervi della sant'anima* performed at SS Giovanni e Paolo on 16 May in 1765, 1766 and 1767, which according to Caffi pleased audiences with its *opera buffa* traits. He also provided music to commemorate the canonization of Girolamo Miani at S Maria della Salute on 20 July 1768 and later that year he wrote an oratorio for the hospital choir at S Maria della Visitazione, commonly called the Pietà, where on 21 September 1768 he was appointed *maestro*, a position he held for nearly 50 years.

In August 1770 Burney heard Furlanetto direct at the Pietà and reported that 'the composition and performance which I heard tonight did not exceed mediocrity'. On 14 August Burney was more favourably impressed by his music at the church of S Maria Celeste and returned the following day for the feast of the Assumption, when he was again disappointed:

> the resources of this composer are very few; he has little fire and less variety, but he sins more on the side of genius than learning, as his harmony is good, and modulations regular and warrantable; yet I must own, that his music is to me tiresome, and leaves behind it a languor and dissatisfaction.

Moreover Burney reported that Galuppi was 'rather hurt at the encouragement and protection which ecclesiastical dunces, among whom is F[urlanetto], meet with as composers here'. And yet Caffi later claimed that Galuppi had respected Furlanetto and even encouraged him to complete one of his masses. The far higher quality of Furlanetto's music composed in the later 1770s and 1780s indicates that his musical talent developed considerably. Exceptionally gifted singers, such as Bianca Sacchetti and Benvenuta, whose range reached high *a'''* and for whom Furlanetto wrote out elaborate cadenzas, joined a growing roster of skilled singers at the Pietà in the mid-1780s. The fact that the scores of his earlier oratorios do not survive except in later revisions suggests his own recognition of his vastly improving abilities. His orchestral resources at that time came to include not only strings and the usual wind instruments but double bassoon, slide trombone, serpent, 'doppio corno' and percussion instruments: timpani, drums, bells, jingle bells (*sonagli*) and rattles (*sistri*). The psaltery, guitar and theorbo were also used for special effects. Furlanetto's unusual bass lines may well have been prompted by the fact that Domenico Dragonetti assisted Furlanetto at the Pieta until the early 1790s.

In 1774 Furlanetto competed unsuccessfully for the post of *vicemaestro* at S Marco. When Ferdinando Bertoni was excused to make his second trip to London (1781–3), Furlanetto was named *organista supplementare* to replace him. On 18 December 1794 he was appointed *vicemaestro provvisorio*, and on 23 December 1797 *secondo maestro effettivo*. The date of his election as *maestro di cappella* is given as 1814 by the *Gazzetta privilegiata di Venezia* of 10 April 1817, yet he must have succeeded Bertoni as *primo maestro* shortly after the latter's retirement on 11 June 1808.

By the early 1800s Furlanetto had become known throughout northern Italy as the most important composer of sacred music in Venice. In 1811 he was unanimously elected *maestro di contrappunto* by the 40 *dilettanti* who had established the Istituto Filarmonico in Venice. A counterpoint treatise from this year is mentioned by Caffi, although the only surviving theoretical work, *Lezioni de contrappunto* (*I-Vc*), is dated 1789. Among his many composition students were Anselmo Marsand, Giovanni Pacini, the patrician Zambelli, the Abate G.B. Botti and his closest friend, Antonio Rota. Rota, a priest at S Vitale, sponsored concerts in his home and church, which Furlanetto conducted, and put in order Furlanetto's autograph scores, now in the Venice Conservatory and Marciana libraries, after his death. The liturgical works composed for S Marco would be easily distinguishable from those written for the Pietà were it not that a bass part occurs in many of the oratorio choruses. Some visitors mentioned the presence of a bass voice at the Pietà, and yet no male singer is ever named in any of the printed librettos.

WORKS

many autographs, notably in I-Vc

ORATORIOS

All for solo vv, chorus, orch; performed at Venice, Pietà, unless otherwise stated

La sposa de' sacri cantici, Venice, S Maria della Fava, 1763, *I-Bc*, Oratorio di S Filippo Neri, Chioggia; Giubilo celeste al giungervi della sant'anima del Protomartire Giovanni Nepomuceno (M. Fiecco), Venice, SS Giovannie Paolo, 16 May 1765, perf. 1767 as Il trionfo del invitissimo Protomartire Giovanni Nepomuceno; Joseph pro-rex Aegypti thypus Christi, Sept 1768, *Vc* (as rev. for 1811); De nativitate virginis genethliacon, 8 Sept 1770, *Vc*; Moyses in Nilo, 1771, *Vc* (as rev. for 1797); Felix victori, 1773, *Vc*, rev. 1805, *Vc*; Jaelis victoria, 1773, *Vc* (as rev. for 1805); Athalia, 8 Sept 1773, *Vc*

SVEN HANSELL

Furlanetto, Ferruccio (*b* Pordenone, Sicily, 16 May 1949). Italian bass. He made his début in 1974 at Lonigo (Vicenza) as Sparafucile, then sang at various Italian opera houses. At Aix-en-Provence (1976–7) he sang Dr Grenvil and Cecil (*Roberto Devereux*). Having made his US début in 1978 at New Orleans as Zaccaria (*Nabucco*), he sang Alvise (*La Gioconda*) at San Francisco the following year. At Glyndebourne (1980–81) his roles were Melibeo (Haydn's *La fedeltà premiata*) and Rossini's Don Basilio. He has sung Phanuel (*Hérodiade*) and Ernesto (*Parisina*) at Rome; Oberto, Gounod's Méphistophélès and Don Giovanni at San Diego (1985–93); Mahomet II at the Paris Opéra (1985); Philip II, Mozart's Figaro, Leporello, Don Alfonso and Don Giovanni at Salzburg (1986–95); and Don Pasquale at La Scala (1994). He made his Covent Garden début as Leporello in 1988, and between 1990 and 1992 sang Leporello, Don Giovanni and Figaro at the Metropolitan. Furlanetto's other roles include Rossini's Assur, Mustafà and Don Magnifico, and Verdi's Ramfis and Fiesco. A lively actor with an incisive, dark-toned voice, he has recorded several of his Mozart roles, including Leporello with Karajan and Figaro and Don Alfonso with Levine.

ELIZABETH FORBES

Furman, James (*b* Louisville, 12 Jan 1937; *d* Danbury, CT, 6 Sept 1989). American composer. His early piano lessons were provided by an aunt, who also exposed him to opera through the Metropolitan Opera's radio broadcasts. His first public recognition came in 1953 when he won the Louisville Philharmonic Society's Young Artist Competition and performed as a soloist with the Louisville SO. He went on to study the piano and singing at the University of Louisville (BME 1954). After serving in the US military, he resumed his musical studies in Boston. Upon the recommendation of Leon Kirchner, he entered Brandeis University (PhD 1964), where his composition teachers included Irving Fine. From 1965 to 1989 he lived in Danbury, Connecticut, where he taught at Western Connecticut State University. Among his many other activities, he founded the 20th-Century Arts Festival, which drew composers such as Copland, Cage, Luening and Lukas Foss to the campus during the late 1960s and 70s. He also participated in the early foundation of the Charles Ives Center for the Performing Arts.

One of the first black American composers to enter the academic mainstream, Furman was dedicated to the assimilation of American folk elements, especially gospel, blues and jazz, into European forms. His oratorio, *I Have a Dream* (1970), written in memory of Martin Luther King, is scored for vocal soloists, chorus, orchestra, gospel choir and rock band. His instrumental writing features rhythmic and harmonic elements borrowed from the music of Bali, the Caribbean, Africa, the Middle East and

South America. The *Grosse Fugue Revisited* (1980) and the String Quartet (1986), works that combine the influences of Beethoven and Bartók with those of gospel, blues and jazz, are important examples of his late style.

ERIC LEWIS

Furmedge, Edith. English contralto, wife of DINH GILLY.

Furno, Giovanni (*b* Capua, 1 Jan 1748; *d* Naples, 20 June 1837). Italian teacher and composer. He entered the S Onofrio conservatory, Naples, on 11 March 1767 and was a pupil there of Cotumacci. A *maestrino* from August 1772, he had a comic opera, *L'allegria disturbata*, produced at the Teatro Nuovo in Carnival 1778 (when he is said still to have been a student teacher at the conservatory). Another, *L'impegno*, was given there in 1783. On Cotumacci's death in 1785 Furno became counterpoint master at the conservatory, and when Insanguine died in 1795, Furno and Rispoli succeeded him as joint *primi maestri*. When the Loreto and S Onofrio conservatories fused in 1797, Furno remained on the faculty as teacher of *partimento*, a post he held at the Naples Conservatory in its various transformations until his retirement in 1835. He died in the great cholera epidemic of 1837.

Furno taught some of the most important Italian composers of the early 19th century, including Bellini, Mercadante, the Ricci brothers and Lauro Rossi. Florimo remembered him as a dedicated, patient and affectionate teacher who followed the traditional methods of the Durante school and preferred practical demonstration to theoretical explanation. According to a report in the *Allgemeine musikalische Zeitung* (xxiii, 1821, 857), he was then 'unanimously' considered the conservatory's best teacher. His *Regole per accompagnare i partimenti* was published (Milan, n.d.); several manuscript versions are in the Naples and Milan conservatory libraries. Furno was of little importance as a composer.

DENNIS LIBBY

Furrer, Beat (*b* Schaffhausen, 6 Dec 1954). Austrian composer of Swiss birth. He studied the piano at the Schaffhausen Conservatory before attending the Vienna Hochschule für Musik, where he studied with Haubenstock-Ramati (composition) and Suitner (conducting). In 1985 he founded the Société de l'Art Acoustique (now the Klangforum Wien). He was appointed to a professorship in composition at the Graz Hochschule für Musik in 1992. He has also served as composer-in-residence at the Lucerne International Festival. He has described his compositional motivation as follows: 'I am always interested in finding out what keeps mankind in such random movement, cutting himself off from nature as if in a blind rage. I want to try to understand the great change that is about to take place without our even noticing it'. It is from this concern that the tonal transformations and discontinuities in his music derive; his works contain sequences of movement and rhythmic patterns, either simple or complex, that are gradually distorted and shifted. In the String Quartet no.1 (1984) harmony and rhythm are superimposed on top of each other like sheets of foil; in *Nuun* (1996) the organization of time, sound and pitch develops increasing plasticity; and in *Stimmen* for chorus and percussion (1996), transitions from noise to sound echo through a wide range of dimensions. In later works, filtered and distorted structures and the effects of interrupted sound allow a certain clarity to emerge.

SIGRID WIESMANN

Furrer-Münch, Franz (*b* Winterthur, 2 March 1924). Swiss composer. After training in commercial art in Zürich and Basle (1941–4), he pursued musical studies at the Basle Musik-Akademie, where his teachers included Rudolf Moser. He continued his studies at Zürich University (1965–73) with Kurt von Fischer, Paul Müller-Zürich and others, and at the Freiburg Studio für elektronische Musik (1976). From 1969 to 1989 he taught and conducted research in image processing at the Cartographic Institute of the Eidgenössische Technische Hochschule, Zürich. Largely removed from fashions and stylistic schools, Furrer-Münch has constructed unique models for each of his works. Compositions written between the early 1960s and 1979 are highly experimental in character, exploring a wide range of musical, linguistic, graphic and multimedia methods, and employing instruments especially designed for these techniques and genres. In *Psalmodie* (1978–9) typography and graphics function as 'musico-phonetic directives'. His musical materials extend from noise to quotations (from the music of Dvořák, Schumann, Wieck and others) and clearly delineated tonal areas. He has described his music after 1982 in terms of poetic qualities: comprehensibility, consistency, attention to detail, introversion and reduction to essentials.

THOMAS MEYER

Fürst, Paul Walter (*b* Vienna, 25 April 1926). Austrian composer and viola player. He learned to play the violin and the piano as a child and from 1938 attended the Musisches Gymnasium in Frankfurt, where, among other subjects, he studied composition with Kurt Thomas. After World War II, he enrolled at the Vienna Music Academy, where his teachers included Willi Boskovsky and Joseph Marx. Active as a performer, he played the viola with the Niederösterreichisches Tonkünstlerorchester (1952–4) and the Munich PO (until 1961) before becoming a full member of the Vienna PO in 1962. He has served as business manager of the Vienna PO (1969–81, 1985–90) and chair of several committees representing players' interests. His many awards include the Grand Decoration for Services to the Austrian Republic (1980).

Employing a particular compositional system has been less important for Fürst than conveying a 'message' through whatever musical means seemed appropriate. Stylistic incongruities, therefore, are inherent in his work. For the most part, however, his style is freely tonal, sometimes featuring jazz elements and contemporary performance techniques. Some works explore new performance possibilities: in *Togata* (1974), for example, string quartet musicians recite Latin texts; in *Anti-Konzert* (1972), the soloist changes positions during performance.

CHRISTIAN HEINDL

Fürstenau. German family of musicians.

(1) Caspar Fürstenau (*b* Münster, Westphalia, 26 Feb 1772; *d* Oldenburg, 11 May 1819). Flautist and composer. He first studied the oboe with his father. When he was orphaned, Anton Romberg took care of him and encouraged him to study the bassoon. But Caspar preferred the flute and soon became an accomplished performer, so that at the age of 15 he could support his family by playing in the military band. The following year he entered the bishop's orchestra in Münster and, after some theory lessons from Josef Antoni, made his first concert tour through Germany in 1793–4. He was appointed to the Duke of Oldenburg's court orchestra in 1794 and gave lessons to the Grand Duke Paul. Together with his son (2) Anton Bernhard Fürstenau he went on concert tours and performed in major European cities. After the dissolution of the court orchestra in 1811, he continued to travel with his son, giving concerts in the capitals of Europe.

WORKS

Fl, orch: 2 concs., 2 polonaises (one for 2 solo fl), rondo, potpourris, variations

Variations, fl, vn, va, vc; 6 waltzes, fl, pf; Duo, fl, vn; 12 pieces, 2 fl, gui; 4 variation sets, numerous shorter pieces, fl, gui; trios, 2 fl, b

*c*30 duos and other pieces incl. Marche variée, 2 fl; 2 variation sets, fl solo

Works by F. Fränzl, F. Krommer arr. fl, vn, va, vc; Variations by A.E. Müller, arr. fl, orch

Other works: Potpourri, bn, orch; Theme and 6 variations, gui; marches, rondos, other works, pf; masonic songs, 5 sets of songs, 1v, pf

(2) Anton Bernhard Fürstenau (*b* Münster, 20 Oct 1792; *d* Dresden, 18 Nov 1852). Flautist and composer, son of (1) Caspar Fürstenau. A pupil of his father, he made his first public appearance as a flautist in Oldenburg at the age of seven and became a member of the Oldenburg court orchestra in 1804. His frequent concert tours with his father took him to Berlin, Frankfurt, Munich, Vienna, Copenhagen and Prague, where he met Carl Maria von Weber in 1815. Partly owing to his wish to settle down and partly on account of his father's poor health, he accepted an appointment to the Frankfurt town orchestra in 1817; there Johannes Vollweiler gave him further lessons in composition. The year after his father's death he moved to Dresden, where he became first flautist under Weber's direction. He continued to make numerous concert tours, and in 1826 he accompanied Weber to Paris and London; although he performed in London, Fürstenau cancelled his benefit concert because of Weber's illness.

Fétis and others praised Fürstenau's playing for its dexterity and expressiveness; only in England did he have a poor reception, his execution being praised but his tone criticized as inferior to that of Nicholson. He continued to play on the old-fashioned flute; in his *Kunst des Flöten-Spiels* op.138 (Leipzig, 1909), he voiced his opposition to the new flute and its monotonous sound. A prolific composer for the flute, he wrote variations and rondos on popular opera themes by Weber, Meyerbeer, Halévy, Bellini and others. His concertos exhibit virtuoso writing and an operatic influence in their themes and style; other works for flute, however, show the influence of Weber.

WORKS

Fl, orch: 11 concs., 1 concertino, 2 polonaises, several variation sets (one with chorus), Réminiscences de Meyerbeer, Tribut aux amateurs

2 fl, orch: 2 concertinos, 3 rondeaux brillants, 2 rondolettos, 2 variation sets

Serenade, fl, va, pf; 6 serenades, fl, va, gui/bn; variations, fl, gui; 4 quartets, fl, str; 2 divertimentos, fl, str

Fl, pf: 8 fantaisies (no.8 pf/hp); 6 nocturnes; several variation sets, rondinos, polonaises, bagatelles, character-pieces, other works

Quatuor, F, 4 fl; 10 trios, 3 fl

2 fl: 6 grands duos concertants, 12 duos concertants, 3 duos brillants, 12 duos, 15 duos faciles

Fl: Amusements, 6 divertissements, 6 thèmes favoris, Caprices, several didactic works

4 sets of songs, other individual songs, most 1v, fl, pf; Waltzes, pf

WRITINGS

'Historisch-kritische Untersuchung der Konstruktion unserer jetzigen Flöte', *AMZ*, xl (1838), 694–6, 706–8, 730–33

(3) Moritz Fürstenau (*b* Dresden, 26 July 1824; *d* Dresden, 27 March 1889). Writer, flautist and composer, son of (2) Anton Bernhard Fürstenau. He also studied the flute with his father, and gave his first public performance at the age of eight. Later he went on concert tours with his father. In 1842 he became a flautist in the Dresden orchestra, and was appointed chamber musician two years later. His father sent him to Munich to study the new methods of Theobald Boehm; after having performed successfully on the Boehm flute, he returned to Dresden. Through the opposition of the older members of the court orchestra, who disliked the Boehm flute, he reverted to the old flute for fear of losing his job. He succeeded his father as first flautist of the Dresden orchestra in 1852, and in 1854 was appointed curator of the Königliche Privatmusiksammlung. He went on concert tours with Jenny Lind in 1855.

Moritz is known as a performer, composer and teacher, and for his organizational work. He transcribed operatic themes, including some by Wagner, for flute and piano. In 1856 he became professor of flute at the Dresden Conservatory. Together with Julius Rühlmanns, he founded the orchestra of the Dresden Tonkünstlerverein, which he directed for many years; he also founded the Dresden Wagner-Verein. His major contribution, however, was as a writer. After several years as a performer, he became interested in archival studies. His *Beiträge zur Geschichte der königlich sächsischen musikalischen Kapelle* (Dresden, 1849) documents the musical life at Dresden up to 1827; he supplemented this with a two-volume *Zur Geschichte der Musik und des Theaters am Hofe zu Dresden* (Dresden, 1861–2), which covers the period to 1763. Often the names of the members of the orchestra and other details are incorrectly given; but he tried to remedy some of these inaccuracies in his periodical articles on Dresden musicians and musical activities, especially in the *Archiv für die sächsische Geschichte*, the *Mitteilungen des königlichen sächsischen Altertumsvereins* and the *Monatshefte für Musikgeschichte*. Yet although his large works have been criticized both for inaccuracy and also for being little more than detailed chronologies, they are important for their time and are valuable as documents of the musical life at Dresden, being written by one who had first-hand experience of the orchestra there. Fürstenau's numerous other writings include biographical articles, reviews of performances, and articles on instrument making and on manuscripts in the Königliche Privatmusiksammlung.

GAYNOR G. JONES

Fürstner. German firm of music publishers. Adolph Fürstner (*b* Berlin, 3 April 1833; *d* Bad Nauheim, 6 June 1908) probably received part of his training as a publisher in France. Later he worked as head clerk with Bote & Bock, and in 1868 he founded his own music publishing house in Berlin, publishing mainly works by French composers. Within four years he was in a position to buy the Dresden publishing firm of C.F. Meser, thus acquiring publication rights of Wagner's *Rienzi*, *Der fliegende Holländer* and *Tannhäuser*. Apart from some of Liszt's compositions he published works by Cornelius, Massenet, Glinka and in 1889 Richard Strauss, with whom he later signed a publishing contract for some years. Both *Salome* and *Elektra* were published by Fürstner, but the latter was handled after Adolph Fürstner's death by his son and successor Otto Fürstner (*b* Berlin, 17 Oct 1886; *d* London, 18 June 1958), to whom Strauss entrusted his later operas (*Der Rosenkavalier*, *Ariadne auf Naxos*, *Die Frau ohne Schatten* and others). The firm also published Pfitzner's *Palestrina*, a wide repertory of piano music, as well as light music for salon orchestra, which was particularly successful. In 1933 Otto left Germany and emigrated to England, where the firm of Fürstner Ltd was formed. He then leased the German publishing rights to the employees of the Johannes Oertel firm; during World War II, the Fürstner publishing house was erased from the German trade register. In 1943 a number of rights were sold to Boosey & Hawkes; those retained were administered in England by Ursula Fürstner as Fürstner Ltd. Ursula returned to Germany in the mid-1970s and died in 1986, whereupon the remaining rights were sold to Schott of Mainz.

THEODOR WOHNHAAS

Furter [Furtter, Furtner, Furttner, Futter], **Georg** [Jörg] (*b* Bavaria, *c*1560; *d* in or after 1612). German singer, composer and court official. By his own account he came from Bavaria, and he can thus probably be identified as the choirboy Jörg Furttner, who according to Sandberger was at the Munich court in 1571 and 1573. On 1 June 1576 he was engaged, at the relatively low monthly salary of eight guilders, as a tenor in the Hofkapelle of the Emperor Maximilian II in Vienna. After the emperor's death on 12 October 1576 and the consequent dissolution of the court, he lost his post and had to leave Vienna, probably at the beginning of 1577. To judge by the title-page of his print of 1585 he must thereafter have found employment at the Prussian court. From 27 May 1588 he worked as a tenor in the Hofkapelle at Munich, and from 1589 he was also court chamberlain. In due course he was recalled to Vienna, where he served the Emperor Rudolf II from 1 February 1592 until the emperor's death on 20 January 1612, after which, as in 1576, he lost his post. He is not heard of again. He published *Villanella* (Königsberg, 1585, perhaps now lost), a five-part wedding song for Jacob von Kran, the Königsberg court organist. There is an ode by him (in RISM 1610[18]), and the six-part *Missa super 'Exoptata Domini'* survives in manuscript (in *D-Z*).

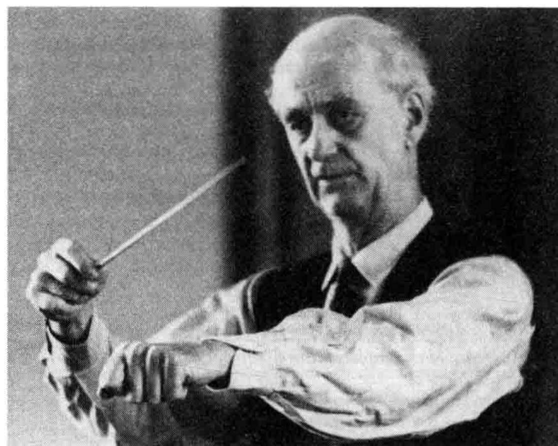
WALTER PASS

Furtwängler, Philipp. German organ builder. *See under* HAMMER–ORGELBAU.



Furtwängler, (Gustav Heinrich Ernst Martin) Wilhelm (*b* Berlin, 25 Jan 1886; *d* Baden-Baden, 30 Nov 1954). German conductor, composer and author. He was the eldest child of the classical archaeologist Adolf Furtwängler and of Adelheid, née Wendt, who was a painter. He was brought up, first in Berlin and then near Munich (where his father was appointed professor in 1894), in the cultivated and liberal atmosphere of German humanism. When he showed signs of exceptional gifts, his parents decided to take him away from school and have him educated privately. His tutors were the archaeologist Ludwig Curtius, the sculptor Adolf Hildebrand and the art historian and musicologist Walter Riezler. Furtwängler spent some time at Hildebrand's house outside Florence. He also accompanied his father on an excavation on Aegina.

Despite the breadth of his artistic sympathies, however, it was music that absorbed him most; music, for him, began where the other arts left off. He learnt the piano from an early age, and was composing by the time he was seven. Lessons in composition followed, with (successively) Anton Beer-Walbrunn, Joseph Rheinberger and Max von Schillings (and, later, piano lessons with Conrad Ansorge). By the time he was 17 Furtwängler had written a dozen substantial works, including a Symphony in D, a 17-movement setting of Goethe's *Walpurgisnacht*, two *Faust* choruses, a string sextet, and several quartets, trios and sonatas, as well as many lesser pieces. The symphony was performed in Breslau during the 1903–4 season. It was a failure. Yet it is unlikely that this had anything significant to do with his decision to abandon, or at least set aside, his long-nurtured ambition to be a composer, and take up conducting instead. Furtwängler came to conducting through a combination of three separate

factors: the wish to be able to conduct his own music; the passionate interest he had begun to take in the art of interpretation, an interest arising in the first place from his fascination with the music and mind of Beethoven; and the practical necessity of earning a living so as to be able to support himself and his mother after the death of his father in 1907. For a time, indeed, composition remained his goal. In June 1906 the programme of his first concert (with the Kaim Orchestra in Munich) had included, as well as Bruckner's Ninth Symphony and Beethoven's overture *Die Weihe des Hauses*, a symphonic Largo in B minor which was later to be the starting-point of the opening movement of his Symphony no.1 in the same key; and four years later a recently completed *Te Deum* of his was given in Breslau (1910). It was subsequently performed in Strasbourg (1911) and Essen (1914).

But by that time he had become irrevocably involved in the career of conductor and, despite an unconventional technique and a slightly awkward, gangling presence, had begun to reveal the interpretative genius and the quasi-hypnotic power which were to carry him rapidly to the top. Furtwängler's apprenticeship was the normal one for aspiring German conductors. His first position was as a répétiteur at the Breslau Stadttheater (1905–6). From there he went to Zürich (1906–7). This was followed by two years at the Munich Hofoper under Felix Mottl (1907–9) and a year as third conductor at the Strasbourg Opera, where Hans Pfitzner was musical director (1910–11). The experience gained at these four theatres led to his first big appointment, at the age of only 25, as director of the Lübeck Opera and conductor of the orchestra's subscription concerts (1911–15). In these four years and the five that followed at the Mannheim Opera (1915–20) Furtwängler emerged as the leading young conductor in Germany. In 1919 came the first of a series of regular autumn appearances with the Vienna Tonkünstlerorchester, and in the following year began a period of long and fruitful study with the great Viennese musical theorist Heinrich Schenker. Until Schenker's death in 1935 Furtwängler regularly worked with him on the scores he was to conduct. In 1920 he was put in charge of the Frankfurt Museum concerts and the Berlin Staatsoper concerts (in succession, respectively, to Mengelberg and Richard Strauss). When Nikisch died in 1922, Furtwängler succeeded him as of right, as conductor both of the Leipzig Gewandhaus Orchestra (where he stayed till 1928) and of the Berlin PO.

In the same year began what was to be a close and lasting connection with the Vienna PO. But it was the Berlin PO that, for the rest of his career, was Furtwängler's chief instrument. With it he undertook a series of European tours – Scandinavia, England, Switzerland, Italy and Hungary. At the same time he began to conduct orchestras outside Germany and Austria. 1924 saw the first of many appearances in London (where in 1937 he shared with Beecham the direction of the Coronation season at Covent Garden, conducting – and again in 1938 – two cycles of the *Ring*). In 1925 and in the two following years Furtwängler went to America as a guest conductor of the New York PO. His impact on audiences and musicians alike was momentous. Yet these visits sowed the seeds of future conflict between Furtwängler and the USA. His highly individual interpretations of the German classics offended one or two important critics dedicated

Wilhelm Furtwängler

to the cult of objectivity which was later to be associated with Toscanini. At the same time his failure to pay court to the orchestra's board members (whose power and influence was something unknown in Europe) tended to make him personally unpopular with them. The result was that, despite his public following and his immense prestige with the orchestra, a pretext was found for not re-engaging him. Instead, Toscanini became associate (with Mengelberg), and later principal, conductor, and in the event Furtwängler never again conducted in America. When, nine years later, in 1936, he was invited to become Toscanini's successor (at Toscanini's own suggestion), there was such a storm of protest that he withdrew and Barbirolli was appointed.

By that time Furtwängler had become, willy-nilly, deeply involved in political issues. Like many German liberals, he was slow to take Nazism seriously. In a sense, he never really did. Yet he was never remotely an adherent of the Hitler regime, and he dissociated himself from it and opposed it in all kinds of ways, great and small: for example, by always refusing to give the obligatory Nazi salute at public concerts, even when Hitler was present, by constantly using his influence to save the lives of Jewish musicians, obscure as well as famous, by rejecting numerous commands to conduct in occupied countries during the war, and by speaking his mind quite openly. In 1934, when Hindemith's opera *Mathis der Maler* was banned, Furtwängler resigned all his posts and, though wooed by the Nazis, never resumed them.

All this required courage, even in a man of Furtwängler's eminence. Indeed, when he finally escaped to Switzerland in January 1945 he was within a few hours of being arrested. He could have emigrated long before, as many non-Jewish German musicians did; it would certainly have made life easier for him. But he thought that art could be kept apart from politics, and he saw it as his responsibility to stay. There were those who felt he was right to do so: Arnold Schoenberg, for instance ('You must stay, and conduct good music'), or the Jewish theatre director Max Reinhardt: 'People like Furtwängler *must* stay, if Germany is to survive'. But, for the vast majority of people outside Germany, Furtwängler, by continuing to live there and make public appearances, was identifying himself with the regime. There was, in the context of the time, a naivety in his attitude; his position was equivocal,

and the Nazis were adept at taking advantage of it for propaganda purposes.

In consequence, the last ten years of Furtwängler's life were darkened by controversy. Whereas German artists who had actively sympathized with Nazism or cynically run along with it were quite quickly cleared, he had to endure a long period of delay and vilification. The American Military Government did not finally denazify him until December 1946, and it was only in the following April, when the decision was ratified, that he was able to conduct again. The anti-Furtwängler movement continued in America. It culminated, in 1949, in a propaganda campaign involving some of the leading musicians in the country, a compound of high-mindedness, ignorance and professional jealousy, aimed at keeping him out and in particular preventing him from becoming director of the Chicago SO, to which he had been appointed. The Chicago board was forced to withdraw its offer.

In Europe he was welcomed everywhere. He appeared, with the Berlin or Vienna PO, or with local orchestras, in London, Paris, Rome, Edinburgh, Stockholm, Lucerne, Salzburg and Milan (including a *Ring* cycle with Flagstad at La Scala in 1950). In 1951 a performance of Beethoven's Ninth Symphony conducted by him opened the first postwar Bayreuth Festival (where he had first appeared in 1930). Despite failing health – he had been ill in 1952 and had collapsed at a concert in Vienna in 1953 – Furtwängler again conducted at the 1954 Bayreuth, Salzburg and Lucerne festivals. A USA tour with the Berlin PO was even being planned for 1955, when he died of pneumonia in November, at the age of 68.

From these final years date the recordings of *Tristan* and *Die Walküre* which, together with more recent issues of Wagner, Brahms, Bruckner, Schumann, Beethoven and Haydn, often from broadcast performances, have given Furtwängler a very large posthumous following, not least among musicians (Casals spoke for many when he called him 'the greatest conductor I have known'). His controversial position under the Third Reich has been gradually forgotten, in admiration of the revelatory splendour of his music-making at its best. Yet the two things were in a deep sense one. His social unworldliness, his inability to deal with people with whom he felt nothing in common, his indecisiveness before the practical decisions of life, his profound sense of Germanness, his obstinate belief that art had nothing to do with politics – all these and the grand idealism of his interpretations were expressions of the same nature, the same exalted philosophical outlook; they reflected the sheltered, highly civilized upbringing he had received. 'With music we enter a new world', he said, 'and are delivered from the other'. But, for him, music was the real world.

Furtwängler has been described as 'an ambassador from another world, a world holding him firmly in its power; he broke free of it only because he had a message to impart' (Kokoschka). 'In listening to him, it is the impression of vast, pulsating space which is most overwhelming' (Menuhin). Such language is an attempt to put into words the almost mystical effect that Furtwängler's conducting had on those who experienced it. He seemed to be searching for music's essential being at a deeper level than anybody else. As Neville Cardus put it, 'he did not regard the printed notes as a final statement but rather as so many symbols in an imaginative conception, ever changing and always to be felt and realised subjectively'.

The fact that he brought a composer's mind and instincts to conducting was certainly a contributory factor; but it was also his natural inheritance. Furtwängler was a product, perhaps the supreme expression, of the interpretative tradition of Wagner and von Bülow. In Germany his conducting was regarded as the synthesis of Bülow's spirituality and Nikisch's improvisatory genius and sense of colour. Furtwängler's performances combined in an extraordinary way lofty thought and spontaneity, impulsiveness and long meditation. Nothing for him was fixed and laid down. Each performance was a fresh attempt to discover the truth; rarely was one like another, or even like the rehearsal that had just preceded it. He deliberately cultivated an imprecise beat, so as to achieve a large, unforced sonority, growing from the bass. (The improvement of the cello and bass section, with the consequent enrichment of the whole body of string tone, and the introduction of continuous vibrato into German and Austrian orchestras, were among his important contributions to the development of orchestral playing.)

The freedom of tempo that he allowed himself was the opposite pole from Toscanini's insistence on the sanctity of the printed score as medium of the composer's intentions (the interpretative tradition of Berlioz), in the light of which Furtwängler's fluctuations of tempo struck many as arbitrary and unacceptable. Yet they were an inevitable concomitant of Furtwängler's method, his constant quest for music's inner meaning and hidden laws. He aimed at achieving, at the profoundest level, an organic unity which should be the result not of conformity to the exact letter of the law but of a concentration on each particular expressive moment within a deeply considered general idea of the work. He was a master of transition, of the art of moulding musical phrases and periods into a spacious design, varied but grandly coherent, as can be heard in his finest recordings, especially in the last and, to many, greatest period of his career (although the recording process itself is not naturally favourable to so immediate and spontaneous an art). These performances have a sweep, an urgency and tragic intensity that silence objections. The spread of Furtwängler's influence, through the diffusion of his recordings, has itself brought about a change in attitudes to musical interpretation, as a result of which his apparent eccentricities seem after all a small price to pay for such visionary splendours. Although German music from Bach to Hindemith (including Mahler) was his province, he often conducted Tchaikovsky, Berlioz, Debussy, Ravel and Sibelius; and the presence of works by Schoenberg, Bloch, Stravinsky and Bartók in his programmes shows that his advocacy of 20th-century music was far from beginning and ending with Hindemith.

Furtwängler went on composing until his death; and in times of diminished public activity – for example most of the Hitler period – it once again bulked large in his life. His music is a highly personal extension of the twin traditions of Bruckner and Brahms. Superficially speaking, its neo-Romantic style has long been outmoded; but several of his mature works – notably the Piano Concerto and the three symphonies – have had modern performances and have been recorded.

Furtwängler, who had five children, was twice married, first in 1923 to Zitla Lund, secondly in 1943 to Elisabeth Ackermann.

DAVID CAIRNS (text, bibliography), JAMES ELLIS (work-list)

Furuhjelm, Erik (Gustaf) (*b* Helsinki, 6 July 1883; *d* Helsinki, 13 June 1964). Finnish composer. He studied the violin and music theory at the Helsinki Philharmonic Orchestra School with Anton Sitt and Sibelius, then at the Helsinki Music School, with Viktor Nováček and Wegelius until 1906, completing his education in Munich and Paris. He taught music theory, history and composition at the Helsinki Music School until 1935 and wrote on music for several Swedish-language newspapers and magazines in Helsinki. The harmonic language of his work developed in the 1920s but remained within extended tonality. In 1916 Furuhjelm published a study on Sibelius which offered acute observations on his music.

Fusetti, Giovanni [Gian] **Paolo** (*b* ?Monza; *d* Udine, June 1690). Italian composer and Friar Minor Conventual. From at least 1657 he was organist at S Francesco, Este, and on 30 June 1658 he was appointed *maestro di cappella* at Montagnana (Padua). He was organist in the convent and church of S Lorenzo in Vicenza from June 1660, and then, from 1 July 1662, at the convent of the Frari in Venice. On 16 June 1664 he was appointed *maestro di cappella* of Udine Cathedral, remaining in this post until his death; he was also responsible for teaching music to the girls of the nearby Casa Secolare delle Zitelle,

and, from 1674 to 1687, held the post of first organist of the cathedral.

WORKS

OPERAS

Iphide greca (N. Minato), Udine, Contarini, 14 Jan 1672, music lost, lib, *I-Vcg*, in Venetian version with music by Partenio, Freschi and G. Sartorio, Fusetti composed only the roles of Osirio and Lubione

Fuss, Johann Evangelist. *See* FUSZ, JÁNOS.

Füssen. Town in Bavaria, Germany. It belonged to the see of Augsburg until 1802, and was the seat of a Benedictine monastery founded in the 8th century by St Magnus. Some of the abbey's musical documents date from the early Middle Ages, but most belong to the late Middle Ages, among them the first treatise on polyphonic Passion singing. From 1395 the church at St Mang possessed its own organ. At the beginning of the 16th century Emperor Maximilian I, with his court musicians, was a frequent guest at the prince-bishop's castle and the Füssen monastery. In the following decades the monastery engaged the service of a salaried organist, and Cardinal Otto Truchsess von Waldburg insisted on the installation of a precentor. Fragments of late-Renaissance prints and manuscripts have been discovered at the monastery, containing pieces by Lassus, Sermisy, Paminger, Ferretti, Ambrosius Reiner and Alexius Neander. The choirmasters Judas Thaddäus Schnell and Paul Baudrexel were responsible for the early musical education of the local composers Benedikt Lechler (director of music in Kremsmünster 1628–51) and Philipp Jakob Baudrexel (later cathedral choirmaster in Augsburg and Mainz). Abbot Gallus Zeiler was the monastery's most important musician; between 1732 and 1740 he published various sacred pieces, and in 1752 he instigated the building of a new organ in the monastery chapel. The abbey was suppressed in 1802.

Füssen has supported a thriving instrument-making industry for several centuries. The organ builders Hans Schwarzenbach (*d* 1605), Andreas Jäger (1704–73), Josef Pröbstl (1798–1866), Balthasar Pröbstl (1830–95) and Hermann Späth (1867–1917) built organs for many churches in southern Germany and the Alpine countries. The lute and violin makers were even more significant, being established in the town from 1436. In 1562 the local lute makers founded their own guild, the first of its kind in Europe; in 1618 it had 18 masters. From the 16th century onwards large numbers of lute and violin makers from the Füssen area moved to European musical and commercial centres; the Tieffenbruckers went to Lyons, Paris, Venice, Padua, Perugia and Nuremberg, the Gerles to Nuremberg, Innsbruck and Linz, the Pfanzelts to Rome and Strasbourg, the Railichs to Venice, Genoa and Brescia and the Fendts to Paris and London. The violin-making tradition in Füssen declined in the mid-19th century, though since 1982 instruments have again been made in the town.

Wherever they settled the Füssen masters were pioneers in the industry, and without them the lute- and violin-making crafts of Padua, Brescia, Cremona, Mittenwald and elsewhere would never have flourished as they did. Their instruments are major treasures of internationally famous collections.

ADOLF LAYER/ERICH TREMMEL

Füssl, Karl Heinz (*b* Jablonec, Czechoslovakia, 21 March 1924; *d* Vienna, 4 Sept 1992). Austrian musicologist and composer. He studied at the Vienna Academy with Erwin Ratz (1946–9) and privately with Josef Polnauer (1948–51). He began to compose in 1945 and from 1953 to 1962 he was a music critic in the daily press and specialist journals. In 1958 he joined Universal Edition as an editor. He worked on numerous Urtext editions, including the Neue Mozart-Ausgabe, the Wiener Urtext Ausgabe and above all the Gustav Mahler-Gesamtausgabe, of which he became editor-in-chief in 1973 (upon the death of Erwin Ratz). Füssl also succeeded Ratz as professor of composition at the Hochschule für Musik in Vienna.

His importance lies in his work as an editor, but he also left an immense corpus of compositions, in which he often attempted to fuse tonality and 12-note technique. His most highly acclaimed successes were the operas *Dybuk* (H. Wagner, Karlsruhe, 1970), *Celestina* (H. Lederer, Karlsruhe, 1976) and the church opera *Kain* (Lederer, Ossiach, 1986). Other works include a ballet, *Die Maske* (1954), orchestral works such as *Epitaph und Antistrophe* (1956–71), *Concerto rapsodico* (1957), *Miorita* (1963) and *Refrains* (1972), and chamber and vocal works. He devoted the last years of his life primarily to settings of Hölderlin.

RUDOLF KLEIN

Fusz, János [Fuss, Johann Evangelist] (*b* Tolna, 16 Dec 1777; *d* Buda, 9 March 1819). Hungarian composer. He received his general education and earliest musical instruction in Baja, and first taught music in Tolna County. Having won a reputation as a pianist and organist by the 1790s, he entered the services of the musical amateur Ignác Végh as a piano teacher (until 1801) before becoming a teacher in the Hungarian capital, Pozsony (now Bratislava). According to József Krüchten, his friend and later biographer, it was here that Fusz composed the one-act melodrama *Pyramus és Thisbe*, which may have been performed at the town theatre.

Fusz then moved to Vienna to study with Albrechtsberger; he was also in close contact with Haydn. His op.1, a quartet for guitar and string trio, was published in 1804. In 1806 he returned to Pozsony to compose and conduct a birthday cantata for Henrik Klein; during this stay he wrote an opera, *Watwort*, among other works. After resuming work in Vienna he seems to have led an active musical life, much of which was reported in the *Allgemeine musikalische Zeitung* (to which Fusz himself contributed the obituary of Albrechtsberger in 1809). In 1811 an overture of his for piano eight hands was performed; he later orchestrated it as a prelude to Schiller's *Die Braut von Messina*, and it is generally regarded as his most important work. His melodrama *Isaak*, with arias and choruses to a libretto based on Metastasio, was first performed at the Leopoldstadt Theatre on 22 August 1812; it was revived in 1817 in Buda and Pest. Fusz met Beethoven in about 1815, when both composers were considering setting Treitschke's *Romulus und Remus*. Although Fusz realized his project (the first performance took place on 9 September 1816), only a single canon from it survives (published as a supplement to the *Wiener allgemeine musikalische Zeitung*, 4 Sept 1817).

In spring 1817 Fusz, who had visited Pozsony again in 1815 to give piano recitals, retired to his native country, at first seeking a cure for his steadily declining health in the spas at Buda. He conducted the overture to his new opera, *Das Medaillon*, at a private concert in May 1818, and died the next year while at work on a mass. Apart from the works already mentioned, he composed an operetta, *Der Käfig*, to a text by Kotzebue, and a musical satire *Pandora szelencéje* ('Pandora's Box'), both of which were first performed in Vienna (1816, 1818). His most important chamber works are a Violin Sonata op.36 and Six Sonatinas for violin and piano op.4; he also published four volumes of lieder. These works were largely written in a German vein, and for this reason Fusz may be regarded as an important representative of the German tradition in Hungarian music of the early 19th century.

Futurism. An artistic movement founded in 1909 by Filippo Tommaso Marinetti (1876–1944) which, while initially Italian, was soon adopted by the Russian avant garde. An obsession with speed, machines and industry was coupled with an iconoclasm that revelled in violence: the combination of these factors in early 20th-century society and their impact on humanity were the identifying factors of activity which encompassed not only the visual arts, literature and music but also film, clothing design and cookery. The genres of manifesto and 'artist's book' were significantly developed by the Italian and Russian groups respectively; subversive performances which encouraged anarchic and violent reactions were common to both (*see* ITALY, fig.18).

Marinetti acted as a catalyst for Italian futurist composers and ensured that a futurist music followed swiftly in the wake of the movement's initial achievements in other fields: he spoke rhetorically of futurists 'singing' of factories, locomotives, aeroplanes and cities at night, these having symbolic significance for the futurist as well as encapsulating the reality of the machine age. Francesco Balilla Pratella was the first composer to involve himself formally with the movement, but, with the exception of passages inserted by Marinetti, his three manifestos (of 1910, 1911 and 1912) display a greater concern with minor details of compositional technique than with the expounding of a musical means of expressing the futurist machine aesthetic. Despite an interest in quarter-tones and improvisation, the few futurist compositions he wrote are of little musical consequence (his *Inno alla vita*, originally titled *Musica futurista*, is a clumsy piece consisting largely of whole-tone scales, while *L'aviatore Dro* is futurist only in topic and by virtue of the inclusion of some of Russolo's instruments). It was most probably those phrases inserted by Marinetti into Pratella's *Manifesto tecnico della musica futurista* (exhorting the musician to 'give musical animation to crowds, great industrial shipyards, trains, transatlantic steamers, battleships, automobiles and aeroplanes') combined with theories of 'words-in-freedom' (suggesting an equivalent 'sounds-in-freedom') which inspired the painter Luigi Russolo (1885–1947) to formulate an 'art of noises'. As Russolo acknowledged, his own lack of musical training gave him a freedom of approach that the musician Pratella was unable to attain.

Russolo's manifesto, *L'arte dei rumori* (1913), argued for the incorporation of all noises, both pleasant and unpleasant, into music. Despite citing the use of timbral dissonance by such composers as Richard Strauss as justification for his experiments, Russolo wanted to use noise not for onomatopoeic effect, but rather as raw material for composition. With an assistant, Ugo Piatti (1885–1953), he constructed a number of *intonarumori* (noise machines), which were demonstrated between 1913 and 1921 in Milan, London and Paris (see illustration). The only surviving fragment of a work by Russolo, written in his specially devised notation, apparently indicates sustained pitches in quarter-tones interspersed with glissandos. Later instruments devised by Russolo included the keyboard-operated *rumorarmonio*, or noise-harmonium, and the enharmonic bow, which produced metallic sounds from conventional string instruments. Russolo's instruments never met with the commercial success he envisaged; the *intonarumori* and *rumorarmonio* were ultimately used to accompany futurist plays and silent films respectively before being destroyed in Paris during World War II.

During the 1920s a younger generation of futurist musicians produced music which, although infused with the machine aesthetic, was frequently intended as incidental music for theatrical performances. Russolo's instruments and other machines were combined with conventional forces by Silvio Mix, Nuccio Fiorda (1897–1975),

324 THE SKETCH. JUNE 17, 1914

NOISE-MAKERS FOR THE FUTURIST CONCERT OF NOISES.

1. THE CRÉPITATEUR; FOR PRODUCING THE SOUND OF WOOD BEING SAWN.
2. THE RONFLEUR; FOR PRODUCING THE SOUND OF SNORING.
3. INSTRUMENTS USED IN THE "GRAND FUTURIST CONCERT OF NOISES," AT THE LONDON COLISEUM: "NOISE-TUNERS" REHEARSING.
4. M. PIATTI, CO-INVENTOR, WITH M. RUSSOLO, OF THE ART OF NOISES, WITH THE INSTRUMENT FOR PRODUCING THE SOUND OF WHISTLING.
5. THE FROISSEUR; FOR PRODUCING THE SOUND OF CRACKLING PAPER.
6. M. RUSSOLO, CO-INVENTOR, WITH M. PIATTI, OF THE ART OF NOISES, WITH AN INSTRUMENT FOR PRODUCING THE SOUND OF A LION'S ROAR.

In the Bill at the London Coliseum this week, No. 12 is "Marinetti . . . The Art of Noises." The Marinetti is, of course, Signor Marinetti, leader of the Futurists; "The Art of Noises" is his lecture on that subject, which will be part of "A Grand Futurist Concert of Noises." The special Futurist instruments used are played by selected members of the Coliseum Orchestra, called "noise-tuners" for the time being.—*(Photographs by Sport and General.)*

Demonstration of futurist noise intoners played by members of the London Coliseum Orchestra, under the direction of Luigi Russolo and his assistant Ugo Piatti, 15 June 1914

Franco Casavola (whose ballet *La danza dell'elica* featured an internal combustion engine) and Pannigi (whose *Ballo meccanico* of 1922 included two motorcycles). Russolo's *arte dei rumori* was later incorporated by futurist artists into their sculpture, scenography and costume design, and Fidele Azari, creator of the Futurist Aerial Theatre, collaborated with Russolo to create 'flying *intonarumori*' – aeroplanes whose engines had been modified so that the pitch, volume and sound quality could be controlled by the pilot. However, the most extreme extension of Russolo's theories came with Marinetti's Futurist Radiophonic Theatre of 1933, the first example of sound collage. Broadcasts consisted of non-hierarchical combinations of sound (musical and non-musical) and silence, both of specified duration.

Russian futurism organized itself differently from its Italian counterpart: comparatively exclusive groups sprang up in Moscow and St Petersburg, in many cases consisting simply of a few key figures (such as Vladimir Mayakovsky and the Burlyuk brothers in Moscow, and Aleksey Kruchyonïkh and Velemir [Viktor] Khlebnikov in St Petersburg). Like the Italians, the various Russian groups proclaimed their ideas in manifestos; these were public, absurd and spattered with iconoclastic posturing notwithstanding the futurists' arguable links with symbolism, the then moribund aesthetic of the *fin de siècle*. The essentially literary form of the manifesto was given a living artistic embodiment in the notorious tours made around provincial Russia which consisted of speeches, theatrical performances and carefully calculated outrages. Those Russian composers who were in some way linked to futurist circles – such as Lourié, Matyushin and Roslavets – stood mostly on the periphery of the movement rather than in the central or official position

occupied by Russolo and Pratella. The attraction of amateur musicians to futurism was as evident in Russian circles; the one-time court violinist and later quasi-suprematist painter Mikhail Matyushin (1864–1933) became actively involved with the movement when he married the futurist poet Yelena Guro. He wrote music for the 1913 'opera' *Pobeda nad solntsem* ('Victory over the Sun') which involved the combined efforts of Kruchyonïkh, Kazimir Malevich and Khlebnikov. The music consists of songs of a decidedly *bouffe* orientation reminiscent of Satie's take on cabaret song, with bold gestures not so far removed from the naive bombastics of Pratella and, more significantly, passages notated in quarter-tones. Under the influence of the 'mad army doctor' Nikolay Kul'bin (1860–1923) Matyushin had investigated micro-intervals and published a brief treatise on performing quarter-tone music on the violin which influenced the experiments of Vïshnegradsky.

Kul'bin's salon in St Petersburg was also frequented by Artur Lourié, who claimed to have written a quarter-tone String Quartet as early as 1912 and whose early career and music mirrors the development and principal characteristics of the Russian futurist movement. He quickly abandoned his conservatory education and, after involvement with the manifesto *Mï i zapad* ('We and the West'), which sought to wean Russian music from its dependence on European traditions, became an habitué of the notorious Brodyachyaya Sobaka ('Stray Dog') café frequented by the leading futurists. During these years he produced a series of experimental works of which the most famous, *Formes en l'air*, dedicated to Picasso, mirrors in its unconventional 'discontinuity' of staff layout the typographical experiments associated with Mayakovksy and Khlebnikov. Roslavets, who corresponded frequently with Matyushin and was a friend of Malevich, formulated a radically atonal compositional technique; although he never considered himself a futurist, this stance earned him a reputation as one. 'Artists' books' appeared containing futurist drawings and poetry alongside compositions by Roslavets and Lourié; such publications became the mainstay of Russian futurist activity until the Revolution.

Futurists enjoyed an unnaturally high prominence during the few years after the Revolution due to the influence of Anatoly Lunacharsky, the 'Commissar of Enlightenment'. In 1917 Lourié was appointed head of the music section of Narkompros and in the same year set Mayakovsky's *Nash marsh* ('Our March') for mass outdoor performance, a creative act emblematic of this sudden politicization of the aesthetic. In this later period, the subjugation of individualism was inherent not only in the conductorless orchestra Persimfans but also in Komfuturizm, the Revolutionary manifestation of the artistic collectives of futurism; the application of futurist aesthetics to everyday life resulted in the constructivist textile and ceramic productions of Stepanova and Rodchenko. The era of the first five-year plans, in which communism assumed a materialist face, saw the appearance of a public art that aestheticized technology, epitomized in the cannonization of heavy industry in Mosolov's *The Iron Foundry* (part of the now lost ballet *Stal*), Meytus's suite *On the Dnepr Dam* celebrating the opening of a hydro-electric dam, and most spectacularly in Avraamov's *Simfoniya gudkov* ('Symphony of Factory Sirens'). This last, which took to extremes Marinetti's passion for a rapport between music and machines, was audible over a considerable stretch of Azerbaijan when performed in 1923; it outdoes any of the *intonarumori* not merely in terms of volume and eccentric hyperbole, but also in its complete embracing of the would-be democratic, anti-art obsession with the modern that characterized futurist performance.

Futurism has had a wide-ranging influence on the music of composers who were in no way linked to the movement itself. Diaghilev's enthusiam for all aspects of futurist performance, and music in particular, brought Russolo in direct contact with composers such as Prokofiev, Ravel and Stravinsky, although plans involving these musicians and the *intonarumori* came to nothing. Admiration for futurist theories was expressed by Honegger, Antheil, Ornstein and Varèse, the last named being a friend of Russolo. In Russia, the atmosphere of experiment engendered by futurism permeated the 1920s; mechanistic atonal music, which reached its heyday in the late 1920s, was, by the 30s, described as a 'gross formalist perversion' and along with other modernist tendencies became outlawed by party decrees on the arts.

The influence of futurism on the general development of 20th-century music is both broad and inestimable; many facets of the lingua franca of the postwar era had their genesis in futurist experiments of the 1910s and 20s. The embracing of technology by the postwar avant garde as a means of musical production distinctly echoes the experiments of both Russolo and Lev Termen; likewise, the acceptance of any sound as compositional material by Cage and the proponents of *musique concrète* has direct parallels with the futurist position. The wide application of microtonal systems since the mid-1950s vindicates the investigations of both Russian and Italian innovators in this field. Other more specific stylistic features of late 20th-century music with origins in futurist experiments include prepared piano, total serialism, extended vocal technique, graphic notation, improvisation (within the context of concert music) and minimalism.

FLORA DENNIS, JONATHAN POWELL

Fux, Ivan [Leopol′d] **Ivanovich.** *See* FUCHS, JOHANN LEOPOLD.

Fux, Johann Joseph (*b* Hirtenfeld, nr St Marein, Styria, 1660; *d* Vienna, 13 Feb 1741). Austrian composer and music theorist. He represents the culmination of the Austro-Italian Baroque in music. His compositions reflect the imperial and Catholic preoccupations of the Habsburg monarchy no less than does the architecture of Fischer von Erlach or the scenic designs of the Galli-Bibiena family. His *Gradus ad Parnassum* (1725) has been the most influential composition treatise in European music from the 18th century onwards.

1. Life. 2. Music. 3. Theory. 4. Sources and catalogues.

1. LIFE. Fux's exact date of birth is unknown. According to his death certificate he was 81 when he died; Flotzinger (*Fux-Studien*, A1985, p.34) has conjectured that he may have been born on 5 January 1660. His antecedents were of peasant stock from the village of Hirtenfeld. His father, Andreas (*b* before 1618; *d* 1708), married twice, and Johann Joseph may have been his eldest child. Although a peasant, Andreas Fux was a parish official attached to the church at St Marein and came into contact with a number of musicians, among them the Graz organist J.H. Peintinger and the Kantor Joseph Keller, who probably influenced his son's early musical development. It is also possible, given his father's position, that Fux sang in the parish choir.

In 1680 Fux enrolled as a 'grammatista' at Graz University, and in 1681 he entered the Jesuit Ferdinandeum as a student of grammar and music. The remark 'profugit clam' ('he ran away secretly') added to his matriculation document indicates that he left the Ferdinandeum without completing the formal requirements for graduation: some two months before he would have finished the prescribed three years he left Graz for the Jesuit university at Ingolstadt, where he was registered on 28 December 1683 as 'Joannes Josephus Fux, Styrian of Hirtenfeld, student of logic, *pauper*'. He remained there until 1687.

The breadth of Fux's education at Graz and Ingolstadt was mediated through the agency of the Jesuit system of learning: he was a student of languages, logic, music and (at Ingolstadt) law. This undoubtedly prepared him for his future role in the administration of the Hofmusikkapelle in Vienna. By August 1685 he had taken a position as organist at St Moritz in Ingolstadt. A music inventory there, dated 1710, lists two Latin motets and a German funeral ode by him, which are his earliest known compositions; he is twice therein described as a 'student of law' and once as a 'student of law and organist'.

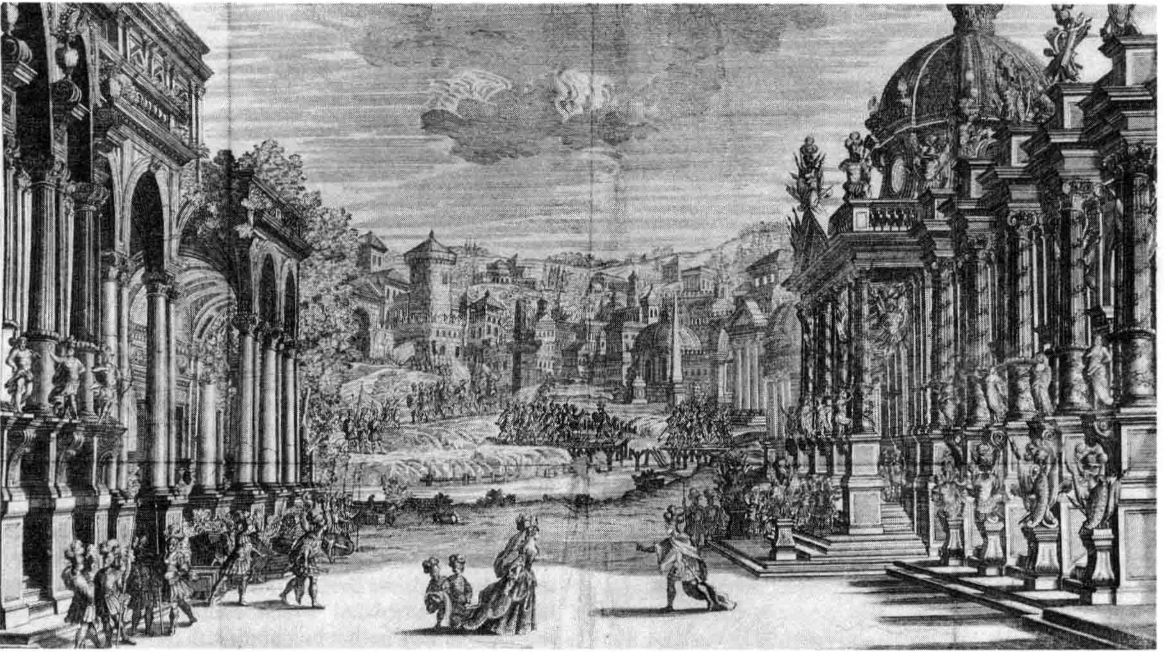
Fux's movements between the beginning of 1689, when a new organist was appointed at St Moritz, and his marriage in 1696 (by which time he was organist at the Schottenkirche in Vienna) remain uncertain. Biographers have followed J.A. Scheibe's pseudo-mythological fable about the composer (published in 1745) in order to account for Fux's progression from provincial student to court musician, which is difficult otherwise to explain. In 1798 J.F. Daube plainly read this fable (by which Scheibe intended to illustrate the 'prejudice' of Italian musicians against non-Italian composers) to mean that Fux had attracted the attention of the Emperor Leopold I, who heard two masses by him while Fux was in the service of 'a Hungarian bishop' (presumably Leopold Karl von Kollonitsch, Archbishop of Hungary, who frequently resided in Vienna and knew the emperor from youth). The emperor had one of these masses performed in Vienna, but it was condemned by the Italian composers of his own retinue. When a second mass was passed off as the work of an anonymous Italian, it was acclaimed. 'Much to the annoyance of the Italian party' (Daube, A1798), Fux was then appointed to the imperial service by the emperor himself.

Three factors support the general thrust of this anecdotal (and patriotic) account: Fux's *Missa SS Trinitatis*, dedicated to Leopold I, can be dated to 1695. Its dedicatory letter refers to the fact that the emperor had already heard the work, and its title-page states that its *subjectum* was provided by a singer employed in the Hofmusikkapelle, Franz Ginter; by 1695, when this mass was almost certainly performed for the laying of the foundation stone of the Dreifaltigkeitskirche in Vienna, Fux must have been in the employ of an influential patron; and, finally, Fux's marriage in June 1696 to Clara Juliana

Schnitzenbaum, the daughter of a family well-connected in the service of the imperial household, argues strongly that the composer had himself by this time made important contacts with the court. One of the witnesses to the marriage was Andreas Schmelzer, imperial ballet and chamber music composer, and son of the former Kapellmeister to the court, J.H. Schmelzer.

Daube's statement that Fux was in the service of a Hungarian bishop (presumably Kollonitsch) not only accounts for Fux's path to the imperial service, it also provides some explanation for the absorption of Italian style-consciousness (especially as between *antico* and *moderno*) in Fux's music. Kollonitsch's extensive visits to Rome may clarify the suggestion that Fux studied in Italy before he joined the Hofmusikkapelle. Kollonitsch travelled to Rome for the 1689 conclave which elected Cardinal Pietro Ottoboni, at whose court both Corelli and Bernardo Pasquini were frequently present, and whose titular organist, Ottavio Pitoni, was known as a keen theorist and emulator of Palestrina. All three musicians have been advocated by Flotzinger (*Fux-Studien*, A1985, pp.55–60) as important influences which Fux may have directly and personally absorbed in Rome.

Although Fux's employment as court composer in Vienna dates officially from April 1698, he himself was ambiguous about his length of service in this capacity. In various documents (including the preface to the *Gradus ad Parnassum*), he implied that he began to work for the imperial household in 1695, or even 1693. His first responsibilities were in church and chamber music: he composed instrumental music in celebration of Archduke Charles's nameday (19 March) in 1698 and he also began to write music for the Sundays and feast days of the Church year, a duty which no longer much interested the incumbent Hofkapellmeister, Draghi, or his deputy, Pancotti. Together with the recently appointed composers Badia, Giovanni Bononcini and Marc'Antonio Ziani, Fux effectively began to introduce elements of late Baroque style into the sacred and secular genres cultivated at court.



In 1699 Fux and his wife adopted the daughter of his step-brother Peter, Eva Maria (1696–1773); upon Peter's death in 1724 they also adopted his youngest son, Matthew (*b* 1719). Fux remained as organist at the Schottenkirche until 1702, when he resigned in order to serve the court more efficiently. His first secular dramatic work, *Il fato monarchico*, was performed as part of the carnival celebrations by boys of the court nobility on 16 February 1700; this was followed in 1702 by a larger commission, *L'offendere per amare*, given for the birthday of the wife of Crown Prince Joseph, Amalie Wilhelmine, as whose private Kapellmeister he was to serve from 1713 to 1718. After the death of Leopold I in 1705 and the accession of his son Joseph I, Fux retained the office of court composer. In the same year he was appointed deputy Kapellmeister at the Stephansdom, where in 1712 he succeeded J.M. Zacher as first Kapellmeister. He retained this office until the end of 1714, and during the same period he also directed services at the Salvatorkirche (until March 1715). His duties as deputy Kapellmeister at the Stephansdom centred on the music performed before the statue of Our Lady of Pötsch, which the emperor had had placed on the high altar of the cathedral in 1697.

After the unexpected death of Joseph I on 17 April 1711, the empress-regent Eleonora dissolved the Hofmusikkapelle (as was customary on the decease of the emperor), and many of its personnel, including Bononcini and Badia, were pensioned. By October 1711 Fux had been appointed deputy Kapellmeister to the court (with Ziani as Kapellmeister from 1712 until his death in 1715). Following his coronation in Frankfurt in 1711 and the gradual removal of his court to Vienna in 1712, Joseph's brother, Charles VI, restored the Hofmusikkapelle to its former pre-eminence: his personal knowledge of, and commitment to, music are reflected in the fact that the reduced Kapelle of 86 members at the beginning of his reign was increased to 134 by 1723 and remained approximately at this strength until his death. In January 1715 Charles VI appointed Fux as Hofkapellmeister, a position he held for the rest of his life.

As a composer who served three emperors, Fux undertook an especially taxing combination of duties. To judge by the *Rubriche generali* of 1727, Fux's responsibilities in composing and performing music for the Mass and Office alone were considerable. In addition, his regular commissions for opera and oratorio and for various kinds of *Tafelmusik* were combined with an administrative function to which his many testimonials and reports on musicians bear witness (see Köchel, A1872, pp.376–456). His coronation opera, *Costanza e Fortezza*, nominally in celebration of the Empress Elisabeth Christine's birthday but effectively written to mark the coronation of Charles VI as King of Bohemia, represents the peak of his public office. The opera was given in a specially designed open-air theatre in Prague (fig.2). It was directed by Fux's deputy, Caldara, Fux himself being indisposed with his chronic gout. The piece was praised by J.J. Quantz, who took part in the performance, and who preferred Fux's 'more ecclesiastical than theatrical manner' to 'a more *galant* style of singing,

1. Johann Joseph Fux: portrait by Nikolaus Buck, 1717 (Historisches Museum der Stadt Wien, Vienna)

2. Open-air performance of Fux's 'Costanza e Fortezza', Prague Castle, 28 August 1723; engraving by Anton Birkhart after designs by Giuseppe Galli-Bibiena

decorated with a lot of little ornaments and grace notes', given the exposed circumstances for which it was written (see Marpurg, A1754–78, p.216).

The publication of the *Gradus ad Parnassum* in 1725 has been compared in importance with the publication of Fischer von Erlach's *Entwurf einer Historischen Architektur* (Vienna, 1721). Both works embody the concept of Habsburg style selfconsciously, and persuasively relate their author's achievements to a coherent past (see Wellesz, A2/1991, pp.38–9). In Fux's case the notion of a 'conservative-progressive' conception of music, firmly rooted in the precedent and emulation of Palestrina, should not be permitted to obscure the late Baroque condition of his music. Fux's dispute with Johann Mattheson in 1717–18 (see Lester, D1977) foundered precisely on this conflict between modal and tonal versions of musical grammar (as between the abolition of solmization syllables in favour of tonal letter-names). The conflict was never resolved, and it probably resulted in Fux's refusal to supply Mattheson with biographical information for the latter's *Grundlage einer Ehren-Pforte* (A1740). The attack on Fux therein (without mentioning his name; see Köchel, A1872, p.111) may be contrasted with sporadic but effective praise for the composer in Mattheson's *Der vollkommene Capellmeister* (1739).

On 8 June 1731 Fux's wife died, and some seven months later the composer drew up his will (5 January 1732). His activities at court notably decreased, with many of his responsibilities being assigned to Caldara and others. He had complained of serious illness at the close of the *Gradus* (which may have prevented his adding a second volume), and by the late 1720s his rate of composition had sharply declined. His last testimonial is dated 10 March 1740. On 13 February 1741 he developed a 'raging fever' (Köchel, A1872, p.266) and died. He was much mourned at court. The most outstanding of his many students were Gottlieb Muffat, G.C. Wagenseil and J.D. Zelenka. According to C.P.E. Bach (see Forkel, A1802, pp.106–7), J.S. Bach placed him first among those contemporary composers whom he most admired.

2. MUSIC. Fux exemplifies the development of late Baroque style at the imperial court in Vienna. He matured late as a composer, to judge by his description of himself as a 'new author of sacred music' in the dedication to the *Missa SS Trinitatis*. His activities as a composer of secular and sacred dramatic works, moreover, would appear to date only from 1700 and 1702 respectively. Few works can be dated from before his appointment at the Viennese court, and his numerous mass and vesper settings, litanies and other liturgical pieces reflect the integrated function of church music as an expression of Habsburg ideology (see Riedel, A1977). Even the secular dramatic texts which he set were explicitly indebted to the imperial credo of a 'holy' and 'Roman' empire. The conjunction of Counter-Reformation zeal and princely absolutism which endured in Vienna throughout Fux's lifetime both delimited and inspired his musical style. He belonged to that generation of composers which redeemed the technical and formal stagnation of the Hofmusikkapelle under the aging Draghi, and he successfully reconciled the deeply authoritarian tenor of the court itself with the expressive freedom of modern idioms and techniques. His own undoubted conservatism, reflected in the progressive thrust of the *Gradus* from Palestrina to 'stylo recitativo', enabled him to evolve a technique answerable to the doctrinaire poetics of Habsburg Vienna.

Fux's masses are for the most part concertante works: some 90 settings of the Ordinary are known, of which only two, the *Missa Quadragesimalis* and the *Missa di San Carlo* (*Canonica*) are wholly in the *stylus antiquus* which Fux recommended in the *Gradus* as the true source of liturgical music. Other masses, including the *Missa Vicissitudinis*, effectively belong to this category, in so far

as their prevailing style is that of *antico* counterpoint, though with instrumental doubling. The *Missa di San Carlo*, by which Fux earned a one-sided reputation for Palestrinian pastiche in the 19th century, is nevertheless a contrapuntal tour de force, in which all 14 sections explore different combinations and resolutions of canonic technique.

Although the chronology of Fux's concertante masses is largely unknown, certain works show the composer's consolidation of modern, italianate techniques, especially after 1700. Thus an early work such as the *Missa SS Trinitatis*, with its predominantly 'colossal Baroque' textures (double choirs fortified by strings, trombones and continuo) may usefully be contrasted with later works such as the *Missa Purificationis*, the *Missa Corporis Christi* (1713) and the *Missa Pro gratiarum actione* (?1716). In each of these Fux's instrumental scoring is partly *colla parte* and partly independent, and in each a remarkable conspectus of vocal and instrumental styles is present, ranging from tutti passages which articulate the text in massively scored homophony to vocally developed trio sonata textures in which vocal soloists partake of instrumentally generated counterpoint. In certain sections, as in the Benedictus from the *Missa Purificationis*, the motto technique of the solo vocal writing and the independent density of the violin counterpoint are strongly suggestive of the secular cantata. In the *Missa Pro gratiarum actione* Fux restricts himself to this trio-sonata texture throughout (with two trombones doubling the alto and tenor in the ripieno sections), with the result that his habitually formal and motivic counterpoint (as in the first 'Kyrie' and 'Christe') is all the more transparent. Paired imitation, inversion, invertible counterpoint and fugal points are frequently deployed. None of these techniques, however, unbalances the integration of contemporary styles. In the large festive and solemn masses trumpet scoring brilliantly enhances the usual complement of softer winds and strings.

Fux's Requiem Mass, I/ii, 7 (K51–3), must be regarded as one of the greatest settings of the Office of the Dead in the first half of the 18th century. Written for the funeral of Eleonora Margaretha Theresia (widow of Leopold I) in 1720, the work was repeated in whole or in part on at least nine occasions between 1729 and 1743. Scored for five vocal parts, two cornetts, two trombones, strings and continuo, the Requiem virtually comprises an anthology of Fux's manipulation of high Baroque style, notwithstanding the absence of formal da capo structures. The concertino–ripieno contrast which is essential to Fux's conception of texture combines in this work with a madrigalian intensity of expression that self-evidently befits the nature of the text. Fux's reliance on counterpoint is here mediated by a sharply distinctive melodic profile, a freedom of chromatic movement in the harmony and a rhythmically flexible structure. The opening 'Requiem', the 'Tuba mirum' and the 'Confutatis maledictis' fugue are sufficient to establish the work as a masterpiece.

Fux's other large-scale liturgical works consist of about 80 compositions for Vespers, among them settings of *Laudate Dominum* and the *Magnificat*. Of the published settings, two, I/iv (K95) and the separate *Laudate Dominum* I/iv (single items), 27 (K91), are in free *a cappella* style (i.e. in four equal vocal parts doubled by wind and string instruments). The remaining works belong to the *stylus mixtus* as it was defined by Fux in the *Gradus*, namely a concertante interplay of vocal and instrumental textures. The court copies of these works show that some of them were performed as many as 13 times between 1726 and 1740. Gleissner (C1982) has suggested that Fux's scoring, vocal disposition and textural contrast (as between ripieno homophony and virtuoso solo counterpoint) was determined to an extent by the feast days to which his settings were attached. The *Laudate Dominum*, I/iv (single items), 26 (E29), opens with a Gregorian cantus firmus in the tenor which is embellished with circular counterpoint in the other vocal parts; the *Magnificat* I/iv (single items), 42 (K98) (which may have been first performed on 11 June 1727) explores a variety of monumental textures and smaller episodes in which the vocal soloist is deployed against an obbligato trumpet or is juxtaposed with the full ensemble. The rapid changes of texture by which Fux habitually responded to these texts is also characteristic of his oratorio choruses (choral madrigals).

A more satisfying formal structure underlies many of the smaller motet settings that Fux provided for the offertory and other elements of the Proper. The offertory motet *Estote fortes* I/vii, 41 (K159) adheres to a rondeau-like design (*ABACA*) which contrasts high Baroque monumentalism in the *A* sections with recitative and aria-like sections. These smaller motets and antiphons, such as *Alma Redemptoris mater* I/ix, 17 (K186) for soprano, alto trombone, strings and continuo, project Fux's mastery of the Neapolitan and Venetian chamber style, so that the alternation of recitative and aria and a reliance on obbligato textures advance a virtually operatic (and unmistakably secular) technique. The prominence of obbligato textures throughout Fux's liturgical music is matched by his trio sonatas, intended for performance during the gradual of the Mass. Although deeply indebted to the Corellian model, many of them incline to a three-part structure (Adagio–Allegro–Adagio).

Fux's operas and oratorios are also definitive expressions of the Austro-Italian Baroque in its final manifestation under Charles VI. His liturgical music reinforced – and was in turn reinforced by – the singular complexity and symbolic importance of the church service in Vienna. Likewise, his operas and oratorios derive from a pervasive conception of *Reichsstil* ('dynastic style') which dominated Viennese art and architecture throughout his lifetime. Fux's 22 secular dramatic works, all but six of which are either one-act operas or serenatas, were written between 1700 and 1731. His particular responsibility between 1708 and 1726 was the setting of mythological and ancient historical texts in celebration of the namedays and birthdays of members of the imperial family, chiefly the emperor and the empress. Whereas his deputy, Caldara, and the court composer F.B. Conti were usually assigned the larger three-act *feste teatrali* by which important occasions of state were marked, Fux's demanding commitments to liturgical music entailed a correspondingly smaller role in the production of secular drama. He nevertheless produced a long sequence of operatic works which are notable for his association with the court poet Pietro Pariati.

Although the early operas show traits characteristic of the late 17th century – as in the use of arioso passages in recitatives – Fux's style is principally a synthesis of his own predilection for contrapuntal textures, a vivid mastery of vocal and instrumental rhetoric and italianate

ornamentation, and a colourful use of obbligato scoring. Introductory sinfonias depend on French and Italian models, choral numbers are usually brief and homophonic (even in the larger operas), and accompagnato recitatives and vocal ensembles are sparingly deployed. As with his Italian contemporaries, it is Fux's manipulation of the da capo aria that represents his keenest sense of *dramma per musica*: his scoring, texture and motivic-thematic integration allow an individual style to arise whereby the idealized passions of the *Affektenlehre* attain dramatic life.

His solo numbers comprise continuo arias (usually with an orchestral ritornello attached to the end of the *A* section), full orchestral arias with four-part string textures, and obbligato pieces. These last are variously scored for chalumeau, bassoons (in pairs), trumpet ('clarino' and 'tromba'), cembalo, violin, viola d'amore, viola da gamba, oboe, flute, mandolin and horns (*corni da caccia*), with or without strings. The absence of cornetts – so common in his church music – is a striking feature. The compositional techniques which these arias exemplify can scarcely be indicated here except to observe that Fux explores a gamut of homophonic and contrapuntal textures which brilliantly overcome the static conception of formal structure implicit in the da capo aria itself. His vocal writing is persistently related to the motivic curve of his ritornello sections, a trait which obtains with even greater force in the sacred dramatic works.

Fux's oratorios, which overlap in chronology with the operas, are without question among the finest examples of the genre in Italy and Austria in the first half of the 18th century. The ten wholly extant works may be divided into biblical, allegorical and *sepolcro* oratorios, but most of the musical features which distinguish the Viennese *sepolcro* from the Italian *oratorio volgare* in the 17th century no longer obtain. Instead, Fux's *sepolcro* settings may be regarded as locally defined Passion oratorios. The texts for five of these are by Pariati, who also wrote the librettos for at least two of Fux's biblical dramas. Their scoring differs from that of the operas in that a smaller range of obbligato instruments is used (they include the trombone). Fux's choral writing is also far more elaborate: each oratorio features at least two large-scale movements, conventionally located at the end of the first and second parts, which explore word-painting familiar from his liturgical music. The recitative–da capo aria sequences which dominate these oratorios are self-evidently dependent on operatic precedents, but in Fux's case it can be argued that the moral, sexual and politico-religious dramas which these sequences convey carry a greater sense of immediacy and conviction than transpires in his secular dramatic works. *La fede sacrilega nella morte del precursor S Giovanni Battista* (1714) and his final *sepolcro* setting, *La deposizione dalla Croce di Gesù Cristo Salvator nostro* (1728), are especially potent manifestations of Baroque musical drama.

Mattheson, who in *Der vollkommene Capellmeister* (1739) praised Fux's choral technique, fugal writing and command of Italian vocal style, also recognized his mastery of instrumental music. The *Concentus musico-instrumentalis* is a cycle of seven partitas variously scored for wind, brass and string instruments. Published in 1701 as Fux's op.1, the cycle was dedicated to Joseph (as King of Rome). Its cosmopolitan admixture of French, Italian and German movements and its festive demeanour are

Dieſi, & b. molli in thematibus abſtinere debet: aliàs enim nunquam genuinam Modorum naturam compertam haberemus.

EXERCITII V.

LECTIO SECUNDA,

De Fuga duarum Partium

NUnc Fugas duarum partium, planâ primò, ac ſimpliciſſimâ methodo conficiendi artem te docebo. Accipe ſubjectum aliquot Notarum, Modo, in quo laborare intendis, appropriatum: illasque Notas inſcribe parti, quâ incipere animo concepiſti; quibus finitis, ſi modo nihil derogetur, ſecundæ parti, ſive ſequenti, in Quarta, vel Quinta intrando easdem Notas dabis: interim cum parte, quâ thema incepiſti, variis Notarum figuris modulando, ut Contrapuncto florido edoctus es, Contrapunctum ſuperinſtrues. Quo facto, poſt aliquantulam modulationem partes eò diſponendo primam clauſulam in quinta Modi conficies. Poſt hæc, poſitâ integri tactûs, aut dimidii pausâ, vel intercedente magno ſaltu, etiam absque pauſa, in parte fermè, quâ incepiſti, thema reaſſumes; ſed alio, quàm inchoatum eſt, intervallo: pars altera, factâ aliquâ pausâ, priùs, quàm ſubjectum in altera parte finitum ſit, intrare tentabit; deinde nonnihil modulando ſecundam clauſulam in Tertia Modi conſtrues. Poſtremò, poſito in utra partium ſubjecto, alteram partem in ſecundo protinus ſubjecti tactu, ſi res patitur, cum ſubjecto intrare facies; & ita, conjunctis arctiſſimo vinculo partibus, clauſulâ finali Fugæ finem impones.

Joſeph. Memini, te ſuprà dixiſſe - - - -

Aloyſ. Differre dubium tuum nunc expedit, donec res obſcura Paradigmate clareſcat. Accipiam itaque ſubjectum, quô paulò ante Modi natura demonſtrata eſt, præſcriptoque modo id ducendo, Fugam efficiam; quâ normâ facilior, & expeditior via tibi ſtrata erit. E. G.

Fuga à 2. *Cadentia in 5ta.*

3. *Part of the lesson on two-part fugue from Fux's 'Gradus ad Parnassum' (Vienna: Van Ghelen, 1725)*

also to be found in the composer's keyboard suites, which are for the most part heavily ornamented and treble-dominated.

3. Theory. Fux's *Gradus ad Parnassum* was published at imperial expense in 1725. The Latin original (fig.3) was followed by German, Italian, English and French translations in whole or in part between 1742 and 1773. The long history of influence exerted by the *Gradus* as a manual of composition (and not merely as a primer of strict counterpoint) has been documented by Alfred Mann (see Mann, D1987, and White, C1992, pp.57–71). It was used extensively by Haydn, Mozart and Beethoven for pedagogical purposes, and it was cited and adapted in formal composition treatises by Marpurg, Albrechtsberger, Cherubini, Bellerman, Haller, Schenker, Roth and Tittel (*Der neue Gradus*, 1959), among others. In brief, it is no exaggeration to state that Fux has played a decisive role in the formation of Western musical thought in so far as tonal practice and technique are concerned. Fux's *Singfundament* (*c*1705) is a vocal primer whose solmization exercises anticipate the studies in imitation in the *Gradus* itself. It, too, has had a place in the afterlife of Viennese composition (see Mann, in White, C1992).

The revival of Fux scholarship after World War II, especially through the research of Liess, Mann, Riedel,

Flotzinger, Wessely, Seifert, and above all Federhofer, has brought about a renewal of interest in Fux's music (as against the abiding presence which the *Gradus* has enjoyed). The founding of a collected edition of Fux's works in 1955 and the production of genre studies on the operas (Van der Meer), the vespers (Gleissner) and the oratorios (White), in addition to a host of biographical, textual and source studies, recordings and conference proceedings, have helped to re-establish Fux as an important composer and to confirm his pre-eminence as a definitive figure in the late Austro-Italian Baroque.

4. SOURCES AND CATALOGUES. The majority of Fux sources are in the Österreichische Nationalbibliothek, Vienna. Other important locations are religious foundations and monasteries in Austria (including Melk Abbey, Heiligenkreuz and Kremsmünster), especially for Fux's liturgical and sacred dramatic music which was disseminated and copied for performance (at least in part) throughout Upper and Lower Austria. The Gesellschaft der Musikfreunde in Vienna, the Salzburg Mozarteum and the Stadtbibliothek in Vienna contain numerous sources, as do collections in Brno, Prague, Brussels, Meiningen and elsewhere. Few autographs survive, and the only works published during Fux's lifetime were the *Concentus musico-instrumentalis* (Nuremberg, 1701), the serenata *Elisa* (Amsterdam, 1719) and the *Gradus ad Parnassum* (Vienna, 1725). Most sources are scores and parts prepared by the imperial court copyists in Vienna and by other contemporaries. Gleissner (C1982) and Lederer (see White, C1992, pp.109–37) have done much to identify the hands of the imperial copyists, which might result in a more accurate dating of Fux's works than has been possible hitherto.

The seminal catalogue of works which Köchel provided as an appendix to his study of the composer (1872) is the basis for all subsequent source studies. Köchel's catalogue was arranged by genre (the chronology of Fux's music being exact only in the case of his operas and oratorios); substantial additions were made by Liess in 1947, by Federhofer in 1959 and by Federhofer and Riedel in 1964. Köchel's catalogue has been comprehensively revised by Thomas Hochradner, Martin Czernin and Géza-M. Vörösmarty, taking note of the many new attributions made by Fux scholars. Those made since 1980 include the oratorios *S Geltrude* (E59) and *Ismaele* (E60), now known to be by Carlo Agostino Badia (see Schnitzler, B1995), and the *Exempla dissonantarium ligaturum et non ligaturum*, which is an arrangement of material from the *Musico prattico* of G.M. Bononcini (i). A number of works mistakenly attributed by Köchel, including K144, 145, 157, 232 and 246, have been found by Flotzinger (*Fux-Studien*, A1985) to be the work of Vinzenz Fux (*c*1606–59), a musician in the service of the Empress Eleonora (wife of Ferdinand III) in Vienna. Among other works formerly credited to Fux are some by Corelli, Palestrina, Legrenzi and Telemann.

WORKS

Edition: *Johann Joseph Fux: Sämtliche Werke*, ed. H. Federhofer and O. Wessely, Johann-Joseph-Fux-Gesellschaft, 8 ser. (Graz and Kassel, 1959–) [F]

Catalogue: T. Hochradner, M. Czernin and G.-M. Vörösmarty: *Johann Joseph Fux: thematisches Verzeichnis der musikalischen Werke* (forthcoming)

The main numbering follows that of the catalogue by Hochradner, Czernin and Vörösmarty; numbers prefixed K *are taken from Köchel (1872); prefixed* L *from Liess (1947); and prefixed* E *from Federhofer (1959) and Federhofer and Riedel (1964).*

Fux, Maria Anna. Austrian singer, daughter of FLORIAN LEOPOLD GASSMANN.

Fux, Pietro. *See* FUCHS, PETER.

Fuzelier [Fuselier, Fusellier, Fusillier, Fuzellier], **Louis** (*b* 1672; *d* Paris, 19 Sept 1752). French dramatist and librettist. He was secretary to the Count d'Estampes from 1709 and was twice co-director of the *Mercure de France* (1721–4, 1744–52). He wrote or collaborated on more than 230 stage works, and frequently had performances running concurrently at all the significant theatres in Paris. For instance, during the 12 months from Easter 1725, 15 new works by him (seven wholly his own, eight collaborations) as well as five revivals (two wholly his own, three collaborations) were being given at the Comédie Française, the Comédie Italienne, the Opéra and the Théâtre de la Foire.

Though he embraced high culture, Fuzelier was most at home in the informal, unofficial world of the Paris fairs. The bulk of his output consists of vaudevilles, *intermèdes* and operatic parodies written for the fair theatres of St Germain and St Laurent (where he was also probably a stage director). His first known stage work, *Thésée, ou La défaite des Amazones*, was written for the marionettes of Betrand and performed at the Foire St Germain on 11 August 1701. A parody of the Lully–Quinault *Thésée* (1675), it is in three acts, with *intermèdes* for live actors. His second three-act spectacle for Betrand's marionettes, *Le ravissement d'Hélène, ou Le siège et embrasement de Troie*, performed at the Foire St Germain in February 1705, was one of the first to display each character's text upon large placards (*écriteaux*): this was a neat circumvention of the ban on dialogues inflicted on the Théâtres de la Foire by their rivals.

In 1716 Fuzelier began a collaboration with Lesage and d'Orneval that lasted 14 years; their best work was collected in the nine-volume *Le Théâtre de la Foire, ou L'opéra-comique*, published between 1721 and 1737. Parodies of operas, tragedies and comedies were some of the most popular works in this immense repertory: *Pierrot furieux*, 1717 (parodying Lully's *Roland*); *Arlequin Persée*, 1722 (Lully's *Persée*); *La grand-mère amoureuse*, 1726 (Lully's *Atys*); *Momus exilé*, 1725 (Destouches' *Omphale*) and *Pierrot Tancrède*, 1729 (Campra's *Tancrède*).

At the end of the 1718 season Riccoboni secured the services of Fuzelier for the Comédie-Italienne, where his first unqualified success was *La mode, la meridienne et le may* (21 May 1719). He also wrote several pieces for the Comédie-Française, of which the most popular was the one-act comedy *Momus fabuliste, ou Les noces de Vulcain* (26 September 1719), which was given 63 times. Something of a composer himself, Fuzelier also supplied cantata texts for Stuck, André Campra, Nicolas Bernier and Courbois; but his most important contributions to French high musical culture are the librettos for 13 works performed at the Opéra. In the *opéras-ballets* of this group he portrayed the regency of Philip of Orleans with a touch of cynicism; they are devoid of sentimentality. *Les âges* (to music by Campra, 1718) gives Fuzelier's view of *opéra-ballet* librettos in its *Avertissement*: 'I have attempted only to weave some playful maxims into a light intrigue which can occasion the use of graceful airs and varied dances. This, it seems to me, should constitute the basis of a ballet [i.e. an *opéra-ballet*]'.

Fuzelier introduced the *ballet héroique* to the lyric stage via Blamont's *Les fêtes grecques et romaines* (1723), a 'completely new type of ballet', according to its preface. But the most important example of the genre is Rameau and Fuzelier's *Les Indes galantes* (1735–6; the two men may well have become acquainted during Rameau's collaboration with Piron at the Théâtres de la Foire in the 1720s). In the prefaces to his librettos for the Opéra, Fuzelier constantly justified his unusual subject matter and novel stage effects. For his Persian comedy *La reine de Péris* (music by Aubert, 1725) he claimed he consulted works in the 'Oriental Library' of 'M. de Herbelot'; and the earthquake in the second entrée, 'Les Incas du Pérou', of *Les Indes galantes* is supported by references to discussions with 'many esteemed travellers' and with 'the most skilful naturalists'. But he could also make telling use of contemporary writers without drawing attention to so doing: witness the presence of aspects of Louis de la Hontan's *Dialogues curieux entre l'auteur et un sauvage de bon sens* (1703) and of the New World volume of Jean-Frédéric Bernard's *Cérémonies et costumes religieuses* (1723) in 'Les sauvages', the entrée he added to *Les Indes galantes* in 1736. There they provided a context for Rameau to base a big peace-pipe ensemble on the harpsichord *morceau* he had written a decade before on seeing two native Americans dancing in Paris.

Gabbrielli, Giovanni Battista (*fl c*1740–70). Italian violin maker. Gabbrielli, who worked in Florence, is the most significant of the 18th-century Florentine violin makers, and it is generally thought that the other makers in the city may have learnt from him. The work of Stainer seems to have been the main influence in Florence, but Gabbrielli is today regarded as successful because he resisted the temptation to exaggerate Stainer's features, so often a pitfall among his followers. Occasionally a very high-built violin is found attributed to Gabbrielli, but much more often the outline is of Cremonese dimensions and the model well-balanced. His soundholes invariably have a Stainer slant at each end, and the varnish is yellow or yellow-brown. His best instruments are handsome and well-sounding, and he made violas and cellos as well as violins. (*LütgendorffGL; VannesE*)

CHARLES BEARE

Gabella, Giovanni Battista (*fl* 1585–8). Italian composer. He is known only from two madrigal books: *Il primo libro de madrigali a cinque voci* (Ferrara, 1585) and *Il secondo libro de madrigali a cinque voci* (Venice, 1588, inc.). He was probably active at Ferrara when his first madrigal book was printed there by the ducal printer Baldini. The first piece in this book, *All'ombra opaca del mio verde Lauro*, may be one of the many madrigals in praise of Laura Peverara published between 1582 and 1583 by Ferrarese musicians (see *NewcombMF*). The volume also contains a four-part madrigal descriptive of the seasons. Gabella's preference for pastoral verse is evident in the selection of texts for his second book, which includes a setting of Guarini's popular *Tirsi morir volea*.

DAVID NUTTER

Gabellone [Caballone, Cabellone, Gabbelone], **Gaspare** (*b* Naples, 12 April 1727; *d* Naples, 22 March 1796). Italian composer, son of MICHELE CABALLONE. Though baptized with his father's patronymic, the composer in later life preferred the spelling 'Gabellone', as shown by autograph manuscripts. The facts of his life and works have often been confused with those of his father. Gabellone probably first learnt music from Michele; then, starting in 1738, he studied at the Conservatorio di S Maria di Loreto in Naples as a pupil of Durante. Later he is said to have taught singing and composition there, although no records of tenure have been discovered.

While a young man, Gabellone wrote two *opere buffe* for the Teatro Nuovo in Naples. His high musical repute, however, derived mainly from compositions for the church; according to tradition, Paisiello kept for a model a copy of Gabellone's large-scale *Messa di requiem* (now lost). In 1769 Gabellone was commissioned by the court to write the cantata for soprano solo, *Qui del Sebeto in riva*, to celebrate the birthday of Queen Caroline.

WORKS

Gabellone, Michele. *See* CABALLONE, MICHELE.

Gabichvadze, Revaz (*b* Tbilisi, 11 June 1913; *d* Moscow, 9 June 1999). Georgian composer. He studied composition with Braginovsky, Shcherbachov and Tuskia at the Tbilisi State Conservatory (1928–35), stayed there for postgraduate studies with Arapov and Ryazanov (1935–8), and taught there from 1938 until 1981. He directed the first light orchestra in Georgia (1941–3) and was executive secretary of the Georgian Composers' Union (1948–52). From 1982 to 1987 he was artistic director of the All-Union House of Composers in Moscow. A continuity runs through his output, albeit through different stages and phased transitions. Early works – the first two quartets and the concertos for violin and cello – contain stylistic and technical features that were summed up in his first transitional piece, the Symphony for strings, piano and timpani (1964), and then further developed to

achieve their maximum expressiveness in compositions of the 1970s and 80s: the last three symphonies (the Chamber Symphony no.4 and the eighth and ninth symphonies) and the ballet *Medea*. His themes show a polar opposition between lyrical monologue – clearly apparent in his songs of the 1940s, 50s and 60s, as well as in the meditative sections of his instrumental works – and tragic outburst, of which the latter is embodied with particular force in the late works mentioned above and in the ballet *Hamlet*. The symphonic principle of synthesis, acting on vivid and dramatic ideas, is important in all his music, the stage works (especially the ballets) as much as the symphonies; in the first three chamber symphonies, symphonic development is combined with an interplay of various musical images, or 'masks'. His distinctive language embraces rhythms and intonational patterns from Georgian folk music, which he quoted directly only at the beginning of his career, alongside 12-note chromaticism and the local use of aleatory devices, texture music and tape (as in the 'Rostock' Symphony, *Hamlet* and *Medea*).

WORKS

(*selective list*)

Stage: Chrichina [The Dragonfly] (operetta, M. Baratashvili and G. Shteyn), 1952; Nana (op, 4, G. Meliva, after A. Arbuzov: *Tanya*), 1957; Mï – materi mira [We are the Mothers of the World] (op, B. and R. Starshov), completed 1966; Hamlet (ballet, 3), 1971; Medea (ballet, after Euripides), 1975; Chelovek, kotorïy smeyotsya [The Man Who Laughs] (ballet, after V. Hugo), 1986

Vocal: Vepkhis tkaosani [The Knight in the Tigerskin] (orat, after Sh. Rustaveli), 1938; 3 monologa o Lenine (after S. Shchipachov, A. Surkov), B, female vv, orch, 1970; Sym. no.2 (choral sym., after N. Baratashvili), 1971; Cantus humanus (after K. Bartel'), 1979; Sym. no.9 (after G. Rozhdestvensky); S, chbr orch, 1985

Orch: Sinfonietta, 1935; Gamzrdeli [The Mentor], sym. poem after A. Tsereteli, 1944; Vn Conc., 1947; Vc Conc., 1950; Sym., str, pf, timp, 1964; Chbr Sym., nonet, 1965; Chbr Sym. no.2, conc. for nonet, 1968; Chbr Sym. no.3, 9 variations for nonet, 1970; Sym. no.3 'Rostokskaya' [The Rostock], 1972; Gamlet, suite, 1973 [from ballet]; Chbr Sym. no.4 'Pamyati Shostakovicha' [To the Memory of Shostakovich], 1975; Ov., 1975; Medea, choreographic poem, 1977; Sym. no.8, nonet, 1980, rev. chbr orch 1982; Conc., vn, vc, orch, 1986

Chbr: 3 str qts, 1946, 1957, 1963; Divertimento, wind qt, 1968; 2 fakturï [2 Textures], str orch, 1969; Spikkato, str orch, 1970; Wind Qnt, 1978; 2 pf sonatas, solo inst works

Film scores, incid music, songs

Principal publishers: Muzfond Gruzii, Muzgiz, Muzïka Sovetskiy Kompozitor

KETEVAN BOLASHVILI

Gabignet, Pierre. *See* GAVINIÉS, PIERRE.

Gabler, Joseph (*b* Ochsenhausen, Upper Swabia, 6 July 1700; *d* Bregenz, 8 Nov 1771). German organ builder. The son of a carpenter, he first worked with his father at the joinery workshop of Ochsenhausen Abbey. From 1719 he worked in Mainz for the court carpenter and joiner Anton Ziegenhorn (*d* 1720) and his son, carrying on the business himself after the latter's death in 1726. In 1729 he married the widow of Ziegenhorn the younger. Gabler lived in Ochsenhausen from 1729 to 1733, then again in Mainz until 1737, subsequently in Weingarten (until 1750) and various other places, and from 1769 until his death in Bregenz. He probably studied organ building in Mainz, where at that time the organ builders J.J. Dahm, Johann Onimus and J.A.I. Will were active.

Gabler's organs include those for Ochsenhausen Abbey (1729–33; four manuals, 49 stops; rebuilt 1751–5 with three manuals and a detached console), Weingarten Abbey (1737–50; four manuals, 63 stops), Zwiefalten Abbey (1753–5; chancel organ), the pilgrimage church of Maria Steinbach (1755–9), the Martinskirche, Memmingen (1759–60; rebuilding), the Karmeliterkirche and Dreifaltigkeitskirche, Ravensburg (1763–6; rebuildings), the Lateinische Schule, Memmingen (1768; positive), and St Gallus, Bregenz (1769–71).

Like Gottfried Silbermann, Gabler used to characterize the sound of the manuals and the pedal, as in the following examples (taken from the Weingarten organ, 1745): 'pompos' (*Hauptpedal*), 'scharpf' (*Brustpedal*), 'penetrant' (*Hauptwerk*), 'douce' (*Secund Manual* and *Brustpositiv*), and 'lieblich' (*Echopositiv*). His specifications show a predilection for mixtures with a lot of ranks, including Sesquialtera and Cornet (both repeating), strings and Piffaros (not undulating) with several ranks, a preference for 8′ stops, and hardly any mutations. He used only a few reeds, having some difficulties with the scaling of them. In addition to effect stops such as the Timpan (Pauke), Rossignol, Cuculus (Kuckuck) and Cymbala, he built Carillon stops, the pedal Carillon in Weingarten (32 bells) serving as the highest enhancement of the full organ. In Weingarten he used ivory for keys and stop-knobs, and even for pipes. Turned wooden pipes are also found. Gabler cultivated the detached console. The imaginative case at Weingarten is perhaps the most impressive ever built. A full stop-list of the organ at Weingarten Abbey is given in ORGAN, §V, 12, Table 26.

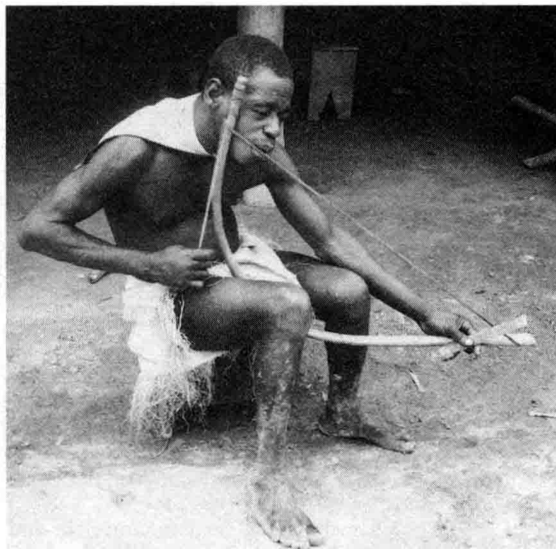
HANS KLOTZ/ALFRED REICHLING

Gabon Fr. République Gabonaise. Country in West Africa. With an area of 267,667 km², it is a relatively homogeneous cultural unit, despite the great ethnic and linguistic diversity of its population of 1·23 million (2000 estimate). The last waves of Central African migration converged on the Atlantic front of the equatorial forest. With the exception of the 'pygmies', all the present-day peoples of

Gabon thus originated in regions outside the equatorial forest that they now inhabit.

1. Main musical traditions: (i) Pygmy and Kele music (ii) The music of the Tsogho, Miene and related peoples. 2. External influences: (i) From the south (ii) From the north. 3. Musicians and instruments.



1. Main musical traditions.

(i) Pygmy and Kele music. The music of the 'pygmies' has features in common with that of other hunter-food-gatherer peoples in Africa. These include the use of a pentatonic tonal system incorporating tetratonic forms; the use of alternately ascending and descending intervals of 5ths, 6ths, 4ths and 7ths in songs that combine a yodelling technique with polyphonic imitation; musical development based on a series of distinct melodic and rhythmic cycles, in a kind of canon particularly suited to the resonances of the forest canopy; and a constant use of polyrhythm within ternary structures. The 'pygmies' of northern Gabon conclude each polyphonic sequence with a sustained solo note that turns into a glissando, imperceptible at first. This is amplified by the maximum vocal resonance, and accompanied by a specific gesture that consists of folding back the lobe of the ear by passing the opposite arm over the top of the head.

The Kele were settled in Gabon before the final waves of Bantu migration. They are now dispersed throughout the country where they live in symbiosis with other groups so that the original features of their music are difficult to identify. The first explorers, however, noted their use of an eight-string harp with a brick-shaped box resonator and an extension carved in the shape of a 7. As far as is known, this instrument is unique to Gabon where it is widespread.

(ii) The music of the Tsogho, Miene and related peoples. The Miene-speaking peoples settled on the lakes and on the northern coast in about the 13th century; but the Kande, the Pindji, the Evya and the Tsogho went down the southern tributaries of the Ogooué and settled in the central mountain massif. A civilization that is now typical of the Gabon forest because of its cultural dominance developed among the Tsogho. It is notable for its various initiatory societies, the most famous being the male brotherhood of the Bwete, which give secret instruction through liturgical ceremonies based on music and dance. These comprise a succession of processional choirs, harp music that has a specific initiatory meaning and that accompanies the lyrical improvisations of a principal cantor, the recitation of the myths of origin accompanied by a musical bow, and dances with masks that are staged with skilful lighting.

Almost the total inventory of musical instruments in their functional and symbolic hierarchy is presented in these ceremonies. The liturgical orchestra is based on the *ngombi*, an eight-string harp, and the *bake*, a wooden percussion beam, which rests on two supports and is struck by two players. This ensemble is supplemented by a mouth-resonated musical bow (fig.1); ensembles of vertical drums including the *ndungu* (with laced skin) and the *mosumba* (with nailed skin), which accompany the masked dances; the *soke*, a ritual rattle (formed from two vegetable shells filled with dried seeds and attached to a handle) used by the principal officiant who recites the myths; and various rattles made of vegetable matter and metal, as well as groups of pellet-bells and jingles. The sound of the *ghebomba*, a signal horn, marks the beginning and the end of the ceremonies.

1. Mouth-resonated musical bow of south Gabon

The music of the Miene-speaking Mpongwe, Rungu, Nkomi and Galoa shows certain similarities to that of the Tsogho. It is characterized by a sophistication of the melodic line, especially in women's singing, which although based on a hexatonic scale has a strong D-mode flavour. The singers also use long vocalizations of beautiful liquidity which result from the sonorities of the Miene language, especially its open vowels. A further characteristic is the fullness of the choral ensembles (ex.1), which use harmonies based on the notes of the two overlapping common chords with minor or neutral 3rds, tuned to the harp. Harp playing among both the Miene and the Tsogho is sometimes reminiscent of Iberian improvisation on instruments of the guitar type, and this might imply an early Portuguese influence. The tuning of an Nkomi harp is given in ex.2.

2. External influences.

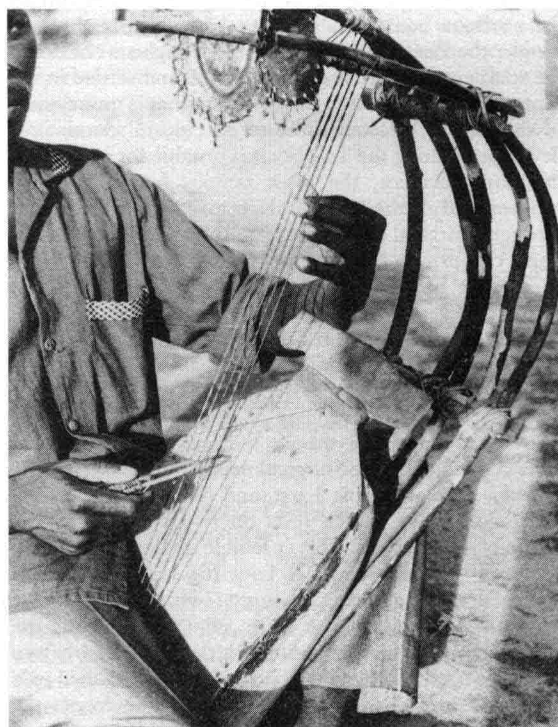
(i) From the south. Another wave of settlement, this time from the south and south-east, took place as a result of the territorial expansion of the former kingdoms of Kongo and Loango. Their influence was felt well before the 16th century as far as Cape Lopez. The migration

Ex.2 Tuning of Nkomi harp; rec. and transcr. P. Sallée (Sallée, 1966)

(Digits denote deviation in cents from the equal tempered scale based on a = 440 Hz.)

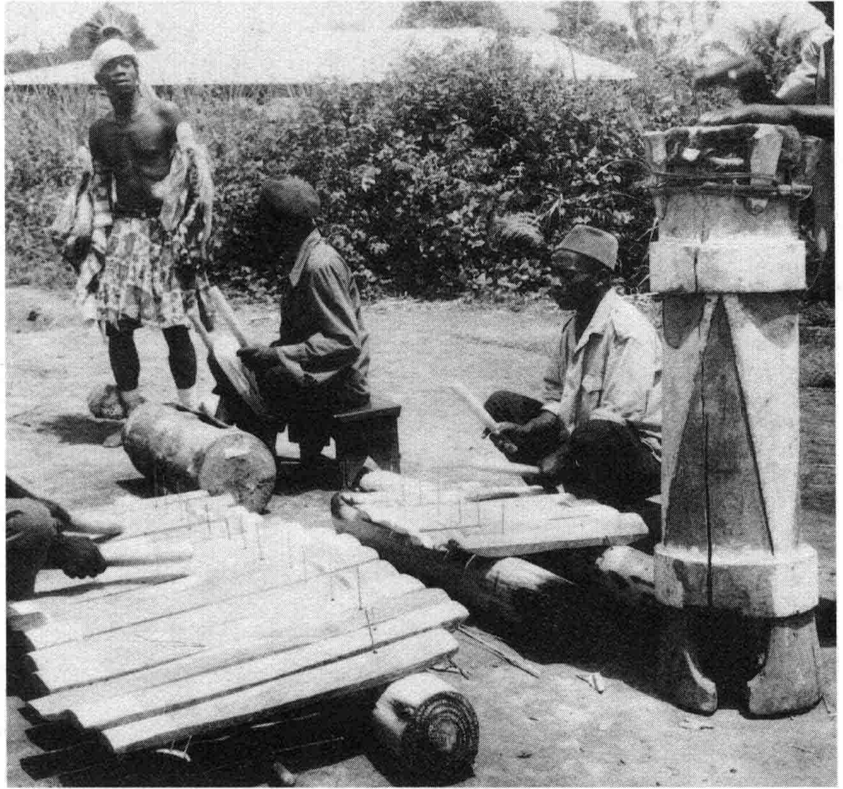
from the south introduced two types of pluriarc, each with five strings. The *tsambi* of the Lumbu, the Vili and the Shira of the plains and lagoons of the south-west is small and carefully made and is also found in Loango and in Bas-Zaïre. The other (shown in fig.2) is large and more crudely made and is called *ngwomi* by the Teke, or Tegue, of the eastern plateau. The term *ngwomi* is a linguistic transformation of *ngombi*, the name by which the peoples of the interior of Oabon know the eight-string harp. The Teke of the Congo generally call this instrument *lukombe*, and it may have originated in the region of the River Kwango and Kasai.

The *sanza* is a lamellophone used for intimate and meditative secular music. It is known in Gabon and the Congo region as *sandza, sandji* and *esandji* and is widespread in the south and south-east of the country. The Gabonese instrument, which has metal keys, corresponds generally with the River Congo type. Some instruments are, however, built on two small boards and are similar to instruments found in the River Kwango and Kasai region. To achieve the greatest possible complexity of timbres, the subtle plucked sounds of the pluriarcs and the *sanza* are systematically prolonged by a continuous buzzing, obtained on the pluriarcs by the addition of metal plates with rattling rings round their edges, and on the *sanza* by trade beads threaded on its keys.



Teke music is particularly original: ensembles of two or three *sanza* with a common tuning are used; polyphonic structures based on different vocal timbres occur in great successive waves in response to a soloist's call-phrase, sometimes sung falsetto. The vocal sound quality, reminiscent of yodelling although produced quite differently, can on occasion induce possession, the possession dances of women's societies being controlled by a soothsayer. The natural singing voice is remarkably soft despite its high register, a combination that sometimes leads to the expressive strangling of particularly high notes, especially characteristic of the Punu.

(ii) From the north. The last of the great migrations produced the present settlements in the north. In the early 19th century, at the time of the first major colonial explorations, the Fang (Faŋ) tribes began to lead a massive exodus of peoples from central Cameroon and from the Ubangi region towards the banks of the Ogooué and the estuary of the Gabon. They were called the Pangwe by the bank-dwellers, and also occupied Equatorial Guinea (Rio Muni) and south Cameroon. They appeared to have something in common with the Zande and introduced instruments of an Ubangl type, such as large wooden lamellophones (which Laurenty termed the *pahouin* type after the Pangwe peoples) called *nkola* or *tamatama*, found also in Cameroon; and xylophones, which were previously unknown in Gabon.



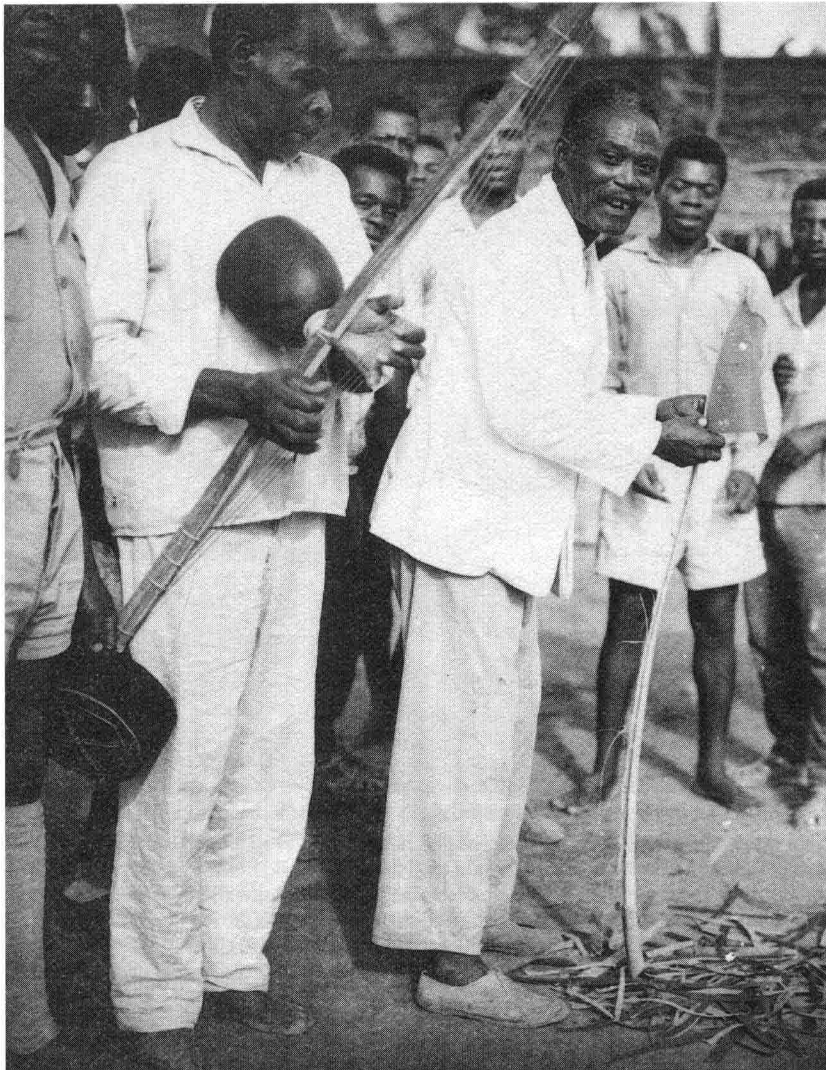
The xylophones are of two types: the *medzang m'biang* (fig.3), a log xylophone whose keys rest on two banana trunks, is reserved for the Melane ancestor cult, and is used in pairs with 15 and 8 keys on each instrument; the second type is portative, its keys being suspended over a frame of light wood beneath which several gourd resonators are fitted. Each of these resonators has a small hole which is covered with a fine membrane to form a mirliton. The keys are struck with two rubber-padded sticks. The portative xylophones are used in groups of five to accompany girls' dances. Each instrument has its own name and range and the instruments are ordered from the highest to the lowest according to the number of keys (9, 9, 8, 6, 2). Xylophone music is like an iridescent carillon of timbres, pitches and note-lengths, based on a major hexatonic scale with no seventh degree. The keys are arranged in the order of the scale in such a way that the alternate or simultaneous use of the sticks produces intervals of 3rds and 4ths.

The Fang are particularly distinguished by their oral epic tradition, which is largely concerned with superhuman struggles. Bards accompany themselves on the MVET, a harp-zither with notched bridge (fig.4), while reciting vehement prose, which is ordered in regular metrical periods against a rigorous isochronous background supplied by pairs of concussion sticks. Each episode in the narrative ends with a raucously sung melodic 'flight' in which intervals of diminished 5ths are curiously interposed; the recitation can last for a whole night.

The harp-zither is also used by the Kota and by the Teke, who combine it with one of their ubiquitous jingles. The Fang formerly used an eight-string harp in their funeral ceremonies, now used exclusively by the syncretic cults in the capital. The resonators of some of these harps are given magnificently carved anthropomorphous extensions in the style of ancestral statues and suggest a relationship with those of the Ngbaka of the Central African Republic.

2. *Ngwomi (pluriarc) of the Teke people*

3. Fang ensemble including a pair of medzang m'biang (log xylophones), single-headed drum and nkul (slit-drum)



The music of the Fang is sober and remarkably disciplined; it can also be rough and virile, characterized by grandiose accents. The great group dances are sustained by the steady rhythm of two *mbejn*, vertical drums with slightly conical bodies, and they are controlled by the signals of the *nkul*, a large slit-drum. The drummer on the *nkul* uses different pitches and rhythms to indicate the dance movements and to determine the musical periods which start and end in perfect ensemble. The great choral ensembles produce imposing homophony based on sequences of 4ths and 3rds which appear episodically. They are responsorial in structure with, however, one peculiarity: the choral response is in each case established by a long-held unison note which is either the final note of each solo melodic phrase or a degree higher than the final note.

Part of the Kota tradition is associated with the Mungala, mythical protector of fecundity and redresser of ills who presides at the initiation of young boys into manhood. The wearing of masks induces all sorts of sounds, including strange voices which are distorted by a high falsetto, cavernous rumblings, raucous growls from the throat produced after drinking an irritant, and by the use of a mouth or nose mirliton. In addition, dull sounds that seem to come from the earth are obtained by beating a plank resting over a pit. It is dangerous to speak to the Mungala without the magic protection of the *kendo* (an iron bell with bent handle and clapper), which an 'interpreter' continuously shakes. The songs relating to twinhood or circumcision are dedicated to the Mungala. The elementary antiphonal structure of these songs is also found in the fable-songs belonging to the domestic oral tradition of stories and games. The Kota, the Ndzabi and the Fang sing guessing games that are based on such oppositions as heaven and earth, bush and village, male and female, and the animal and human worlds. The player is offered a series of choices, and the answers are guided by the particular inflections, negative or positive, of the instrumental ostinato of a musical bow.

3. Musicians and instruments. Strictly speaking, there is no musical professionalism in Gabon since musical specialization is not the prerogative of any one social caste. Music is common to all and artists engage in the same daily occupations as other members of a village. The talent of an individual is, however, always potentially linked with sorcery and must be approved by a special initiation, where it is assigned a role in the initiatory hierarchy that prevails over every other form of social hierarchy in the traditional organization of the tribe. After a 'revelation' or 'vision', an individual might follow the career of a harpist; the suppleness of the fingers is reputedly increased after incisions have been made at the base of the thumb and on the wrist.

Among the Fang, however, the *mvet* player is semi-professional and is invited by families to play and sing on evenings that have been arranged for important occasions. Some *mvet* players are much sought after and travel long distances in response to these invitations; they are generally paid in money and in kind. The initiation of a *mvet* player is carried out under the sponsorship of a master and takes the form of physical, moral and intellectual tests, including personal sacrifices, the drinking of burning syrups, the eating of the heads of birds captured by a lure and finally the rapid and faultless recitation of complex and lengthy genealogies.

The musical bow is generally considered the primeval instrument and the ancestor of other chordophones. Its

4. *Mvet (stick zither) of the Fang*

stretched string symbolizes the mediation between heaven and earth, and the sounds of its vibrations connect to the 'word' of the first ancestor. String instruments are considered to be of common descent. Thus the harmonics given out by the single string of the musical bow give birth to the eight strings of the harp, and the feminine body of the harp in turn gives birth to sounds and multiplies their vibrations.

PIERRE SALLÉE

Gabriel, Charles H(utchinson) [Homer, Charlotte G.] (*b* Wilton, IA, 18 Aug 1856; *d* Hollywood, CA, 14 Sept 1932). American composer and editor. In 1892 he moved to Chicago where he established a studio and during the ensuing 23 years became one of the most prolific and successful writers of gospel hymns. He was associated with numerous prominent evangelists, including Gipsy Smith, J. Wilbur Chapman and Dwight L. Moody, as well as the songleader and publisher Rodeheaver, who acquired Gabriel's services in 1912. Gabriel supplied much of the copyrighted material used by the Rodeheaver company for 20 years, often writing both words and music. He frequently employed the pen name Charlotte G. Homer.

Gabriel wrote over 8000 works, the most popular of which were *Send the light* (1891), *When all my labors and trials are o'er* (*The Glory Song*, 1900), *My Savior's Love* (1905) and *Brighten the corner where you are* (1918; *see* GOSPEL MUSIC, ex.2). He also edited 35 gospel songbooks, eight Sunday-school collections, 19 anthem collections and a monthly periodical, the *Gospel Choir* (1915–23) in which he published his memoirs (iv, 1918). His *Gospel Songs and their Writers* (Chicago, 1915) is an interesting first-hand account of the subject.

MEL R. WILHOIT

Gabriel, Peter (*b* Cobham, Surrey, 13 Feb 1950). English rock singer and songwriter. He was the lead singer with Genesis until 1975 when he left the band to pursue a solo career. Four eponymously named albums released between 1977 and 1982 marked a gradual stylistic shift from the somewhat pretentious progressive rock of Genesis to a more considered style, heavily dependent on slow-moving synthesizer washes (frequently alternating just two or four modally inclined harmonies) and cymbal-less intricate drum patterns, programmed since the third album on a Fairlight computer. Far from writing formulaic songs of interpersonal relationships, Gabriel's approach is always more sophisticated, and frequently troubling, which might derive from his deep interest in Jung. Many songs focus on the need for personal contact (*I Have the Touch*), and warn of the perils of surrender to it (*Here Comes the Flood*). His next two albums, *Peter Gabriel* (1980) and *Peter Gabriel (Security)* (1982), continued this development. While *So* (1986) includes some soul-influenced bass lines, on *Us* (1992) the use of instruments and the influence of styles from different cultures (especially North and West African) is particularly notable. These can be traced to a maturing political conviction evident in the third album's *Biko* which protested against the death of the South African student leader. This led to the formation of WOMAD (an important organization for the promotion of 'world music') in 1982, subsequent recordings with such African stars as Youssou N'Dour and Geoffrey Oryema, and concerts and tours in aid of and outspoken support for such organizations as Greenpeace and Amnesty International and those involved with alternative technologies and anti-apartheid matters. In 1992 he set up Real World Records from his studio near Bath, promoting a wide range of musicians from across the world. Gabriel's ability to set up convincing atmospheres for his challenging songs has also been harnessed to film music, most notably in Parker's *Birdy* (1985) and Scorsese's *The Last Temptation of Christ* (1989).

ALLAN F. MOORE

Gabriel, (Mary Ann) Virginia (*b* Banstead, Surrey, 7 Feb 1825; *d* London, 7 Aug 1877). English composer. Born into an Irish military family, she studied the piano with Johann Pixis, Theodor Döhler and Sigismond Thalberg and composition with Bernhard Molique and possibly Saverio Mercadante. Her earliest song to be published was *The Blind Boy* (1836). Most of her published music from the 1850s consisted of complex, difficult piano pieces, such as the nocturne *La previdenza* (1852) or the *romance sans paroles La reine des aulnes* (1853), and

elaborate, operatic songs to Italian texts, such as the recitative and aria *Ciel, che veggio!* (1852). She also published somewhat simpler English ballads such as the dramatic *Weep not for me* (1851), written for and sung by Charlotte Dolby. Her first commercial success, *The Skipper and his Boy* (*c*1860), was also sung by Dolby and had reached a third edition by 1865; the impassioned *When Sparrows Build* had reached a 30th edition by 1870.

Gabriel wrote about 12 operettas, dating from the 1860s. The most popular was *Widows Bewitched*, which had a run of several weeks in 1867 by the German Reed company. Several of her librettos were written by her husband George March, whom she married in 1874. Her cantata *Dreamland* was performed at Covent Garden in 1870 but Gabriel had to pay for its publication herself. A second cantata, *Evangeline*, was played at Covent Garden in 1873. She died at the age of 52 after a carriage accident.

WORKS
(*selective list*)

printed works published in London

Operettas: Widows Bewitched (H. Aidé), 1865 (1866); Who's the Heir (G.E. March), *c*1870 (1873); Grass Widows (March), 1873 (1875); Graziella (J.J. Lonsdale) (1875); The Love Tests (V. Amscotts); The Shepherd of Cournouailles (T.G. Lacy); *c*7 others

Cants.: Evangeline (H.W. Longfellow) (1873); Dreamland (A. Matthison) (1875)

Songs: *c*300, incl. The Blind Boy (C. Cibber) (1836); Recitative and Aria: Ciel, che veggio! (1852) rev. as On the Threshold (A. Mullen) (1870); The Skipper and his Boy (H. Aidé) (*c*1860); The Forsaken (H. Aidé) (1861); Orpheus (W. Shakespeare) (1862); At the Window (R. Browning) (1864); Change Upon Change (E.B. Browning) (1868); When Sparrows Build (J. Ingelow) (before 1870); Après tant de jours (A.C. Swinburne) (1873)

Pf: *c*30, incl. La previdenza (1852); La reine des aulnes (1853); La gondola (1855); Long Ago (1861); Dream of the East (1876)

SOPHIE FULLER

Gabriel de Santa Maria. *See* ANNUNCIAÇÃO, GABRIEL DA.

Gabriel de Texerana. Spanish singer, probably identifiable with GABRIEL MENA.

Gabrieli, Andrea (*b* Venice, ?1532/3; *d* Venice, 30 Aug 1585). Italian composer and organist, uncle of Giovanni Gabrieli. He brought an international stature to the school of native Venetian composers after a period when Netherlandish composers had dominated. Although he was not as profound a composer as Giovanni, his music displays an exceptional versatility; he was one of the most important figures of his generation and exerted considerable influence on both later Venetian and south German composers.

1. LIFE. In the register which records Andrea Gabrieli's death on 30 August 1585, the composer is described as 'about 52 years of age'; it is thus most likely that he was born in 1532 or 1533. Since he is frequently referred to as 'Andrea da Cannaregio' in contemporary documents, it would appear that his place of birth was the Venetian *sestiere* of that name. There is some documentary evidence to link his family to the parish of S Geremia: his sister Paola is known to have married a linen-weaver of the parish, and Andrea himself was organist at the church of S Geremia from before June 1555 until at least July 1557. Andrea's father, Domenico, died before 1567. These facts constitute all that is known of the composer's background and early life.

There is indirect evidence that while in his teens or early twenties, Gabrieli was in Verona and was associated in some way with Vincenzo Ruffo (*maestro di cappella* at the cathedral from about 1550). His first published madrigal, *Piangete occhi miei*, appeared in a Ruffo print of 1554. Moreover, Gabrieli's setting of Petrarch's sestina *Giovane donna sott'un verde lauro*, first published in an anthology of 1568, appears to have been intended for the Accademia Filarmonica of Verona.

In 1557 Gabrieli was one of ten unsuccessful applicants for the post of organist at S Marco, Venice, left vacant by the death of Girolamo Parabosco (the winner was Claudio Merulo). Not many years later, however, an important new opportunity arose in the form of a contact with Orlande de Lassus. A document of October 1562, drawn up by a quarter-master employed by the Bishop of Bamberg, lists Gabrieli and Lassus among the retinue of Albrecht V, duke of Bavaria, during a journey from Prague to Frankfurt to attend the coronation of the emperor Maximilian II. It is possible that the two musicians became acquainted in Venice during one of Lassus's frequent trips to Italy to recruit personnel for the Bavarian court chapel. It is also plausible that Gabrieli returned with Lassus on the latter's subsequent journey south at the end of 1562. Whatever the case, there can be little doubt that Lassus provided Gabrieli with a major source of musical and artistic inspiration. Gabrieli's acquaintance with members of the rich and powerful Fugger family of Augsburg may also date from his period abroad.

With the exception of the reference of October 1562, Gabrieli's movements and activities between 1557 and the mid-1560s, when he was appointed to a permanent position at S Marco, are mostly unknown. There is evidence to suggest that he obtained temporary employment at S Marco during September and October 1564, although the documents in question are 18th-century commentaries on originals that can no longer be traced. The decision by the governing body of the ducal chapel, dated 3 November 1566, to grant Gabrieli a reimbursement of 15 ducats 'for the considerable travelling expenses sustained in coming to S Marco' might suggest that the composer remained north of the Alps until summoned to Venice a year or two later. A third possibility is intimated by one interpretation of the madrigal *Per monti e poggi*, published in the *Primo libro di madrigali a cinque voci* of 1566. Here, a shepherd and his flock from a land watered by the rivers Secchia and Scultenna (i.e. in the vicinity of Modena) are invited to settle in a country fed by the Ticino, Lambro and Po (a clear allusion to Milanese territory). It is not impossible that the shepherd/pastor in question is Cardinal Carlo Borromeo, abbot *in commenda* of the abbey of Nonantola (itself situated near a point where the Secchia and Scultenna almost converge), whose solemn entry into Milan (which city was to become his permanent residence) occurred on 23 September 1565. If this is so, Gabrieli was probably residing and working in or near the Lombard capital. Further circumstantial evidence in support of this hypothesis is provided by the admittedly late indications in Paolo Morigia's *La nobiltà di Milano* of 1595: Gabrieli, it is claimed, had a high

regard for a *Salve regina* by the Milanese nobleman Lucio Castelnovato, a piece presumably composed before 1569 (in which year it was apparently submitted to the attention of the pope).

In a deliberation of 12 July 1566 the procurators of S Marco granted Claudio Merulo the sum of 10 ducats (a little more than a month's salary) for services performed between the end of November 1565, after Annibale Padovano had failed to return to his post following a period of leave, and Gabrieli's arrival in Venice: this suggests that Gabrieli took up his appointment as permanent organist of S Marco at the beginning of 1566. His arrival marks an important step in assuring stability in the musical establishment of the Ducal chapel, threatened after the death of Willaert, the short-lived tenure of Cipriano de Rore as *maestro di cappella* and the subsequent disappearance of Padovano. Zarlino, recently appointed as *maestro di cappella*, retained his post until his death in 1590; Merulo, the 'other' organist at the basilica from 1557, remained in his position until 1584; many talented singers and, above all, instrumentalists (the Dalla Casa brothers in 1568; the cornettist Giovanni Bassano in 1576) were added to the payroll in this period. Gabrieli himself remained in his post until his death in August 1585, despite an attempt involving Lassus to recruit him for the service of Duke Wilhelm V of Bavaria in 1574.

Few details are known of Gabrieli's personal and professional life. At about the time of his appointment as organist of S Marco, he appears to have taken on some economic responsibility for the family of his sister Paola: in a legal document of March 1567 he agrees to act as the financial guarantor for Giacomo, elder brother of Giovanni Di Fais (later Gabrieli), who was about to enter a monastery. Documents submitted for tax estimates in 1566 suggest that Gabrieli was then renting two separate living-quarters: one for himself and the other for Paola and her family. The inference is that he had become *de facto* head of the Di Fais household. In 1578 he received a one-off payment of 20 ducats from his employers at S Marco, apparently on account of economic difficulties caused by his (i.e. his sister's) numerous family.

2. WORKS. Gabrieli published music in all the principal forms and styles current in late 16th-century Venice: masses, motets, madrigals, *giustiniane*, *mascherate* and theatre music (including the choruses for Sophocles' *Oedipus tyrannus* in Orsatto Giustiniani's Italian translation, staged in March 1585 for the inauguration of the theatre designed by Andrea Palladio for the Accademia Olimpica, Vicenza: these choruses represent the only surviving example of music written specifically for Renaissance performances of tragic theatre).

The posthumous *Concerti* (1587) include sacred and secular compositions for the most important ceremonies of the Venetian church and state. The text of the motet *Benedictus Dominus Deus* contains an explicit reference to an important military victory, presumably that at Lepanto in 1571. The first performance of *O crux splendidior* probably took place during the ceremony for the foundation of Palladio's church of the Redentore, erected by the Venetian state as thanksgiving for the passing of the plague epidemic of 1575–7. A series of mass sections in five to 16 parts (one to four choirs) was perhaps written on the occasion of the visit of five Japanese princes in June 1585 (though the composer's death notice in late August of that year notes that his fatal illness had begun some five months before). *Hor che nel suo bel seno* and *Ecco Vinegia bella* commemorate the arrival of Henri III of France in 1574. The madrigal *Felici d'Adria*, printed in the *Secondo libro di madrigali* for five, six and eight voices (1570), was written for a visit Archduke Charles of Austria made to Venice in 1565 or 1569.

Gabrieli's large-scale polychoral works correspond in style less to the double-choir psalm-settings published by Willaert in 1550 than to the compositions written by Lassus for the Munich court chapel. It is indeed possible that the Venetian composer's stay north of the Alps was intended as a means of familiarizing him with the ceremonial music in vogue in the great northern courts; his earliest known large-scale motets, the eight-part *Lucida ceu fulgida* and 12-part *Deus misereatur nostri*, appeared in a print largely comprised of motets in honour of various members of the Habsburg family. In comparison with these pieces, his later polychoral compositions tend to exhibit a more clear-cut separation between the various groups of performers, and there is a growing preference for contrapuntal simplicity, chordal textures and homophonic blocks of sound (though modified, presumably, through improvised embellishment); imitation, when present, is as likely to occur between entire groups of voices as single parts. This is perhaps a result of the clear-cut spatial separation of groups of performers in S Marco. The widening of overall range in the supposedly later works (where at times the outer parts reach C and *a'''*) is a clear indication of instrumental participation; in some works, the marking of one choir as 'cappella' indicates that this is the only fully vocal group. Further characteristics of the later works are an increased propensity for the use of V–I harmonic relationships and a growing awareness of the structural possibilities of musical climax through the use of gradually shortening note values and acceleration of the rate of exchange between choirs.

In his madrigals Gabrieli quickly abandoned the Petrarch sonnet in favour of the poetic madrigal. Several texts were set only by him, suggesting that he had direct contact with the poets concerned or that he was required by patrons to set specific texts. As in the motets, there is increasing use of homophonic textures (contrasting with passages in imitative counterpoint) and the verbal underlay becomes more syllabic; variety is increasingly obtained through repetition of phrases in different combinations of voices and at different pitches. Gabrieli's debt to Lassus is particularly evident in his *greghesche* and *giustiniane* (antecedents, in turn, of the madrigal comedies of Orazio Vecchi and Banchieri); the obvious models are Lassus's pieces of 1555.

In his keyboard music Gabrieli adopted the standard forms of toccata, ricercar, canzona and *intonazione*. The *intonazioni* are preludes, written in a quasi-improvisatory style, with chords held in one hand against which the other hand provides decorative figuration. Some toccatas are similar in style, though longer; others are marked by the addition of an imitative, fugal section which, in some cases, comes to dominate the composition as a whole. Venice was clearly an important centre for the development of the form; many composers were active in the city at some time, and six were organists at S Marco. Gabrieli's ricercars are consistently contrapuntal, with a lengthy

development of the main theme set against a succession of counter-themes to which it is often closely related. The canzonas are mostly transcriptions of French chansons, with little adaptation of the original except for ornamentation, above all at cadences.

Gabrieli's popularity as a composer is attested by the numerous reprints of his collections, as well as by the frequent occurrence of his compositions in anthologies. His vocal works continued to be published and recopied in manuscripts in Italy and, until well into the 17th century, in German-speaking regions and the Low Countries, both in their original form and in arrangements for lute or keyboard. As late as about 1640, in Germany or for a German patron, his four-part motets and madrigals and his three organ masses (probably published in the lost fourth book of Gabrieli's organ works) were copied in keyboard tablature in Italy. Evidence of Gabrieli's popularity outside Venice, and north of the Alps in particular, is provided by the dedications of his publications. Of the non-Venetian dedicatees, a clear majority are northerners and all are titled heads of state, high-ranking church dignitaries (including Pope Gregory XIII) or leading bankers. By contrast, the Venetians include no high-ranking patricians, patriarchs or, in general, men of particular wealth, power or influence: the actor, merchant and musician Antonio Molino, the second-rank official Girolamo Molino and Domenico Paruta, abbot of the Venetian monastery of S Gregorio. The family of Giovanni Saracini (dedicatee of the *Primo libro de madrigali a sei voci* of 1574), from Bologna, owned a banking firm in Venice. As for Gabrieli's activities and influence as a teacher, Lodovico Zacconi, in his *Prattica di musica* of 1592, referred to his many pupils and stated that he himself had studied with Andrea. Other pupils were Hans Leo Hassler and Gregor Aichinger (further evidence for Gabrieli's popularity in northern Europe), and, naturally, Giovanni Gabrieli. In 1585 the Venetian musician Marco Facoli made provision in his will for his son's keyboard and general musical studies with Gabrieli, a confirmation of the latter's pre-eminence as a teacher in Venice.

DAVID BRYANT

Gabrieli, Giovanni (*b* ?Venice, *c*1554–7; *d* Venice, Aug 1612). Italian composer and organist, nephew of ANDREA GABRIELI. Together with Willaert, Andrea Gabrieli and Merulo, he was one of the leading representatives of 16th- and early 17th-century Venetian music.

1. LIFE. Giovanni was one of five sons and daughters of Piero di Fais 'called Gabrieli', a native of Carnia who resided for some time in the parish of S Geremia, Venice. Little is known of his early years. It is possible that he was brought up by Andrea, to whom, in the dedication to *Concerti ... continenti musica di chiesa, madrigali, & altro* (RISM 1587[16]), he described himself as 'little less than a son'; precise information regarding the relationship between uncle and nephew is, however, scant. Like Andrea, Giovanni spent a period of study and apprenticeship under Orlande de Lassus at the court of Duke Albrecht V in Munich. One of his first published madrigals, *Quand'io ero giovinetto*, appeared in *Il secondo libro de madrigali a cinque voci de floridi virtuosi* (RISM 1575[11]), a collection of works by composers in Albrecht's service. Gabrieli remained in Munich for some years, and in 1578 the court records show him to be in receipt of both salary and livery. He probably left this employment either in the following year or shortly after, as part of the exodus of musicians after the death of Duke Albrecht in 1579. He was in Venice in 1584, acting as temporary organist at S Marco on the vacation of that post by Claudio Merulo. His appointment was made permanent when he was successful in the competition held on 1 January 1585, and he retained the post until his death: for some months during 1585 the two Gabrielis – uncle and nephew – served together as organists of the ducal chapel.

After Andrea Gabrieli's death in 1585, Giovanni edited a large number of his uncle's works for publication: in particular, the *Concerti* (1587), a collection of large-scale sacred, secular and instrumental pieces (see illustration), and the *Terzo libro de madrigali a cinque voci* (1589). To both of these volumes he added several of his own compositions. A number of his organ *intonazioni*and ricercares were published in Andrea's *Intonationi d'organo ... libro primo* (1593) and *Ricercari ... libro secondo* (1595), both of which were probably edited by Giovanni together with other volumes of his uncle's keyboard compositions. A further sign of the close affinity between uncle and nephew is the fact that, after 1585, Giovanni took over Andrea's role as the principal composer of ceremonial music for S Marco. In the same year he composed music for at least one of the pastoral plays given in the ducal palace several times annually.

In 1585 Gabrieli was elected to succeed Vincenzo Bellavere as organist to the Scuola Grande di S Rocco, with a salary of 24 ducats. He took up his duties on 13 February of that year and held the post for the rest of his life. He was required to be present in the confraternity on so regular a basis as might seem quite incompatible with

Title-page of Andrea and Giovanni Gabrieli's 'Concerti' (Venice: Angelo Gardano, 1587)

his service at S Marco, and he undoubtedly sent substitutes on many occasions. Besides playing for the confraternity's monthly Mass, held on the first Sunday of each month, he was required to be present for Mass and/or Vespers on no fewer than 24 major feast days, as well as for Sunday Vespers (except during Advent and Lent) and Friday Compline. Particularly sumptuous was the music performed annually on the confraternity's name day, which occurred on 16 August. Besides the regular organist and singers of the *scuola*, the list of payments to musicians in 1603 mentions the following participants in the ceremonies: Giovanni Bassano, his company of players and an extra four instrumentalists; three violinists; one violone; four lutenists; a company of singers from Padua; eight other singers from Padua; a bass singer from S Marco and 'other special singers'. Gabrieli was given an extra payment for having procured '7 organs at 21 lire each'.

The first comprehensive collection of Gabrieli's works was the *Sacrae symphoniae* (1597); the contents undoubtedly reflect, in particular, his duties at S Marco, but it is not unlikely that several of the pieces were written for and first performed at the confraternity of S Rocco or in the various parish and monastic churches of Venice, where Gabrieli frequently participated in music-making on major feast days. Many of the works in the 1597 volume were quickly reprinted north of the Alps, notably in two volumes of *Sacrae symphoniae* printed by Kauffmann of Nuremberg in 1598 (RISM 1598[2]; the collection

was edited by Caspar Hassler). Gabrieli's fame in German-speaking lands is also reflected in the fact that he was engaged to teach pupils sent to Venice by several northern princes: Alessandro Tadei was sent from Graz for two and a half years beginning in March 1604 and, on his return, was appointed as organist to Archduke Ferdinand; in 1599, Morgens Pedersøn, Hans Nielsen, the organist Melchior Borchgrevinck, two choirboys and two other singers were sent to Venice for a year at the expense of the king of Denmark; a further group from Denmark in 1602–4 included Nielsen and Hans Brachrogge; Pedersøn was back in Venice from 1605 to 1609; Johannes Grabbe was sent from Westphalia from 1607 to 1610; and Schütz was sent from the Saxon court from 1609 until shortly after Gabrieli's death in 1612; Christoph Clemsee was probably in Venice during the last years of Gabrieli's life. There were Venetian pupils as well. Francesco Stivori dedicated a collection of instrumental music to 'the most magnificent, my dear master, signor Giovanni Gabrieli' (*Ricercari, capricci et canzoni, libro terzo*, 1599), and an unnamed 'pupil of sig. Gio. Gabrieli' was elected as organist of the Dominican convent of SS Giovanni e Paolo on 26 July 1602. A further pupil was the Augustinian friar Taddeo dal Guasto, a member of the Venetian convent of S Stefano, and organist there from 1605. In recording their decision to elect Taddeo, the friars recalled Gabrieli's positive judgement of his student's abilities and referred to the close relationship existing between composer and monastery. Taddeo dal Guasto, himself a member of the S Marco ensemble, was the executor of Giovanni's will and editor of the posthumously published *Canzoni et sonate* of 1615.

Few details are known of Gabrieli's family circle and financial situation. His father almost certainly died before 1572; this, over and above all musical considerations, would explain the almost filial relationship between uncle and nephew. On 9 September 1587, a notarial document drawn up 'in the house of the undermentioned brothers' describes an arrangement by which Giovanni, his brothers Domenico and Matteo, and his sister Marina agree to supplement with 100 ducats each the dowry of their sister Angela who, according to another notarial document of January 1586, was about to enter the Venetian convent of S Giovanni Laterano. These references might explain the decision of the *procuratori* of S Marco on 30 December 1586 to pay the musician the uncommonly large sum of a year's salary in advance, in part out of 'respect for his needs'. Both notarial documents specify that the composer was now living in the parish of S Vidal; he was, indeed, buried in the convent church of S Stefano, in the same parish. In a letter of 1604, the composer refers to his 'numerous family': it is unclear whether his dependents are his own children or those of his sister or sisters-in-law. An entry in the Venetian necrology under 12 August 1612 records the composer's death, apparently from a kidney stone, and gives his age as 58 (indications of age in these documents are, however, notoriously unreliable).

2. Works. Unlike his teachers and most of his colleagues, who are known to have composed in a wide variety of genres, Giovanni is known almost entirely through his vocal and instrumental music for the church: large-scale motets and other settings for ensembles of voices and instruments, large- and smaller-scale music for instrumental ensembles, and compositions for organ. The light secular forms such as the villanella and canzonetta are all but absent from his output. All Gabrieli's surviving madrigals were composed in the 16th century and are published in anthologies dominated by the works of other composers. The occasional character of several of his madrigals is apparent from their texts. The eight-part *O che felice giorno* is an expanded version of the text in the *rappresentazione* given before the Doge Pasquale Cicogna on St Stephen's day 1585 (the madrigal was later reworked as *Hodie Christus natus est*, a motet for Christmas Vespers). *Udite, chiari e generosi figli*, which contains an explicit reference to the 'fair and noble sons of happy Hadria', was probably intended for insertion in another pastoral play. Other madrigals celebrate distinguished personages: *Sacro tempio d'honor* forms part of a cycle of twelve sonnets composed in honour of the Venetian noblewoman Bianca Capello on the occasion of her marriage to Francesco de' Medici, Grand Duke of Tuscany; *Sacri di Giove augei* honours Jacob Fugger, dedicatee of the *Concerti* (RISM 1587[16], where the madrigal was published); *Quando Laura, ch'or tant' illustr'e bea* forms part of an anthology dedicated to the soprano Laura Peverara for her wedding to count Annibale Turco in February 1583; the six-part *Scherza Amarilli e Clori* is Gabrieli's contribution to the marriage celebrations of Georg Gruber of Nuremberg and Helen Joanna Kolmann in 1600.

Many of Gabrieli's motets are liturgically appropriate to the major occasions in the Venetian church and State calendar. On these occasions, ceremonial required the doge to be present in S Marco or in one or other of the city's churches for the celebration of mass and/or vespers. Thus *Deus, qui beatum Marcum* was probably intended for performance on the feast of St Mark or during the investiture ceremony for a doge or some other high-ranking Venetian state official (for which the text is also prescribed). Other texts in honour of St Mark are *Iubilemus singuli* and *Virtute magna operatus est*. Several motets are for the Ascension Day festivities, which combined the liturgical celebrations of Mass and Vespers with the ceremony of the Wedding of Venice to the Sea, an allegorical ceremony which symbolized Venetian domination over the Adriatic. Textual analysis of *In ecclesiis* and *Dulcis Iesu patris imago* suggests that their origins lie in the annual ceremonies held on the third Sunday in July, when the doge and other high-ranking officials were required to attend Mass in the church of the Redentore, in thanksgiving for the passing of the plague epidemic of 1575–7. Several motet texts are drawn from Christmas Vespers, celebrated at the Benedictine church of S Giorgio Maggiore in the presence of major state dignitaries. There are also large-scale motets for Easter, Pentecost, Holy Trinity, Corpus Christi and the feasts of the Blessed Virgin. Other texts are generically celebrative in nature and are appropriate for use on a wide variety of liturgical occasions. It is tempting to speculate that at least some of these pieces were written for use on the major festivities in the various parish and monastic churches, of which there were some 150 in Venice. The presence of large musical ensembles was normal on such occasions.

Gabrieli's earliest music shows his indebtedness to Lassus and, above all, to his uncle Andrea. Five large-scale motets and five madrigals were included in Andrea's *Concerti* (1587[16]). As in Andrea's late works, the writing is basically chordal, and word-setting is syllabic. Some

expressive chromaticism arises occasionally from harmonic rather than melodic considerations, lively rhythms often produce cross-accents and syncopations, harmonies are simple and counterpoint frequently all but non-existent. Imitation between choirs occurs in the form of repetition of materials and, especially towards climaxes, the use of strettos. In the double-choir works the contrasting groups take the form of a *coro superiore* and a *coro grave*. The bass line frequently descends to low C and clearly requires instrumental participation, though the use of voices to perform these parts is not to be ruled out (the parts in question are, indeed, supplied with text). Like Andrea's, too, the lowest part of the upper choir is frequently not a real bass in the tuttis. Gabrieli's interest in texture and sonority is always apparent. The overall feeling of the music is one of power: an appropriate musical symbol for the state church of Venice.

Most of the music written before 1597 uses *cori spezzati*. The *Sacrae symphoniae* of 1597 show Gabrieli moving towards a style in which thematic material is developed dynamically in dialogue form, as opposed to being stated in one choir and answered almost exactly in the other (at most, with transposition), as is more typical of Andrea. The harmonic idiom is still simple and essentially diatonic, with many cadential passages caused by frequent interchanges between the choirs. In general, however, Gabrieli now tends to make greater use of dissonance and employ a wider range of tonal centres. Textures are, if anything, further simplified. The melodic element is of greater importance than in the *Concerti*. Naturally, in the three- and four-choir works, harmony tends to be simpler than in double-choir pieces. These large-scale works, however, exploit colour contrasts more than ever before.

In general, the function of Gabrieli's large-scale motets as musical adjuncts to what seems in no small degree to have been a series of quite unrelated, special occasions celebrated not only in S Marco but also, probably, in other churches in Venice, determines a variety of styles and manners of performance. The considerable range in the number of voices – from six to 16 in the *Sacrae symphoniae* of 1597, from seven to 19 in the *Symphoniae sacrae* of 1615 – is itself indicative of a certain heterogeneity of intention. So are some apparent 'inconsistencies' of orchestration as described in contemporary archival documents: mass or vespers may be celebrated 'solemnly by the *capella*', 'with singers and organ' or 'with all manner of instruments'. As a rule, however, the greatest occasional events and liturgical commemorations (above all, Christmas, Easter, Ascension, Pentecost, Holy Trinity, St Mark) required the participation both of the salaried instrumentalists of the Basilica (three such players were engaged permanently in 1568, a fourth in 1576) and of extra musicians specially hired for the ceremony in question. Archival evidence (presented in Quaranta) suggests that Gabrieli's employment of mixed vocal and instrumental ensembles in his festive church music represents a mere continuation of what, in Venice, were normal performance practices inherited from previous centuries.

Payment records for the years 1586–7 mention up to 12 supplementary instrumentalists: mostly cornetts and trombones, but also up to two violins. By the early 17th century, the use of strings increased but winds still dominated: a payment to extra musicians brought in for Christmas Day 1603, for example, lists four cornetts, five trombones, one bassoon, two violins and one *violone*. A list of singers drawn up in the mid 1590s by the *maestro di cappella* Baldassare Donato names 13 resident adults: two sopranos (castratos), four contraltos (male), three tenors and four basses. Obviously, in the same way as the instrumentalists, extra singers could be hired on an occasional basis. Little information is available on the participation of boy singers. However, beside the 24 adult singers mentioned in a list of 1562 are the names of five boys who were required to participate daily in the performance of polyphonic music; of 14 extra singers hired for first Vespers *in festo ascensionis Domini*, 1604, three were 'putti soprani'.

In a resolution drawn up by the governing body of the basilica on 2 April 1607, some five years before Gabrieli's death, not only is it strongly implied that the singers, organists and other instrumentalists were regularly present during the greatest religious solemnities, but also that one unfortunate consequence of their division into spatially separated groups could prove of no little embarassment to their employers. In the document the *procuratori*, having emphasized how important it is 'to perform music in the organ lofts at such times as the Most Serene Prince and the Most Serene Signoria come to church', underlined the necessity of placing one of the best musicians in each loft 'to beat the time as it is regulated by the *maestro*'. For this purpose, Giovanni Bassano (together, presumably, with at least some of the instrumentalists, since he was *capo dei concerti*) was assigned to Gabrieli's loft and one of the singers to the other; the *maestro di cappella* generally stood with a group of singers in a hexagonal pulpit positioned in the nave of the church to the right of the iconostasis. This would explain why the term 'cappella' is applied, in no fewer than 16 of his extant works (as, indeed, in Andrea's large-scale mass movements of the *Concerti*), to a single, usually four-part choir, whose part-ranges lie comfortably within the medium range and which is generally harmonically self-sufficient (necessarily so, since it is distant from the other groups of performers). In turn, the use of 'cappella' to describe a group of ripieno singers suggests that some or all of the parts with text underlay in the other choirs were performed by vocal soloists, not only in those parts which bear the specific designation 'Voce' (which occurs in 22 of Gabrieli's compositions, all for *cori spezzati*) but also, by inference, in the other works. Some large-scale works, it would appear, did not involve the ripieno singers. The 11-part *Surrexit Christus* (1615), for example, contains specifications for two cornetts, two violins, four trombones and three solo voices. The specifications which accompany the printed parts of the ten-part *Iubilate Deo omnis terra* (1615) show that instruments could be used both to double voice parts and to replace them: three parts are labelled 'cornett and voice *si placet*', 'trombone and voice *si placet*' and 'bassoon and voice *si placet*' respectively. A surviving copy of the second *Symphoniae sacrae* (in *PL-Wu*) includes early 17th-century German annotations to *Attendite popule meus* – in which all eight parts have text underlay and each of the upper four parts is assigned to a vocal soloist using the printed label 'Voce' – prescribing the use of stringed instruments for the lower four parts. The same commentator describes choir I of the 15-part *Salvator noster* as the 'violin choir', though, in the composition as

printed, text underlay occurs in all parts of the work and instruments are not specified (one vocal soloist is mentioned in connection with choirs I and III, and two in connection with choir II). How much this practice of instrumentation corresponds to Venetian usage is open to doubt: archival documentation suggests that mixed consorts were more common in Venice, as opposed to the homogeneous timbres frequently described in German-speaking regions. Though Praetorius's indications for instrumental participation are also valuable for these pieces, these too must be used with some caution since they also reflect German taste and are of a later date than the music to which they refer: in line with the annotations in the *Symphoniae sacrae II*, Praetorius describes how certain choirs were performed by homogeneous groups of instruments, such as violins, flutes or cornetts for the upper choirs, trombones or bassoons for those of lower tessitura (in these choirs, he adds, at least one part must be sung to ensure textual completeness). The increased number of indications for specific instruments in the *Symphoniae sacrae* of 1615 is perhaps due to an all-too-literal approach to what, in Gabrieli's original performing materials, may well have been mere annotations regarding individual performances: in general, usage appears to have been highly flexible. Yet, in several of the late works, the parts marked for instruments are treated quite differently from the vocal parts. Likewise, solo voices are clearly differentiated from the ripieno choir by florid writing and greater concertante play between parts. The use of the basso continuo allows solo voices to be accompanied by the organ as well as instrumental groups. Other instruments are specified in *basso seguente* parts (*D-Kl* mus. 51a and 62f; though these two manuscripts were compiled in Germany and are thus not necessarily representative of Venetian practice): the three such parts in the 18-part *Hic est filius Dei* are marked 'basso continuo' (probably organ), 'violone' and 'lute' respectively, while the 19-part *Alti potentis Domini* has a 'basso grande' for lute.

Gabrieli's music for instrumental ensemble consists of canzonas and sonatas. Like the motets, these were probably designed for use in S Marco during mass and vespers on the most important liturgical commemorations and greatest occasional events; they certainly exploit the exceptionally large resources available in the church and the virtuosity of several players, in particular Girolamo Dalla Casa and Giovanni Bassano. As in some of Gabrieli's late motets, the ornamentation applied to the melodic lines is similar to that set out in the treatises of these two virtuoso cornett players. One is tempted to see, in the frequent contrast between a few highly embellished lines and the plainer main body of instruments, a deliberate exploitation of their presence in the instrumental band of the basilica.

The appointment of Monteverdi as *maestro di cappella* at S Marco in 1613 meant that Gabrieli's impact on Venetian composers during the first half of the 17th century was comparatively small. G.B. Grillo, his successor as organist of the S Rocco confraternity and himself appointed to S Marco in 1619, was one of the few to follow his ideas, writing not only a *Sonata pian e forte* but also concertante motets in a similar style to some of those published in the *Symphoniae sacrae* of 1615. Like Andrea, Giovanni was most influential north of the Alps. His many German pupils have already been mentioned. His organ music was included in several tablatures using German notation, such as Bernhard Schmid's *Tablatur Buch* (RISM 1607^{29}) and Johann Woltz's *Nova musices organicae tabulatura* (RISM 1617^{24}). Much of his church music was printed by German publishers and the popularity of polychoral music in northern Europe can be traced largely to his model. Schütz's *Psalmen Davids* of 1619 show direct links with Gabrieli's motet style, not only in the general layout of instruments and voices but also in details of cadential progressions and formal design. Smaller-scale German church music also owed much to works such as the chromatically expressive *Timor et tremor*; music by Schein and others displays a similar attitude to word-painting and uses a similar melodic and harmonic style rather than exploiting the potential of the basso continuo. Schütz's *Cantiones sacrae* (1625) were particularly indebted in this way, and Gabrieli's music was one of the most influential Italian models in Germany before Monteverdi. It was probably this strong German interest which led to the rediscovery of his music in the early 19th century by Winterfeld, whose transcriptions of most of Gabrieli's sacred music and some pieces for instrumental ensemble are still extant (in *D-Bsb*).

DAVID BRYANT

Gabrieli Consort and Players. English vocal and period-instrument ensemble. They are recognized principally for enterprising, meticulously researched reconstructions of liturgical musical events, especially from Venice in the 16th and 17th centuries. Founded by their director Paul McCreesh in 1981, they have given concerts in major festivals around the world and have made numerous recordings. In 1990 they won a Gramophone Award for a reconstruction of Doge Marino Grimani's coronation in 1595. Similar programmes include Vespers at S Marco, Palestrina in the Cappella Sistina and a Mass for Christmas Day at Wolfenbüttel (Praetorius). More recently, the group's thrilling, incisive tutti textures have been admired in performances of Handel oratorios.

JONATHAN FREEMAN-ATTWOOD

Gabrielli, Adriana. *See* FERRARESE, ADRIANA.

Gabrielli [Gabrieli], **Caterina** [La Cochetta] (*b* Rome, 12 Nov 1730; *d* Rome, 16 Feb or 16 April 1796). Italian soprano. She was probably a pupil of Porpora in Venice (1744–7) and is said to have made her début at Lucca in 1747 and to have sung in Jommelli's *Didone* at Naples in 1750. In 1754–5 she sang in Venice at the Teatro S Moisè. After a highly successful concert début at the Burgtheater in Vienna in 1755, she was given a contract there until 1758–9. Metastasio instructed her in the declamatory style and she soon appeared in works by Gluck (*Le cinesi*, *La danza* and *L'innocenza giustificata*, 1755; *Il re pastore*, 1756). In 1758 she was at the Regio Ducal Teatro, Milan; at Padua with the castrato Gaetano Guadagni, one of her most important teachers, she was involved in scandals and had to leave precipitately.

From 1759 Gabrielli often sang in operas by Traetta, creating at Parma the leading roles in his *Ippolito ed Aricia* (1759) and *I tintaridi* (1760). In Vienna, she created the title parts in Gluck's *Tetide* (1760) and Traetta's *Armida* (1761). In Italy again in 1761, she sang in Padua (1761), Lucca (1761–2), Reggio nell'Emilia (1762), Turin (1762), Milan (1763) and Naples (1763–5), then retired briefly to live with a young nobleman; in 1766–7 she again sang in Naples. She then had a three-year engagement at Palermo, and in 1771 was at Milan, where Mozart met her. She was then engaged at St Petersburg

(1772–5), probably at Traetta's request, for she again appeared in his operas (*Antigona*, 1772; *Amore e Psiche*, 1773; *Lucio Vero*, 1774). After a season (1775–6) in London, she returned to Italy, singing until 1782 in Naples, Venice, Lucca and Milan. Gabrielli was one of the most eminent and perfect singers of her time. Burney called her 'the most intelligent and best-bred virtuosa' with whom he had ever conversed; to immense technical powers and knowledge she seems to have joined exceptional personal charms, and accordingly the protection of several noble personalities (such as Prince Kaunitz). Mozart, however, hearing her after her prime, described her as a 'manufacturer of passage-work and roulades ... who cannot sing' (1778).

Francesca Gabrielli (*b c*1735), probably her sister, often appeared with her as seconda donna.

GERHARD CROLL, IRENE BRANDENBURG

Gabrielli, Domenico ['Minghino dal violoncello'] (*b* Bologna, 19 Oct 1659; *d* Bologna, 10 July 1690). Italian composer and cello virtuoso. The first part of his nickname ('Mingéin dal viulunzèl' in Bolognese dialect) is a diminutive of 'Domenico'. He studied composition with Legrenzi in Venice; he was also one of the best students of Franceschini in Bologna, where on 20 December 1680, after Franceschini's death, he succeeded him as a cellist at S Petronio. He was elected to the Accademia Filarmonica on 23 April 1676 and became president in 1683. During the 1680s he became widely recognized as a cello virtuoso and composer of vocal music. He turned to the composition of operas in 1683 and in seven years wrote 12, which received their premières in Venice, Modena and Turin as well as in Bologna. This undoubtedly caused him to travel a good deal, and because of his prowess on the cello he also often performed at the Este court at Modena. He was granted frequent leave of absence from S Petronio, but it is no surprise that he was dismissed on 14 October 1687 for neglect of his duties: he failed to play on the feast of St Petronius, the most important function of the year. He immediately went to Modena for a short time, where he entered the regular service of Duke Francesco II d'Este. His prestige, however, was such that he was reinstated at S Petronio on 23 March 1688, but he soon contracted the incurable illness that led to his death.

Gabrielli's historical significance lies primarily in his virtuosity on the cello, which was just becoming popular, and as the composer of some of the earliest music for it. His canons, ricercares and sonatas reflect both an advanced performing technique and an acute awareness of the sonority inherent in the instrument: his ricercares for unaccompanied cello contain florid passage-work and double, triple and quadruple stops. Except for occasional brilliant passages for the cello, Gabrielli's other chamber music is strongly influenced by the uncomplicated style of the Emilian school of instrumental music as represented by G.B. Vitali and Corelli. This music includes his op.1 and a set of 12 pairs of dances, each pair in a different key, ranging from C minor to B minor and from E♭ to A.

Gabrielli further demonstrated his interest in the cello by employing it as an obbligato instrument in his trumpet sonatas and vocal works. He composed sonatas for one or two trumpets and orchestra (six of which are extant) specifically for S Petronio. They reveal his mature grasp of this new genre which was so popular in Bologna in the late 17th century. They consist of four to six movements, slow and fast ones generally alternating as in the Bolognese sonata tradition. One remarkable movement contains a concertante duet between cello and trumpet with continuo – basically a trio sonata texture. Gabrielli also used the cello and trumpet, as well as other instruments, in a concertante manner in his vocal music, especially in his operas and oratorios. His opera *Flavio Cuniberto*, for example, contains several extended florid arias supported by obbligato instruments including cello and theorbo (one aria each), trumpet (two arias) and violin (three).

Gabrielli's vocal music, the work of a fine craftsman, reflects his Venetian training and background. While his sacred music is more reserved, his cantatas, oratorios and operas reveal a flair for the dramatic. The recitatives are seldom of the secco variety and he often emphasized expressive features in the texts. The way in which he constructed scenes also reflects his desire for relative freedom in organizing recitative, aria and arioso for dramatic purposes. The forms of his arias range from strophic and binary pieces to those built on ostinatos and full-blown da capo arias, and they vary from the simple to the florid. Instrumentally accompanied arias are used for dramatic emphasis, a feature particularly evident in the oratorio *S Sigismondo*.

Gabrielli's sacred works, written predominantly for up to five soloists, one ripieno choir and a five-part string ensemble without trumpets, recall G.P. Colonna's skilful use of S Petronio-style counterpoint, particularly in the final sections of mass movements and psalms and in the contrasts between virtuoso solo sections and homophonic choir passages. The influence of Gabrielli's former teacher, Franceschini, is evident in his use of short, dynamic rhythmic cells. Other characteristics are the clear polarization between melodic upper parts and walking bass lines, and the frequent use of melodic sequences in the style of the organ compositions of G.B. Degli Antoni and Bartolomeo Monari.

JOHN G. SUESS (with MARC VANSCHEEUWIJCK)

Gabrielli, Francesca. *See* FERRARESE, ADRIANA.

Gabrielli, Count **Nicolò** [Nicola] (*b* Naples, 21 Feb 1814; *d* Paris, 14 June 1891). Italian composer. His teachers included Carlo Conti and, at the Naples Conservatory, Zingarelli and Donizetti. In about 1835 he began writing for the theatre, and from 1840 to 1854 directed the ballets at the royal theatres in the kingdom of Naples. Summoned by Napoleon III, he lived from 1854 in Paris, where he dedicated himself to composition, writing operas and ballets, some of them for the Opéra. He was successful until the fall of Napoleon III in 1871, after which he stopped composing almost completely. His output included about 20 operas and about 60 ballets.

Fétis acknowledged Gabrielli's gift for dramatic effect, but observed that his ballets, for instance, were written unimaginatively. His melodic lines often have a pleasing dance-like quality, though they are generally weak in substance. (See *GroveO*.)

Simon Bolivar, march, orch, after 1870, pf score (Paris, 1883)

FRANCESCO BUSSI (with JOHN BLACK)

Gabrilovich [Gabrilowitsch], **Ossip (Salomonovich)** (*b* St Petersburg, 26 Jan/7 Feb 1878; *d* Detroit, 14 Sept 1936). American pianist, conductor and composer of Russian birth. From 1888 he studied the piano with Anton Rubinstein and composition and theory with Navrátil, Lyadov and Glazunov at the St Petersburg Conservatory, graduating in 1894 as winner of the Rubinstein Prize. On Rubinstein's advice he spent the next two years studying with Leschetizky in Vienna. His first public appearance was in Berlin in October 1896, after which he made frequent successful tours in Europe. Gabrilovich's first American tour was in 1900, followed by numerous others. From 1910 to 1914 he was conductor of the Munich Konzertverein.

Gabrilovich settled in the USA in 1914, and in 1916 was appointed conductor of the Detroit SO, which he conducted until his death and which he brought to a high standard. He kept up his public appearances as a pianist. His style was one of great finish, delicacy and restraint, frequently more reflective than dramatic, though not lacking in power or in depth of expression. Among his notable achievements was a series of historical concerts, showing the development of the piano concerto, in which

he played 18 such works. In 1909 Gabrilovich married Mark Twain's daughter, Clara Clemens, a contralto, who appeared with her husband in recitals. He composed an *Ouverture rhapsodie* for orchestra, an *Elegy* for cello, and piano pieces, several of which he included in recital programmes.

RICHARD ALDRICH/JAMES METHUEN-CAMPBELL

Gábry, György (*b* Istanbul, 23 April 1927). Hungarian musicologist. At the Liszt Academy of Music, Budapest, he studied composition with Ferenc Szabó (1947–51) and musicology (1952–7). From 1957 he worked in the music collection of the Hungarian National Museum, and in 1974 he was appointed a research fellow at the Music History Museum of the musicology institute of the Hungarian Academy of Sciences. From 1979 until his retirement in 1987 he worked in the music collection of the Ethnographic Museum, Budapest. In his research Gábry has concentrated on the history of instruments, particularly those of the Baroque period, with special emphasis on Hungarian instruments. His chief interest in his museum work has been the surviving evidence of Liszt's activity in Hungary.

VERA LAMPERT

Gabucci, Giulio Cesare. *See* GABUSSI, GIULIO CESARE.

Gabunia, Nodar (*b* Tbilisi, 9 July 1933). Georgian composer, pianist and teacher. He studied at the Tbilisi Conservatory and then at the Moscow Conservatory with Goldenweiser for piano and Khachaturian for composition. In 1962 he returned to the Tbilisi Conservatory to teach the piano, and in 1984 he was appointed rector of that institution as well as president of the Georgian Composers' Union. Recognition as both pianist and composer came to him early, at a time when he belonged to a group of Georgian composers moving towards Stravinsky, Prokofiev and, most of all, Bartók. Gabunia's *Igav-araki* ('Fable', 1964) is one of the most successful syntheses of these Eastern European compositional models with a clear Georgian musical identity. The piece is a kind of madrigal comedy in the modern form of a concert satire. Many aspects of it were new to Georgian music – polyrhythm and polymetre, the sharp dissonance of polytonal chords, the variation of short motifs, the freshness and richness of timbre – and yet these features were organically connected to the modal and polyphonic particularities of west Georgian folk music. Bartók was the guiding spirit, as throughout Gabunia's creative life. Another continuity lies in his adherence to chamber and chamber-orchestral music, allowing a deepening and emotional intensification of style which is realized with particular fullness in his Second Quartet, one of his best known works. For the piano he writes as a virtuoso, using modernist devices – clusters, mechanical rhythms, new modes of playing – alongside lyrical episodes that suggest a feeling for nature and an elegiac-pensive mood. His later compositions are simpler and more diatonic.

WORKS
(*selective list*)

Stage: Kvarkvare Tutaberi (musical comedy, after P. Kakabadze), 1973

Orch: Pf Conc. no.1, 1961; Poėma-ėlegiya, ob, str, timp, 1963; Sym. no.1, 1972; Pf Conc. no.2, 1976; Vn Conc., 1981; Sym. no.2, 1984; Sym. no.3 'Giocconda', 1988; Pf Conc. no.3, 1996

LEAH DOLIDZE

Gaburo, Kenneth (Louis) (*b* Somerville, NJ, 5 July 1926; *d* Iowa City, 26 Jan 1993). American composer. He was awarded an MM from the Eastman School (1949) and the DMus from the University of Illinois, Champaign (1962), and undertook special studies at the Accademia di S Cecilia in Rome on a Fulbright scholarship (1954–5), at the Berkshire Music Center (1956) and at the Princeton Seminar in Advanced Musical Studies (1959). His teachers included Petrassi and Bernard Rogers. He taught at Kent State University (1949–50), McNeese State University (1950–54), the University of Illinois (1955–68) and the University of California, San Diego (1968–75). In 1975 he founded Lingua Press, which issues scores, books, records, audio tapes, videotapes and films. He received a George Gershwin Memorial Award (1954), an award from the Berkshire Music Center (1956), a UNESCO Creative Fellowship (1962), a Guggenheim Fellowship (1967) and grants from the Deutscher Akademischer Austauschdienst (1971), the NEA (1975–6), and other sources. Among the bodies which commissioned his works were the Fromm Foundation and the Koussevitzky Foundation.

Gaburo was a prolific composer; his early compositions (for example, *Three Dedications to Lorca*, 1953) were orientated towards tonality. From 1954 to 1959 his works were based on serial principles and complex structural systems (for example, *Ideas and Transformations* no.1 for violin and viola). In 1959 he began to investigate the physiological, acoustical, and structural domains of language as compositional elements; this led to a conception of 'compositional linguistics' on which many of his subsequent works were based, among them *Antiphonies II* and *III* (1962–3) and the *Lingua* series (from 1965). These works involve in various ways live and electronically processed voices, texts clearly articulated and phonetically fragmented, synthesized electronic sound and *concrète* mixes, live instrumental ensembles, and theatrical elements. Gaburo founded and conducted several groups under the title 'New Music Choral Ensemble' (NMCE) between 1962 and 1975; these were virtuoso groups which gave numerous performances of contemporary works. NMCE IV (1972–5), supported by a Rockefeller grant, included theatrical elements – a mime, an actor, a virtuoso speaker, a gymnast and a sound-movement artist.

WORKS

JEROME ROSEN (text), KEITH MOORE (work-list, bibliography)

Gabussi [Gabucci, Gabusi, Gabutio, Gabutius, Gabuzzi], **Giulio Cesare** (*b* Bologna, *c*1555–8; *d* Milan, 12 Sept 1611). Italian composer. He first studied music at Ravenna and Loreto under Costanzo Porta, and then became *maestro di cappella* at Forlì Cathedral. In 1582 Porta recommended him to Cardinal Borromeo, and in 1583 he took up the post of *maestro di cappella* at Milan which had been vacated by Pietro Pontio in 1581 or 1582. Briefly, between March 1601 and July 1602, he was employed by King Sigismund III in Warsaw, after which he returned to Milan where he took up his former duties in the cathedral. He remained there until his death.

Gabussi's works show transitory stylistic features; his early motets and madrigals are late Renaissance in style while his later sacred music is typically Baroque. According to De Gani and Garbelotto, Gabussi was, after Gaffurius, the first composer to write music adapted to the Milanese Ambrosian rite, as well as being one of the first to put into practice the instructions issued by the Council of Trent concerning polyphonic music. Both Marcello in his *Trattato delle consonanze armoniche* (MS, 1707) and G.B. Martini in his *Esemplare ossia Saggio fondamentale pratico di contrappunto* (1774–5) praised Gabussi's command of counterpoint.

MIROSŁAW PERZ

Gabussi, Vincenzo (*b* Bologna, 1800; *d* London, 12 Sept 1846). Italian composer and teacher, elder brother of the singer Rita Gabussi De Bassini. He studied counterpoint with Stanislao Mattei at the Liceo Musicale in Bologna and became a teacher of singing and the piano. He made his successful début as an opera composer with *I furbi al cimento* (Modena, 1825). In the same year he went to London, where he lived for many years, highly regarded as a teacher chiefly of amateurs of the best society. His second opera, *Ernani* (Paris, 1834), was subjected to typically spiteful criticism by Bellini, whose *I puritani* followed it on the stage of the Théâtre Italien. But *Ernani* proved a fiasco, receiving only three performances, and was no threat to Bellini who thereafter sarcastically referred to its composer as 'the great Gabussi'. Also unsuccessful was *Clemenza di Valois* (Venice, 1841), which most excited its audiences through having caused its composer's friend Rossini to make his first visit to Venice for 17 years. Gabussi's true sphere was that of vocal salon music, in which his output includes *canzoncine* and *romanze* for one and two voices. While amateurish in construction and mediocre in musical and dramatic content, his works reveal him to have been a facile and modish melodist, and this quality ensured the contemporary success of the large number of romanzas, ariettas and, particularly, duets which he published mostly in London and Milan.

WORKS

I furbi al cimento (melodramma comico, 2), Modena, Comunale, 12 Feb 1825
Ernani (dramma serio, 3, G. Rossi, after V. Hugo), Paris, Italien, 25 Nov 1834; excerpts, pf acc. (Paris, n.d.)
Clemenza di Valois (melodramma, 3, Rossi, after E. Scribe: *Gustave III*), Venice, Fenice, 20 Feb 1841; *I-Mr**, *Vt*, vs (Milan, 1841)
Vocal: over 30 songs, 100 duets; trios; qts

GIOVANNI CARLI BALLOLA

Gace Brule (*b c*1160; *d* after 1213). French trouvère. Gace's shield was banded in red and silver (*burelé de gueules et d'argent de huit pièces*; see illustration), and his name is merely a description of this blazonry, altered through the transposition of two letters. The name can be traced in two documents of 1212 and 1213: the first indicates that he owned land in Groslière (département Eure-et-Loire, arrondissement Dreux) and that he had dealings with the Knights Templar; the second records a gift from the future Louis VIII. Apart from these facts, all other biographical information about Gace rests on clues provided within his poetry. It is reasonably certain that he was born in Champagne, and that his home may have been Nanteuil-les-Meaux (département Seine-et-Marne,

'Li plusour ont d'amours chanté' by Gace Brule, with illuminated capital showing the trouvère as an armoured knight, late 13th–early 14th centuries (I-Rvat Reg.lat.1490, f.18r); marginal annotations formerly attributed to Claude Fauchet (1530–1601)

arrondissement Meaux). He appears to have spent some time at the court of Count Geoffrey II of Brittany, son of King Henry II and Eleanor of Aquitaine. The Count of Brittany is mentioned in *Li plusour ont d'amours chanté*, and a Count Geoffrey is the dedicatee of *A la doucour* and *Sans atente de gueredon*; the identity of the two is probable, but not beyond question. The count was intensely interested in literature, and was the patron of Guiot de Provins and of the troubadours Bertran de Born, Gaucelm Faidit and Guiraut de Calanson. *Gace, par droit me respondés*, one of the earliest jeux-partis in Old French, involves the Count of Brittany and Gace, and may be by them jointly.

Gace apparently also spent time at the court of Marie de France, Countess of Brie and Champagne, and half-sister of Geoffrey II. She was active in literary circles, having been the patroness of Richart de Berbezill, Gautier d'Arras, Chrétien de Troyes and Conon de Béthune. Gace was also familiar with others in the highest ranks of the nobility, including the counts of Blois and Bar (presumably Louis and Thibaut I, respectively) and Guillaume V de Garlande, known under the sobriquet 'Noblet'. It would appear that Gace was on fairly close terms with a number of the earliest generation of trouvères, including Blondel de Nesle, Conon de Béthune, Gautier de Dargies, Gilles de Vies Maisons, Pierre de Molins, Bouchart de Marly, Amauri de Craon, and perhaps even Hugues de Berzé and the Chastelain de Couci. Several of these took part in the crusades of the time, and there are hints in *Les consirers de mon päis*, *Tres grant amours* and *Bien cuidai toute ma vie* that Gace may have taken part in either the Third or Fourth Crusade, possibly in both.

Gace Brule was not only the most prolific of the earliest trouvères, but also one of the best known. *En cel tens*, *Quant flours et glais* and *Bien cuidai* were quoted by Jean Renart in the *Roman de la rose ou de Guillaume de Dole*, the first of the *romans* to incorporate such quotations. *Cil qui d'amour*, *Ne me sont pas*, *Pour verdure* and *Bien cuidai* were inserted into the closely contemporaneous *Roman de la violette* by Gerbert de Montreuil, the two tales having been written probably between 1220 and 1230. *Cil qui d'amour me conseille* and *Li plusour* appear in the *Méliacin ou la Conte du cheval de fust*, while *Au renouveau de la doucour d'esté* and *Pour verdure ne pour pree* are included, misattributed, in the *Roman du castelain de Couci et de la dame de Fayel*. Yet another work, *Ire d'amour*, was cited by Dante in *De vulgari eloquentia*, but with an erroneous attribution to Thibaut IV of Champagne. Brief quotations of works by Gace or allusions to him appear in chansons by Gontier de Soignies (R.433), Gautier de Dargies (R.708), Gilles de Vies Maisons (R.1252) and Guillaume Le Vinier (R.691 and 1859). A number of poems by Gace provided the models for later imitations; *De bone amour et de loial amie* in particular served as model for four other trouvère songs and for one by a German Minnesinger as well. Latin contrafacta include works by Philippe de Grève and Adam de la Bassée.

The great popularity enjoyed by Gace derives more from the fact that he satisfied admirably the conventions of his time than from particular originality of situation, imagery, or structure. The poet followed faithfully, and seldom strayed from, the paths laid by earlier troubadours. Among the many chansons attributed to Gace, only three, *L'autrier estoie*, *Quant bone dame* and *Quant voi l'aube*, do not begin with the rhyme scheme *ABAB*. Of the remainder, ten continue this pairing of rhymes still further; the rest are built in the standard pattern of two equal *pedes* and contrasting cauda. The continuation of the paired rhyme scheme in *Quant voi la flor botoner* is deceptive in that the musical structure would seem to indicate that the work was conceived in terms of *pedes* of four lines each. Most poems consist of either five or six strophes. Usually there are seven or eight verses per strophe, although there may be as many as 11 and as few as six. The largest single group of works is composed of isometric, decasyllabic strophes, while others intermingle decasyllables with shorter verses. Isometric heptasyllabic and octosyllabic verses are also fairly frequent. In the few more complex poems, Gace employed three or four different line lengths.

There is a corresponding lack of variety in the larger aspects of the musical structures. Among the original settings of the works certainly or very probably by Gace there is only one, *Bien ait amours*, that is not in bar form; it follows instead the scheme *ABCDEFA'B'*. On the other hand, the treatment of the cauda itself is more flexible: about two dozen melodies use new material throughout the concluding section, while the remainder display repetition patterns of different kinds. More than half of the original settings have finals on *d*, and there is a heavy preponderance of authentic modes. A curiosity worthy of some note is the appearance of *f*♯ in three chansons having a final on *d*, *Au renouveau*, *Desconfortés, plain de dolor* and *Ne puis faillir*; *c*♯ is notated in *Quant l'erbe muert*, while *e*♭ appears in *De bone amour*. A few chansons use common motifs, such as the leap from *d* to *a* that appears at the opening of several phrases. The rhythmic construction of the melodies is quite variable: in *F-Pn* fr.846 (Chansonnier Cangé), *Chanter me plaist*, *De bone amour*, *Tant m'a mené*, and large portions of *Ne me sont pas achoison de chanter* are notated in 3rd mode; in the same source *Sorpris d'amors* and large parts of *Quant define*, *Quant noif* and *Quant voi la flor* are notated in 2nd mode. Normally, however, there are few indications of regular rhythmic patterns in the music, although there is a perceptible tendency to increase rhythmic activity towards the end of the phrase, a trait common in the works of many other trouvère composers.

THEODORE KARP

Gaci, Pjetër (*b* Shkodra, 27 March 1931; *d* Tirana, 27 March 1995). Albanian composer and violinist. Jakova enabled him to study the violin at the Jordan Misja Art Lyceum, Tirana (1948–52). He then studied at the Moscow Conservatory (1952–6) with Yampol'sky and others. On his return to Albania he led the orchestra at the Tirana Opera and taught the violin at the Jordan Misja Art Lyceum (1958–67). After serving as artistic director of the Tirana Circus, the 'Estrada' Revue Theatre and the Puppet Theatre, he moved in 1970 to Shkodra, where he received a full salary from the state in order to devote himself full-time to composition as a 'free professional composer'.

Although he was one of the first Albanian composers to study in Moscow, Gaci did not remain in the forefront of musical life. Though he is known principally for his patriotic canatatas and songs, such as *Për ty atdheu* ('For Thee, O Fatherland', 1961) and *Gryka e Kaçanikut* ('The Passage of Kaçaniku', ?1980), his concert works, such as the Violin Concerto (1959), with its remote echoes of Dvořák and Khachaturian, and the spontaneous one-movement Concertino (1979), demonstrate an inexhaustible melodic inventiveness, enriched by his knowledge of Shkodran folksong. His operas, meanwhile, especially the masterly *Toka jöne* ('Our Land'), demonstrate a keen sense of drama and stage timing, and of the qualities of the Albanian language.

WORKS
(*selective list*)

Dramatic: Marifetet e tetos Sherifesë [The Guiles of Aunt Sherifé] (comedy-vaudeville, 3, A. Pano), Durrës, House of Culture, 1961; Përtej mjergulës [Beyond the Fog] or Minatorët [Mine Workers] (op, 1, S. Kasapi), Tirana, Theatre of Opera and Ballet, 27 May 1971; Luftëtarët e lirisë [Freedom Fighters] (ballet, 1, Gaci, choreog. P. Kanaçi), ?1974; Toka jonë [Our Land] (op, 3, K. Jakova and N. Luca), Tirana, Theatre of Opera and Ballet, 6 June 1981; 6 ballet scenes, all Tirana, 1961–8, 6 film scores, 1963–85, and incid music for two plays by F. Kraja, Shkodra, 1978, 1979
Choral-orch: Festë e madhe [The Great Festivity], cant., S, A, T, B, mixed chorus, orch, 1961; Kantate për 20 vjetorin e Partisë [Cant. for the 20th Anniversary of the Party], ?solo vv, mixed chorus, orch, 1961; Epopea e lavdishme [The Glorious Epopee], cant., solo vv, mixed chorus, orch, 1962; Për ty Atdheu [For Thee, O Fatherland] (Gaci), B, mixed chorus, orch, 1964; O moj Shqipni, e mjera Shqipni [O Albania, Poor Albania] (cant., P. Vasa), S, Mez, T, Bar, mixed chorus, orch, 1968; Përse mendohen këto male [Why are these Mountains so Pensive] (I. Kadare), S, mixed chorus, orch, before 1982; Partisë [To the Party] (cant., F. Kraja), Bar, mixed chorus, orch, 1984; Firma e popullit tim [The Signature of my People] (vocal-sym. poem, K. Petriti), S, mixed chorus, orch, 1989–, ?unfinished
Orch: Conc., b, vn/fl, orch, 1959; Rhapsody, pf, orch, perf. Tirana, May 1967; Vallja no.1 [Sym. Dance], 1971; Vallja no.2 'Sqiponjat' [Eagles], 1974; Vallja no.3 'Heroizmi e ditëve tona' [The Heroism of our Days], 1974; Concertino 'Gëzim i fëmijeve' [Children's Joy], vn, orch, 1977; Rhapsody, a, vn, orch, 1983–4; Prelude, vn, orch, 1984
Other inst: Vallja, 10 vn, 1990; 7 pieces for vn, pf (Tirana, 1986)
Songs: Kur bie Fyelli e Çiftelia [When the Fyell and the Çifteli play], female v, orch, before 1980; Grusht bashkuar rreth partisë [Like a Fist United Around the Party] (Gaci), T, small chorus, orch, before 1980; Poeti partizan [Partisan Poet] (R. Qatipi), T, orch, before 1980; Shqiponjë e lirë [Free Eagle] (Gaci), female v, orch, before

1980; Të atdheut jemi ushtarë [We are Soldiers of our Fatherland], 1v, orch, before 1980 [orchd K. Uçi]; Gryka e Kaçanikut [The Passage of Kaçaniku] (P. Shtjefni), 1v, mixed chorus, orch, ?1980; Sot flamujit ngrihen [Today Banners Rise], before 1983; Mes jush [Among You], before 1983; Biri i Shqipërise [Sons of Albania] (Qatipi), T, orch before 1983; Syni i kaltër [Blue Eyes], after 1983; Asht liqeni bahçja jonë [When you put your Hand on my Hand] (Shtjefni), after 1983; Kush e vret pranverën tonë [Who has Killed our Spring] (Shtjefni), after 1983; Shpirt i trazuar [A Soul in Confusion] (Shtjefni), after 1983

GEORGE LEOTSAKOS

Gade, Niels W(ilhelm) (*b* Copenhagen, 22 Feb 1817; *d* Copenhagen, 21 Dec 1890). Danish composer, conductor, violinist, educationist and administrator. For his wide-ranging musical activity Gade ranks as the most important figure in 19th-century Danish music.

He had musical parents, his father being a cabinet maker who about the time of Gade's birth began to specialize in making musical instruments. Gade showed a pronounced musical talent at an early age, and plans for him to join his father's business as an apprentice were quickly overtaken by his desire to become a musician. At 15 he began to study the violin with F.T. Wexschall and theory and composition with A.P. Berggreen, a leading figure in the Danish folk-ballad movement. He made his début as a violinist in May 1833, and in the following year he was engaged as a junior violinist in the Royal Orchestra.

During the 1830s Gade developed his talents, playing chamber music with friends from the Royal Orchestra (Beethoven's string quartets were a particular favourite), and composing feverishly. His early attempts at composition include songs, chamber music, ballet music and orchestral overtures, although the results were inconsistent. Some of the songs were successful, but the overture *Socrates* was not: the Royal Orchestra played it for Gade, whereupon he burnt it in disappointment. Of far greater importance to his intellectual development during these years was his contact with friends of his own age, in particular musicians and actors, through whom he became acquainted with German Romantic literature and with contemporary music.

The breakthrough for Gade came in 1840, when he won a competition arranged by the Copenhagen Music Society (founded in 1836) with his concert overture *Efterklange af Ossian* ('Echoes of Ossian'). The adjudicators were Spohr and Friedrich Schneider; Mendelssohn was also appointed, but owing to the pressure of work did not attend. Particularly in the light of the compositions of the 1830s, the *Ossian* overture is an extraordinary work, being extremely individual and expertly written. Gade succeeded in matching his melodic capacity to his ambitions in instrumental and particularly symphonic music. The new features in his work, an archaizing ballad manner and the generally regular thematic formation, are reflected in the motto of the overture: 'Formel hält uns nicht gebunden, unsre Kunst heisst Poesie' ('Formula does not constrain us; our art is called Poetry') (Uhland).

When Gade's First Symphony (1841–2) was not accepted for performance in Copenhagen, he sent the work to Mendelssohn, who received it with enthusiasm and performed it with great success in March 1843. Following this success a government grant enabled Gade to go to Leipzig, where he met Mendelssohn and Schumann, performed his First Symphony at the Gewandhaus, and was engaged as assistant conductor of the Gewandhaus Orchestra and as a teacher at the Leipzig Conservatory under Mendelssohn. Schumann wrote appreciatively of him in the *Neue Zeitschrift für Musik*. After Mendelssohn's death in 1847, Gade was appointed chief conductor, but when in the spring of 1848 war broke out between Prussia and Denmark he returned to Copenhagen. His works composed during his stay in Leipzig, including the Third Symphony (1847) and the String Octet (1848), show a development away from the nationally inspired style towards that of Mendelssohn, whose influence was to remain a characteristic feature of Gade's music until his death, as may clearly be seen in the String Quartet in D (1890).

On his return to Copenhagen, Gade took upon himself the reorganization of the Music Society, which had languished for some years; under his leadership it began to flourish again. Following the model of H.C. Lumbye's Tivoli orchestra, he established a permanent symphony orchestra and chorus with which he raised Copenhagen's concert life to international standard. With these forces Gade gave the Danish première of Beethoven's Ninth Symphony and the first performances of a number of his own major works; he also introduced the Baroque revival to Denmark, including the first performance there of Bach's *St Matthew Passion*.

Gade was married twice: in 1852 to Emma Sophie Hartmann (1831–55) and in 1857 to Mathilde Staeger (1833–1915). In 1851 he became the organist at the Garnison Church and in 1858 at the Holmens Church. In 1866 he was appointed director, with his father-in-law J.P.E. Hartmann, and H.S. Paulli, of the newly established Copenhagen Conservatory. When Gade died he was internationally recognized as a composer and conductor, had undertaken many concert trips to Germany, the Netherlands and Great Britain, and was acknowledged as a leading figure in Danish musical life.

While Gade's position in Danish musical life over a 40-year period is unchallenged, his role as a composer has been the subject of intense debate. What enthused both the Danish and the international public was the distinctive 'Nordic' colour of Gade's early music, which originated partly from the combination of his melodic style with elements of Danish or Nordic folk music. The assessment of Gade's work became for many people a question of whether he remained faithful to national folk colour or whether he 'betrayed' it in favour of the more international style he had refined in Leipzig under the influence of Mendelssohn. Such a view is hugely simplistic and Gade became weary of being measured against this 'Nordic' yardstick. 'One becomes tired of patriotism', Grieg reported him to have said.

Gade was, nevertheless, a conservative composer, and he did not strive for a new creative aesthetic in the 'New German' sense. It is also true that his music after the 1850s does not show overtly innovative stylistic features, rather a subtle internal intensification of expression. Grand rhetorical gestures were alien to him; he even used

Niels Gade

strong thematic contrasts with caution. Clarity of expression and firmness of form remained his hallmark, even in many works where Nordic colour is prominent. Unfortunately, the issue of national colour has largely deflected attention from Gade's imaginative instrumentation and fine sense of thematic development.

The backbone of Gade's orchestral works consists of the eight symphonies and eight overtures. The First Symphony in C minor builds thematically on Gade's own ballad-like melody for *Paa Sjølunds fagre sletter* ('On Sjoland's fair plains') and is the work – together with the *Ossian* overture and *Elverskud* ('The Elf-King's Daughter') where Nordic colour is most clearly apparent. Symphonies nos.2 (1843), 3 (1847) and 4 (1850) are more classically orientated. No.5 is distinguished by the inclusion of an obbligato piano part, which attracted considerable attention at the first performance. The last three are heavier, more serious and more personal in expression than the others, and without a major content of 'Nordic' elements. Of the overtures, only the *Ossian* overture, the *Michel Angelo* overture and – in a lighter genre – the overture to the singpspiel *Mariotta* are generally played today.

Most of Gade's chamber music was published during his lifetime. A notable exception, however, are the string quartets, among which only the Quartet in D major op.63 (1889) was printed. The Octet op.17, composed about the time of his return to Copenhagen from Leipzig, is one of Gade's most widely played works and represents his most Mendelssohn-influenced style. The Piano Trio op.42 (1863) and the Fantasy pieces for clarinet and piano op.43 (1864) are also among his most popular works. The Sextet op.44 (1864) – somewhat undeservedly – has never achieved the same popularity. Among the violin sonatas, the D minor Sonata op.21 (1850) merits particular mention. In his piano works Gade shows himself to be a master of the short Romantic character piece. Although he was an organist, Gade wrote few organ works. Among his relatively modest production of stage music, Gade wrote parts of two ballets *Napoli* (Act 2 only, 1842) and *Et folkesagn* ('A Folk Tale', Acts 1 and 3 only, 1854), and these are still frequently performed.

Gade's vocal works are dominated by the large cantatas for soloists, choir and orchestra. The first in the series, *Comala* (1846), was composed in Leipzig on a theme from Ossian, and is one of the works which Schumann most admired. The one which is most frequently played – almost in the nature of a Danish national cantata – is *Elverskud* (1854), composed shortly after his return to Copenhagen, with themes from the Danish folk ballads about Elverskud (the Elf-King's daughter) and Elvehøj (Elf Hill). *Balders drøm* ('Baldur's Dream') also takes its theme from Nordic legend, and is one of the few works in which a certain new German influence can be discerned. In the later cantatas the themes move from the Nordic region to more southern latitudes, and the Nordic colour – logically enough – gives way to Gade's more internationally orientated style. *Zion* (1874) and *Psyke* (1882) were composed for the Birmingham Festival. In addition to his cantatas, Gade composed a large number of choral songs (for children's choir, male choir and mixed choir) and solo songs, many of which are at the centre of the Danish treasury of song.

About half of Gade's output was unpublished during his lifetime, and the first appearance of many works in the collected edition of his works (1995–) should enable a fuller understanding of his music and its aesthetic basis.

WORKS

Edition: *Niels W. Gade: Works/Werke*, ed. Foundation for the Publication of the Works of Niels W. Gade (Copenhagen and Kassel, 1995–) [GW]

MSS in DK-Kk

STAGE

Agnete og Havmanden (incid music, H.C. Andersen), op.3, 1838–42
Faedrelandets muser [The Muses of our Fatherland] (ballet), 1840
Napoli (ballet, A. Bournonville), 1841–2 [Act 2 only]
Mariotta (Spl, C. Borgaard, after E. Scribe), 1848–9
Et folkesagn [A Folk Tale] (ballet, 3, Bournonville), 1853–4, arr. for pf 4 hands (Copenhagen, 1896) [Act 2 by J.P.E. Hartmann]

CHORAL

op.	
11	Six Songs, 4 male vv, 1845 (Leipzig, 1846)
12	Comala (after Ossian) (cant.), solo vv, chorus, orch, 1846 (Leipzig, 1885)
13	Five Songs, 4vv, 1846 (Leipzig, 1846)
16	Reiterleben (C. Schultes), 6 songs, 4 male vv, 1848 (Leipzig, 1848)
30	Elverskud [Elf-King's Daughter] (C.F. Molbech, C. Andersen and G. Siesbye), solo vv, chorus, orch, 1851–4 (Leipzig, 1865)
23	Frühlings-Fantasie (E. Lobedanz), solo vv, orch, pf, 1852 (Leipzig, 1853)
26	Five Songs, 4 male vv, 1853 (Leipzig, 1853)
—	Mindekantate over Fru Anna Nielsen [Cant. in Memory of Fru Anna Nielsen], 1856
—	Baldurs drøm [Baldur's Dream] (cant.), 1856–7 (Copenhagen, 1897)
33	Five Songs, 4 male vv, 1858 (Leipzig, 1858)
35	Frühlings-Botschaft (E. Geibel) (cant.), chorus, orch, 1858 (Leipzig, 1858)
—	Mindekantate over Overhofmarschal Chamberlain Levetzau [Cant. in Memory of Count Chamberlain Levetzau], 1859
—	Mindekantate over skuespiller Nielsen [Cant. in Memory of the Actor Nielsen], 1860
40	Die heilige Nacht (cant., after A. von Platen), A, chorus, orch, 1861 (Leipzig, 1862)

38	Five Songs, 4 male vv, 1862 (Leipzig, 1862)
46	Ved solnedgang [At Sunset] (cant., A. Munch), chorus, orch, 1865 (Leipzig, 1865)
50	Korsfarerne [The Crusader] (cant., C. Andersen), solo vv, chorus, orch, 1865–6 (Leipzig, 1866–)
54	Gefion (cant., Oehlenschläger), Bar, chorus, orch, 1869
48	Kalanus (cant., C. Andersen), solo vv, chorus, orch, 1869 (Leipzig, 1871)
—	Ved Danmarksstøtten [At the Danish Monument] (F. Paludan-Müller), 4vv, pf, 1869 (Copenhagen, 1869)
51	Aartidsbilleder [Pictures of the Seasons], solo vv, female chorus, pf 4 hands, 1871 (Leipzig, 1876)
—	Festmusik ved den nordiske industriudstillings aabningsfest 1872 [Festival Music for the Northern Industrial Exhibition, 1872] (Copenhagen, 1873)
52	Den bjergtagne [The Mountain Thrall] (cant., G. Hauch, after trad. Norse ballad), solo vv, male chorus, orch, 1873
49	Zion (cant., Gade and Carl Andersen), Bar, chorus, orch, 1874 (Leipzig, 1877)
—	Festmusik i anledning af Universitetets 400 aars jubelfest juni 1879 [Festival Music for the 400th Anniversary of the University of Copenhagen, 1879] (Copenhagen, 1879)
60	Psyke (cant., C. Andersen), solo vv, chorus, orch, 1881–2 (Leipzig, 1882)
—	Festmusik ved det nordiske kunstnermøde [Festival Music for the Northern Artists' Congress], 1883
64	Der Strom (cant., after J.W. von Goethe: *Mahomet*), solo vv, chorus, orch, pf, 1889 (Leipzig, 1893)

ORCHESTRAL

1	Efterklange af Ossian [Echoes of Ossian], ov., 1840 (Leipzig, 1854), GW I/9
5	Symphony no.1 'Paa Sjølunds fagre sletter', 1842 (Leipzig, 1844)
10	Symphony no.2, E, 1843 (Leipzig, 1844), GW I/2
7	I højlandene [In the Highlands], ov., 1844 (Leipzig, 1844), GW I/9
14	Overture no.3, C, 1846 (Leipzig, 1847), GW I/9
15	Symphony no.3, a, 1847 (Leipzig, 1848), GW I/3
20	Symphony no.4, B♭, 1849–50 (Leipzig, 1851), GW I/4
—	Nordische Sennfahrt [A Mountain Trip in the North], ov., 1850 (Copenhagen, 1887)
25	Symphony no.5, d, 1852 (Leipzig, 1853)
32	Symphony no.6, g, 1857 (Leipzig, 1858)
37	Hamlet, ov., 1861 (Leipzig, 1862)
39	Michel Angelo, ov., 1861 (Leipzig, 1861)
—	Sørgemarsch ved Kong Frederik d. 7. Død [Funeral March for Frederik VII], 1863
45	Symphony no.7, F, 1864 (Leipzig, 1865)

53	Novelletter, F, str orch, 1874 (Leipzig, 1876)
—	Capriccio, a, vn, orch, pf score (Berlin, 1878)
55	En sommerdag paa landet [A Summer's Day in the Country], 5 pieces, 1879 (Leipzig, 1880)
56	Violin Concerto, d, 1880 (Leipzig, 1881)
58	Novelletter, E, 1883, rev. 1886 (Leipzig, 1890)
61	Holbergiana, suite, 1884 (Leipzig, 1884)
—	Ulysses-marsch: forspil til Holberg's Ulysses von Ithaca, 1884

CHAMBER

—	Scherzo, c♯, pf qt, 1836, GW II/3
—	String Quartet, a, 1836 [1 movt], GW II/2
—	String Quintet, f, 2 vn, va, 2 vc, 1837 [1 movt], GW II/1
—	Piano Trio, B♭, 1839, inc., GW II/3
—	String Quartet, F, 1840, inc., GW II/2
6	Sonata no.1, A, vn, pf, 1842 (Leipzig, 1843)
8	String Quintet, e, 2 vn, 2 va, vc, 1845 (Leipzig, 1846–7), GW II/1
17	Octet, F, 4 vn, 2 va, 2 vc, 1848–9 (Leipzig, 1849), GW II/1
21	Sonata no.2, d, vn, pf, 1849 (Leipzig, 1850)
—	String Quartet, f, 1851, GW II/2
29	Novelletter, pf trio, 1853 (Cologne, 1854), GW II/3
42	Piano Trio, F, 1862–3 (Leipzig, 1864), GW II/3
44	String Sextet, E♭, 2 vn, 2 va, 2 vc, 1863–4 (Leipzig, 1865), GW II/1
43	Fantasiestücke, cl, pf, 1864 (Leipzig, 1865)
—	String Quartet, e, 1877, rev. 1889, GW II/2
59	Sonata no.3, B♭, vn, pf, 1885 (Leipzig, 1887)
62	Folkedanse, vn, pf, 1886 (Leipzig, 1887)
63	String Quartet, D, 1887–9 (Leipzig, 1890), GW II/2

KEYBOARD

28	Piano Sonata, e, 1840, rev. 1854 (Copenhagen, 1854)
2b	Foraarstoner [Spring Flowers], 3 pieces, pf, 1840–41 (Copenhagen, 1842)
4	Nordiske tonebilleder, pf 4 hands, 1842 (Copenhagen, 1843)
18	Tre karakterstykker, pf 4 hands, 1848 (Copenhagen, 1848)
19	Akvareller, pf, 1850 (Copenhagen, 1850)
22	Drei Tonstücke, org, 1851 (Leipzig, 1852/3)
—	Albumsblade, pf (Copenhagen, 1852)
27	Arabeske, pf, 1854 (Copenhagen, 1854)
31	Folkedanse, pf, 1855 (Copenhagen, 1855)
—	Fra skizzebogen, pf, 1857 (Copenhagen, 1886)
34	Idyller, pf, 1857 (Copenhagen, 1857)
36	Børnenes Jul [Children's Christmas], pf, 1859 (Copenhagen, 1859)
41	Fantasistykker, pf, 1861 (Copenhagen, 1861)
—	Festpraeludium, org, tpt, trbn, 1873 (Copenhagen, 1892)
2a	Rebus, 3 pieces, pf (Copenhagen, 1875)
57	Nye akvareller, pf, 1881 (Copenhagen, 1881)

SOLO SONGS

for 1v, pf, unless otherwise stated

—	Fem melodier til faedrelandshistoriske digte (A.P. Berggreen) (Copenhagen, 1840)
—	Seks danske sange, 1841 (Copenhagen, 1841)
9	Neun Lieder im Volkston, 2 S, pf, 1845 (Leipzig, 1845)
—	Tre digte (C. Winter), 1842 (Copenhagen, 1846)
21b	Tre digte (C. Hauch), 1849 (Copenhagen, 1850)
—	Tre digte (H.C. Andersen), 1850 (Copenhagen, 1851)
24	Bilder des Orients (after Stieglitz), 5 songs, 1852 (Copenhagen, 1853)
—	Tre danske sange, 1852 (Copenhagen, 1854)
—	Holger Danske's sange (B.S. Ingemann), 1863 (Copenhagen, 1863)

BO MARSCHNER/FINN EGELAND HANSEN

Gadenstätter, Clemens (*b* Zell am See, 26 July 1966). Austrian composer and conductor. He studied composition with Erich Urbanner and the flute with Wolfgang Schulz in Vienna (1984–92), where he also founded the Ensemble Neue Musik (1990) and performed as a member of Klangforum Wien (1990–92). He subsequently undertook postgraduate studies with Lachenmann in Stuttgart (1992–5). He won the Forum junger Komponisten competition organized by WDR in 1992, and has lectured at the Darmstadt Ferienkurse für Neue Musik.

Gadenstätter's music can be considered a further development of Lachenmann's 'instrumental theatre': in accordance with Gadenstätter's notion of 'analytical composition', his scores are characterized by a constant variety of finely differentiated sounds, which, though rich in contrast, are nonetheless related below the surface. He has enjoyed fruitful collaboration with artists working in other media, among them the video artist Joseph Santarromana (from 1992), the choreographer Rose Breuss (from 1994) and the poet Lisa Spalt.

WOLFGANG GRATZER

Gadifer d'Avion. *See* GAIDIFER D'AVION.

Gadsby, Henry (Robert) (*b* Hackney, London, 15 Dec 1842; *d* Putney, London, 11 Nov 1907). English organist and composer. While a boy chorister in St Paul's Cathedral (1849–58) he was taught harmony by the vicar-choral, William Bayley (1810–58). He was organist of St Peter's, Brockley, for some time up to 1884, when he succeeded Hullah as professor of harmony at Queen's College, London. He was also one of the original professors at the Guildhall School of Music, a Fellow of the Royal College of Organists and a member of the Philharmonic Society. His works, many of them published, include cantatas (*Alice Brand*, 1870; *The Lord of the Isles*, 1879; *Columbus*, 1881; *The Cyclops*, 1890), dramatic music (*Alcestis*, 1876; *Andromache*, 1893; *Aminta*, 1897), an organ concerto, symphonies in D (*Festal Symphony*, 1888), A and C, overtures, a string quartet (1875), anthems and songs. He also wrote some sight-singing exercises, and his treatise on harmony (1883) was probably the first published in England that departed from the system of teaching from figured bass in favour of giving melodies to be harmonized. Gadsby was one of a number of eminent musicians who sang in the choir for the open-air service at St Paul's for Queen Victoria's diamond jubilee in 1897.

GEORGE GROVE/JOHN WARRACK

Gadski, Johanna (*b* Anklam, Prussia, 15 June 1872; *d* Berlin, 22 Feb 1932). German soprano. She studied in Stettin, and made an early début (1889) at the Kroll Opera, Berlin, singing there and elsewhere in Germany for the next five years. In 1895 she began a successful three-year association with the Damrosch Opera Company in the USA, and from 1899 to 1901 was active at Covent Garden and at Bayreuth, where she sang Eva (1899). Between 1900 and 1917, however, her main centre was the Metropolitan, with whose company (after a previous appearance as Elisabeth in *Tannhäuser* on tour in Philadelphia) she made her house début on 6 January 1900 as Senta; she became one of its most valuable Brünnhildes and Isoldes, excelling also in many Verdi roles such as Aida, Leonora (*Il trovatore*) and Amelia. After the USA's declaration of war on Germany, her reputation suffered during the war hysteria of that time. From 1929 until her death (in a car accident) she was active and successful in a Wagnerian touring company in the USA organized at first by Sol Hurok and then by herself. She sang even the heaviest Wagner roles with unfailing beauty of voice and purity of style, and showed the same qualities in her Italian parts. Her powers are well documented in the large number of records which she made between 1903 and 1917, notably in her Wagner excerpts and in scenes from *Aida* and *Il trovatore* with Caruso, Homer and Amato.

DESMOND SHAWE-TAYLOR

Gadulka. Fiddle of Bulgaria; also known as *ganilka*, *kopanka*, *gjola*, *tsigulka*, *kemene* in western Bulgaria, and sometimes, erroneously, *gusla*. It resembles the Greek *lira* and the Yugoslav *lirica*. Its oval or pearshaped soundbox

is carved from one piece of wood, usually mulberry, manna-ash (*Fraxinus ornus*) or sycamore. Its short, broad neck ends in a circular, triangular or clover-leaf shaped flat peg-disc or head. The soundboard, made of spruce, is glued to the soundbox and has two round or oval soundholes called *ochi* ('eyes'). The strings are generally made of sheep- or cat-gut, although some late 20th-century instruments have metal strings; they are attached to a bone tailpiece and, at the upper end, are wound directly round wooden pegs. They pass over a thin wooden bridge and soundpost, which emerges through one of the soundholes.

The traditional *gadulka* has three strings; in Thrace there are instruments with one or more metal sympathetic strings. The Thracian tuning is the most popular: *a′–e′–a′*. Other tunings are the Dobrudzhan tuning (*a′–a–e′*) and the Gabrovo or Balkan tuning (*a′–e′–d′*). The range on the Thracian tuning is the widest: *a* to *e″*, extended to *a″* with harmonics. The strings are played with a bow made of cornel, dogwood or willow and strung with horsehair, rubbed with rosin before playing. The first (highest) string is played by sideways pressure of the fingernail, the other strings with pressure from the fingertips. The *gadulka* is held vertically, with the lower end tucked in the player's belt when standing, or held on his hip when seated.

The Thracian *gadulka* is the largest instrument, and has the fullest tone-quality. Dobrudzhan instruments such as the *kopanka* are smaller. The *kemene* of western Bulgaria has a shallow soundbox and a correspondingly thinner sound; it is always played with a drone note. Regional variants in pre-socialist Bulgaria included the shallow-bodied Shop *kemene* and the flat-bodied *kasnak* found in Trakiya and the Shop area.

The *gadulka* is used as a solo instrument to accompany songs and dances, in different rituals and in small instrumental groups. The Dobrudzhan *gadulka*, with the accordion and a *gaida* (bagpipe) or *kaval* (flute) forms a typical Dobrudzhan *troika* (trio).

Gaelle, Meingosus [Johannes] (*b* Buch, nr Tettnang, 16 June 1752; *d* Maria Plain, nr Salzburg, 4 Feb 1816). German composer, theologian and physicist. He attended the grammar school at Tettnang and the Hofen priory school attached to the Benedictine abbey of Weingarten (now Schloss Friedrichshafen, Lake Constance). He entered the monastery of Weingarten in 1769 and took his vows in 1771. From autumn 1771 he studied at the Benedictine University of Salzburg, taking doctorates in philosophy (1773) and theology (1777) and becoming friendly with Michael Haydn. He returned to Weingarten and was ordained (20 September 1777); at the monastery he taught practical philosophy and mathematics, was in charge of the novices and became deputy librarian, choral director and even chief cook. After the dissolution of the monastery (1802) he remained at Weingarten for two years, then became professor of dogmatics and ecclesiastical history at the University of Salzburg. Numerous copies of works by Haydn, Mozart and Beethoven in the St Peter chapter library indicate that Gaelle performed them for his Salzburg brothers. After the dissolution of the university he was appointed Father Superior of Maria Plain (1811), where he devoted himself particularly to experiments on the theory of electricity and published his *Beyträge zur Erweiterung und Vervollkommnung der Elektricitätslehre in theoretischer und practiscsher Hinsicht* (Salzburg, 1813/*R*).

Gaelle's compositions were intended for use in church services and to promote conviviality within the monastery. Of special importance is the setting of Sebastian Sailer's *Schöpfung* (*Adam und Evas Erschaffung*), which Gaelle designated a comic opera. Siegele has noted the effective use of simple melodies and rich harmonies in the arias, melodramatic style in the recitatives and intimate instrumentation. Beneath the comic aspect, both Sailer's text and Gaelle's music have more complex features. Gaelle's compositional style (in the opera chamber works) is characterized by the use of single themes, fairly long series of variations, modulations to remote keys and small musical units.

WORKS

MSS mainly in A-Ssp, CH-E, D-Tl; incomplete catalogue in Lindner

Sacred: Ger. Mass, 3vv, org; 4 cants., 1808–9, 1 pubd; 30 Vesperae falsobordonicae, 4vv, org, 1789, collab. M. Steyr; Huc venite, piae mentes, chorus an Festtagen, S, A, SATB, insts, ed. E. Seifriz (Altötting, *c*1996); Ave regina, T, B, org, 1790; Mag; Regina coeli, 4vv, org, 1787; Salve regina, S, insts, ed. E. EBERHARD STIEFEL

Gaetani, Jan de. *See* DEGAETANI, JAN.

Gaetano [Majer, Kajetan] (*b* Warsaw, 1st half of the 18th century; *d* Warsaw, *c*1792). Polish composer and conductor, probably of German origin. He came to Warsaw from Dresden in 1758 and presumably had already worked at the court of King August III of Saxony (then King of Poland). Known as an accomplished violinist, in 1764 he created an orchestra for the coronation of Stanisław August Poniatowski. From 1765 he worked as a violinist at the newly established National Theatre, holding the post of orchestral director from 1776 (or 1779) until his death. At the same time he was responsible for concerts at the Royal Castle, where he employed the

musicians and ran various kinds of ensembles. In 1772 he organized 17 concerts, with a similar number the following year, billed as 'therapeutic concerts' for the king who was then ill. He brought to the theatre various orchestras maintained by Polish princes such as W. Potocki (with which orchestra Gaetano performed on the harpsichord in 1777), A. Tyzenhaus (1780–81) and J.M. Lubomirski (1783). In 1786 he prepared the premières of two Italian operas, which were performed by a group of aristocratic amateurs (known as the Théâtre de Société) in the private theatre of a castle. He wrote for the needs of the court, including many dances such as polonaises, mazurkas and minuets. In 1780 he was given the formal title of *maître de chapelle*, and until the second half of 1782 he directed the combined theatre and court orchestra, returning to these duties from September 1789. From 1790 he worked with Bogusławski, after his return from Vilnius. Throughout his life he gave music lessons.

As a composer Gaetano made his début with the opera *Nie każdy śpi ten, co chrapi* ('Not All Sleep who Snore'), which was well received, also outside Warsaw. In 1788 the king's private theatre in Warsaw's Łazienki Park was inaugurated with a performance of Gaetano's intermezzo *Les amours de Bastien et Bastienne*. In the opera *Żółta szlafmyca* ('The Yellow Nightcap') he introduced a chorus for the first time on the stage of a Polish theatre; the chorus sang memorable motifs drawn from Polish folk music. As well as operas and ballets, he wrote programmatic music for dramatic works and musical intermezzos. Gaetano was for many years the most important musician at court and one of the most talented composers of Polish opera in the second half of the 18th century.

WORKS

all performed in Warsaw

Nie każdy śpi ten, co chrapi (Nie zawsze śpi ten, co chrapi) [Not All Sleep who Snore] (vaudeville, L. Pierożyński), 1779, lib (Kraków, 1790)

Żółta szlafmyca, albo Kolęda na Nowy Rok [The Yellow Nightcap, or A Carol for the New Year] (op, 3, F. Zabłocki, after P. Barré and A. de Piis: *Les étrennes de Mercure*), 1 May 1783, lib (Warsaw, 1783), inc. MS (private collection), extracts, pf, *PL-Wn*; frags. in J. Prosnak, *Kultura muzyczna Warszawy XVIII wieku* [Music in Warsaw in the 18th Century] (Kraków, 1955)

Lucassin et Nicolette (La fête d'amour, ou Lucas et Colinette) (op, M.-J.-B. and C.-S. Favart), 7 Feb 1786

Les amours de Cherubin (op), 10 Feb 1786

Żołnierz, z przypadku czarnoksiężnik, czyli Uczta diabelska [The Soldier-Accidental Conjuror, or The Devilish Banquet] (vaudeville, 2, Pierożyński, after L. Anseaume), 11 March 1787, polonaise, *Wn*

Diabla wrzawa, czyli Dwoista przemiana [The Devil's Uproar, or Double Transformation] (op, 3, J. Balldouin, after M.-J. Sedaine), 18 Nov 1787 [incl. Furia, orch int]

Scytowie przez Minerwę zgromieni [The Scythians Crushed by Minerva] (ballet) choreog. F. Le Doux, 2 Aug 1787

Zabaira turecka [Divertissement turc] (ballet), choreog. D. Curz, 1787

Les amours de Bastien et Bastienne (int, M.-J.-B. Favart), 6 Sept 1788

Music in: Natura mistrzynią [Nature is the Mistress] (op, 1, Pierożyński), 1786

BARBARA CHMARA-ŻACZKIEWICZ

Gaffarello. *See* CAFFARELLI.

Gaffi [Caffi], **Tommaso Bernardo** (*b* Rome, 14 Dec 1667; *d* Rome, 11 Feb 1744). Italian composer and organist. After studying with Pasquini he held positions as organist in various Roman churches: between 1688 and 1690 he was at Santo Spirito in Sassia, in 1692 at S Maria in Vallicella and in 1700 at the Chiesa del Gesù. In 1705 he is also mentioned as a singer at S Marcello. His reputation as an organist was finally confirmed when he was appointed to succeed Pasquini at S Maria Maggiore and, when the latter died in 1710, at S Maria in Aracoeli; from 1739 until his death he held this position jointly with Costantino Pieri. He was also a fine harpsichordist and owned many valuable harpsichords at the time of his death.

Gaffi wrote at least seven oratorios, which were fairly popular and were performed in Florence, Modena and Vienna, as well as in Rome. The 12 chamber cantatas op.1 are among the very few such works to be published. They are similar to Francesco Gasparini's published cantatas in containing a number of arias with obbligato instruments, common in dramatic works but exceptional in cantatas. Both composers allowed the obbligato parts to be played on the harpsichord – an unprecedented use of it in any kind of chamber music. The short treatise *Regole per sonare con la parte* (MS, 1720, *I-Rli*) deals mostly with basic theory. It is interesting mainly for its unusually detailed classification of cadences according to the movement of the bass.

WORKS

ORATORIOS

L'Abigaille (F. Bambini), Modena, 1689, lost; Florence, 1693, pubd lib, Brompton Oratory, London

La Micole, 4vv, insts, Modena, 1689, *I-MOe*

THARALD BORGIR

Gaffurius [Gafurius], **Franchinus** [Lanfranchinus] [Gafori, Franchino] (*b* Lodi, 14 Jan 1451; *d* Milan, 25 June 1522). Italian theorist, composer and choirmaster. At home in both speculative and practical music, he was the first theorist to have a substantial number of his writings published, and his influence can be traced for more than a century, both in Italy and abroad.

1. Life. 2. Writings. 3. Compositions.

1. LIFE. Much of our knowledge stems from the contemporary biography by Pantaleone Malegolo, printed in the

De harmonia: Gaffurius was born in Lodi to the soldier Bettino from Almenno in the territory of Bergamo and to Caterina Fissiraga of Lodi. He began theological studies early, at the Benedictine monastery of S Pietro in Lodi Vecchio (which he left after September 1473) and he was ordained priest in late 1473 or 1474. He studied music with Johannes Bonadies (or Godendach), probably in Lodi, where he sang in the cathedral on Ascension Day, 18 May 1474. Later that year, he went to Mantua with his father and spent two more years in diligent research in music. He then moved to Verona, where he taught publicly and wrote his *Musice institutionis collocutiones* and *Flos musice* (both lost) and continued his research.

Gaffurnius was called to Genoa by Doge Prospero Adorno in 1477, and after having taught there for a year followed Adorno into exile in Naples (November 1478); there he devoted himself to speculative music, carrying on discussions with Johannes Tinctoris, Guglielmo Guarneri, Bernhard Ycart and others (according to Giovanthomaso Cimello, he directed music at SS Annunziata). His *Theoricum opus* was published in Naples on 8 October 1480. Plague, and the Turkish invasion of Puglia, caused him to return to Lodi at the invitation of the bishop, Carlo Pallavicino, in whose castle at Monticelli in the territory of Cremona he spent three years (1480–83) teaching and preparing his *Practica musice*. He accepted a post at Bergamo, as choirmaster of S Maria Maggiore (from 19 May 1483), but stayed only briefly because of the War of Ferrara. Invited to Milan, he became choirmaster at the cathedral on 22 January 1484, where he taught and composed, and published revisions of his *Theorica musicae* (1492) and *Practica musice* (1496).

Several later events in Gaffurius's life are not mentioned by Malegolo: in 1490 he went to Mantua to persuade the architect Luca Paperio to work on Milan Cathedral. By July 1494 he was named rector of S Marcellino, Milan. By 1497 Gaffurius was named professor of music at a university founded by Ludovico Sforza in Milan; he attempted to augment his rather low salary through various requests to the duke for benefices. When the French captured Milan in 1500, Gaffurius remained at his post, now styling himself 'Regius Musicus'. In 1504 he visited thermal baths, and in 1506 he spent three months in Varese organizing the chapel in S Maria al Monte. In 1509 he published an oration by Jacopo Antiquario welcoming Louis XII after his victory over Venice. In 1518 he gave a number of his books to the Incoronata, Lodi.

Near the end of Gaffurius's life, his scholarly exchanges with GIOVANNI SPATARO, dating from 1493, broke out into a bitter pamphlet war from which neither emerged with much honour. The last salvo was fired by Gaffurius's friend Bartolomeo Filippineo, bolstered with the poetic satires of a group of the theorist's admirers: *Bartho. Philippinei Gaphuriani nominis assertoris in Io. Vaginarium Bononien: Apologia* (Turin, August 1521). In these exchanges Spataro is sarcastically called 'Vaginarius' (sheath-maker). Gaffurius died of a fever on 25 June 1522; the medical certificate overestimated his age by ten years.

It is highly unlikely that the 'Portrait of a Musician' in the Pinacoteca Ambrosiana, sometimes ascribed to Leonardo da Vinci, is of Gaffurius, though the two were surely acquainted. The portrait is that of a young man, not in clerical robe; Gaffurius, a priest, did not come to Milan until he was 33.

2. WRITINGS. Gaffurius began to transcribe theoretical treatises while a student; manuscripts and books he owned can be identified by his inscriptions, with place and date of copying or purchase. On 16 September 1473 in the monastery in Lodi he finished copying Marchetto of Padua's *Lucidarium*. The manuscript (now in *I-TRE*) also contains the *Pomerium* and Franco of Cologne's *Ars cantus mensurabilis*. His *Extractus parvus musicae* of *c*1474 consists largely of extracts from Marchetto and Ugolino of Orvieto, but also shows that he had read Johannes de Muris, the *Ars nova* attributed to Philippe de Vitry, Philippus de Caserta's *Tractatus de diversis figuris*, several anonymous treatises and an unknown treatise by Dufay. At the same time, he was compiling a *Tractatus brevis cantus plani*, and was probably undertaking practical instruction in composition with his teacher Johannes Bonadies. Thus he seems to have decided early on the path his career would take. The inscription on the frontispiece of the *Angelicum ac divinum opus musice* records the way he wished to be remembered: 'Franchinus Gafurius of Lodi meticulously composed three volumes on music: theory, practice and the harmony of musical instruments'. He is shown as a professor, pronouncing 'Harmonia est discordia concors'.

The habit of gathering extracts and quotations from a multiplicity of sources and weaving them together with commentaries (learnt from Boethius) continued to characterize Gaffurius's writings up to the time of the printed version of the *Practica musice* (1496). Thus his *Theoricum opus* of 1480, a pioneering effort to supplement Boethius by gathering every witness to Greek and Latin theory he could find (without knowing Greek), suffers from contradictions and duplications; nevertheless it, or rather the improved version, the *Theorica* of 1492, had a far-reaching influence. It has been estimated (by Kreyszig; see *Theorica musicae*) that some 70% of the 1480 book was based on Boethius, whose *De musica* had not yet appeared in print. When Gaffurius moved to Milan in 1484 he enjoyed the company of leading Milanese humanists, and by the 1490s it had become clear to him that Greek sources still existed and that he would need to have them translated; the fruits of this effort, however, are not particularly evident in his last treatise, *De harmonia*, completed in 1500, but not published until 1518 (a number of illuminated manuscript versions testify to his search for a patron). Here he thoroughly investigated Greek genera and tunings (he was the first to give a complete exposition of Ptolemy's syntonic diatonic, which would gain importance in the next century); the last chapters are devoted to the harmonies of the universe and the harmonious relations of the human mind and body (the 'musical instruments' of his title). His theoretical works demonstrate throughout his urge to combine theory with practice: Greek harmonic science, for example, is presented side by side with Guidonian hexachords. He did not get everything right: the confusion of the Greek octave species and Western modality was not clarified until well into the 16th century.

The manuscript sources of the treatises that eventually formed the four books of the *Practica musice* (that for book 3, on counterpoint, does not survive) reveal that Gaffurius was heavily indebted to Tinctoris: language and examples are often almost verbatim transcriptions. By the

1490s, however, he had found his own voice, and not only the subject matter but the more elegant Latin diction show how he had matured. There is now a discussion of Ambrosian chant, as befitted his new post in the diocese of Milan. Book 2, on notation, includes sections on poetic feet as related to musical rhythm and a survey of notation, beginning with Greek rhythmic symbols. The book on counterpoint is quite brief, laying stress on rules; unlike Tinctoris's treatise it addresses the composer more than the singer. Book 4, on proportions, seems intended to outdo Tinctoris, with proportions as abstruse as 19:4 illustrated in musical examples. In his *Epistula secunda* Gaffurius boasts that Tinctoris gave him his own treatise to correct.

Realizing that his Latin was difficult for many, including nuns, Gaffurius undertook an Italian compendium in the *Angelicum* of 1508. No concession is made in the topics, however, since the first treatise is a complete treatment of mathematical proportions as applied to intervals, tetrachords and genera, and there is only one musical example in the whole work.

3. Compositions. It seems unlikely that Gaffurius devoted much time to composition before he became choirmaster at Milan, although he reportedly composed in Genoa. His only surviving secular works (in *I-PAc* 1158) must have been written in the 1470s, and (to judge from *Illustrissimo marchexe*) they are not even competent. Clearly, he gained experience in the following decade, perhaps under the influence of the skilled composer Tinctoris. Once established in Milan Cathedral, where he reformed the choir, Gaffurius was responsible for enlarging the polyphonic repertory. Four large choirbooks remain from his tenure (*I-Md* Libroni 1–4), partly in his hand (Lib.1 is signed and dated 23 June 1490). Some of the works probably stem from the Sforza court under Galeazzo Maria, for example the so-called *motetti missales* and others in which a particular 'Milanese style' has been detected, especially motets of Loyset Compère and Gaspar van Weerbeke. Gaffurius too absorbed this style. Although we have no record of a visit to Milan in the 1470s (but in July 1474 the ducal court passed through Lodi), Gaffurius mentioned in the *Angelicum* that many years earlier he had spoken with Josquin and Weerbeke, and in his *Tractatus practicabilium proportionum* of *c*1482 he refered to the latter's 'motetti ducales'.

A substantial number of works in the choirbooks are by Gaffurius: at least 18 masses, 11 Magnificat settings, and 51 motets and hymns; for the identifications we depend partially on old inventories and imperfectly preserved indexes to the manuscripts, and all the works in Lib.4 are fragmentary because of fire damage. His masses, while perfectly serviceable, have a sameness about them; imitation appears sporadically, and duos are used infrequently. While 11 follow the standard Roman Ordinary, six lack the Kyrie and Agnus Dei, in accordance with the Ambrosian rite (where the Kyrie is only an appendage to the Gloria), and one has a Kyrie but no Agnus. Too little is known about the use of these choirbooks to explain the seeming anomaly; even the *motetti missales* include substitute motets for Roman items. Four of Gaffurius's masses are labelled 'brevis', and some are very short indeed (the Gloria of the *Missa primi toni brevis* has only 48 breves, the Credo 69); text-setting is mostly syllabic and omission of phrases is common not only in these but in all his masses. Two masses are troped: Kyrie, Sanctus and Agnus of *Missa 'Omnipotens genitor'* and Sanctus of *Missa 'Montana'*. Only one mass is certainly based on a cantus prius factus, the *Missa 'De tous biens pleine'*, but even here the use of the model seems largely confined to a head-motif treated with considerable freedom, as in many of Gaffurius's other masses (and the *motetti missales* by Compère and Weerbeke). Despite his keen interest in proportions, only the untitled mass in Lib.2 makes extended use of them. If the *motetti missales* had their origin in the ducal court in the 1470s, they were still being sung in the cathedral in the following decades; Gaffurius's *Missa quarti toni Sancte Caterine* is partly in this tradition, attaching motets in place of the introit and 'Deo gratias' before and after the five sections of the Ordinary, and the cycle of motets beginning with *Salve mater salvatoris* is wholly within it (no designations appear over the pieces, but the index records 'cum tota missa'); three of his masses in Lib.4 also have motets attached.

Gaffurius is at his best in the motets. Most of these are found in the earliest of the codices, Lib.1. These short pieces have much more variety in texture than the masses, mixing block chords, brief duos (rarely paired), lilting triple-metre passages and quasi-chordal writing much in the same way that the texts are put together: many of these are addressed to the Virgin and comprise fragments from sequences and hymns and verses from the Song of Songs. Imitation is used sparingly. The text is delivered expeditiously; phrases often begin with semibreves, especially in metrical texts. Settings of liturgical texts, even Marian antiphons, are rare.

Of the 11 Magnificat settings, ten set even verses using the wording of the Roman rite; only one (no.6 in the edition) sets odd verses in the slightly different wording of the Ambrosian rite.

Gage, Irwin (*b* Cleveland, 4 Sept 1939). American pianist. He studied at the University of Michigan with Eugene Bossart, at Yale University, and later with Erik Werba, Hilde Langer-Rühl, Helene Berg, Kurt Schmidek and Klaus Vokurka in Vienna, where he settled. A passionate interest in poetry led him to work primarily as an accompanist to singers, among them Christa Ludwig, Arleen Augér, Brigitte Fassbaender, Gundula Janowitz, Jessye Norman, Lucia Popp, Elly Ameling, Dietrich Fischer-Dieskau, Hermann Prey, Peter Schreier and Tom Krause. He has performed at numerous European music festivals, including Edinburgh, Spoleto, Montreux and Salzburg, has appeared in concerts throughout Europe and the Americas and has contributed to many distinguished recordings, notably a large collection of Schubert lieder with Janowitz. In 1970 Gage planned and accompanied an entire series of lieder recitals at the Vienna Konzerthaus. He teaches at the Zürich Conservatory and regularly gives masterclasses at other institutions. Gage's subtle understanding of song texts is reflected in his accompaniments. A specialist in the standard lieder repertory, he has also done research in more obscure areas of the German and Austrian song literature.

RICHARD LESUEUR

Gagliano. Italian family of violin makers. They worked in Naples from about 1700 to the middle of the 19th century. They were an industrious family and produced a large number of violins, many cellos and a few violas. With the exception of Alessandro Gagliano, they usually worked on the Stradivari model. All of the 18th-century Gaglianos could produce a masterpiece if circumstances required it, but as the 19th century approached the demand seems to have been increasingly for hastily made, inexpensive instruments. Except for Alessandro, they all used a similar varnish, harder than that of more classical makers; the most attractive has a distinctive golden orange colour, but there are many that appear stained, with almost a grey-green tinge to the orange. Tonally they all have what is known as the 'Italian' quality, but tend towards brightness, occasionally almost harshness. They are very good all-round instruments, and well liked by all types of players. No work has been published giving the correct dates of each member of the family, and the dates given by most authorities do not always tally with those on the original labels.

Alessandro Gagliano (*fl c*1700–*c*1735) was the first maker in the Gagliano family and the first known Neapolitan maker: it is not known where he learnt his craft. His work differs in almost all respects from that of his descendants, but most of all in the varnish he used. This was of a soft, oily nature, similar to the very best, glowing and transparent and of the deepest red colour. He was only an average workman, but his instruments have great character and are in no sense copies of the work of his great predecessors or contemporaries. He made violins of at least three different sizes, one of them small and another rather too large, with a long string length. The soundholes have an exaggerated swing which can nevertheless be quite charming, but the scrolls are often pinched in design and crudely carved, sometimes with a little extra ornament to the pegbox. His cellos are especially good, but rare.

Nicola Gagliano (i) (*fl c*1740–*c*1780) was a son of Alessandro Gagliano. The majority of his instruments were made between 1750 and 1770, though he is thought to have had a longer working life. They are all much influenced by Stradivari's work, and, with those of his brother Gennaro, are the most sought after of the Gaglianos. The quality of his work is consistently high, but a few of his violins are rather high-built and broad in measurement. Some of the violins with his original label show the collaboration of his son Giuseppe.

Gennaro [Januarius] Gagliano (*fl c*1740–*c*1780) was also a son of Alessandro Gagliano. He is often considered the best maker of his family. Gennaro was a more sensitive craftsman, and his overall concept of violin making was not far behind that of the great Cremonese makers. Although he was most influenced by Stradivari, he often made Amati copies, with strong-grained pine in the front, brown varnish and facsimile Amati label. Both Gennaro and Nicola (i) made very good cellos on the best Stradivari model, but they also introduced the very narrow design used by most later Neapolitans (see illustration).

Ferdinando Gagliano (*fl c*1770–*c*1795) was a son of Nicola Gagliano (i), but is more likely to have been a pupil of his uncle, Gennaro Gagliano. His instruments vary in the quality of their finish, but their outlines have the pleasing flow of typical Gennaro models, with slightly stiffer, more open soundholes. The varnish can be very

Cello by Nicola Gagliano (i), Naples, 1762 (private collection)

good looking, but is less striking than that on his father's or uncle's instruments.

Ferdinando Gagliano's three brothers collaborated in their work to a certain extent. Giuseppe [Joseph] Gagliano (*fl* *c*1770–*c*1800) was certainly a pupil of his father and his early work suggests he was an excellent maker. His work declined over the years, however, and instruments made in partnership with his brother Antonio are not as good as those he made alone. Antonio Gagliano (i) (*fl* *c*1780–*c*1800) was inferior to his brother Giuseppe in his workmanship. Instruments bearing his signature inside often have labels showing them to have been made in partnership with Giuseppe.

Giovanni [Joannes] Gagliano (*fl* *c*1785–after 1815) began working with Giuseppe and Antonio, but by about 1800 was working by himself. His work, while reflecting that of his uncle Gennaro and his brother Ferdinando, has strong individual features in the slant of the soundholes and the deep cut of the pegbox fluting. He had three sons: Nicola Gagliano (ii) (*fl* *c*1800–*c*1825) produced work in the Gagliano tradition, though some workmanship is completely undistinguished and his instruments are now rarely found; Raffaele (*d* 1857) and Antonio Gagliano (ii) (*d* 1860) were responsible for many violins and cellos, usually with their backs left unpurfled, but although the varnish technique remained unchanged the workmanship declined in quality.

CHARLES BEARE

Gagliano, Carlo (*fl* late 18th century). Italian violin maker who worked in Belluno. There is no evidence to connect him with the GAGLIANO family who worked in Naples.

Gagliano, Giovanni Battista [Giovanbattista] **da** (*b* Florence, 20 Dec 1594; *d* Florence, 8 Jan 1651). Italian composer, musician and teacher, younger brother of MARCO DA GAGLIANO. He seems to have spent his entire life in Florence as a performing musician and composer. In 1613 he became instructor in plainsong to the young clerics at S Lorenzo, a post previously held by his brother. On 6 September 1621 he is included for the first time in the salary accounts of Florence Cathedral, as a singer ('musico'), and on 1 October 1624 he was given the same title at the Medici court, where he was also active as a theorbo player. On 9 June 1643 he succeeded his brother as *maestro di cappella* of both the court and the cathedral (having largely carried out the duties for 19 years because of his brother's ill-health), but the actual title was withheld from him because he was not a priest. He was also *maestro di cappella* of the Compagnia dell'Arcangelo Raffaello, a lay religious confraternity in Florence, from 1619 to 1625. In 1614 he, along with the dilettante composers Giovanni del Turco and Francesco Arrighetti, invested in the Florentine printer Zanobi Pignoni, but the arrangements lasted only one year, during which time the press issued music by Del Turco, Caccini, Antonio Brunelli, Domenico Visconti, Raffaello Rontani and Marco da Gagliano.

Documents (mostly in *I-Fas*) show that Gagliano was active in supplying music to various churches, religious confraternities and academies in Florence for special feasts and local observances; his four published collections include some of it. He wrote music, all of it lost, for at least four oratorios. One of these, *Il martirio di S Agata*, composed with Francesca Caccini, received seven performances in Florence in January and February 1622 and was repeated the following June and on a number of subsequent occasions up to at least Carnival 1642. Gagliano's *Varie musiche* (1623), which, unusually among such volumes, contains a fair amount of sacred music, includes a number of interesting madrigalian and strophic pieces; among the latter is *Ah ladra d'amore*, in which each verse is in a clear ternary form adumbrating the da capo aria.

EDMOND STRAINCHAMPS

Gagliano, Marco da (*b* Florence, 1 May 1582; *d* Florence, 25 Feb 1643). Italian composer, elder brother of GIOVANNI BATTISTA DA GAGLIANO. As *maestro di cappella* for nearly 35 years of the Medici court and of Florence Cathedral (S Maria del Fiore), he was one of the most important Italian musicians of the period. His *Dafne* (1608) is a milestone in the early history of opera, and his secular madrigals and monodies and many sacred works in various genres, though now little known, were much acclaimed in the first half of the 17th century.

1. LIFE. Gagliano was born to Zanobi and Camilla da Gagliano, who lived in Florence, and he may never have seen the village of Gagliano in the Mugello valley, north-east of Florence, from which the family apparently took its name long before his birth. The assertion in some modern histories that he had no surname and references to him as Marco Zanobi are erroneous. He studied music with Luca Bati, and in 1602 he became Bati's assistant at S Lorenzo, Florence. Though his salary of 2 scudi a month was indeed small, he remained in the position for nearly six years. His duties were primarily to instruct the clerics at S Lorenzo in singing, but from 1605 he was given the additional responsibility of preparing the music for Holy Week each year. His general education, and perhaps to some extent his training in music also, was entrusted to the Compagnia dell'Arcangelo Raffaello (sometimes referred to as the Compagnia della Natività or the Compagnia della Scala), in which he was enrolled at the age of six and a half. This lay religious confraternity, one of the oldest and most important in Florence, had a mixture of boys from both the middle and upper classes. Music played an important part in the company's activities, and its records show that from early youth Gagliano was much involved in both its public and private musical performances. In December 1607 he was elected *maestro di cappella* of the company at an annual salary of 40 scudi, but for political reasons his election was set aside within nine days in favour of another, and the office was not restored to him until July 1609. Many of the Florentines most important to Gagliano's subsequent career (among whom Cosimo de' Medici, Ottavio Rinuccini, Jacopo Peri, Giovanni del Turco and Giovanni de' Bardi stand out) were his brothers and associates in the Compagnia dell'Arcangelo Raffaello. He also received theological training and took holy orders.

A number of letters written by Gagliano to the Gonzagas of Mantua, mostly to Prince (later Cardinal) Ferdinando (29 of them are printed in Vogel, 550ff and 25 are in Strainchamps, 'The Unknown Letters'), show that he was in contact with the Gonzagas from at least July 1607 (fig.1). He supplied them with music he had composed to texts either written or chosen by them, as well as music by other Florentine composers that he considered worthy of their attention. Late in 1607 he went to Mantua, where his setting of Ottavio Rinuccini's newly reworked pastoral drama *Dafne* (the original version had been set by Peri and Corsi) was presented during Carnival 1608. The

1. Autograph letter (20 August 1607) from Marco da Gagliano to Prince Ferdinando Gonzaga (I-MAa Archivio Gonzago, Busta 6, f.13r)

opera was a great success, and Gagliano remained in Mantua until early June to help with preparations for the series of theatrical-musical works that the court produced in celebration of the marriage of the hereditary prince, Francesco Gonzaga, to Margherita of Savoy. He wrote the music for a ballo, *Il sacrificio d'Ifigenia* (to words by Alessandro Striggio (ii)), and the third *intermedio* (text by Chiabrera) for Guarini's play *L'Idropica*. In mid-June he returned to Florence and resumed his modest duties. On 17 October 1608 Bati died, and in November Gagliano succeeded him as *maestro di cappella* of the cathedral; by July 1609 he was given the title of *maestro di cappella* at the Medici court as well. His position was enhanced on 26 January 1610, when he was made canon of S Lorenzo under the designation SS Cosimo e Damiano, and on 2 January 1615 he was further elevated in the ecclesiastical hierarchy when he became apostolic prothonotary there, thus achieving clerical as well as musical distinction.

In June 1607 Gagliano's reputation among his fellow musicians in Florence was such that he was able to found an academy devoted to music, the Accademia degli Elevati. Its membership comprised 'the city's finest composers, instrumentalists and singers', as Gagliano described it, but it also included literati. Those known to have belonged are Jacopo Peri, Giovanni and Lorenzo del Turco, Giovanni de' Bardi, Alfonso Fontanelli, Piero Strozzi, Rinuccini, Antonio Francesco Benci, Piero Benedetti and Giovanni Cavaccio; according to Gagliano's assertion, Bati, Caccini, Lorenzo Allegri, Severo Bonini and Santi Orlandi must also have been members, as probably were some of the outstanding singers and instrumentalists then resident in Florence. The academy's patron was Cardinal Ferdinando Gonzaga, its secretary Giovanni del Turco. Composer candidates were admitted to the academy only after two madrigals written to assigned texts had been approved by the official censor and subsequently by the full membership. The academy

met weekly for the purpose of examining and performing musical works, and members were required to be present and to perform by turns or to pay a fine. Once a year, on the feast of S Cecilia, the academy's protectress, it was obligatory for the members to gather together so that all might join in singing a mass. Historically, the Elevati belong to the tradition of musical gatherings in Florence extending from Bardi's Camerata through the groups sponsored by Jacopo Corsi and Cosimo Cini to those of Cosimo del Sera and Alessandro Covoni. Gagliano's group was unique, however, in being a formal academy with rules of procedure modelled on those of such well-known Florentine groups as the Accademia Fiorentina and the Accademia della Crusca. Unlike its worthy models, however, the Accademia degli Elevati may have been short-lived; in the autumn of 1609 a faction of the academy rebelled with the intention of destroying it, and though they seem not to have succeeded, the academy was certainly weakened and its demise hastened. Gagliano referred to it in only two publications, *Dafne* and his fifth book of madrigals (both 1608), giving his academic name, 'L'Affannato' ('The Breathless One'), on the title-pages of both. Although Gagliano himself made no further reference to the Elevati, it was still mentioned on the title-pages of works by Benedetti in 1611 and 1613 and by Cavaccio in 1611, 1620 and 1626.

From the time of his appointment to the Medici court in 1609 until his death, Gagliano prepared, directed and composed much of the great variety of music – including ballets, *intermedi*, operas, oratorios, masses, motets, madrigals – with which the court so lavishly represented and entertained themselves and their guests, principally in their various palaces and in S Lorenzo and the cathedral, S Maria del Fiore (*see* OPERA, fig.32). At the cathedral he was also in charge of overseeing the music used in services there week in and week out. Glimpses of him in his day-to-day duties at the court may be caught in the accounts of Cesare Tinghi, the Medici court diarist (excerpts in *SolertiMBD*), who reported his singing and playing (he performed on the theorbo and keyboard instruments) in various intimate and private entertainments he prepared for the several grand dukes and duchesses he served. A letter of 1621 in the Gonzaga Archives at Mantua states that he had been commanded to Innsbruck to serve the emperor, and Daugnan reported that Polish records show that he was in Warsaw at some time during the period 1624–32. But no corroborating evidence has been found to show that he was ever away from Florence and the Medici during the long period over which he served them. A letter written by his younger brother Giovanni Battista (in *I-Fd*) indicates that Gagliano suffered ill-health during his last 19 years and was unable, to some degree, to perform his duties as *maestro*. In personality he was apparently a gentle and agreeable man; his contemporary Lorenzo Parigi described him as 'a musician as amiable as he was learned', and his portrait bust, which still stands in the chapter room of the canons of S Lorenzo (fig.2) shows a thoughtful and gentle countenance. According to the canons of S Lorenzo he was 'famed for the honesty of his character and the superiority of his knowledge'.

2. WORKS. Gagliano's best-known work is his setting of Rinuccini's *Dafne*. It was much admired by his contemporaries and notably praised by Jacopo Peri, who, in a letter to Cardinal Ferdinando Gonzaga, declared the setting to be better than any other (meaning his own and

2. *Marco da Gagliano: marble bust (S Lorenzo, Florence)*

Corsi's) and specified that Gagliano's manner of writing vocal music came much closer to the speaking voice than that of any other distinguished composer. In a long and important preface to the published score (printed in Solerti, 1903, pp.78ff), Gagliano acknowledged that *Dafne* had had an extraordinary effect on those who heard it at Mantua but modestly credited its success less to his music than to the uniting of 'every noble delight' (story, poetry, musical composition, exquisite singing, combining of voices and instruments, dance, gesture, costumes and scenic design) that distinguished the new genre. His remark that 'the true delight of song stems from the intelligibility of the words' governed many of his practical directions for performances of *Dafne* and works similar to it: ornaments (*gruppi*, *trilli*, *passaggi* and *esclamazioni*) should be used only where the story requires them, otherwise entirely omitted; the instrumentalists accompanying the singers must be seated where they can see the singers' faces and can best hear them, so that they can keep together; and the instruments must be careful not to double the singers' melody and must never embellish the accompaniment. Gagliano further called upon the orchestra to provide a sinfonia before the raising of the curtain. His interest embraced the entire production and not merely the musical aspects of it; the preface continues with directions for many details of stage business, which throw some light on what productions of *Dafne* and other early operas must have been like. At the close of the preface, he credited three of the arias, 'Chi da lacci d'Amor vive disciolta', 'Pur giacque estinto al fine' and 'Un guardo, un guardo appena', to a learned academician and patron. This was undoubtedly Cardinal Ferdinando Gonzaga, the patron of Gagliano's academy. In style, *Dafne* is much less austere than similar works by his fellow Florentines. Like Monteverdi's *Orfeo*, it incorporates traditional genres and manners and so has a number

of ensemble pieces – duets, trios, madrigalian choruses – and a variety of airs interspersed with passages in *stile recitativo*. *La Flora* (to a text by Andrea Salvadori), Gagliano's only other surviving opera, is stylistically close to *Dafne*.

Gagliano's madrigals, all but one *a cappella* and nearly all for five voices, were, with a single later exception, published between 1602 and 1617. They are important, highly personal examples from the last years of the genre. Gagliano was typically Florentine in his choice of poets and poems of quality; Marino, Guarini and Chiabrera were his favourites, followed closely by Rinuccini, Sannazaro, Della Casa, G.B. Strozzi, Petrarch and a group of lesser-known poets. In texture, his madrigals show a marked preference for homophony. Where polyphony does appear it is often for only three or four voices of the full ensemble, though rich, five-part polyphonic writing is not unknown. Most of the polyphonic passages involve imitation, but of a rather unusual kind. Often a point of imitation is notable for its use of a motif so brief that each voice successively entering has in common with the others only its first few intervals, continuing freely thereafter (as, for example, in *Come il ferir sia poco* from the third book and *O com'in van credei* from the sixth). Imitation is also frequently made with declamatory motifs which, by virtue of their brevity, must be used again and again to extend the texture, typically in sequential manner (as, for example, in *Ecco l'alba, ecco il giorno* from the fourth book and *Fuggi tua speme, fuggi* from the fifth). Melodically, Gagliano's preference was for brief, concise phrases to which the text is syllabically set. Melismas are reserved for the illustration of the text (though, in general, word-painting is of little interest to him), except for several elaborately ornamented later madrigals that were clearly intended for some of the virtuoso singers so much in evidence in Florence in the early 17th century (e.g. *Chi sete voi che saettate a morte* from the sixth book). In a typical Gagliano madrigal, syllabic treatment of text and extensive use of homophonic texture project the poetry with remarkable clarity; this, of course, agrees with his above-quoted statement in the *Dafne* preface stressing the importance of the intelligibility of the words. Gagliano's madrigals are harmonically unadventurous, with only a mild use of chromaticism. Dissonances are usually carefully prepared and resolved, though elsewhere there is occasionally some rather awkward part-writing. Rhythm is greatly varied; it runs the gamut from long sustained values to very short ones, the latter often in passages of rapid parlando-like settings of textual phrases in which the ideal is certainly to capture the flow and accent of spoken language. In general, the earlier madrigals are somewhat broader and more expansive in their musical flow than those from his last books. Here the directness and compression of the music is almost telegrammatic in its effect; the most vivid way of illustrating this is to compare the setting of *Filli, mentre ti bacio* from the first book (ex.1*a*) with the reworked version of the same madrigal in the sixth (ex.1*b*). The speed with which Gagliano moves through a text in these late pieces is on occasion somewhat contradicted, however, by the repetition or reworking of a portion of music and text to produce a formal design of large-scale *ABB* or *ABB′*. The compression and density of construction in his later madrigals is lightened by the frequent full stops with simultaneous rests in all the parts that separate and define discrete sections of musical-textual matter.

In 1623 Gagliano's last book of madrigals was attacked by MUTIO EFFREM in his *Censure ... sopra il sesto libro de madrigali di M. Marco da Gagliano*. The diatribe had first circulated privately and was published only on Gagliano's complaining (in an open letter printed in 1622 in his *Sacrarum cantionum ... liber secundus*) that he should like to see it so as to defend himself. In his vicious attack on the madrigals Effrem pointed out errors in part-writing and dissonance treatment, incorrect cadences, breaking of the modes and the misuse of chromaticism, and accused Gagliano of confusing the madrigal with the canzonetta. From the standpoint of a conservative these accusations were, for the most part, just, but from that of a modernist they were entirely inappropriate and misguided. As far as is known, Gagliano never responded, probably because, all things considered, he felt no defence was necessary. The remainder of his extant secular music is found in his *Musiche* of 1615, one of the most notable such volumes of the period. The chamber monodies, duets and trios, some to sacred texts, include *Valli profonde*, one of the finest Italian monodies. This volume also includes the music of the *Ballo di donne turche* (text by Alessandro Ginori), danced at court during carnival, on 26 February 1615.

Much of Gagliano's sacred music remains in manuscript. The masses, motets, hymns, antiphons, responsories, *Magnificat* settings and other surviving works are nearly all *a cappella* for four to six voices, though there are a few double-chorus works as well. It is clear that they belong to all phases of his career. The series of sacred works that he chose to publish began with the (now incomplete) *Officium defunctorum* (1607/8), which contains 12 liturgical pieces to Latin texts and four spiritual madrigals to Italian texts. His next volume of sacred music (1614) contains 15 motets and a mass, all for six voices. The continuo part of his *Sacrarum cantionum . . . liber secundus* for one to six voices appeared in 1622, the vocal partbooks in 1623. The use of continuo throughout this book and its florid vocal writing suggest that it was made up of works written for the private devotions of the Medici. Tinghi's diary often reports occasions when performances of sacred music by the virtuoso singers of the court were presented in the private apartments of the Palazzo Pitti. Gagliano's last publication, *Responsoria maioris hebdomadae* (1630/31), responsories for Thursday, Friday and Saturday of Holy Week, are homophonic, harmonically simple four-part settings of the familiar texts and are fittingly reserved and sombre in tone. They were perhaps the most cherished of all Gagliano's music in the years following his death. They survive in at least a dozen manuscript copies in Florence, some with added instrumental parts, showing adaptations for later taste, and according to Picchianti were performed every year in S Lorenzo until well into the 19th century.

WORKS

music lost unless otherwise stated

STAGE

La Dafne (op, prol., 6 scenes, O. Rinuccini, after Ovid), Mantua, Feb 1608, collab. F. Gonzaga (Florence, 1608); ed. J. Erber (London, 1978)

Intermedio III (G. Chiabrera) to G.B. Guarini: *L'Idropica*, Mantua, 2 June 1608

Il trionfo d'onore (ballo, A. Striggio (ii)), Mantua, 3 June 1608

Il sacrificio d'Ifigenia (ballo, A. Striggio (ii)), Mantua, 5 June 1608

Mascherate di ninfe di Senna (intermedi, Rinuccini), collab. Peri and others, Florence, 16 Feb 1611; Gagliano's music lost except Su l'affricane arene [see MADRIGALS, MONODIES]
Scherzi e balli di giovanette montanine (G. Ginori), 1614
Ballo di donne turche (A. Ginori), Florence, 26 Feb 1615 [see MADRIGALS, MONODIES]
La liberazione di Tirreno ed Arnea (veglia, A. Salvadori), ? collab. Peri, Florence, 6 Feb 1617
La fiera (intermedi, M. Buonarroti), Florence, Palazzo Pitti, 11 Feb 1619, collab. F. Caccini
Lo sposalizio di Medoro et Angelica (op, Salvadori, after L. Ariosto), Florence, Palazzo Pitti, 25 Sept 1619, collab. J. Peri; rev. as Il Medoro, 1623
Le fonti d'Ardenna (ballo, Salvadori), Florence, 3 and 8 Feb 1623
La regina Sant'Orsola (sacred drama, Salvadori), Florence, Uffizi, 6 Oct 1624
La storia di Judit (sacred drama, Salvadori), Florence, 22 Sept 1626
La Flora (op, prol., 5, Salvadori), Florence, Palazzo Pitti, 14 Oct 1628 (Florence, 1628) [role of Chloris by Peri]

MADRIGALS, MONODIES

EDMOND STRAINCHAMPS

Gagliarda [gagiarda] (It.). *See* GALLIARD.

Gagnebin, Henri (*b* Liège, 13 March 1886; *d* Geneva, 2 June 1977). Swiss composer, teacher and organist. He received his musical education in Lausanne, Berlin, Geneva (where he studied with Otto Barblan, Oscar Schulz and Joseph Lauber) and Paris, taking lessons from d'Indy at the Schola Cantorum; he also studied the piano with Blanche Selva. During this period he worked as a Protestant church organist in Paris, Lausanne and Geneva. He finally settled in Switzerland in 1916, teaching music history and the organ at the conservatories of Lausanne, Neuchâtel and Geneva. In 1925 he was appointed director of the Geneva Conservatoire, a post he held until 1957, and in 1938 he founded the Geneva International Competition for Musical Performance, which gained a worldwide reputation and over which Gagnebin continued to preside until 1959. As a result of this activity he was made president of the Federation of International Competitions, and sat on the juries of many contests; he also became known as an organist, lecturer and musicologist. Among the awards made to him were the Prize of the City of Geneva (1961), an honorary doctorate of Geneva University and an honorary fellowship of the Royal Academy of Music, London.

His output is large and covers all genres except opera. Strongly influenced at first by Franck and d'Indy, his music evolved beyond them to incorporate some of the

new developments of his contemporaries, notably Stravinsky. Gagnebin avoided external effect and constructed his music with care; the most characteristic features of his work are a deep faith expressed through the use of Protestant psalmody, and a kindly, colourful humour.

WORKS

(*selective list*)

Choral: St François d'Assise, orat, 1933; Les vanités du monde, orat, 1938; Abraham sacrifiant, 1939; Jedermann, cant., 1942; Chant pour le Jour des morts et la Toussaint, orat, 1943; Psaume 100, chorus, org, 1947; Psaume 109, chorus, org/orch, 1948; Les mystères de la foi, orat, 1958; Psaume 104, solo vv, chorus, orch, 1962; Messe latine sur de vieux noëls, chorus, org, 1966; Messe de concert, chorus, org, 1973

PIERRE MEYLAN

Gagneux, Renaud (*b* Paris, 15 May 1947). French composer. He attended the Ecole Normale de Musique de Paris, where he studied piano with Cortot (1961–2) and composition with Dutilleux (1966); he also studied composition with Stockhausen at the Cologne Musikhochschule (1966). He pursued his studies at the Paris Conservatoire (with Messiaen, 1967–72), where he won a first prize in composition in 1972. In that year he joined Pierre Schaeffer's musical research group at ORTF. In addition to a large output of sacred choral, orchestral and other instrumental works, he has also written several film scores. He has won a number of prizes including the Prix Georges Enesco (1983), the SACD Prix des nouveaux talents (1989), the Prix de l'Institut de France (1989, 1998), the Prix des Compositeurs (1990) and the SACEM Grand Prix (1993).

JEAN-NOËL VON DER WEID

Gagnon, (Frédéric) Ernest (Amédée) (*b* Rivière-du-Loup-en-haut [now Louiseville], Lower Canada [PQ], 7 Nov 1834; *d* Quebec City, 15 Sept 1915). Canadian composer, organist, teacher and folksong collector. After completing the classical studies programme at the Collège Joliette, he spent three years studying music in Montreal. In 1853 he was appointed organist at St Jean-Baptiste in Quebec City, and from 1864 to 1876 he was organist of the Quebec City Basilica. During the first of two European trips (1857–8 and 1873) Gagnon studied the piano at the Paris Conservatoire with Alexandre Edouard Goria and Henri Herz, and harmony and counterpoint with Auguste Durand.

An exponent of the Louis Niedermeyer method of plainchant accompaniment, Gagnon published in 1903 a large book of accompaniments for use in Quebec parishes (*L'accompagnement d'orgue des chants liturgiques*). He also composed some church music, as well as several salon-type pieces for solo piano. He was a founder of one of the first regulatory musical institutions in Canada in 1868, the Académie de Musique de Québec, and taught music for many years at the Ecole Normale Laval and at the Ursuline convent in Quebec City. In later life he was a civil servant in the provincial government.

Gagnon is remembered for his folksong collection, *Les chansons populaires du Canada* (Quebec City, 1865–7, 2/1880/*R*). It is remarkable for the scrupulous attention to detail in his transcriptions, concordances with variants in other sources, and musical analysis.

GORDON E. SMITH

Gai (Fr.: 'merry', 'cheerful'). A tempo mark. Rousseau (1768) equated it with *allegro*, the fourth of his five main degrees of movement in music; and the frequency of its use from the earliest years of the 18th century suggests that his equation, for once, was a happy one. Couperin used it (with the spelling *gay*), as did Rameau; and they and their contemporaries made much use of the adverbial form *gaiment*, also spelt *gayment*, *gaiement* and *gayement*, as tempo and mood designations. The early history of *gai* as a purely musical instruction is a little difficult to trace because the word appears in musical contexts throughout the 17th century as the title of a dance, the *branle gai*; but its absence from Brossard's *Dictionaire* of 1703 suggests that François Couperin's use of it is one of the earliest. Occasionally Italian composers used the adjective *gajo* or *gaio*, particularly as a qualification to *allegro*.

For bibliography *see* TEMPO AND EXPRESSION MARKS.

DAVID FALLOWS

Gaiani [Gajani], **Giovanni Battista** (*b* Bologna, 20 Nov 1757; *d* Bologna, 13 Oct 1819). Italian organist and composer. He studied with Zanotti, Vignali, Martini and Mattei. Admitted to membership in the Accademia Filarmonica of Bologna as organist and then as composer in 1781–2, he was elected *Principe* in 1793, 1802, 1807 and 1815. He was organist and *maestro di cappella* at various Bolognese churches, including S Maria della Morte; in 1802 he played the harpsichord for the opera at the Teatro Comunale. Competent, but conservative and provincial, he was a composer of the late 18th-century Bolognese school derived from Padre Martini. The only trace of him outside Bologna is one sacred piece in the Cappella Lauretana in Loreto. (*GaspariC*)

Gaiarda (It.). *See* GALLIARD.

Gaidifer [Gadifer] **d'Avion** (*fl* 1230–50). French trouvère. Avion is in the environs of Arras, and Gaidifer, an ecclesiastic, was a member of the Artesian poetic circle. Since he appears as a respondent to Jehan Bretel in two jeux-partis, and as judge of Jehan de Grieviler and of Robert de Castel in other jeux-partis, and since Perrin d'Angicourt, Jehan le Cuvelier d'Arras and the banker Audefroi Louchart appear as judges in the former, Gaidifer was probably active towards the middle of the 13th century. Six of the seven chansons attributed to him are unica in the Rome Chansonnier (*I-Rvat* Reg.lat.1490). His style is sharply circumscribed. All the poems are isometric, consisting of octosyllables or decasyllables; all except one contain only two rhymes per strophe and in five the *pedes* are followed by the rhyme pattern *baab*. The melodies are all in bar form. Only in *Tant ai d'amours* is there any repetition in the cauda. This is also the only melody cast in a mode with a minor 3rd above the final. The melodies, though simple, span between an octave and an 11th. In *Je me cuidoie* and *Las pour quoi* the latter portions of the melodies are more active than the nearly syllabic beginnings. In no work is there clear evidence of symmetrical rhythmical organization.

Gail [née Garre], **(Edmée) Sophie** (*b* Paris, 28 Aug 1775; *d* Paris, 24 July 1819). French composer. Her first songs appeared from 1790 in the song magazines of Louis de La Chervardière and Antoine Bailleux. At the age of 18 she married the philologist Jean Baptiste Gail, but they separated some years later. She then studied singing with Bernardo Mengozzi, and made a successful tour of southern France and Spain. She studied musical theory with Fétis and, later, with Perne and Neukomm. Between 1808 and 1810 her salon attracted the most fashionable singers in Paris. She wrote a number of songs and *romances*, and four one-act operas which were produced by the Opéra-Comique at the Théâtre Feydeau. The first and most successful of these, *Les deux jaloux* (1813), was followed by *Mlle de Launay à la Bastille* (1813), *Angéla, ou L'atelier de Jean Cousin* (with Adrien Boieldieu, 1814) and *La sérénade* (1818). The last contains accomplished music, but its libretto, adapted from J.-F. Regnard's 1694 comedy of the same title, was considered scandalous, even 50 years later, by Félix Clément in his *Dictionnaire lyrique* (1867–9). He claimed that it offended 'moeurs dramatiques' and that even the opera's beautiful music was not enough to salvage it. Gail sang in London in 1816, and in 1818 toured Germany and Austria with Angelica Catalani. She died prematurely of a chest ailment.

Sophie Gail enjoyed a high reputation both as singer and accompanist, and her songs, which cultivate a vein of plaintive, amorous sentiment fashionable in post-Revolutionary France, are original and carefully wrought. The most popular of them, *Celui qui sut toucher mon coeur*,

was used as a theme for instrumental variations by at least five different composers. Her son, Jean François Gail (1795–1845), wrote songs and music criticism.

PHILIP ROBINSON (with SARAH HIBBERD)

Gailhard, André (*b* Paris, 29 June 1885; *d* Paris, 3 July 1966). French composer, son of PIERRE GAILHARD. A pupil of Massenet, Leroux, Vidal and Lenepveu at the Paris Conservatoire (1905–8), he won the Prix de Rome in 1908 for his cantata *La sirène*. Skilfully written early settings of late Romantic and symbolist poets can be likened to the early songs of Debussy. In the 1930s he composed miniature piano pieces, very simple in style, often working a straightforward idea on a single page As a result of his travels and interest in ethnomusicology, a strong penchant for the oriental pervades much of his music and in this respect he collaborated frequently with the writer Maurice Magre. *La bataille* is set in Japan and many of his instrumental pieces are based on oriental modes. He was most successful as a dramatic composer. Set in Homeric times in Sicily, *La fille du soleil* was one of the large-scale spectacles commissioned for the open-air arena at Béziers. Centred on a village in the Pyrenees, *Le sortilège* is an opera of considerable charm, somewhat indebted to Massenet, based on folklore.

WORKS

Stage: Amaryllis (conte mythologique, 1), 1906; L'Aragonaise (mimodrame), before 1909; La fille du soleil (incid music, 3, M. Magre), Béziers, Arènes, 29 Aug 1909; Le sortilège (conte des fées, 3, M. R. LANGHAM SMITH

Gailhard, Pierre [Pedro] (*b* Toulouse, 1 Aug 1848; *d* Paris, 12 Oct 1918). French bass and opera director. He studied singing in Toulouse and with Révial at the Paris Conservatoire. On 4 December 1867 he made his début at the Opéra-Comique as Falstaff in Thomas' *Le songe d'une nuit d'été*, and was engaged at the Opéra in 1870. There he created the roles of Richard in Mermet's *Jeanne d'Arc* (1876), Simon in Joncières' *La reine Berthe* (1878) and Pedro in Thomas' *Françoise de Rimini* (1882). He appeared regularly at Covent Garden from 1879 to 1883, his roles there including Osmin, Girot in Hérold's *Le Pré aux Clercs*, and Méphistophélès, of which he was generally considered to be the finest interpreter since Faure. His voice was warm and vibrant, but also powerful and he was said to be unequalled in vehemence in the scene of the Benediction of the Swords (*Les Huguenots*). Yet he also had the necessary light touch for comic operas. In 1884 he was appointed manager of the Opéra, a position he held jointly with Ritt (1884–91) and then with Bertrand (1893–9); on Bertrand's death in 1899 he became sole manager (until 1906). His regime was perhaps most distinguished for its excellent Wagner productions. Gailhard also wrote the scenarios for two works by Vidal, *Maladetta* (1893) and *Guernica* (1895). On 6 July 1886 he was appointed a Chevalier of the Légion d'Honneur.

HAROLD ROSENTHAL

Gaillard, Marius-François (*b* Paris, 13 Oct 1900; *d* Evecquemont, 23 July 1973). French composer, pianist and conductor. He began his career as a pianist, receiving a *premier prix* at the Paris Conservatoire in 1916 and gaining recognition for his recital performances, of Debussy especially. He also conducted his own orchestra, which, in the Gaillard concerts he founded, performed both classical and contemporary French repertory. In 1921 he was commissioned to write music for the silent film *El Dorado* directed by Marcel l'Herbier. Debussian in idiom, this 100-minute score for symphony orchestra is considered a landmark in European film music. Between 1933 and 1959 Gaillard wrote scores for 40 films, including feature films by L'Herbier and Cavalcanti, and documentaries.

The interaction of classical form and non-European musical influence is a recurring feature of Gaillard's large output of concert works. *La passion noire*, a cantata for triple chorus and large orchestra (including ondes martenot) inspired by Bach's Passions and African music, enjoyed a *succès de scandale* at its 1932 Paris première. Of Gaillard's four symphonies, the first is marked by its polytonality, whereas the third ('Europe', 1937) in Machabey's words 'truly foreshadowed the tragic events to come'. Of his later works the ironic 12-note piano sonata of 1959 was much praised. Gaillard gave up music in 1961, only to take up composing again two years before his death. The work of this cosmopolitan individualist has gradually been rediscovered in recent years.

WORKS

(selective list)

Stage: Le vitrail (comic op, 1, after R. Fauchois), 1920; Les caprices de Marianne (incid music, after A. de Musset), 1924; La danse pendant le festin (drame lyrique, 1, after G. Guesnier), *c*1924; Yamba-O (tragédie burlesque, after A. Carpentier); Lilliane (drame lyrique, after P.F. Quilici), 1928; Détresse (ballet), 1932;

13 (ballet), 1933; La France d'outre-mer (ballet), 1943; Adjugé ou les folles enchère (ballet); Mille et quatre (incid music), 1956
Film scores: El Dorado (silent film, dir. M. L'Herbier), 1921; Les hommes nouveaux (dir. L'Herbier), 1936; Histoire de rire (dir. L'Herbier), 1941; They Made Me a Fugitive (dir. A. Cavalcanti), 1947; Les rendez-vous du diable (dir. H. Tazieff), 1958; Magie moderne, 1959; also TV scores
Syms.: no.1, G, 1927; no.2 'A mon père', 1937; no.3 'Europe', 5 movts, 1937; no.4. 'Symphonie lyrique', 1972–3

THEODORE VAN HOUTEN

Gaillard, Paul-André (*b* Veytaux-Chillon, Montreux, 26 April 1922; *d* Pully, 28 April 1992). Swiss musicologist, conductor and composer. After his schooling at Montreux, Lausanne and Winterthur, where he learnt the violin and viola with Ernst Wolters, he studied literature and theology at Lausanne and took a course in conducting at Geneva with Baud-Bovy and Franz von Hösslin. He studied the violin at the Zürich Conservatory with Willem de Boer (diploma 1946) and musicology, church history and philosophy at the university. His principal teachers were Hindemith, Willy Burkhard, Willi Schuh and Antoine Cherbuliez. In 1947 he obtained the doctorat ès lettres from Zürich University with a dissertation on the Huguenot Psalter. He taught music history in Lausanne at the Conservatory and the Université Populaire (1956–87) and at the Ecole Polytechnique Fédérale (1973–9). Throughout his life he was active as a choral and orchestral conductor. At the Bayreuth Festival he directed the Wagner Seminar (1951–69) and the Chor des Festspieltreffens (1957–69). He was also music director of the choir of the Geneva Grand Théâtre (1969–87) and guest conductor of several orchestras in Switzerland and abroad. From 1965 to 1974 he was French editor of *Revue musical suisse* (*SMz*). A specialist in the Renaissance, Wagner and the oratorio, Gaillard was also well known as a composer of choral music. He received the Richard Wagner Medal for his compositions in 1963.

ETIENNE DARBELLAY/DOROTHEA BAUMANN

Gaillarde (Fr.). *See* GALLIARD.

Gaisser, Hugo [Hughes; Ugo Athanasio; Josef Anton] (*b* Aitrach, nr Württemberg, 1 Dec 1853; *d* Ettal, Upper Bavaria, 26 March 1919). German writer on Gregorian and Byzantine chant. He entered the Benedictine monastery of Beuron in 1872, and studied plainchant and theology; he was ordained priest in 1873. After staying in Volders, Tyrol (1875), and in the Benedictine monastery of Maredsou near Namur (1876), he became a teacher (1899) and then director at the Pontificio Collegio Atanasiano in Rome, a school founded in 1577 by Gregory XIII for the education of Greek Catholics. In 1905 he went for two months to Mt Athos to study the chant there. He became prior at the monastery of St Andrew at Bruges in 1912, but was forced to return to

Germany in 1914, first to the abbey of St Joseph, Coesfeld, then in 1916 to Ettal.

Up to 1899 Gaisser wrote mainly about Gregorian chant. During the 11 years which followed, he studied the history of Byzantine chant, using his experience to train the choir of the college church, S Atanasio. He advanced many hypotheses and ideas in this new field: he drew attention to the oriental elements in modern Byzantine chant; he studied the liturgy and folksongs in the Greek-Albanian colony in Sicily to show how Byzantine elements have survived; he drew parallels between the chant in the Eastern and Western church. At the same time as, and apparently independently of, Oskar Fleischer, he found the key to deciphering the neumes of the middle Byzantine notation, but was unable to solve the problem of the *martyriai*, or intonation signatures. (One of his students, H.J.W. Tillyard, later solved this problem.) Gaisser showed how the different stages of Byzantine notation were closely related; he also tried to find a solution to the problem of rhythm and attempted to identify the eight Byzantine modes with the classical Greek *harmoniai*.

NANNA SCHIØDT

Gaita (i). Term used in Iberia, eastern and south-eastern Europe, North Africa and Latin America for an aerophone, usually an oboe or a bagpipe. This article outlines the etymological background of the term and discusses the instruments of Iberia and Latin America. For North African instruments *see* SURNĀY, essentially the same instrument; for West African instruments *see* ALGAITA. Most instruments to which the term is applies are oboes or shawms; the south-east European *gajde* or *gadjy* is a BAGPIPE (see §7(iv, v)).

The term, which is variously spelt (*gaida*, *gajde*, *gajdë*, *gajdy*, *ghaida*, *ghaite*, *ghayṭa*, *kaita*, *aghiyad*, *algaita*), is derived from the Gothic *gait* or *ghaid* ('goat') and originally denoted a bagpipe with a goatskin bag; this is borne out by all surviving specimens of the Portuguese *gaita* (V. de Olivares: *Instrumentos musicais populares portuguesis*, Lisbon, 1982) and the *gajde* of European Turkey (L. Picken: *Folk Musical Instruments of Turkey*, London, 1975). Some Spanish writers have suggested that *ghayṭa* is a Spanish borrowing from Arab Andalusia; however it is clear that Arab Andalusia borrowed the word from the Visigoths and applied it to the oboe, and if the term shifted from the bagpipe (*gaita*) to the oboe (*ghayṭa*), it was by virtue of similarity of timbre or of social function.

In Spain, *gaita* can signify the DUCT FLUTE also known as a *pito* in León and Andalusia. In the Basque region the terms *gaita* and *dulzaina* signify an oboe. In Galicia, Catalonia and parts of the Pyrenees *gaita* is the term for a bagpipe (*see* BAGPIPE, §7 (i)). It is also an alternative name for an oboe elsewhere known as *chirimía* or *gralla* (in Catalan). In Castile the *gaita* (*gaita serrana* or *gaita zamorana*) is a capped, single-reed hornpipe (*see* HORNPIPE (i)) with a bell of animal horn, now rare. The *gaita gallega* or *gaita de fuelle* is a bagpipe of Galicia, also known in Catalonia (as *sac de gemecs*, 'bag of groans') and in parts of the Pyrenees; the Galician bagpipe ensemble may consist of two bagpipe players and two drummers. In Portugal, the *gaita de foles* is a bagpipe used to accompany dancing in the Alentejo region (with *pifaro* and castanets); in Brazilian usage the term means an accordion.

In Colombia, the *gaita* is an end-blown duct flute of the Atlantic coastal region, made from long tubes of a cactus-like plant. The term *gaita* is also used for a Colombian ensemble (including two *gaitas*) which accompanies the *cumbia* folkdance.

CHRISTIAN POCHÉ, JOHN M. SCHECHTER

Gaita (ii). *See under* ORGAN STOP (*Gaitas*).

Gaither, William J. (*b* Alexandria, IN, 28 March 1936). American composer and performer of gospel hymns.

Gaito, Constantino (*b* Buenos Aires, 3 Aug 1878; *d* Buenos Aires, 14 Dec 1945). Argentine composer, conductor and pianist. Born into a musical family, he showed precocious signs of ability and was awarded a grant from the Argentine government to study abroad. He attended the Naples Conservatory, where he studied the piano with Francesco Simonetti and composition with Platania. He travelled throughout Europe, meeting Verdi, Mascagni and Massenet. In 1900 Gaito returned to Buenos Aires, where he co-founded the Conservatorio Bonaerense and taught at the National Conservatory of Music. He remained active as a pianist and conducted opera seasons at the Teatro Argentino at La Plata. He also directed performances of his own compositions at the Teatro Colón.

Gaito is considered one of Argentina's foremost opera composers; he is also known for his ballets, symphonic poems, incidental music and chamber works. His early compositions reveal Italian influences, which were a logical product of his background and training. His later works incorporate material of a distinctly Argentine character presented within the framework of Italian musical aesthetics. *La flor del Irupé* (performed in 1929) is regarded as the first national ballet of significance. His string quartets are believed to be the first in Argentina to rely on indigenous material. His popular opera, *La sangre de las guitarras* (performed in 1932), is based on the life of a gaucho *payador* (folk singer), who struggles to

uphold the ideals of liberty during the Argentine civil war period.

WORKS
(*selective list*)

Ops (perf. in Buenos Aires, Teatro Colón): Caio Petronio (op, 3, H. Romanelli), 1911–14, 2 Sept 1919; Fior di neve (drama lírico, 1, J. Colelli), 1919, 3 Aug 1922; Ollantay (drama lírico, 3, V. Mercante, after Quechua legend), 1926, 23 July 1926; Lázaro (drama lírico, 1, Mercante), 1927, 19 Nov 1929; La sangre de las guitarras (drama lírico, 3, V.G. Retta and C.M. Viale, after H. Blomberg), 1931, 17 Aug 1932

Ballets (perf. in Buenos Aires, Teatro Colón): La flor del Irupé (Mercante, after Guaraní legend), 17 July 1929; La ciudad de las puertas de oro (E. Carreras, after A. Capdevila), 11 July 1947

DEBORAH SCHWARTZ-KATES

Gaius, Jo. (*fl c*1450). Composer. Two compositions can be attributed to him: *Dyana lux serena* in *I-TRmp* 90, and a *Magnificat* in *I-TRmp* 88. The former has only the incipit of the text (in each of its three voices). The first four verses of the *Magnificat*, including the opening words, are set using three, four, two and three voices, respectively. The eighth *Magnificat* tone is ornamented in the top voice. (Both works are ed. in DTÖ, xiv–xv, Jg.vii, 1900/*R*; *Dyana lux* is also ed. M. Gozzi: *Il manoscritto Trento, Museo provinciale d'arte, cod.1377 (Tr 90)*, Cremona, 1992, ii, 214)

TOM R. WARD

Gajani, Giovanni Battista. *See* GAIANI, GIOVANNI BATTISTA.

Gajo (It.). *See* GAI.

Gakkel′, Leonid Yevgen′yevich (*b* Leningrad, 27 Jan 1936). Russian musicologist, pianist and teacher. He entered the Kazan′ Music School in 1943 following the evacuation of his family to Kazan′ in 1941. After returning to Leningrad in 1945 he continued his musical education at the Special School for Gifted Children in the class of Ė.I. Shteynbok. He studied the piano with N.Ye. Perel′man at the Leningrad Conservatory from 1953 and, after graduating in 1958, undertook postgraduate research at the conservatory with Barenboym in the history and theory of pianism (1958–61). In 1946 he gained the *Kandidat* degree with a dissertation entitled *Chertï fortepiannogo stilya i voprosï interpretatsii fortepiannoy muzïki rannego Prokof′yeva 1908–1918* ('Features of the Piano Style and Questions Surrounding the Interpretation of Prokofiev's Early Piano Music, 1908–18'). He was appointed to teach at the Leningrad Conservatory in 1961, later becoming a senior lecturer (1967) and professor (1983). He gained the doctorate in 1979 with a dissertation on Bartók and piano music of the 20th century. Gakkel′ has taken an active part in Sviatoslav Richter's 'Dekabr′skiye vechera' ('December Evenings') at the Pushkin Museum in Moscow. He became a member of the Composers' Union in 1974 and an acting member of the Russian Academy of the Humanities in 1994, and in 1995 was created an Honoured Representative of the Arts of the Russian Federation.

Gakkel′'s scholarly interests include the fate of Russian musical culture, the history and theory of piano performance and the history of musical life in St Petersburg. His book on piano music of the 20th century (1976) occupies a central position among his writings. A unique piece of research, this book became the target of severe and biased ideological criticism on the part of the official newspaper of the Central Committee of the Communist Party of the Soviet Union, *Sovetskaya kul′tura*, with Gakkel′ being subjected to persecution (Malinin, Fliyer and Sokolov, 1977). In his work he perpetuates the traditions of humanitarian knowledge and Russian critical writing that go back to the Silver Age, with his publications being distinguished by the breadth of his aesthetic views, his culture, his exquisite feeling for art and the refinement and lexical richness of his writing style.

ADA BENEDIKTOVNA SCHNITKE

Gál [Gal], **Hans** (*b* Brunn, nr Vienna, 5 Aug 1890; *d* Edinburgh, 3 Oct 1987). Austrian composer and musicologist. He studied composition with Mandyczewski and music history with Guido Adler at Vienna University, completing the doctorate in 1913 on the style of the young Beethoven. Two years later he won the newly created Austrian State Prize for composition. From 1919 until 1929 he was lecturer in music theory at the university, and the period between the end of World War I and 1933 saw his rapid rise to success as a composer, above all with his second opera *Die heilige Ente*, performed in some 20 theatres. After winning the Columbia Schubert centenary prize for his Sinfonietta in 1928, he was appointed director of the Mainz Conservatory (1929–33). On Hitler's accession to power in 1933 he was instantly dismissed and the performance and publication of his works were banned because he was Jewish. He returned to Austria, but was driven out by the Anschluss in 1938 and fled to England. Tovey invited him to Scotland, where he settled in 1939 and was appointed lecturer at Edinburgh University in 1945. From that time he played an active part in the musical life of the city, not only as lecturer, but also as conductor, pianist, musical personality and founder-member of the Edinburgh International Festival. He remained active as a composer but never re-established his pre-war career and relatively little of his output is known.

Of his 110 published works, more than half were composed in Scotland. His values were deeply rooted in the tonal tradition of the Austro-German musical style. Though an inheritor of the legacy of Brahms, he had by the time of his twenties found his own distinctive musical language to which, regardless of changing musical fashions, he remained true. It unites many elements: the clarity, playful humour and formal mastery of early Classicism; the chromatic harmony and extended tonality of early 20th-century, pre-serial music; a Schubertian love of melody; the lyricism and emotional restraint of Brahms and the contrapuntal textures that remained fundamental to his style. His deep insight into the life and work of great musicians is shown in his books – on Brahms, Schubert, Wagner and Verdi.

WORKS

OPERAS

Der Arzt der Sobeide (comic op, prol, 2, F. Zoref), op.4, 1917–18, Breslau, 1919; Die heilige Ente (ein Spiel, 3, K.M. von Levetzow and L. Feld), op.15, 1920–21, Düsseldorf, 29 April 1923; Das Lied der Nacht (dramatische Ballade, 3, von Levetzow), op.23, 1924–5, Breslau, 24 April 1926; Der Zauberspiegel (fairy play, Jaroschek), op.38, lost, Breslau, 1930; Die beiden Klaas (3, von Levetzow), op.42, 1932–3, perf. as Rich Claus, Poor Claus (trans. A. Fox), York, Rowntree, 22 May 1990

ORCHESTRAL

Ov. to a Puppet Play, op.20, 1923; Sym. no.1 (Sinfonietta), op.30, 1927; Ballet Suite (Scaramuccio), op.36, 1929; Vn Conc., op.39, 1932; Concertino, op.43, pf, str, 1934; Concertino, op.52, vn, str, 1939; Serenade, op.46, str, 1937; A Pickwickian Ov., op.45, 1939–44; Lilliburlero: Improvisations on a Martial Melody, op.48, *c*1943; Sym. no.2, op.53, 1942–3; Concertino, op.55, org, str, 1948; Pf Conc., op.57, 1948

Sym. no.3, op.62, 1951–2; Vc Conc., op.67, 1944; Meanders, suite, op.69, 1954–5; Idyllikon, op.79, suite, 1958–9; Concertino, op.87, vc, str, 1966; Triptych, op.100, 1970; Suite, op.102a/b, va/a sax, orch, 1949; Sym. no.4 (Sinfonia concertante), op.103, 1973

CHORAL

Von ewiger Freude (cant., 17th century), op.1, female vv, org, 2 hp, 1912; Vom Bäumlein, das andere Blätter hat gewollt (F. Rückert), op.2, A, female vv, orch, 1916; Fantasies (R. Tagore), op.5, a, female vv, chbr orch, 1919; 2 Songs, op.8, male vv, 1914; 3 Songs, op.11, male vv, pf/orch, 1910–11; 3 Songs, op.12, female vv, pf, 1910; Kinderverse (P. Dehmel), op.14, female vv, *c*1921; Motet (M. Claudius), op.19, 1924; Herbstlieder, op.25, female vv, 1918–25; Requiem für Mignon (J.W. von Goethe), op.26, vv, orch, 1922

Epigramme (G.E. Lessing), op.27, 1926; 3 Songs, op.31, female vv, pf, 1928; 5 Serious Songs, op.32, male vv (1929); 3 Porträtsstudien (W. Busch), op.34, male vv, pf, 1929; 3 Songs, op.37 (1932); 3 Idyllen (Busch), op.40, male vv, pf (1934); 6 Folksongs, male vv (1930); Nachtmusik (J.J.C. von Grimmelshausen), op.44, S, male vv, fl, vc, pf, 1933; Stille Lieder (Summer Idylls) (C. Flaischlen), op.47, female vv, 1935; De profundis (cant., 17th-century Ger.), op.50, solo vv, chorus, orch, 1936–7; 4 Madrigals (Elizabethan texts), op.51 (1939); 4 Partsongs, op.61, *c*1953

2 Songs, op.63, male vv, 1954; Lebenskreise (cant., Goethe, F. Hölderlin), op.70, 4 solo vv, chorus, orch, 1955; Songs of Youth, op.75, female vv, 1959; A Clarion Call, op.76, female vv, 1959; Of a Summer Day (A. Strawbridge), op.77, female vv, str, 1952; Spättlese, op.91, male vv (1970)

CHAMBER AND INSTRUMENTAL

For 3–8 insts: Variations on a Viennese 'Heurigen' Melody, op.9, pf trio, 1914; 5 Intermezzi, op.10, str qt, 1914, also appeared as 4 Miniatures, op.10a; Pf Qt, op.13, *c*1914; Str Qt no.1, op.16, 1916; Pf Trio, op.18, 1923; Divertimento, op.22, 8 wind, 1924; Str Qt no.2, op.35, 1929; Serenade, op.41, str trio, 1931; Little Suite, op.49a, 2 vn, vc, pf ad lib, 1947–8; Trio, op.49b, pf trio (1949); Suite, op.59b, 3 mand (1956); Divertimento, op.68c, 2 rec, gui (1958); Quartettino, op.78, 4 rec (1960); Concertino, op.82, rec, str qt/str orch/pf, 1961; Trio Serenade, op.88, rec/fl, vn, vc (1967); Huyton Suite, op.92, fl, 2 vn, 1940; Serenade, op.93, cl, vn, vc, 1935; Trio, op.94, ob, vn, va, 1941; Str Qt no.3, op.95, 1969; Sonata, op.96, 2 vn, pf, 1941; Trio, op.97, cl, vn, pf, 1950; Str Qt no.4, op.98, 1971

For 2 insts: Suite, op.6, vc, pf, 1919; Sonata, op.17, vn, pf, 1920; Suite, op.56, vn, pf, 1942; Sonatina, op.59a, 2 mand (1952); Suite, op.68a, rec, vn, 1954–5; 6 2-part Inventions, op.68b, 2 rec (1958); 3 Sonatinas, op.71, vn, pf, 1956–7; Divertimento, op.80, mand, hp/pf (1961); Sonata, op.84, cl, pf (1965); Sonata, op.85, ob, pf (1965); Sonata, op.89, vc, pf, 1953; Divertimento, op.90/1, bn, vc, *c*1958; Divertimento, op.90/2, vn, vc (1968); Divertimento, op.90/3, vn, va, *c*1969; Sonata, op.101, va, pf, 1941

KEYBOARD AND SONGS

Pf: Serbische Weiser, op.3, 4 hands, 1916; 3 Sketches, op.7, 1910–11; Sonata, op.28, 1927; Tunes from Old Vienna, 1934; 24 Preludes, op.83, 1960

Org: Toccata, op.29, 1928

Songs: 2 Songs, op.21, S, b viol/vc, org, 1922; 3 Songs, op.33, Mez/Bar, pf, 1928

Principal publishers: Bärenreiter, Breitkopf & Härtel, Novello, Schott, Simrock, Universal

CONRAD WILSON, ALEXANDER R.C. SCOTT

Galakhov, Oleg Borisovich (*b* Gorlovka, Donetsk Province, Ukraine, 10 August 1945). Russian composer. He graduated from the Moscow Conservatory (composition classes with Khrennikov and Shchedrin) in 1970. He became a member of the Composers' Union in 1970, and then taught music theory at the Pedagogical Institute (1971–2) before becoming an editor of the Sovetskiy Kompozitor publishing house (1971–4). He was awarded the title Honoured Representative of the Arts of Russia in 1986, and since 1994 has been chairman of the board of the Moscow Composers' Union.

Galakhov has an easy command of various genres ranging from ballet to song cycles. He is particularly drawn towards chamber forms: the concise manner of his writing, range of colour, the detailed working out and subtle nuances all make his works for instrumental ensembles noteworthy. His language is fairly mobile, and his style ranges from the sonoristic in the cantata *Dvadtsat' shest'* ('26'), through the simple but refined manner of his music for children, to the synthesis of folk and art elements in the polystylistic chamber works. As a composer, Galakhov is drawn towards poetry; the word arouses his imagination, dictates the style and the form, and gives rise to the most precise sonic equivalents in the music. His vocal and choral styles are rooted in folksong and Russian classical tradition, but these links are well absorbed: in the cycle *Gulyan'ye* ('Walking') the 'suburban lyricism' hovers between peasant and urban styles utilizing classical forms while still preserving an independence of language.

Galakhov's chamber and instrumental works display an interest in extended single-movement structures which freely interpret various musical trends in 20th-century music, for example *Monologi* for cello and organ and *Otvet* ('Reply') for organ. Nonetheless, the role of the miniature within the framework of a cycle is not ignored (*Malen'kiy triptikh* ('Little Triptych') for piano, *Severnïy triptikh* ('Northern Triptych') for harp). Galakhov initiated and, since 1994, has planned the Moscow Autumn festival as well as organizing the various types of concert activity that take place at the House of Composers in Moscow under his guardianship. He frequently acts as a jury member for composition competitions.

WORKS
(*selective list*)

Stage: Belosnezhka i sem' gnomov [Snow White and the Seven Dwarfs] (ballet), 1969; Samaya krasivaya [The Most Beautiful Girl] (children's fairy tale, V. Stepanov), 1983; Solov'inaya pesnya [The Nightingale's Song] (radio op, 1, M. Sadovsky), 1986

Choral: Dvadtsat' shest' [Twenty Six] (cant. poem, N. Aseyev, A. Mikoyan), Mez, nar, chorus, org, orch, 1970, rev. 1976; Istoricheskiye pesni [Historical Songs] (orat, A.S. Pushkin), solo vv, chorus, orch, 1970; Pesnya o nashey zemle [A Song about Our Land] (cant., A. Layko, V. Tatarinov), children's chorus, orch of folk insts, 1975; Golos, obrashcheniye k A.A. Akhmatovoy [The Voice, an Address to Akhmatova], S, male chorus, vn, org, cel, 1992

Chbr and solo inst: Polyphonic Trio, str trio, 1967; Str Qt, 1972; Sonata, vc, 1973; Severnïy triptikh [Northern Triptych], hp, 1984; Monologi [Monologues], sonata, vc, org, 1987; Otvet [Reply], org, 1993

Songs, choruses, music for children, incid music, film scores

ALLA VLADIMIROVNA GRIGOR'YEVA

Galambos, Benjámin. *See* EGRESSY, BÉNI.

Galamian, Ivan (Alexander) (*b* Tabriz, 23 Jan 1903; *d* New York, 14 April 1981). American violinist and teacher of Armenian parentage. After studying with Konstantin Mostras at the School of the Philharmonic Society in Moscow (1916–22), and with Lucien Capet in Paris (1922–3), he made his Paris début in 1924. He moved to the USA in 1937 and was appointed to the Curtis Institute in 1944 and the Juilliard School of Music in 1946. During the summer he taught at the Meadowmount School of Music which he founded in 1944. In 1965 he was made an honorary member of the RAM, London, and he held honorary doctorates from Oberlin College and the Curtis Institute. In 1966 he received the Master Teacher Award of the American String Teachers Association.

Galamian's success as a teacher was remarkable. For four decades his students were among the laureates of every major international competition; some became virtuosos (Perlman, Zukerman, Kyung-Wha Chung, Luca, Laredo, Michael Rabin), while others belong to leading string quartets, occupy teaching posts, or are orchestral leaders. Galamian's approach was analytical and rational, with minute attention to every technical detail. His method embodied the best traditions of the Russian and French schools (particularly of Capet's *Art of Bowing*). However, he rejected the enforcement of rigid rules and developed the individuality of each student. Mental control over physical movement was, in his opinion, the key to technical mastery. He published *Principles of Violin Playing and Teaching* (with E.A.H. Green, Englewood Cliffs, NJ, 1962), *Contemporary Violin Technique* (with F. Neumann, New York, 1962) and edited many violin works. He played a Nicolò Amati of 1680, the 'ex-Walton'.

BORIS SCHWARZ/MARGARET CAMPBELL

Galán, Cristóbal (*b c*1625; *d* Madrid, 24 Sept 1684). Spanish composer. In 1651 he was rejected as *maestro de capilla* in Sigüenza because he was married. In 1653 he was listed first as a singer and organist, then as *maestro de capilla* at Cagliari, Sardinia. He left Cagliari in 1656, and although invited to return there in 1661, he never did. He was *maestro de capilla* of the church choir at Morella, and of the choir of Teruel Cathedral before 22 October 1659, when he is first heard of in Madrid. In 1664 he was *maestro* of a group of musicians at the Buen Retiro, where he must have participated in dramatic productions. From 22 August 1664 to 22 July 1667 he was director of the choir at Segovia Cathedral; some time after that he became director of music at the convent of the Descalzas Reales, Madrid. In 1675 the queen regent made known that she wished him to become director of

music of the royal chapel, but the appointment was opposed by the abbess, the Patriarch of the Indies, and court musicians, who suggested that his talents were more suited to the convent choirs. On the death of J. Pérez Roldán in 1680, however, he at last received the appointment.

Galán wrote music in most of the vocal forms current in Spain in his day. He probably composed the music for a number of secular musical plays performed at court, such as *Lides de amor y desdén* and *El labyrinto de Creta*, with texts by J.B. Diamante, as well as for *autos sacramentales* by Calderón; most of this music is lost. He wrote a large number of villancicos and other songs, both secular and devotional, for one to 13 voices, some with continuo. Several of the works for large numbers of voices are for two or three antiphonal choirs with separate continuo parts, and in a few works soloists alternate with choirs. Galán also wrote masses and motets and other sacred music. His popularity is attested by the wide distribution of 17th-century manuscripts of his music throughout Spain and the Americas and by many references to him in contemporary documents. In the early 18th century Francisco Valls (in his *Mapa armónico práctico*) still found his music a worthy, correct and tasteful model for composers of small-scale works in the Spanish manner.

WORKS

Edition: *Cristóbal Galán: Obras completas*, ed. J.H. Baron and D.L. Heiple, Gesamtausgaben, xii (1982–)

2 masses, 9vv, 12vv, *E-V*

JOHN H. BARON, JACK SAGE

Galant (Fr.; It. *galante*). A term widely used during the 18th century to denote music with lightly accompanied, periodic melodies, and the appropriate manner of performing the same. 'Being *galant*, in general', wrote Voltaire, 'means seeking to please'. The old French meaning of the general term with its emphasis on valour had by the 1630s given way to a newer emphasis on social or amatory grace: titles like Campra's *L'Europe galante* (1697), Rameau's *Les Indes galantes* (1735), Guillemain's *Sonates en quatuors, ou Conversations galantes et amusantes* (1743) and Graun's *Le feste galanti* (1748) are to be understood in that latter sense. Watteau's epochal paintings of *fêtes galantes* contributed further to the vogue of the term. Applied to letters, the term took on a meaning close to 'French courtly manner', as in a treatise by C.F. Hunold (Menantes), *Die allerneuste Manier höflich und galant zu schreiben* (1702), a manual for self-instruction that Herder later denounced as lacking virility.

A musical parallel is at hand in Mattheson's first publication, *Das neu-eröffnete Orchestre, oder Universelle und gründliche Anleitung wie ein Galant Homme einen vollkommenen Begriff von der Hoheit und Würde der edlen Music erlangen* (1713); on the title-page roman typeface is used in place of Gothic, significantly, to emphasize the numerous non-German expressions. As an imported phenomenon, the *galant* style in Germany borrowed much vocabulary from its countries of origin and generated a more extensive theoretical literature. Mattheson's 'galant homme' must be taken to include both sexes; as his dedication of this work to a noble lady indicates, much of the *galant* literature, like much *galant* music, was intended to instruct and entertain female amateurs. Mattheson used the substantive 'galanterie' in this and subsequent treatises with a variety of meanings. Pieces called 'galanteries' were numerous in the suites of 17th-century French harpsichord composers; the term was used to designate the lighter, mainly homophonic dances, such as the minuet (J.S. Bach followed this practice). As early as 1640 'galanteria' was used to describe the playing and the late style of Frescobaldi. Mattheson preferred that 'Galanterien' be played on the clavichord rather than the harpsichord because its dynamic nuances approximated more closely to vocal style, a feeling that was to become widespread with partisans of a specific north German dialect of the international *galant* idiom, 'Empfindsamkeit'. In keeping with the emphasis on a singing style, Mattheson also used the term in reference to vocal pieces, saying that a French *air* had 'ein etwas negligente Galanterie' while an Italian aria had this in addition to more musical content, or 'ein harmonieusere Galanterie'; as a singer at the Hamburg Opera under Keiser he was well acquainted with both types. Good music, in his view, required melody, harmony and 'galanterie', the last being equated with the theatrical style, as opposed to the strict or church style, and not subject to rules (except those of 'le bon goût').

Other writers bear out this fundamental distinction. Scheibe opined in *Der critische Musikus* (1737–40) that the *galant* way of writing had its origins in the Italian theatre style. Throughout the *Versuch über die wahre Art das Clavier zu spielen* (1753) C.P.E. Bach distinguished between the learned and *galant* styles. Marpurg in his *Abhandlung von der Fuge* (1753) contrasted fugal texture with the freedom of *galant* writing. Quantz was more preoccupied than any of his contemporaries with defining the new style, both in his *Versuch einer Anweisung die Flöte traversiere zu spielen* (1752) and in his autobiography (1754; first printed in Marpurg's *Historisch-kritische Beyträge*, 1755). In the latter he described Fux's *Costanza*

e fortezza, which he had heard at Prague in 1723, as magnificent, but more in a sacred than theatrical style; he contrasted it with the *galant* melodic style, described as being ornamented with many small figures and passages, which he admitted were less appropriate to a vast space than an intimate one, with fewer instruments. The following year, in Rome, he heard Domenico Scarlatti perform and described him as a *galant* player in the manner of the time. Having been introduced to the elder Scarlatti by Hasse, he observed that the master played the harpsichord in a learned manner but with less finesse than his son. At Paris in 1726–7, Quantz encountered Blavet, whom he praised most highly among the numerous composer-performers of the French flute school, the sonatas of which would seem to qualify on musical grounds as quintessentially *galant*, although Quantz did not so describe them. His emphasis upon the manner of tone production led Quantz in the *Versuch* to define *galant* singing: it consisted of dynamic shadings, joining the chest voice to the falsetto smoothly, and in skilful ornamentation. Mattheson, Scheibe and other writers occasionally used the term 'Galanterie' to refer to embellishments themselves – either improvised or incorporated into the notation. Italian flattery, Quantz said, was effected by slurred notes and by diminishing and strengthening the tone (a description of the *messa di voce*). With this he contrasted the noisy chest attacks and lack of legato in the old manner of German choral singing. Here the essential musical quality of what the period meant by *galant* emerges particularly clearly. Its ideal was the Italian bel canto, which reached its highest pinnacle, according to Quantz, in the first third of the century, when the most famous castratos were in their prime (Farinelli and Carestini were singled out for praise). Flexibility in dynamic nuance went with rhythmic flexibility, or *tempo rubato*, in the modern Italian style. Schäfke showed that Quantz formulated the *galant* aesthetic of clarity, pleasingness and naturalness in music on the basis of several earlier theorists, including Mattheson, and that these ideals, typical of the Enlightenment in general, went back to the rationalist philosophy of Descartes ('clare et distincte percipere').

Instrumental pieces specifically called 'galant' or 'galanteria' proliferated in the chamber and solo literature during the third quarter of the century, which may be considered the highpoint of the *galant* style in instrumental music. Newman judged that qualitative peaks were reached in the keyboard sonatas of Galuppi (who was fond of writing minuets in 3/8 time with the thinnest of textures), Soler and J.C. Bach, and in the chamber music of G.B. Sammartini. The 'menuet galant' represented the epitome of the style. Rousseau wrote in his *Dictionnaire* (1768): 'le caractère du menuet est une élégante et noble simplicité' (cf C.P.E. Bach's chief goal in keyboard playing: 'edle Einfalt des Gesangs'). In Sulzer's *Allgemeine Theorie der schönen Künste* (1771–4) the minuet's affect is said to be 'noble and of charming decency, yet united with simplicity'; 'more than any other dance [the minuet] is appropriate for societies of persons distinguished by their refined way of life'.

Defenders of the old contrapuntal virtues were heard from more and more as the 18th century reached its last third, with the onset of an anti-*galant* reaction. Parallels may be observed with the turn against the Rococo style in art and the rise of *Sturm und Drang* in literature. Adlung complained that 'murky' basses and 'Galanterien' were being heard even in church. In the article on melody in Sulzer's encyclopedia (written with advice from Kirnberger), 'pleasant, so-called *galanterie* pieces' and their 'very small phrases, or segments' are said to be appropriate for light, flattering passions, but out of place in serious or sacred compositions, where their effect is more dainty than beautiful. Under the rubric 'Musik' Sulzer noted that 'the melodic language of the passions has gained immensely' from the introduction of 'the so-called *galant*, or freer and lighter manner of writing', even while claiming that the abuses of this style were leading to music's complete degeneracy. Other complaints about the *galant* manner were even more specifically moral. As Seidel has shown, the term 'galant', having connoted ease and gracefulness of manner to the early 18th century, later came to stand for an empty, artificial and mainly aristocratic manner of comporting or expressing oneself, and the opposite of bourgeois naturalness of feeling.

Freedom of dissonance treatment (e.g. by voice-exchange), defended by Heinichen in connection with the theatrical style, was further rationalized by Marpurg and Türk as a specifically *galant* trait. In the *Fundamentum des General-Basses* printed by Siegmeyer at Berlin and attributed (posthumously) to Mozart, a certain cadential progression is described as 'modern (gallant)': II6–I6-4–V–I. It is illustrated in duple time and then in triple, the latter approximating to the cadence to the minuet in *Don Giovanni* (which first introduces the dance, after hearing the beginning of which Leporello says 'che maschere galanti!'). Opposite this is illustrated a cadence, called 'contrapunctisch', that consists of a I–V–I progression with prepared 4–3 suspensions over the first two chords (see Heartz and Mann, 1969, p.17). Cudworth (1949), unaware of this instance, arrived at isolating the 'cadence galante' *par excellence* as IV (or II6)–I6-4–V–I in minuet rhythm; he hypothesized its origins in some Italian opera house early in the century. Its antecedents may in fact be discerned in, most of all, the operatic arias of Leonardo Vinci (1690–1730), who was widely recognized as an innovator: his light textures, simple harmony, periodic melody and formula-based cadences typify the early *galant*. His immediate followers in this light and gracious manner were Hasse and Pergolesi, who used more decoration, particularly triplet figures and inverted dotted rhythms. Burney wrote that Vinci was the first to break away from the older style, 'by simplifying and polishing melody, and calling the attention of the audience chiefly to the voice-part, by disentangling it from fugue, complication and laboured contrivance'. Before Vinci, elements of the *galant* style can be found in the bel canto melodies of Alessandro Scarlatti; Veracini's unpublished violin sonatas of 1716, already markedly freer than Corelli's classic examples; and in dance music, particularly light 'galanteries' like the minuet with their simple textures, periodic structures and short melodic motifs.

The *galant* idiom freed composers from the contrapuntal fetters of the church style, to some degree even in the context of church music; its simplicities and miniaturistic nature imposed new fetters, which in turn were thrown off with the reintegration of more contrapuntal means in the obbligato homophony that matured in the last three decades of the century.

DANIEL HEARTZ/BRUCE ALAN BROWN

Galanterie (Ger.). In the early 18th century, a German term for an up-to-date work or piece, as 'theatralische Sachen auch andere Galanterien' (Mattheson: *Das neu-eröffnete Orchestre*, p.119), especially a keyboard work, such as Bach's *Clavier Übung, bestehend in Präludien, Allemanden, Couranten, Sarabanden, Giguen, Menuetten, und anderen Galanterien*. The term has been read here as 'other light pieces such as minuets, i.e. gavottes, bourrées etc', from which the definition of *Galanterien* has been inferred as the light pieces that come between the saraband and gigue in suites, whereas in reality the word seems to be used as a modish, slightly deprecatory reference to all the pieces in the collection. *Galanterie* could also refer to an expressive nuance, especially melodic figuration and ornamentation. The term acquired pejorative, outdated connotations as the *galant* manner went out of fashion later in the century. For further information see D.A. Sheldon: 'The Galant Style Revisted and Re-evaluated', *AcM*, xlvii (1975), 240–69.

Galão, Joaquim Cordeiro (*b c*1762; *d* Lisbon, *c*1834). Portuguese composer. After a quarter-century directing the royal chapel at Vila Viçosa, he was named canon treasurer of the chapel in 1825. In 1831 he settled in Lisbon, where he taught Princess Anna de Jesus Maria. His earliest mass in the Lisbon cathedral archive is dated 1789, and the earliest of his seven vesper psalms for four voices with organ at the Ajuda library is dated 1792. In addition, the cathedral archive at Évora has an undated set of his vesper psalms and a *Magnificat*.

Conscious of not being able to write successful vocal fugues, he enrolled for a course in counterpoint at the Lisbon Seminário Patriarcal at the age of 40. In September 1831 José de Santa Rita Marques e Silva (*c*1778–1837), royal *mestre de capela* at Bemposta and Galão's former pupil at Vila Viçosa, showed how much better he was as a contrapuntist when he rewrote the fugue with which one of Galão's Credos closed. The jury deciding which fugue was the better included, among others, Antonio José Soares (1783–1865), another of Galão's famous pupils.

ROBERT STEVENSON

Galás, Diamanda (Dimitria Angeliki Elena) (*b* San Diego, CA, 29 Aug 1955). American singer and composer. Born to emigrant Greek Orthodox parents, she was initially discouraged from singing but encouraged to foster her talent as a pianist; she performed Beethoven's First Piano Concerto with the San Diego SO at the age of 14. As a teenager she played jazz piano in San Francisco and, using the pseudonym Miss Zina, worked alongside black transvestites in Oakland's underworld. She later worked in the haematology and immunology departments at Scripps College and, while studying psychology and music (1974–9), at the University of California, San Diego medical school. With other students she participated in biochemical experiments involving sadomasochism, acid and mental illness. During this time she gave performances of wordless vocal improvisations at mental institutions, singing with her back to the patients. From 1979 through the early 1980s she toured internationally as an avant-garde vocalist, performing works by Globokar and Xenakis, with whom she had studied, as well as her own compositions.

Galás is best known for her compelling performances of her own 'intravenal electro-acoustic voice work[s]', theatrical pieces involving real-time electronic transformation of her wide-ranging singing voice. Grounded in operatic bel canto training, she pushes her voice to the edge, creating an intense array of innovative and confrontational timbres. Her vocal technique includes special use of body resonance, attention to overtones and subharmonics, new breathing approaches, vocal breaks and

'static', changing pressure on her vocal chords, variable vibrato and pitch inflection. Her characteristic high, sustained and raw screams challenge the boundaries of music and other art forms. Intentionally provocative, her works emerge from her first-hand experience of drug addiction, prostitution and manic depression, as well as her acute awareness of AIDS. When her brother, writer Philip-Dimitri Galás, died of the disease in 1986, she was already creating *Masque of the Red Death*, a three-part denunciation of the cultural response to the illness. In *Plague Mass*, a shorter live version and ongoing evolution of *Masque*, she appears bathed in red stage lights and covered with a blood-like substance.

In contrast to the extroverted expression of earlier works, later compositions operate on a more intimate level. *Vena cava* addresses the horror of isolation caused by mental and emotional illness; *Insekta* deals with a survivor of repeated trauma trapped within an enclosed space; and *Schrei 27*, performed in complete darkness and alternating sudden bursts of high energy vocal material with utter silence, focusses on torture and sensory deprivation. In covers of popular songs and spirituals, such as those on the albums *The Singer* (Mute 9 61278–2) of 1992 and *Malediction and Prayer* (Asphodel 0984–2) of 1998, she transforms borrowed material into laments or dark commentaries, intensifying them through melodic and rhythmic distortion and through her powerful virtuoso performances.

Galás claims influences as diverse as Jimi Hendrix, Maria Callas, Antonio Artaud and his 'theatre of cruelty', her father's New Orleans-style band, gospel, Ornette Coleman, jazz piano and the wailing laments of Maniatic women in southern Greece. Her use of music as a political force has brought denouncement in Italy for blasphemy against the Roman Catholic Church and condemnation from the Christian Right in the USA. Her personal commitment as an activist is visible in her work at AIDS hospices and in her participation in demonstrations organized by ACT UP.

J. MICHELE EDWARDS

Galaxy Music Corporation. American music publishing firm. It was founded in New York in 1931 by George Maxwell, who had been head of the American branch of Ricordi from 1899. Under the leadership of A. Walter Kramer, Galaxy quickly became established as a publisher of serious music, specializing in choral works. Later, under the editorship of Robert Ward, it began publishing symphonic, band and chamber music as well as opera and music for school use. Composers published by Galaxy include William Bergsma, Charles Wakefield Cadman, Mario Castelnuovo-Tedesco, Richard Hageman, Hunter Johnson, Otto Luening, George Mead, George Perle, George Rochberg, Halsey Stevens and William Grant Still. From its earliest years Galaxy's name has been linked in particular with English music; the firm is the exclusive representative of the Stainer & Bell hire library in the USA. In May 1962 Galaxy purchased the firm of Augener, and thereby its subsidiaries Joseph Williams and Joseph Weekes, and formed Galliard Ltd, a wholly owned subsidiary. Galliard continued to distribute the works of these firms and represented Galaxy in Great Britain, in addition to publishing numerous popular works on its own. In November 1972 Galliard was bought by Stainer & Bell, and on 1 July 1989 Galaxy became an imprint of E.C. Schirmer.

W. THOMAS MARROCCO, MARK JACOBS/R

Galbán, Ventura. *See* GALVÁN, VENTURA.

Galeazzi, Francesco (*b* Turin, 1758; *d* Rome, Jan 1819). Italian theorist, violinist and composer. He was trained in Turin, a leading centre of violin playing in the 18th century; later he moved to Rome where (according to Fétis) he was active as a violin teacher, a composer of instrumental music, and musical director of the Teatro Valle for 15 years. Galeazzi published his six duets op.1 (1781) in Ascoli Piceno, where he married and spent his later years. The two volumes of Galeazzi's treatise, *Elementi teorico-pratici di musica*, were published in Rome in 1791 and 1796, the second volume dedicated to his patron in Ascoli, Tommaso Balucanti. The title-page of the second edition of vol.i (Ascoli, 1817; dedicated to another patron, Giovanni Vitale) identifies Galeazzi as a teacher of the violin and mathematics; his many scientific interests are well documented. Few of Galeazzi's compositions are extant; besides two sonatas, six duets and 12 trios, opp.11 and 15, a violin solo, fragments of two violin concertos and the introduction to op.15 no.4 appear as examples in his treatise. A setting of the *Seven Last Words*, dated 1812, has also recently been found.

Galeazzi's *Elementi* is the most comprehensive 18th-century Italian treatise, and one of the most important sources for an understanding of the Classical style in general as well as late Classical trends. The treatise is divided into four main parts, two in each volume. Part I

is 'An Elementary Grammar [of Music]', Part II 'An Essay on the Art of Playing the Violin'. This section, which forms a substantial violin treatise, includes chapters on intonation, equality of sound, bowing, multiple stops, harmonics, ornaments, diminution, improvisation and other topics, as well as chapters on the duties of the orchestral player and director, the proportion of instruments in orchestras of various sizes, and the seating of orchestras in the church, chamber and theatre (Galeazzi included the seating plan of the Turin orchestra – and Rousseau's plan of the Dresden orchestra). Part III, 'Theory of the Principles of Ancient and Modern Music', constitutes a brief history of music, with emphasis on theory. Part IV, 'Of the Elements of Counterpoint', is a treatise on composition, with two main subdivisions. In the first, 'Harmony', Galeazzi discussed harmony and counterpoint (including species counterpoint, canon and fugue); in the second, 'Melody', he remarked on such diverse topics as rhythm, how to stimulate the imagination for composing, sonata form, periodic structure, modulation, the 'conduct' of compositions in vocal, instrumental and mixed (vocal-instrumental) styles, instrumentation and orchestration. The supplement to vol.i (found in vol.ii) describes a metronome invented by the author.

Galeazzi's description of sonata form is the earliest known thematic description, and contains many profound observations on Classical structure. Like other Classical theorists, Galeazzi described the form as a large two-part design. He identified the 'members' (thematic functions) of Part I as: 1. Introduction; 2. Principal Motive; 3. Second Motive; 4. Departure to the most closely related key; 5. Characteristic Passage or Intermediate Passage; 6. Cadential Period; and 7. Coda. Part II contains: 1. Motive; 2. Modulation; 3. Reprise (of the Principal Motive); 4. Repetition of the Characteristic Passage; 5. Repetition of the Cadential Period; and 6. Repetition of the Coda. Each function is discussed in detail and a 64-bar melody is appended to illustrate the form. The essential functions of the first part are nos.2, 4 and 6; the flexible, often altered recapitulation may also begin with no.4 of the second part; no.7 may be replaced by a coda in the modern sense, that recalls earlier material. He also gave 'the earliest clear prescription for a second, contrasting theme in a sonata[-form] movement' (Stevens, 301).

Galeazzi identified the elements of fugue in a similar manner. The treatise is also rich in information on tempo, the expressive associations of keys, definitions of the major musical forms and examples of the *ars combinatoria*. The chapter on modulation shows how more distant modulations can be made through tonic major–minor exchange, irregular resolutions of dissonant chords and enharmonic resolutions. In the second edition of vol.i, Galeazzi added four elaborate tables of bowings (which he also published separately with the title *Arte dell' arco*), short études in the second to seventh positions, and two examples (one more elaborate than the other) of diminutions of a Corelli slow movement. Recent research has also focussed on Galeazzi's remarks on phrase and period structure.

Galeazzi's treatise has copious musical examples. His pedagogical aims are reflected in his attempts at simplification, his schematic arrangements of material and useful summaries. The entire treatise is systematically organized into Articles, Rules, Demonstrations, Explanations, and so on. Galeazzi was familiar with the work of French theorists, especially Rameau and Rousseau, but was also influenced by Quantz (probably in French translation). Choron and Fayolle praised the treatise, and Fétis observed that it was 'a very good book that did not have the success it deserved'.

A letter from Galeazzi, written in Ascoli on 17 October 1816, is in the Masseangeli collection (*I-Baf*).

BATHIA CHURGIN

Galeffi, Carlo (*b* Malamocco, Venice, 4 June 1882; *d* Rome, 22 Sept 1961). Italian baritone. After studies with Giovanni Di Como, Enrico Sbriscia and Teofilo De Angelis, he made his début at the Teatro Quirino, Rome, in 1903 in *Lucia di Lammermoor*. His first great successes were in Palermo (1908) and at the S Carlo, Naples, in *Aida* and *Rigoletto* (1909) and during 1910 and 1911 he appeared in Lisbon, Buenos Aires, Boston and at the Metropolitan. His first appearance at La Scala was in

1912 in *Don Carlos*, and he sang there for 18 seasons (the last time in 1940). He was also engaged at Chicago (1919–21) and returned to Buenos Aires, where he stayed until 1952. Galeffi had a full, smooth voice with an extensive range; it was remarkable for its affecting warmth. His passionate phrasing and dramatically eloquent enunciation made him a first-rate Rigoletto and a fine Verdi interpreter generally (*Nabucco*, *La traviata*, *Un ballo in maschera*, *Il trovatore*, *Don Carlos*). His other important roles included Tonio and Rossini's Figaro. He took part in the first performances of Mascagni's *Isabeau* (1911) and *Parisina* (1913), Montemezzi's *L'amore di tre re* (1913) and Boito's *Nerone* (1924).

RODOLFO CELLETTI/VALERIA PREGLIASCO GUALERZI

Galeno [Galleno], **Giovanni Battista** (*b* Udine, 1550–55; *d* after 1626). Italian composer and singer, active mainly in central Europe. He himself said that he served the house of Habsburg from early youth, probably first as a chorister in the Graz court chapel of Archduke Karl II, in whose domestic chapel he was then employed as an alto from 1572 with a monthly salary of a mere six guilders. On the archduke's recommendation he became the domestic chaplain of the cathedral at Aquileia in north-east Italy on 16 March 1573, and he was ordained priest on 2 February 1575. He left Aquileia for health reasons in 1583 and thanks to the good offices of Simone Gatto, Kapellmeister at the Graz court, was readmitted to the chapel there in 1584. He served at Graz until the death of the archduke in 1590, acting as court chaplain. From 1591 to 1594 he was employed as court chaplain and alto at the Bavarian court chapel at Munich. There is evidence that in 1594 he was senior court chaplain to Archduke Ernst, Regent of the Netherlands, to whom he dedicated his *Primo libro de madrigali a cinque voci* (Antwerp, 1594; 1 in DTÖ, xc, 1954). After Ernst's death he became, on 1 August 1595, court chaplain and alto at the chapel at Prague of the Emperor Rudolph II, to whom he dedicated his *Primo libro de madrigali a sette voci* (Venice, 1598; 1 in DTÖ, xc, 1954). With only a short break from October 1597 to about May 1598, during which he was *maestro di cappella* of Udine Cathedral, he occupied this post until the emperor's death in 1612. There is no record of his subsequent activities, though a reference to him in 1626 in the Prague court records relating to his service under Rudolph II suggests that he was still alive then.

Galeno was a representative composer of pastoral Italian madrigals, in which the influence of the canzonetta may be seen: as in the canzonetta, individual voices are woven into a pseudo-polyphony using musical motives inspired by the text. Although the composer creates complex forms within individual sections, he avoids experimenting with the harmony or with chromaticism. The seven-part pieces sometimes include passages for opposing groups of voices; in this they are not dissimilar to the late seven-part madrigals of Philippe de Monte, which may have influenced them. Apart from his two collections of madrigals the only works of Galeno to survive are a six-part litany to the Virgin (*A-Gu* 97) and the ode *Musa precor facilis*, for six voices, which was his contribution to the collective volume *Odae suavissimae in gratiam et honorem ... J. Chimarrhaei ... a diversis musicis partim V, partim VI voci* (1610[18]).

HELLMUT FEDERHOFER

Galeotti, Stefano (*b* Velletri or Livorno, *c*1723; *d* Italy, *c*1790). Italian composer and cellist. He spent most of his career in Holland, though Fétis states that for health reasons he eventually returned to Italy. The multiplicity of publications of his works from England and France suggests that he also spent some time in those countries. His violoncello sonatas were especially popular as teaching material: John Gunn recommended their use in 1789 and reprints were included in the violoncello methods of J.-B. Bréval (a sonata in D minor) and of the Paris Conservatoire (three sonatas). Most of the sonatas are in three movements, concluding with a minuet. Composed in the *galant* style, Galeotti's writing is melodious and fluently ornamental. The works make greater demands on facility of bowing than on fingering techniques, and feature intricate string-crossing patterns and staccato bowings. Bréval included thumb-postion fingerings and indicated that Galeotti also used bowing undulations and natural harmonics as special effects.

Galeotti was no relation to Salvatore Galeotti (or Galleotti), an Italian violinist probably active in London in the 1760s, with whom he has sometimes been confused; some title-pages ascribe works simply to 'Sigr Galeotti'.

WORKS

Sonatas for vc, bc: 2 as op.1 (London, n.d.); 6 as op.1 (Paris, 1760; London, n.d.); 6 Solos, op.3 (London, *c*1770); 6 as op.4 (Paris, 1785)

Sonatas for 2 vn, bc: 6 as op.2 (Paris, n.d.; London, n.d.); 6 as op.2 (Amsterdam, n.d.); 6 as op.3 (Paris, n.d.; Amsterdam, 1790); 6 as op.4 (London, n.d.; Amsterdam, n.d.); 2 (London, n.d.)

Other works: 6 Sonatas, 2 vc, bc (London, n.d.); 20 Italian Minuets, 2 vn, bc (London, n.d.); Divertimento, 2 vn, bc, *A-Wgm*

VALERIE WALDEN

Galerati, Caterina (*b* Venice; *fl* 1701–21). Italian soprano. She sang in Florence in 1701–2, Venice in 1703, Naples in 1704–7 and 1710–11 (15 operas, including Porpora's *Flavio Anicio Olibrio* and Alessandro Scarlatti's *La fede riconosciuta*), Vienna in 1709, Genoa in 1712 and Milan in 1718. In 1714–15 she appeared frequently in London, mostly in pasticcios and revivals, playing Goffredo in Handel's *Rinaldo* and possibly replacing Anastasia Robinson as Oriana in his *Amadigi di Gaula*. She was a member of the first Royal Academy for two seasons from 1720, singing in Porta's *Numitore*, Handel's *Radamisto* (first as Tigrane, then as Fraarte), Giovanni Bononcini's *Astarto*, the composite *Muzio Scevola* and two pasticcios. Her salary was £250 for the short spring season and £400

from November to June 1721. She specialized in male roles; the 12 parts she is known to have sung in London did not include a single woman. Her compass as Tigrane was *e′* to *a″*.

WINTON DEAN

Galerón. A song genre central to the celebration of the *velorios de cruz* of Venezuela. Texts include traditional improvised *décimas* (octosyllabic verse form usually arranged in ten-line verses) of historical, amorous and religious content and are accompanied by guitar, *cuatro* (small four-string guitar) and maracas. Both the singing style and use of *bandolín* (mandolin) interludes demonstrate the Arab influences on the music of southern Spain. In its more informal, secular setting the *galerón* is danced in couples or in threes (two women and a man, in which case it is called the *tres*) and features handkerchief-waving and *zapateo* (foot-stamping) by the man.

WILLIAM GRADANTE

Galfridus de Anglia (*fl c*1444). English composer. His two two-voice songs, *Io zemo, suspiro* and *Che farò io* (both in *P-Pm* 714 only) set the first and 12th stanzas of a 17-stanza poem by the Ferrarese poet Girolamo Nigrisoli, lamenting the departure from Ferrara of Isotta d'Este, apparently at her first marriage in May 1444. Their musical style resembles that of some English songs in *GB-Ob* Ashmole 191.

DAVID FALLOWS

Galilei, Michelagnolo [Michelangelo] (*b* Florence, 18 Dec 1575; *d* Florence, 3 Jan 1631). Italian lutenist and composer, son of VINCENZO GALILEI. His father destined him for a musical career at an early age. The young Michelagnolo wrote the dedicatory epistle of Vincenzo's *Contrapunti a due voci* (1584). He went to Poland, probably in the service of the Radziwiłł family in 1593 and remained until 1606, having applied unsuccessfully in 1599 for a post at Archduke Ferdinando de' Medici's court in Florence. In 1607 he was appointed to the Hofkapelle of Duke Maximilian I in Munich, where he spent the rest of his life. His last years were clouded by his disastrous relationship with his brother Galileo as well as by the misconduct of his eldest son Vincenzo (*b* 1608), a talented lutenist. Of his eight children, Alberto Cesare (*b* 1617) and Cosimo (*b* 1621) also followed their father's example.

Galilei's music, sought after even before his departure for Poland, was first published in the anthologies of Fuhrmann, Mertel, Besard and Mylius; its circulation seems to have been limited to Southern German countries. Almost all his compositions appear in his first and only book for ten-course lute, engraved in French tablature. Galliards, correntes and voltas, generally provided with varied repeats, are grouped by modes into 10 'suites' each preceded by a toccata; two passamezzos with saltarellos complete the collection. Galilei's works, in which tradition is wedded to modernity (especially of dissonance treatment), express their author's elegance of invention, cosmopolitanism of style and eminently poetic nature.

WORKS

all for lute

CLAUDE CHAUVEL

Galilei, Vincenzo [Vincentio, Vincenzio] (*b* S Maria a Monte, Tuscany, probably in the late 1520s; *d* Florence, bur. 2 July 1591). Italian theorist, composer, lutenist, singer and teacher. He was the leader of the movement to revive through monody the ancient Greek ideal of the union of music and poetry.

1. LIFE. Galilei was probably born later than his traditionally accepted date of birth of about 1520. As a youth he studied the lute. It was probably his playing that attracted the attention of Giovanni de' Bardi, his principal patron, who facilitated his theoretical studies with Zarlino in Venice, probably about 1563. By that time he had settled in Pisa, where in 1562 he married a member of a local noble family. The scientist Galileo (who was born in 1564) was the first of his six or seven children; another was the lutenist Michelagnolo Galilei (*b* 18 Dec 1575; *d* 3 Jan 1631). In 1572 Galilei went to Florence, and his family joined him in 1574. He enjoyed the support of other patrons besides Bardi: in 1578–9 in Munich Duke Albrecht V of Bavaria; about 1584 Jacopo Corsi; and in the summer of 1587 Pietro Lazzaro Zefirini in Siena.

2. WORKS. Galilei's theoretical writing grew out of his lifelong activity as a composer, lutenist, singer and teacher. Although his writing progressed from the purely didactic approach of the *Fronimo* (1568) through the polemics of the *Dialogo* (1581) and *Discorso* (1589) to some highly original compositional theory and scientific observations in his last, unpublished treatises, there was continuity and consistency in his thought, and it was fed by practice, research and experiment. As early as the *Fronimo* he deplored the tendency of modern singers always to seek novelty and difficulty when they should prefer the 'very easy ... because only harmonies that come from notes of some [i.e. longer] value are apt for expressing the human affections' (p.28), and he defended the lute as against the organ for its ability 'to express the affections of harmonies, such as hardness, softness, harshness and sweetness and consequently shrieks, laments, complaints and weeping, with such grace and wonder' (p.30). The songs he arranged for his own bass voice with lute accompaniment about 1570 lean towards the homophonic, with clear declamation, simple harmony and a sharp rhythmic profile. The transcriptions in the two editions of the *Fronimo*, intended to illustrate the proper way of intabulating part-music for the lute, represent only a fraction of those he prepared. In 1584 (*Fronimo: dialogo*, p.102) he promised he would publish his transcriptions

of more than 3000 French, Spanish and Italian songs and Latin motets and more than 500 romanescas, 300 passamezzos and 100 galliards, as well as many saltarellos and airs on diverse subjects. His original pieces show a mastery of instrumental counterpoint and of the resources of tonality. Favouring the new major and minor keys over the church modes, which he deplored as a false system, he recognized that equal temperament was the only solution for instrumental tuning. His lute book of 1584 is one of the first music publications to experiment with equal temperament. The book is comprised of 24 groups of dances, clearly related to 12 major and 12 minor keys. His lute was tuned in G and the first group of dances is in G (major). This was possible because of the well-tempered tuning of his instrument.

About 1570–71 Galilei started to write a compendium of Zarlino's *Le istitutioni harmoniche*, but as he progressed he began to enrich it with information and points of view derived from ancient authors, particularly pseudo-Plutarch, Aristoxenus and Ptolemy, whom he studied through Latin and Italian translations. The draft of his compendium breaks off at a comparison of the octave species of Ptolemy, Boethius and Gaffurius, indicating that he ran into difficulties in interpreting their doctrine. Having heard that Girolamo Mei, a Florentine humanist residing in Rome, had made an extensive study of the Greek 'modes', he appealed to him early in 1572. Their correspondence and two personal consultations that followed marked a new turn in Galilei's career. He was inspired to embark on a programme to correct modern theory and practice through the example of the ancients.

Galilei's new orientation led him to quarrel with his former teacher Zarlino, to whom in 1578 he addressed a short discourse (now lost) outlining, it would appear, some new theories concerning tuning and the modes. The first and longest section of the *Dialogo della musica antica et della moderna* (1581, pp.1–80) indeed deals with these subjects. Galilei set out to prove that the tuning then used in vocal music could not be the syntonic diatonic of Ptolemy, as Zarlino maintained, but had to be a compromise between the Pythagorean diatonic ditoniaion, with its pure 5ths, and the diatonic syntonon, with its consonant 3rds. He also showed that the Greek 'modes' were entirely different from the church modes. Deeply hurt by Galilei's attack, Zarlino did not reply until the *Sopplimenti musicali* of 1588, and he never reconciled himself to his pupil's often well-founded facts and arguments. Galilei answered in a *Discorso intorno all'opere di Messer Gioseffo Zarlino* (1589).

The most lasting contribution in the *Dialogo*, though the least original because it derived from Mei, was the critique of contrapuntal music (pp.80–90). Galilei condemned it as incapable of achieving the fabled effects of ancient music, because the various vocal lines, though set to the same text, pulled in opposite directions. Composers should imitate the ancients, who never sang more than a single melody. Another important belief of Mei found in the *Dialogo* is the opinion that the ancient tragedies were sung from beginning to end, a theory that Cavalieri, Corsi, Rinuccini and Peri later tested in a number of pastorals set entirely to music. Galilei founded his conception of the monodic style on what he had learnt about Greek music from Mei, principally that it was always a single melody, that its rhythms were based on those of poetry and speech and that its melody spanned a narrow range, which was placed in the low, middle or high register depending on the affection. He assumed that the accompaniment was like that used in his own time in simple airs for singing poetry and that it was thus limited to the simplest chords, chiefly 5-3 triads. How well he was able to realize a monodic style based on the ancient models is impossible to judge; his Lamentations and responses for Holy Week and the lament of Count Ugolino from Dante's *Inferno*, which he performed in Bardi's Camerata in 1582, do not survive. Of the early examples of monody that are extant the recitatives and songs in Cavalieri's *Rappresentatione di Anima et di Corpo* (1600) probably come closest to what he had in mind.

Galilei did not neglect polyphonic composition in either theory or practice, but he subordinated the observance of the niceties of imitative counterpoint to the expression of the text. In his two-part treatise on counterpoint, which he drafted in 1588–9 and twice revised, he stated that to the text's 'true expression are subordinated whatever laws might have been given or might ever be given regarding the use of consonance and dissonance' (*I-Fn* Gal.1, f.83*r*; Rempp, 1980, p.47). The works of Rore pointed the way, and 'the contrapuntist will acquire from their diligent examination all he can possibly hope for' (f.100*v*; ibid., 72). Although he believed that the conventional rules for the movement of consonances were adequate, it was wrong to prohibit, for example, two parallel major 3rds or minor 6ths simply because they produced false relations, for the first might suit the composer's desire for a cheerful feeling and the second for a mournful one (f.74*r*; ibid., 33).

Galilei was particularly critical of the rigid rules of dissonance expounded by Zarlino and Artusi. He recognized two kinds of dissonance: those produced by the rapid motion of parts, which he said were acceptable wherever they occurred as long as the voices moved gracefully; and essential dissonances, which the composer deliberately introduced for their effect, particularly through suspensions. Galilei relaxed the rules by permitting the suspended voice to leap, ascend, or move chromatically to a resolution or by allowing the other voice to move simultaneously towards resolution or to a new dissonance. He also recognized the viability of piling up dissonances to form double and triple suspensions and to introduce dissonances other than through suspensions, on both strong and weak beats. He presented dissonance tables, complementing the older consonance tables, showing every possible combination of two and three simultaneous dissonances, and gave examples of their usage (Gal.1, ff.129*r*–134*v*; ibid., 118–27). He emphasized, however, that it was possible to write expressively without dissonances through a careful choice of harmonies, by employing, for example, 6ths from the bass and false relations ('mali relationi') between successive consonances. These ideas are reflected in his second book of madrigals (1587; only the tenor part of the first book of 1574 survives). The texture is mainly homophonic, and expression of feeling is achieved largely through harmonic effects such as dissonances and false relations and through changes of register, duration and metre rather than through conventional word-painting. The expanded tonal realm of Rore and his followers is coloured with touches of melodic chromaticism. Like his patron Bardi, Galilei tended to suppress word repetition in favour of repeating an entire line, particularly the final one.

During his last years Galilei drafted a number of shorter essays (ed. in Palisca, 1989) that are important in the history of acoustics. He reported on experiments with strings of various materials and anticipated several of the revelations about the generation of sound later made by his son Galileo. His most significant discovery was that the ratio of an interval was proportional to string lengths but varied as the square of the tension applied to the strings and as the cubes of volumes of air. Thus the perfect 5th, he showed, is produced by string or pipe lengths (other factors being equal) in the ratio of 3 : 2, by weights hung on equal strings of 9 : 4, and by concave volumes of 27 : 8. He was the first to show that the same ratio e.g. 3 : 2, did not apply to all conditions, and his observation led Galileo to investigate the relationships further and to discover that the rate of vibration varied inversely with the string length; it is thought that he may have steered Galileo towards experimentation and away from pure mathematics.

WRITINGS

all MSS in I-Fn Gal. 1–8

Fronimo: dialogo … nel quale si contengono le vere, et necessarie regole del intavolare la musica nel liuto (Venice, 1568)

Dialogo della musica antica et della moderna (Florence, 1581/R); Eng. trans. in Herman; Eng. trans. with introduction by C.V. Palisca (forthcoming); Eng. trans. of pp.80–90, *StrunkSR2*, iii, 302–22

CLAUDE V. PALISCA

Galimberti [Galinberti, Gallimberto], **Ferdinando** (*fl c*1730–50). Italian composer. Gerber described him as a symphonic composer and 'distinguished violinist' active in Milan about 1740. Between 1740 and 1742 he taught the violin to the Swiss composer Meyer von Schauensee. Ten symphonies copied by 'Meyer' are in the library of Engelberg Abbey. Numerous sacred works by Galimberti survive, reflecting his activity as a church composer, and those in Einsiedeln, acquired in 1751, include a *Miserere* and *Dies irae* dated 1744. Other sacred works exist elsewhere, mostly in Engelberg. Galimberti was one of the earliest symphonists; most of his 15 possibly authentic symphonies probably date from the 1730s or even earlier. They call for a string orchestra *a* 3 or *a* 4, sometimes with two horns, and contain three movements, usually with a non-minuet finale. Five symphonies ascribed to Galimberti in the Fonds Blancheton (*F-Pc*) have few Baroque traits. Their thoroughly homophonic texture is enlivened by violins in dialogue, a Milanese hallmark. Fast movements, often in 2/4, use sonata form, with strong thematic contrasts in some cases, long developments and full or partial recapitulations (of cadential material) which further vary the thematic ideas. Slow movements are binary and lyrical. The Einsiedeln *Miserere* (1744) has 14 movements and is scored for a large orchestra, chorus and solo vocal quartet. The musical vocabulary, consistent use of sonata form, and symphonic-dramatic emphasis resemble the sacred works of G.B. Sammartini.

WORKS

Ov. no.2 in 6 ouverture a piu stromenti composte da varri autori, op.4 (Paris, *c*1753–5), ?by Giorgio Giulini

BATHIA CHURGIN

Galin, Pierre (*b* Samatan, 1786; *d* Bordeaux, 31 Aug 1821). French teacher of mathematics. He was originator of a method of teaching sight-singing. He received his education at the Lycée in Bordeaux and the Ecole Polytechnique. Appointed a teacher, first at his former school and then at the Bordeaux School for the Deaf and Dumb, he worked to perfect the teaching of science and mathematics. He also turned his attention to music teaching, convinced that the difficulty of learning to read music was due to existing methods of teaching the subject. Having analysed the theory of music scientifically, Galin began to teach a group of children; after a year's experiment he published an account of his method (not a textbook) in *Exposition d'une nouvelle méthode pour l'enseignement de la musique* (1818; part Eng. trans., 1983, as *Rationale*), based on the figure-notation first proposed by Rousseau in 1742. The book was remarkable for its clearsighted analysis of the music teacher's problems. The success of his first pupils next encouraged Galin to establish himself as a teacher of music in Paris in 1819. He taught classes of children and trained a number of young teachers to employ his method. Subsequently, although several of his pupils attempted to continue Galin's work, only Aimé Paris was ultimately successful. He was joined by his sister Nanine, and her husband Emile Chevé, and the trio elaborated Galin's basic method into a full course of training complete with textbooks and published exercises. Under the composite title of the GALIN-PARIS-CHEVÉ METHOD, the resulting system enjoyed wide use in many countries and has survived in some areas.

BERNARR RAINBOW

Galindo Dimas, Blas (*b* San Gabriel [now Venustiano Carranza], 3 Feb 1910; *d* Mexico City, 19 April 1993). Mexican composer of Huichol Indian descent. At the age of 19 he began playing the village church organ by ear, and a year later he played the clarinet in the village band. He entered the Mexico City National Conservatory in 1931 to study with Carlos Chávez (composition), Rodríguez Vizcarra (piano), Huízar and Rolón. On returning in 1935 from several months as a music teacher in the rural teachers' school El Mexe, Hidalgo, he formed with Ayala Pérez, Salvador Contreras and José Moncayo the 'Group of Four' dedicated to propagating their works

and to creating a Mexican music using indigenous instruments and melodies.

Under Chávez's patronage, Galindo Dimas was introduced to the New York public at a Museum of Modern Art concert (16 May 1940), which included the *Sones de Mariachi*, a colourful medley of Mexican street serenades that remained his most widely played work. He studied with Copland at the Berkshire Music Center (1941, 1942), where in the latter year his orchestral suite *Arroyos* was played, and he continued his conservatory studies until 1944, when he received the title *maestro en composición*. After three years as a teacher of harmony, counterpoint and composition at the conservatory, he was appointed its director (1947–61), and also in 1947 he was made head of the music department at the National Institute of Fine Arts. In 1949 he was invited to adjudicate at the Chopin Competition in Warsaw; during his visit to Europe he officially inspected music schools in seven countries.

He was music director of the Instituto Mexicano de Seguro Social SO (1960–65), and in spring 1964 he conducted the Madrid appearances of the Ballet Popular Mexicano. Galindo was a founder-member of the Mexican Academy of Arts (1966) and a recipient of the National Arts Prize (1964). His works have embraced all of the reigning vogues from peppery folklore through brazenly dissonant, contrapuntal abstracts to light shows.

ROBERT STEVENSON

Galïnin, German Germanovich (*b* Tula, 30 March 1922; *d* Staraya Ruza, 18 July 1966). Russian composer. He studied in Moscow with Litinsky, Myaskovsky and Shostakovich. His works continue the Russian traditions of Balakirev, Borodin, Myaskovsky, Shostakovich and Taneyev. His style is characterized by vivid themes, and by melodious and theatrical musical ideas (particularly in his early works) while the role played by polyphony, and the influence of Bach, is important. He made wide use of Russian folksong, leaning both on the traditions of the Five and of 20th-century composers such as Bartók. His harmonic language is fresh and his methods of orchestration are frequently unusual. His most important works include the First Piano Concerto, the *Suite* for strings, the oratorio *Devushka i Smert'i devnshka* ('The Maiden and Death') and the *Epicheskaya poèma* ('Epic Poem'). The last-mentioned work was awarded the State Prize in 1951. Interpreters of his works include Tat'yana Nikolayeva, Gennady Rozhdestvensky and Yevgeny Svetlanov. His untimely death from a serious illness cut short the life of one of the most gifted Russian composers of the mid-20th century.

GALINA GRIGOR'YEVA

Galinne [Gal'in], **Rachel** [Gluchowicz, Rachel S.] (*b* Stockholm, 7 Feb 1949). Israeli composer of Swedish birth. After graduating from Uppsala University (BA 1974) she moved to Israel and studied composition with Leon Schidlowsky at the Rubin Academy at Tel-Aviv University (BM 1984, MM 1988). She represented Israel at the UNESCO Rostrum in Paris in 1990 with *Islossning* (1984), and was awarded the Prime Minister's Prize for Composers in 1993. Her *Cycles* (1986) displays the influence of Lutosławski and Ligeti, while that of Mahler and Paul Ben-Haim is evident in *Symphony no.1* (1996). Both works were performed by the Israel PO in 1996. One of the foremost Israeli women composers, Galinne devotes her time solely to composition. In *Uneginotai Nenagen* (1993), based on a motif from Mordecai Seter's *Midnight Vigil*, she depicts the spiritual elevation expressed in the text by means of a process evolving gradually from an atonal, densely contrapuntal texture to pure tonality. She invokes a eclectic range of stylistic tendencies through smooth synthesis rather than confrontational juxtaposition.

WORKS
(*selective list*)

Orch: Islossning, 2 pf, perc, 1984; Cycles, 1986; Conc., 2 pf, orch, 1988; Trio, cl, va, pf, 1989; Sym. no.1, 1996; Sym. no.2, 1998

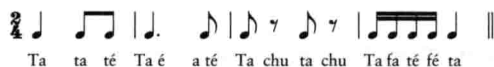
Vocal: Uneginotai Nenagen [And We Shall Sing my Song of Praise] (Isaiah xxxviii), 16-pt mixed chorus, 1993

Principal publisher: Israel Music Institute

RONIT SETER

Galin-Paris-Chevé method. A French system of teaching sight-singing. It was based on the figure-notation proposed by Rousseau in 1742 but with later modifications introduced by Pierre Galin, Aimé Paris and his sister Nanine, and her husband Emile Chevé. The central feature of the method is a notation of numerals from 1 to 7, with 1 representing the major tonic. Allowing a compass of three octaves for vocal music, the lower and upper octaves

respectively are marked by the insertion of dots below or above the numerals (1̣ 2̣ 3̣ 4̣ 5̣ 6̣ 7̣ 1 2 3 4 5 6 7 1̇ 2̇ 3̇ 4̇ 5̇ 6̇ 7̇). Key is shown by a simple statement at the beginning of a piece, for example 'F = 1: ton *fa*'. Accidental sharps are marked with an oblique stroke through the numeral from left to right, flats by a stroke in the opposite direction; rests are shown as zeros (ex.1). Where several



Ex.1

numerals share a bar or part of a bar, they share its value equally. Smaller note values are shown by the use of horizontal lines, somewhat similar to the tails of grouped quavers or semiquavers, placed above notes that share beats or parts of beats. Longer notes have their continuation indicated by large dots, which share the value of the bar in the same way as the notes themselves. Pupils employ the sol-fa syllables *do*, *ré*, *mi*, *fa*, *sol*, *la* and *si* when singing exercises, not the numbers themselves. Accuracy of intonation is encouraged by the use of *points d'appui* (preparatory notes to be thought of, not sung) before attacking more demanding intervals; these are indicated by smaller numerals (e.g. 1 3 5 1_5 6_5 4_3 2_1 7̣).

The method was planned as an approach to standard notation, not as an alternative notation in its own right. Pupils are introduced to staff notation by means of the 'méloplaste', a vacant staff on which notes and intervals are pointed out with a baton. Note lengths are familiarized by means of a series of rhythmic note names which, when spoken aloud, pattern the effect of the notes concerned (ex.2).

Ex.2

All these devices were first made widely known in *Méthode élémentaire de musique vocale* (1844), published jointly by Chevé and his wife. In spite of considerable opposition from professional musicians in France, the method gained wide popularity there during the second half of the 19th century, largely through the vigorous propaganda of Emile Chevé. It was employed in many schools, teacher-training colleges and in the Ecole Polytechnique, as well as in the army and navy by 1875. By that time it had also been adopted in Switzerland, the Netherlands and Russia. Also introduced at that time into a few English private schools by Andrade, the method had its formal introduction to the professional musician in Britain when George Bullen read a paper on the subject to the members of the Musical Association in 1878.

BERNARR RAINBOW

Galiot, Johannes (*fl* 1380–95). French composer. He left only two or three compositions, which show the style of the Ars Subtilior at its height: a three-voice ballade *Le sault perilleux*, a work of considerable rhythmic complexity with a remarkable notational technique and a Latin–Greek canon, appears in the Chantilly Manuscript (*F-CH 564*) at the beginning of a fascicle (perhaps the beginning of the old corpus of works) on a page that has often been reproduced for its marginal illustrations (e.g. *MGG1*, ii, pl.34; *MD*, xxxviii, 1984, p.112); Vaillant used it in Paris to explain the proportion 9:8 to his students. *En attendant d'amer*, a three-voice rondeau with strict isorhythmic structure, has an exceptionally syncopated melodic style. The anonymous rondeau refrain *Se vos ne voles*, following on the same page, may also be his work.

The Chantilly manuscript wrongly ascribes two further works to Galiot. Both also begin *En attendant*, but both are ascribed to other composers elsewhere (in *I-MOe* α.M.5.24). One of them, *En attendant esperance*, is quite clearly by JAQUEMIN DE SENLECHES on stylistic grounds; the other, *En atendant souffrir m'estuet*, a ballade mentioning the arms of Bernabò Visconti, must be by PHILIPPUS DE CASERTA, since Ciconia quoted the opening of the song in his *Sus un' fontayne*, a virelai which also contains two further direct quotations from Philippus. It seems likely, though, that Galiot also had dealings with the Viscontis (*StrohmR*; this seems more likely than Strohm's suggestion that 'Jean Galiot' may be a French misspelling of 'Gian Galeazzo', i.e. Visconti). (All his works are ed. in PMFC, xviii–xix, 1981–2.)

Galkin, Elliot W(ashington) (*b* Brooklyn, NY, 22 Feb 1921; *d* Baltimore, 24 May 1990). American music critic and conductor. He attended Brooklyn College (BA 1943), took conducting diplomas in Paris at the Conservatoire and the Ecole Normale de Musique (1946–9) and studied musicology at Cornell University (MA 1950), where he took the doctorate in 1960 with a dissertation on orchestral conducting which he later revised and published as *A History of Orchestral Conducting in Theory and Practice* (New York, 1988). As a Fulbright Fellow he attended the university and the music academy of Vienna and became apprentice conductor at the Staatsoper (1955–6). He then worked at Goucher College (from 1956; from 1964 as professor), and in 1957 was appointed to the staff of the Peabody Conservatory, where he was conductor from 1957, and chairman of the department of music history and literature from 1964. He was director (1977–82) following its affiliation with the Johns Hopkins University, where he had earlier been conductor (1958–62) and director of musical activities (from 1969). His music criticisms appeared in the *Baltimore Sun* (1962–77)

and other papers. He was president of the Music Critics Association, 1975–7.

PAULA MORGAN

Gall, Jan Karol (*b* Warsaw, 18 Aug 1856; *d* Lemberg, 30 Oct 1912). Polish composer, choral director, teacher and critic. After graduating in piano and music theory from the music school of the Muza music society in Kraków (after 1867), he subsequently studied composition with F. Krenn at the Vienna Conservatory, and with Rheinberger and M. Sachs in Munich. From 1879 to 1881 he lived in Kraków, where he began his career as composer and critic. In 1882 he was conductor of the Andante Choir in Leipzig and associate répétiteur for the opera chorus in Weimar; here his songs came to the attention of Liszt. In 1883 he went to Italy to deepen his knowledge of the art of singing, and consulted various teachers including F. Lamperti. From the autumn of 1884 he was conductor of the Music Society in Lemberg, and at the end of 1888 he went to Dresden and Leipzig, where he became musical advisor to the publisher of his songs, Leuckart. From 1890 to 1895 he taught music history, theory and solo singing at the conservatory in Kraków, and from April 1895 he worked in Breslau, as a singing teacher at the conservatory, and as conductor of the Musikverein. Following travels to Switzerland, France, Spain and Scandinavia he settled in Lemberg in 1896, accepting the position of the director of Echo, the choral society which later changed its name to Echo-Macierz. He transformed it into one of the best choirs of its type in Poland, and travelled with them on their frequent concert tours.

During the course of his life Gall wrote hundreds of concert reviews and articles about music for journals including *Nowa reforma* (1884–5 and 1889–91), *Gazeta Lwowska* (1885–8), *General Anzeiger* (1895) and *Wiek nowy* [New Century] (1897, 1902–4). He was a well-skilled but severe critic who tended to point out composers' mistakes. He was also an adjudicator for music competitions and a lecturer.

Gall's strongest creative talent was for the composition of a wide repertory of songs, mainly for solo voice and piano or for choir, and also for female voices and piano. They demonstrate his understanding of the nature of the human voice, the flow of the melodic line and precise prosody, all of which contributed to their success. Some are still performed. However his compositional technique does not appear to have developed significantly during his career.

WORKS

STAGE

Barkarola [Barcarolle] (dramatic scene, M. Gawalewicz), Warsaw, 7 Oct 1884

Viola (comic op, based on trans. of W. Shakespeare: The Merry Wives of Windsor), 1886

Frasquita (comic op), 1886

BARBARA CHMARA-ŻACZKIEWICZ

Gall, Yvonne (*b* Paris, 6 March 1885; *d* Paris, 21 Aug 1972). French soprano. She studied at the Paris Conservatoire and in 1908 was engaged by Messager at the Opéra as Woglinde in the first production there of *Götterdämmerung*. Keeping the French lyric roles such as Marguerite, Manon and Thaïs at the centre of her career, she developed a powerful voice and added more dramatic parts such as Elsa and, in 1923, Isolde to her repertory. At Monte Carlo she sang in the premières of operas by Raoul Gunsbourg, the impresario of the house: *Le vieil aigle* (1909), *Le cantique des cantiques* (1922) and *Lysistrata* (1923). Abroad, she appeared with success in Buenos Aires and in Chicago, where she sang in the first American performance of *L'heure espagnole*. Tosca was the part in which she appeared at La Scala and in her only performances at Covent Garden (1924); Ernest Newman remarked that she presented 'three capable Toscas, a different one in each act'. One of her last appearances was as Phoebe in Rameau's *Castor et Pollux* at the Maggio Musicale, Florence, in 1936. Her bright, very French soprano is heard in many recordings, notably in one of the first complete operas on record, Gounod's *Roméo et Juliette* (1912).

J.B. STEANE

Gallarati, Paolo (*b* Turin, 18 June 1949). Italian musicologist. He graduated in music history at Turin University (1973). He was lecturer in music history at Turin (1977–9) and in 1980 was appointed associate professor in the history of opera. His musical interests include opera in the 18th and 19th centuries; in his publications he examines Gluck and operatic reform, the aesthetics of 18th-century opera, Mozart's dramatic craftsmanship and some stylistic aspects of Weber and Rossini.

TERESA M. GIALDRONI

Gallarda (Sp.: 'elegant', 'dashing'). The Spanish equivalent of GALLIARD, a lively triple-metre dance popular in 16th- and 17th-century Europe. A galliard choreography under the Spanish name appeared in Antonius de Arena's treatise *Ad suos compagnones studiantes ... bassas dansas* (?1519), and the characteristic rhythms of the dance formed the basis of several sets of *diferencias* or variations by Cabezón in the mid-16th century. Apparently the Spanish term also referred to a duple-metre dance, for a number of variations on duple *gallardas* were composed by Juan Cabanilles (ex.1); each retains the bass line of an eight- or ten-bar dance strain as an ostinato unifying the set. A 17th-century choreography for the *gallarda* describes a highly ornamented version of the 16th-century dance with shakes of the feet preceding some steps and vigorous leaping and twisting of the body, but it seems unrelated to the duple-metre form of the dance used by Cabanilles.

Gallay, Jacques François (*b* Perpignan, 8 Dec 1795; *d* Paris, 18 Oct 1864). French horn player, teacher and composer. He studied solfège with a local musician when he was only ten, and two years later, he began to learn the horn with his father. At the age of 14, already a member of the Perpignan theatre orchestra, he made his solo début in Devienne's *Les visitandines*. In 1818 he was appointed director of a new local music society, and began composition lessons with the son of the bassoonist Ozi who had settled there. After six months, his First Horn Concerto was completed and performed. In 1820, though over-age, he entered the Paris Conservatoire to study with Dauprat. He won the *premier prix* a year later, and was allowed to play his own composition at his laureate concert. After graduation, he joined the Odéon orchestra, leaving in 1825 to become principal horn at the Théâtre Italien, a post he held for many years. In 1830 he joined the royal chapel, and two years later became first horn for Louis-Philippe's private ensemble. After ten years as an extra, Gallay succeeded Dauprat at the Société des Concerts in 1841, and in 1842 succeeded him again, as natural horn professor at the Conservatoire, where he remained until his death. He was made a Chevalier of the Légion d'Honneur.

Gallay was the last major hand-horn figure in France. Reports of his playing praise a bright tone quality, evenness between open and stopped notes (aided by a preference for a narrow bell throat), secure attacks and clear technique; he produced trills in a curious manner, using a fluttering of the tongue. He composed concertos, solos and chamber music, primarily for horn, and a considerable number of exercises, addressing technical and musical issues, still widely used today. Most significant are his *Préludes mésurés et non mésurés*, which provide insights into cadenza-type performing practices. Gallay also produced a *Méthode* (Paris, 1843) which, though using 'first' and 'second' designations, focusses on the upper two octaves of the range, promoting even stopped and open tone colours. This limited range was the most practical for solo playing, though some, including Fétis, found it occasionally monotonous. Gallay's compositions demonstrate a player's understanding of the instrument, which may account for his apparent influence on the sound and technique associated with horn-playing in France for many years.

JEFFREY L. SNEDEKER

Gallego (Sp.: 'native of Galicia'). A term used to denote the music, song and dance of Galicia, and the Galician bagpipe, hurdy-gurdy and jew's harp. It is used chiefly for a 16th- to 18th-century variant of the VILLANCICO with Galician dialect in its text and, characteristically, drones in its bass line. It is possible that the bagpipe, hurdy-gurdy

or jew's harp was used in its performance; the first two are known to have been played in Mexico City Cathedral in the 17th century, along with the trumpet marine. The examples by Juan Gutiérrez de Padilla, the Mexican *maestro de capilla* at Puebla Cathedral, are probably the best known, one of them even having reached a Spanish archive; numerous examples by other composers exist, mostly anonymous.

E. THOMAS STANFORD

Gallego, Antonio (*b* Zamora, 21 April 1942). Spanish musicologist and music administrator. He studied law at the University of Salamanca, art history at the Complutense University in Madrid, and music at the conservatories in Salamanca and Valladolid. He worked for Organería Española and at the Real Academia de S Fernando, where he began his research into the history of recording in Spain, a subject on which he is a recognized specialist. He taught music history (1978–82) and musicology (1982–97) at the Madrid Conservatory; however, after a decade of participation in debates on the reform of Spanish musical education, including taking part in polemics in the press, he left teaching, disillusioned by the state of music teaching in Spain.

As director of cultural services for the Juan March Foundation (from 1980), he set up the Centre for the Documentation of Contemporary Spanish Music (now the Library of Contemporary Spanish Music). He was the founder of the Spanish Musicological Society and the first manager of *Revista de musicología*. He has taken part in a number of publishing and recording projects and has been constant in his efforts to promote music in the press, on radio and through concerts, as well as editing didactic works. A collector of scores and music books, he has published a large number of facsimiles.

A brilliant scholar of Spanish music since 1750, Gallego has, thanks to his broad humanist and legal training, been able to tackle hitherto untouched fields, such as music legislation, professionalism and music editing. He is a leading specialist on the life and works of Falla, on whom he has published several books and many articles which have updated the traditional interpretation of the early 20th-century composer.

XOÁN M. CARREIRA

Gallenberg, (Wenzel) Robert, Graf von (*b* Vienna, 28 Dec 1783; *d* Rome, 13 March 1839). Austrian composer and administrator. He was descended from an old Carniolan noble family. Having studied composition with Albrechtsberger, he soon earned a reputation as something more than an aristocratic dilettante. On 3 November 1803 he married Countess Giulietta Guicciardi, Beethoven's pupil and the dedicatee of the 'Moonlight' Sonata. He had modest success with the Singspiel *Der kleine Page* (21 January 1804, Theater an der Wien) before moving to Italy, where he quickly earned a reputation as a ballet composer. In May 1806 he was largely responsible for the music at the celebrations in Naples in honour of Joseph Buonaparte. Gallenberg returned to Vienna in 1822 and took a leading part in the administration of Barbaja's opera season at the court opera. From October 1828 until May 1830 he was lessee of the Kärntnertortheater but he suffered heavy losses and left Vienna, spending the remaining years of his life in France and Italy.

Harshly criticized in the *Allgemeine musikalische Zeitung* of 11 April 1804 for slavish imitation of Mozart and Cherubini, Gallenberg nevertheless supplied a public demand with his piano pieces and once-popular ballet scores – and in a 20-year-old it is hardly reasonable to expect much beyond a sensible choice of models. His numerous ballets (some authorities place the number as high as 50) include examples of almost all the genres then familiar, the subjects being taken from Shakespeare, the Old Testament, mythology and history. Among his most successful were *Wilhelm Tell* (1810), *Samson* (1811) and *Die Silberschlange* (1821, performed 57 times) for the Theater an der Wien, *Alfred der Grosse* (1820), *Jeanne d'Arc* (1821), *Arsena* (1822) and *Ismaans Grab, oder Die bezauberten Instrumente* (1823) for the Vienna Court Opera and *Arsinoe e Telemaco* (1813) and *Amleto* (1817) for Milan. The popularity of *Arsena* and *Ismaans Grab* is attested by the fact that they were parodied; other ballets

were published in piano reductions. Gallenberg also wrote overtures, marches, dances and songs. A number of his works were published in Vienna by Artaria, Mechetti and others; his manuscripts are in (Vienna *A-Wn*).

PETER BRANSCOMBE

Galleno, Giovanni Battista. *See* GALENO, GIOVANNI BATTISTA.

Gallerano, Leandro (*b* Brescia, end of 16th century; *d* Padua, 1631). Italian composer and monk in the Observant order. Information on his early life comes solely from the title-pages of his published works. He was organist of the convent of S Francesco, Bergamo, in 1615 and in 1620 he held an equivalent post at S Francesco, Brescia. On 17 October 1623 he was appointed *maestro di cappella* of the basilica of S Antonio, Padua, replacing Giovanni Ghizzolo, and he remained there until his death. He was a member of the Accademia degli Occulti in Brescia, adopting the pseudonym 'Accademico Involato', which first appears on the title-pages of his works in 1624. His output consists entirely of church music, the majority of it settings for the Mass and offices, mostly for four or more voices with organ; the *Curioso misto di vaghezze musicali* (1628), formerly in the Biblioteka Uniwersytecka, Wrocław, and now lost, was a collection of 14 Latin motets for solo voice and basso continuo. His masses use both a moderately contrapuntal style and the new concertato style with organ. The 1615 collection includes a Requiem. The motets of the *Ecclesiastica armonia* are more up to date in both texture and style, representing the composer's first contribution to the *stile concertato*. Of the 21 pieces which make up the collection, three use obbligato instruments: *Nolite me considerare*, for soprano and basso continuo with two violins, has pleasant, idiomatic string writing, while *Gaudeat ecclesia* and *Sono tubae tympano* (with texts from the antiphons of the Office of Julian of Spira for the feast of St Anthony, patron saint of the basilica of Padua) call for two voices (soprano and bass and two sopranos respectively), two violins, supported by a trombone, and basso continuo. The 'grand' *stile concertato* is well represented by the *Messa e salmi* of 1629, a composite collection intended for the most part for the Vespers of the Comune Sanctorum (male cursus) with music both in the Venetian style of *cori spezzati* and in a mixed concertato style, and with occasional use of obbligato instruments, particularly two violins and chitarrone. The work begins with a valuable 'dichiarazione' on how to perform the mass and psalms.

JEROME ROCHE/RODOBALDO TIBALDI

Gallery music. A late 19th-century term for the sacred music performed in rural English churches and chapels during the 18th and early 19th centuries. It is so called because the singers and instrumentalists often occupied the gallery, usually at the west end. The unsatisfactory state of congregational singing by the late 17th century, particularly in provincial parish churches, resulted in the formation of amateur, initially male, choirs. Unfortunately, their increasing skill and desire for more elaborate music silenced the very congregations they were supposed to encourage.

Country churches usually lacked organs, but singers needed support in order to maintain pitch in complex music. From the mid-18th century singers began to be accompanied, at first by a bass instrument and later by a small band. The most common instruments used were bassoons, cellos, clarinets, flutes and violins, but the size and instrumentation of bands varied according to availability. At first the instruments merely doubled the voices, often playing the upper parts an octave higher. Later, short symphonies were added, sometimes with designated instrumentation, especially in more sophisticated music such as that by Joseph Key.

The repertory consisted primarily of metrical psalms and anthems; fuging-tunes were particularly popular in the mid-18th century (*see* FUGING-TUNE). Itinerant singing teachers, such as Michael Beesly and William Tans'ur, sold their own collections of psalmody, borrowing freely from each other. However the prohibitive cost of printed books meant that many country musicians made their own manuscript compilations. Most gallery composers were amateurs, and while some, such as John Chetham, may have been conventionally trained, others, such as William Knapp, probably learnt their skills from fellow

psalmodists. Lack of formal technique resulted in an idiosyncratic, occasionally archaic style. The early repertory in particular was still based on the Renaissance concept of linear composition, with a tendency for open 5ths and false relations. Although this music may break theoretical rules, using unexpected dissonances and consecutive 5ths and octaves, it can show great originality, with inventive word-painting and strong melodic lines. Another characteristic is the dominance of the tenor voice. The number of parts varied, but throughout the 18th century the tenor carried the tune, often doubled an octave higher by treble voices.

Gallery music was regarded as a financially and artistically viable genre by professional composers, including John Alcock (elder and younger), Capel Bond, William Hayes the elder and Samuel Webbe the elder, who produced psalmody books 'for the use of country choirs'. Its demise was caused partly by the increased urbanisation of the Industrial Revolution, and partly by demands for a more polite and formal style of worship, culminating in the Oxford Movement and the eventual introduction of *Hymns Ancient and Modern* (1861). Some 'improved' tunes still exist in modern hymn books, and, despite the growing use of harmoniums and organs, a few bands survived until the end of the 19th century.

A parallel development occurred in the music of nonconformist churches, where organs were generally excluded and bands tended to be introduced later and to remain in use longer than in Anglican churches. Northern Methodist composers, such as James Leach of Rochdale and later John Fawcett of Bolton, developed characterstic florid repeating tunes with contrasting dynamic passages sung by treble voices in thirds, and produced orchestrated set-pieces for Sunday school and church anniversaries. The Methodists, in particular, regarded full congregational involvement as a vital element of worship, and often fitted their hymns to secular operatic and popular melodies.

English gallery music has links with American psalmody and with the present Sheffield carolling tradition. However it was generally forgotten and condemned, except in a few nostalgic publications, and, more recently, in Nicholas Temperley's definitive work. A West Gallery Music Association, concerned with the revival of this music, was formed in England in 1990.

SALLY DRAGE

Gallet, François [Galletius, Franciscus] (*b* Mons, *c*1555; *d* after 1585). Flemish composer. He studied at the Jesuit college in Anchin (near Douai), and in 1582 became chaplain of the collegiate church of St Amé in Douai; an archival document dated October of the same year describes him as *maistre de chant* of the church. He resigned from this post in 1584, but remained chaplain until 1586. He seems to have been in close contact with Robert de Melun, Marquis of Roubaix, who died in 1585 and to whose memory he refers in the motet *Adesto dolori meo*.

A Counter-Reformation composer, Gallet had his *Hymni communes sanctorum* for four to six voices and [29] *Sacrae cantiones* for five, six and eight voices published by Bogard in 1586. The dedications, both signed in Douai, are addressed respectively to the superior of the Premonstratensian abbey of Vicoigne and to Florent de Berlaymont, brother-in-law of Robert de Melun. The hymns are closely related to liturgical melodies and constitute a rare instance of the publication of polyphonic hymns in the southern Netherlands. The motets, usually on sombre texts, are in the tradition of Lassus.

HENRI VANHULST

Gallet, Luciano (*b* Rio de Janeiro, 28 June 1893; *d* Rio de Janeiro, 29 Oct 1931). Brazilian composer and ethnomusicologist. He attended the Instituto Nacional de Música, where he took a gold medal at the conclusion of his piano studies (1916) and where his principal teachers were Oswald (piano) and França (harmony). But the men who had most influence on him were the composer Glauco Velásquez and later the writer Mário de Andrade. In Rio during World War I he came into contact with Milhaud, who introduced him to the newest works of Schoenberg and Stravinsky, though Gallet's first compositions (1918) have a Romantic and Impressionist character. During the 1920s he taught the piano at the Instituto, where he occasionally conducted the orchestra and chorus; he directed the Instituto in 1930–31. In addition he founded the Sociedade Pró-Arte (1924), edited *Weco* (1928) and was founder-director of the Associação Brasileira de Música (1930).

Together with Andrade, Gallet pioneered the study of Brazilian folk music. He was particularly concerned with the definition of folk and popular music, and with devising means of using its characteristics in compositions. His first efforts were harmonizations, the *Canções populares brasileiras*. Among his nationalist piano pieces, perhaps the most successful is *Nhô chico*; the series of *Exercícios brasileiros* is based on the most typical melodic and rhythmic traits of folk music. Andrade edited his *Estudos & folclore* (Rio de Janeiro, 1934).

GERARD BÉHAGUE

Galley, Johann Michael (*b* Hagnau, Lake Constance, *c*1650; *d* Augsburg, 16 Jan 1696). German composer. From 1669 he studied at the University of Ingolstadt, where he wrote the music (now lost) for the dramas *Sigericus* (1673) and *Solimanus* (1674), performed at the Jesuit theatre. Later he became Kapellmeister of the cathedral at Konstanz, where he is also known to have composed the music for plays staged at the Jesuit Gymnasium in 1676, 1681, 1689 and 1690. In 1692 he succeeded Johann Melchior Caesar as Kapellmeister of Augsburg Cathedral. He published *Aurora: Musicalium fabricationum* (Konstanz, 1688), which contains 20 sacred songs for two to six voices. Two fugues and an *Aria sub elevatione* for organ also survive (*D-DO* Mus.1486, 1488). (A. Layer: *Augsburger Musik im Barock*, Augsburg, 1968)

ADOLF LAYER

Galli, Amintore (*b* Perticara, Rimini, 12 Oct 1845; *d* Rimini, 8 Dec 1919). Italian critic, teacher and composer. He studied with Croff and Mazzucato at the Milan Conservatory, 1862–7, joining Garibaldi during the 1866 war against Austria, along with his fellow-students Marco Praga, Faccio and Boito. In Carnival 1865 his *Cesare al Rubicone*, a *gran scena ed aria* for baritone, chorus and orchestra, was successfully performed in Rimini, and on graduating he won the composition prize for his secular oratorio *Espiazione* (1867) to his own text after Moore's *Lalla Rookh*. He then conducted the band in Amelia, Umbria, and was director of the music school in Finale Emilia, 1871–3 (several early works are extant in *I-FEM*, including a quartet, three symphonies, sacred music and the oratorio *Cristo al Golgota*, 1871).

Galli returned to Milan as music critic of *Il secolo*, published by Sonzogno. He took charge of Sonzogno's music publishing, arranging vocal scores, translating French librettos and replacing spoken dialogue with recitative. He was responsible for a series of cheap editions and sat on the jury of Sonzogno's opera competitions (which led to *Cavalleria rusticana* among other works). He also taught at the Milan Conservatory (1878–1903) and wrote didactic works. His *Estetica della musica* (1900) is written along lines of Kantian idealism, also evident in his historical writings. Of his many pedagogical works of music theory, the *Trattato di contrappunto e fuga* (1877) was long used at the Milan Conservatory. He edited several periodicals, including *Il teatro illustrato* (1881–92) and *Musica popolare* (1882–5). He retired from Sonzogno in 1904 and in 1914 returned to Rimini.

He had two operas performed, *Il corno d'oro* (Turin, Balbo, 30 August 1876) and *David* (Milan, Lirico, 12 November 1904), which is in five acts and to his own libretto; both were published by Sonzogno. Three others remained unperformed: *Follia tragica*, *Roma* and *Il risorgimento* (the last two to his own librettos). He also composed sacred, chamber, orchestral and band works (several songs are in *I-Mc*). His papers are collected in the Biblioteca Civica Gambalunga, Rimini.

MARCO BEGHELLI

Galli [Gallus], **Antonius** [Antoine] (*d* Vienna, 2 April 1565). Franco-Flemish composer. In 1545 he was appointed choirmaster at St Donatian, Bruges, having previously been choirmaster at St Saviour there. He was dismissed in 1550 for negligence in the care and instruction of the choirboys. Galli served as chaplain at the court of Archduke (later Emperor) Maximilian of Austria; he is listed in the court register of 1 January 1554, and Maximilian referred to him in a letter of the 1550s as 'main Capellan, der Galli'.

Galli's extant works include three masses, three chansons and 19 motets. The cantus parts of an additional six motets are in a 17th-century manuscript (*A-Wn* 18828). Most of the motets and all the chansons were published in anthologies; all the settings of the Ordinary are imitation masses. The model of the six-voice *Missa 'Stetit Jacob'* is unknown, but *Missa 'Ascendetis post filium'* is based on a motet by Vaet, and the five-voice *Missa 'Aspice Domine'* is derived from a motet by Jacquet of Mantua. They show that Galli was a capable composer, adept in parody techniques. He was probably much influenced by Vaet, the imperial Kapellmeister, and, like him, he

occasionally employed bold dissonances such as the augmented 5th and octave.

WORKS

Missa 'Ascendetis post filium', 6vv, Kaplanské Knihovny, Česky Krumlov, III, S.17.1/391, ed. in DTÖ, cxviii (1968) (on Vaet's motet)
Missa 'Aspice Domine', 5vv, *A-Wn* 15950 (on Jacquet of Mantua's motet)
Missa 'Stetit Jacob', 6vv, Kaplanské Knihovny, Česky Krumlov, III, S.17.1/391
16 motets, 3–6vv, 1554[8], 1554[15], 1559[1], 1564[3], 1564[4], 1564[5], 1567[2], 1568[2], 1568[3]
1 motet, 5vv, *A-Wn* 15950; 2 motets, 6vv, *D-Z* 11, 13, 30; 6 motets, *A-Wn* 18828, inc. (cantus only)
3 chansons, 4, 6vv, 1553[24], 1555[21], 1556[18]

MILTON STEINHARDT

Galli, Caterina (*b* ?Cremona, *c*1723; *d* Chelsea, 23 Dec 1804). Italian mezzo-soprano. After singing in Bergamo in 1742, she was engaged for the 1742–3 Italian opera season in London, appearing at the King's Theatre in Brivio's *Mandane*, Galuppi's *Enrico* and *Sirbace* and Porpora's *Temistocle* (she took male parts in all four operas). In 1745 she was in a pasticcio, *L'incostanza delusa*, at the New Haymarket Theatre, but she made her name in Handel's Covent Garden oratorio seasons from 1747 to 1754. She appeared first in revivals of the *Occasional Oratorio* and *Joseph*. On 1 April, 1747 she sang the Israelite Man and Second Israelite Woman at the première of *Judas Maccabaeus* and made such a hit in the air ''Tis liberty alone' that, according to Burney, 'she was not only encored in it every night, but became an important personage, among singers, for a considerable time afterwards'. Handel composed parts for her in *Joshua* (Othniel, 1748), *Alexander Balus* (title role, 1748), *Susanna* (Joacim, 1749), *Solomon* (title role, 1749), *Theodora* (Irene, 1750), *Jephtha* (Storgè, 1752) and probably *The Choice of Hercules* (Virtue, 1751). She appeared in many revivals, of these works and others, including *Messiah*, *Samson* and *Hercules* from 1749, *Saul* in 1750 and probably 1754, *Belshazzar*, *Esther* and *Alexander's Feast* in 1751, and probably *Deborah* in 1754. As in opera, most of her parts were male. She received four and a half guineas for singing in the Foundling Hospital *Messiah* on 15 May 1754.

Galli's success in *Judas Maccabaeus* caused Lord Middlesex to re-engage her for the King's Theatre in 1747–8, when she appeared in the Handel pasticcios *Lucio Vero* and *Rossane* (*Alessandro*), in which she played Alexander the Great. She sang in *Acis and Galatea* for Miss Oldmixon's benefit in 1749 (Hickford's) and her own in 1754 (New Haymarket), in *Alexander's Feast* for Pasqualino's at the same theatre in 1754, and appeared frequently in Musicians Fund charity concerts from 1743. In 1753 she took part in a charity performance of Arne's *Alfred* at the King's. She also taught singing. One of her pupils in 1753 was the ten-year-old Lady Caroline Russell, daughter of the Duke of Bedford, who drew a caricature of Galli on the back of her bill – the only likeness that survives.

Galli left England about 1754 and for 15 years pursued an active career in north Italy, singing in a dozen cities, and also in Naples (four operas, including two by Hasse, in 1758–9) and Prague (two operas in 1761). In 1773 she was back in England, where she seems to have remained until her death. She sang in *Messiah* at the New Haymarket in 1773, for three seasons at the Bach-Abel concerts, and in many benefits. In November 1773 she took a male role in Sacchini's *Lucio Vero* at the King's, where she continued until 1776 in serious and comic operas. She appeared in oratorios at Oxford in 1773 and Winchester in 1775. On 30 May 1777 (her final benefit) she sang with the 16-year-old Samuel Harrison, later a famous tenor, who was probably her pupil. After retiring she took a job as companion to the actress Martha Ray; Galli was present when Miss Ray was shot dead by an infatuated clergyman at Covent Garden on 7 April 1779. Economic pressure forced her to reappear in oratorios at Covent Garden as late as 1797. In her last years, according to her obituary in the *Gentleman's Magazine*, she 'subsisted entirely on the bounty of her friends, and an annual benefaction from the Royal Society of Musicians'. The same notice calls her 'the last of Mr Handel's scholars'; if she was not a regular pupil, she was largely trained by him. She had a compass of *a* to f♯″ with an occasional g″. A song by Galli, 'When first I saw thee graceful move', was published about 1750 and often reprinted.

WINTON DEAN

Galli, Domenico (*b* Parma, 16 Oct 1649; *d* ?Parma,1697). Italian composer, cellist, instrument maker, sculptor and painter. All that is known of his life is that he worked at the Este court at Modena. His only known music is *Trattenimento musicale sopra il violoncello a' solo* (Modena, 1691), a set of 12 sonatas for solo cello (like his contemporaries at the Este court, G.B. Vitali and Giuseppe Colombi, he was himself a cellist). Precedents for his sonatas can be found in various works for solo cello by Colombi. Others by the two Bolognese composers G.B. Degli Antoni and Domenico Gabrielli probably influenced him still more: Degli Antoni's set of 12 *Ricercate* appeared in 1687, and Gabrielli published a similar set of seven *Ricercary* in January 1689, shortly after spending a year at the Este court. The appearance of Galli's sonatas in 1691 seems more than just coincidental: they could well have been inspired by his close contact with Gabrielli. Their style is remarkably close to that of Gabrielli's *Ricercary*, though Galli's handling of tonality, which is often modally ambiguous, is very individual. The upward range of his sonatas is lower than in those of the other two composers (*e*′, compared with Degli Antoni's *c*″ and Gabrielli's *b*′), but the downward range extends to *B*′; this tuning, also used by Colombi, is that given by Mersenne (*Harmonie universelle*, 1636–7), but it was generally discarded by the end of the 17th century. His ability as an artist can be seen in the chiaroscuro vignettes at the beginning of each sonata, in a work of art in S Giacomo, Parma, and in a list of notaries and historians

in the Archivio Notarile, Parma. Galli's reputation as an instrument maker rests primarily on a violin and a cello (probably commissioned by Francesco II, Duke of Modena, and dating from 1687 and 1691 respectively) notable for their elaborate and intricate carving. The Domenico Galli, 'professore di musica', cited by Francesco Valesio in a chronicle of 26 February 1703, is most probably another musician. This Galli lived in Rome between the end of the 17th century and the beginning of the 18th, and was active for a time at the court of Christina of Sweden.

NONA PYRON (with ANGELA LEPORE)

Galli, Filippo (*b* Rome, 1783; *d* Paris, 3 June 1853). Italian bass. He made his début in 1801 at Naples as a tenor. On the advice of Paisiello and of Luigi Marchesi, he became a bass, making his second début in Rossini's *La cambiale di matrimonio* at Padua in 1811. The next year he sang Tarabotto in *L'inganno felice* at the Teatro S Moisè, Venice, the first of eight Rossini premières in which he took part, and made his début at La Scala as Polidoro in Generali's *La vedova stravagante*. During the next 13 years he appeared in over 60 different operas at La Scala, including 26 first performances. In one season (1814) he appeared in three operas by Paer and sang Guglielmo (*Così fan tutte*), the title role of *Don Giovanni*, Dandini in the first performance of Pavesi's *Agatina* and Selim at the première of *Il turco in Italia*.

Elsewhere, Galli sang Mustafà at the première of *L'italiana in Algeri* at the Teatro S Benedetto, Venice (1813), and created the title role of *Maometto II* at the S Carlo, Naples (1820); he made his Paris début in 1821 at the Théâtre Italien in *La gazza ladra*. His last Rossini creation was Assur in *Semiramide* at La Fenice (1823). He appeared in London at the King's Theatre between 1827 and 1833, and at the Teatro Carcano, Milan, he sang Henry VIII at the first performance of *Anna Bolena* (1830). He continued to sing, in Mexico and Spain, for another decade, returning to La Scala in 1840 to take the title role in Donizetti's *Marino Faliero*. He was a chorus master in Madrid and Lisbon, and then taught at the Paris Conservatoire for some years.

The wide range of Galli's magnificent voice and its extreme flexibility are fully demonstrated by the roles that Rossini wrote for him, while his power as an actor can be imagined from Donizetti's Henry VIII.

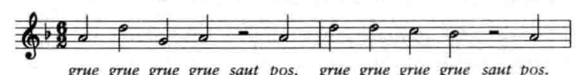
ELIZABETH FORBES

Galli [Gallo, Gallus], **Giuseppe** [Gioseffo, Josephus] (*b* Milan; *fl* 1598). Italian composer. He is known by one publication, *Sacri operis musici alternis modulis concinendi liber primus ... missam unam vocibus novenis; 8 motecta octonis; 3 item cantiones musicis instrumentis* (Milan, 1598); its title-page reveals that he was Milanese. The eight-voice motet *Veni in hortum meum*, probably from that volume, was reprinted in south German anthologies (e.g. RISM 1600²) and copied into manuscripts in Silesia (formerly in *PL-LEtpn*) and in Pomerania (Pelplin Tablature, *c*1620–30, *PE*; incipit in AMP, i, 1963; facs. in AMP, vi, 1965); it is a competent example of imitative polyphony and polychoral dialogue.

MIROSŁAW PERZ



Gallia, Maria (*fl* 1703–34). Italian soprano. She arrived in London in 1703, perhaps with Margherita de L'Epine, and became a pupil of Haym, making her first stage appearance in her husband Giuseppe Fedeli's *The Temple of Love* at the Queen's Theatre (1706). She sang in Clayton's *Arsinoe* and *Rosamond* (1707), both at Drury Lane, and the pasticcio *Love's Triumph* at the Queen's Theatre (1708). Between 1704 and 1710 she had several benefit concerts at York Buildings, generally with her husband. She returned to London as a singing teacher in 1722 and was still alive in 1734. Burney identified Gallia with the 'Sorella della Sig. Margarita' [de L'Epine] who created Clizia in Handel's *Teseo* (1713). The part requires modest skill and a compass of *d′* to *g″*.

WINTON DEAN

Galliard (from It. *gagliardo*: 'vigorous', 'robust'; It. *gagliarda*, *gagiarda*, *gaiarda*; Fr. *gaillarde*; Sp. *gallarda*). A lively, triple-metre court dance of the 16th and early 17th centuries, often associated with the PAVAN.

Choreographically the galliard was a variety of the *cinque pas*, a step-pattern of five movements taken to six minims. Arbeau (*Orchésographie*, 1588) explained at some length the many possible variations of the galliard; the basic pattern consisted of four *grues* (the dancer hops on to the ball of one foot while moving the other forward in the air 'as if to kick someone'), a *saut majeur* ('big jump', often ornamented with beats in mid-air), and a *posture* (the dancer rests with one foot in front of the other). Ex.1 shows Arbeau's intabulation of the *cinque pas* pattern to a galliard tune called *Antoinette*. Slightly different combinations of kicking and small, jumping steps were required for galliards with longer phrases, but each pattern always ended with the *saut majeur*, which according to Arbeau often coincided with a rest in the music, and a *posture*. The steps for the galliard were essentially similar to those of the saltarello and tourdion, except, as Arbeau said, 'that in the execution of them they are done higher and more vigorously'; the extra height of hops and leaps in the galliard implies that the music cannot be played at all fast.

Ex.1 *Gaillarde appellée Antoinette* from T. Arbeau: *Orchésographie* (1588)

* *posture* with left foot forward

Couple dancing a galliard: woodcut by Hans Hofer, c1540

Like the pavan, the galliard probably originated in northern Italy. D'Accone (1997, pp.652–4, 662) reports references to the *gagliarda* being taught in a dancing school in Siena about 1493–1503, and to a dancing-master who was engaged in 1505 to teach 'calatas and gagliardas as well as morescas'. (Sach's claim that Boiardo mentioned the galliard in his epic *orlando innamorato* is incorrect). The earliest surviving examples of music for the dance are to be found in publications issued by the Parisian printer Attaingnant: *Dixhuit basses dances* for lute (1529/30), *Six gaillardes et six pavanes . . . a quatre parties* (1529/30), and *Quatorze gaillardes neuf pavennes* for keyboard (1531), the last including a few thematically related pavan–galliard pairs (one in ex.2). Thus the galliard as a musical form first appeared as one of the possible after-dances of the pavan (others were the saltarello, tourdion, *Hupfauff* and *Proportz*; *see* NACHTANZ). Morley, in *A Plaine and Easie Introduction to Practicall Musicke* (1597), described in some detail the method of deriving a galliard from its pavan:

> After every pavan we usually set a galliard (that is, a kind of music made out of the other), causing it go by a measure which the learned call 'trochaicam rationem', consisting of a long and short stroke successively . . . the first being in time of a semibreve and the latter of a minim. This is a lighter and more stirring kind of dancing than the pavan, consisting of the same number of strains; and look how many fours of semibreves you put in the strain of your pavan, so many times six minims must you put in the strain of your galliard.

16th-century galliards are almost invariably in triple metre, usually in three strains of regular phrase structure (8, 12 or 16 bars), and, like contemporary pavans, in a simple, homophonic style with the tune in the upper part.

Among the earliest Italian printed collections to include galliards are Antonio Rotta's *Intabolatura de lauto* (1546), Giulio Abondante's *Intabolatura ... sopra el lauto* (1546) and Gardano's *Intabolatura nova di varie sorte de balli* for keyboard (1551). Rotta's collection contains groups of dances in the following order passamezzo–galliard–padovana, while the other two anthologies consist mainly of isolated galliards, some based on contemporary tunes (for example, Abondante's *Zorzi gagliarda* is based on Azzaiolo's *Occhio non fu*) and others bearing descriptive titles like *El poverin*, *La comadrina* and *La fornerina*. The pairing of passamezzo and galliard, less common than that of pavan and galliard, continued to appear intermittently during the 16th century, as, for example, in the lutebooks of G.A. Terzi (1593) and Simone Molinaro (1599). These collections probably represent arrangements of popular dance-tunes, rather than music for actual dance accompaniment, which required a larger ensemble. Up to about 1570 most of the surviving ensemble galliards come from France and the Low Countries, in printed collections issued by Attaingnant, Susato and Phalèse. They were often closely modelled on the pavans that preceded them (e.g. HAM, no.137*b*). Manuscripts of Italian ensemble dances from before 1560 (*D-Mbs* Mus.ms.1503*h*; *GB-Lbl* Roy.App.59–62) contain about 30 pieces in the style of galliards, but none of them is so called (the titles are descriptive or dedicatory), and they are seldom associated with any other dance.

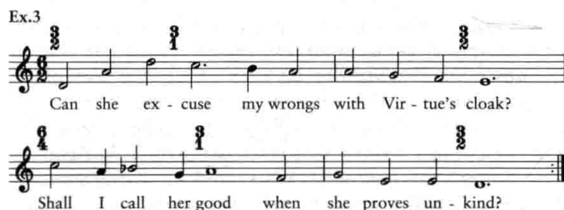
Among the earliest surviving English galliards are two in *GB-Lbl* Roy.App.58 (*c*1540) and a 'Galyard', together with half a dozen untitled pieces of similar character, in *GB-Lbl* Add.60577 (ed. in MB, lxvi, 1995, nos.40, 44, 47, 49–53, 55). Most of these appear to be keyboard reductions of consort pieces. Some consort galliards from the early Elizabethan period are in *GB-Lbl* Roy.App.74–6 (ed. in MB, xliv, 1979, nos.96, 98, 99, 102, [104, 105], 110, [111]). It is not until the period from about 1590 to 1625 that sources become plentiful in England. Galliards from this period, like the pavans, have a musical substance and interest far beyond the needs of functional dance music. Those for keyboard and lute are often of considerable brilliance; each strain is ordinarily followed by a variation enlivened by scales, runs and other kinds of idiomatic figuration, in lieu of the customary repetition of the strain. Those for consort, such as the six-part galliards of Byrd and Gibbons, often have a dense and elaborate polyphonic texture.

Despite Morley's contemporary prescription about the derivation of a galliard from its pavan, it was comparatively rare for an early 17th-century English galliard to be a close transformation of its pavan (although often there is a similarity of mood between the two pieces). Furthermore, many galliards from the period have survived unattached as independent pieces. The keyboard publication *Parthenia* (1613[14]), for example, includes no fewer than ten galliards among its 21 pieces, and four of those are independent. Byrd's famous *Pavan: The Earl of Salisbury*, most unusually, is followed by two galliards.

A feature of the galliard almost throughout its history was the use of hemiola (the usual division of the six minims into 3 + 3 being varied, especially just before the

Ex.2 from P. Attaingnant, ed.: *Quatorze gaillardes neuf pavennes* (1531)

(a) Pavenne



(b) Gaillarde

*These are the note values of Attaingnant's print: his intabulator reduced the normal values by half.

cadence, by a division into 2 + 2 + 2). Ex.3 shows something of this rhythmic complexity in the first strain of Dowland's song *Can she excuse*, which is cast in the

form and style of a galliard; the barring in 6/2 is the one that might have been used in a contemporary keyboard version, while the time signatures above the staff represent cross-rhythms suggested by the stresses of the words and the harmonic movement. If such a tune were to be danced to, it would be necessary to decide where to begin the *cinque pas* pattern. In all Arbeau's examples, the steps begin with the first notes of a tune. Heartz (1964) has argued, however, that the suspension preceding the cadence (occurring, in this case, on the second beat of the fourth bar) is the logical place for the *saut majeur*, 'the equivalent strong accent in terms of the dance'; hence the sequence of steps should begin on the fourth note of the tune. Alternatively, it might be argued that an interesting tension between physical and musical rhythms would result from the juxtaposition of accents if the pattern began on the first beat of the tune. Whichever interpretation of the dance is adopted, there remains a pleasing rhythmic ambiguity in the music of this and many other examples of the galliard.

Like the pavan, the galliard survived as a musical form well into the 17th century. Examples appear in consort suites by several German composers of the early part of the century; contemporary with these are a number of German polyphonic songs having the rhythmic character of the galliard (and sometimes also the title). Galliards feature in Frescobaldi's *Il secondo libro di toccate, canzone* (1627) and Johann Vierdanck's *Erster Theil newer Pavanen, Gagliarden, Balletten und Correnten* (1637), and later in the suites of Locke's second *Broken Consort* (composed *c*1661–5) and G.B. Vitali's *Balletti, correnti alla francese, gagliarde . . . a 4 stromenti* (1679). A few galliards appear in the work of the harpsichordists Louis Couperin, Chambonnières and D'Anglebert. By this late stage the galliard had become a quite slow piece; Thomas Mace (*Musick's Monument*, 1676) said that galliards 'are perform'd in a *Slow, and Large Triple-Time*; and (commonly) *Grave, and Sober*'.

A few 20th-century composers have re-created the galliard, either as a companion to a pavan (e.g. Howells, Vaughan Williams and Britten: *see* PAVAN) or as an independent piece (the 'Gailliarde' for two female dancers in Stravinsky's *Agon*, 1957).

ALAN BROWN

Galliard, John Ernest [Johann Ernst] (*b* ?Celle, ?1666/?1687; *d* Chelsea, 18 Feb 1747). German composer and oboist, active in England. A son of Jean Galliard, a French wig-maker, he learnt both flute and oboe from a French member of the Celle court orchestra, Pierre Maréchal. He himself joined the orchestra in 1698, and soon afterwards

was studying composition in nearby Hanover with Steffani and G.B. Farinelli. When the Celle orchestra was disbanded in 1706, he went to London to become court musician to Prince George of Denmark, Queen Anne's consort. He must have had some ability as a keyboard player, for when Draghi died in 1710 he was appointed organist at Somerset House. He probably wrote his *Te Deum*, his *Jubilate* and his three anthems for the chapel there, but his duties were negligible and he was soon to make a mark both as a secular composer and as an oboist at the Queen's Theatre. Handel wrote obbligato parts for him in *Teseo* (1713).

By this time Italian opera was well established in London, and an attempt by Galliard and the poet John Hughes to stage an English opera, *Calypso and Telemachus*, was unsuccessful. Hughes had an unusual knowledge of music, and though the opera was accepted for the Queen's Theatre, the machinations of the Italians who now dominated it limited the performances to five; it was the last opera with English words to be staged there. Nearly all the arias are in the newly fashionable da capo form; the music is competent and agreeable. The work is also notable for Hughes's preface to the printed libretto, which deals intelligently with issues concerning opera in English.

Galliard worked for John Rich at Lincoln's Inn Fields between 1717 and 1730, as did the writer Lewis Theobald, later the main object of Pope's scorn in the original version of *The Dunciad*. Galliard and Theobald collaborated first on the masques *Pan and Syrinx* and *Decius and Paulina*. Though the first is dull in parts, its end is strikingly original. When Pan chases Syrinx on the river bank and she is 'transformed into reeds', he sings an air, 'Surprising Change!', accompanied at first by a dark-toned viola solo suggesting the flow of the water, but then three recorders (one of them a bass) start playing unobtrusive chords in the background; these represent the voice of the transformed Syrinx, and eventually they come to dominate the music, the viola solo having petered out.

Galliard then wrote another full-length opera, *Circe*, but the libretto, which had been set 40 years earlier by John Banister (i), was too old-fashioned to have much appeal. Rich permitted a new production of *Calypso and Telemachus*, but did not get good value out of Galliard until he embarked on his great pantomime period (1723–30), during which he himself mimed the role of Harlequin. The pantomimes Theobald and Galliard contrived were to be Rich's chief money-spinners at Lincoln's Inn Fields and (from 1732) at Covent Garden up to his retirement in 1761. Most of them alternated between masque-like scenes sung by gods and goddesses and 'Comic Tunes', which accompanied the miming of the mortals. There was no speaking, and the music was continuous. Pantomimes normally lasted a little under an hour. In most cases a published 'Description' survives, which gives the words that were sung and a seldom lucid résumé of the action. The most interesting is *The Rape of Proserpine*, for which a great deal of Galliard's music survives, much of it fully operatic and of good quality.

After 1730 Rich seldom risked his money on new productions. Galliard and Theobald offered their next pantomime, *Merlin*, to Drury Lane, but Cibber had little flair for staging such entertainments, and it failed. In 1736 Rich revived his first successful pantomime, *Jupiter and Europa*, under the title *The Royal Chace*. Much of the action and music were new, and Galliard's song 'With Early Horn' was enormously popular and helped make the reputation of its singer, the young tenor John Beard.

Not all Galliard's music was written for the playhouses. In 1728 he published his *Hymn of Adam and Eve*. In 1773 Benjamin Cooke published a heavily revised full score: he added an overture, expanded some of the duets into choruses and provided fuller accompaniments. In 1739 Galliard offered an evening's entertainment that consisted of two hour-long works in strange act-by-act alternation – a serenata called *Love and Folly* and 'The Choruses to the Tragedy of Julius Caesar'. The music of the former, to a confused libretto about Cupid and Psyche, is lost. The latter survives in an autograph full score: it consists of four cantatas, each in several sections, that were originally intended as entr'actes for a tragedy by John Sheffield, Duke of Buckingham; each cantata comments on the preceding act. Solo voices are freely used, and there is no chorus at all in the third 'Chorus'. The score is dated 1723, the year after Buckingham's death. If his tragedy was ever acted at all, it was acted privately.

The Happy Captive (1741), Galliard's final collaboration with Theobald, is a minor musical landmark: it is the first complete opera on an 'abduction' theme like that in Mozart's *Die Entführung aus dem Serail*, and it included the first true English intermezzo. The music of the opera is charming and occasionally exotic. The intermezzo *Capoccio and Dorinna* was reset twice by T.A. Arne, as *The Temple of Dullness* (1745) and as *Capochio and Dorinna* (1768). Unfortunately, the music for all three settings is lost.

On 31 March 1740 Galliard repeated *Love and Folly* and the Julius Caesar choruses, and this time he added two oboe concertos and a 'solo', which he played himself. For a similar programme on 11 December 1744 he added a 'New Concerto grosso, 24 Bassoons, accompanied by Caporale on the Violoncello'. None of these works survive, but a set of sonatas for bassoon or cello was published, and some of these are occasionally heard today; the sonata in F is outstanding, and the one in A minor has a fine Hornpipe, idiomatically written for the bassoon. He also published a fine set of cello sonatas.

Galliard certainly played a significant role in London's musical life in the first half of the 18th century. He was a founder-member of both the Academy of Vocal (later Ancient) Music in 1726 and the Royal Society of Musicians in 1738, directing the first performance of the former. His translation of Tosi's singing manual is very felicitous, and he added some intelligent notes; he had known Tosi in London earlier in the century. Burney wrote of Galliard's music, 'I never saw more correctness or less originality ... Dr. Pepusch always excepted', but he was rather more generous elsewhere in his *History*, and both he and Fiske recognized Galliard and Pepusch as the leading composers of English theatre music before the 1730s. Charles Didbin thought Galliard had 'considerable genius', and if Dr Kitchener is to be believed, Handel in old age told the youthful Samuel Arnold that he had so high an opinion of *Calypso and Telemachus* that he would sooner have composed it than any of his own operas. The story must have become distorted in the telling, but Handel surely expressed admiration in some degree.

WORKS

all printed works published in London; theatre music first performed in London, and published within a few months of first performance unless otherwise stated

LLF – *Lincoln's Inn Fields Theatre*

OPERAS

full-length, all-sung

Calypso and Telemachus (J. Hughes, after F. Fénelon), Queen's, 17 May 1712, pubd full score lacks recits and final chorus
Circe (C. Davenant), LLF, 11 April 1719, 3 songs pubd, rest lost
The Happy Captive (L. Theobald), Little Theatre, Haymarket, 16 April 1741, full score *F-Pc**; Capoccio and Dorinna (int, after P. Metastasio: *L'impresario delle Canarie*), music lost
Oreste e Pilade, unfinished, lost, mentioned by Hawkins

MASQUES

one-act, all-sung

Pan and Syrinx (Theobald), LLF, 14 Jan 1718, full score, incl. music added for 1726 revival, *GB-Lbl*
Decius and Paulina (Theobald), LLF, 22 March 1718, insert for revival of E. Settle's play The Lady's Triumph, 1 song pubd, rest lost
The Nuptial Masque, or The Triumphs of Cupid and Hymen, Covent Garden, 16 March 1734, lost
Oedipus (N. Lee and J. Dryden), Covent Garden, 2 March 1736, *Lam*, pts *Lcm*
Masque of the Deities, doubtful, by H. Carey

PANTOMIMES

Jupiter and Europa (?Theobald), LLF, 23 March 1723, 1 song by Galliard pubd, also some by other composers; rev. as The Royal Chace, or Merlin's Cave, Covent Garden, 23 Jan 1736, 1 song pubd
The Necromancer, or Harlequin Dr Faustus (Theobald), LLF, 20 Dec 1723, 6 songs pubd anon., some Comic Tunes pubd with Harlequin Sorcerer (1752)
Harlequin Sorcerer, with The Loves of Pluto and Proserpine (Theobald), LLF, 21 Jan 1725, Comic Tunes pubd with new music by Arne (1752)
Apollo and Daphne, or The Burgomaster Trick'd (Theobald), LLF, 14 Jan 1726, 7 songs pubd, partial score *DRc*
The Rape of Proserpine, with The Birth of Harlequin (Theobald), LLF, 13 Feb 1727, ov. and 14 songs pubd in score, some Comic Tunes pubd with those in Perseus, score with recits and chorus *Lgc* (copies, *Lbl*, *Lcm*)
Perseus and Andromeda, or The Spaniard Outwitted (Theobald), LLF, 29 Jan 1730, Comic Tunes pubd, 1 song in Musical Miscellany, vi (1731)
Merlin, or The Devil of Stonehenge (Theobald), Drury Lane, 12 Dec 1734, *DRc*

MISCELLANEOUS VOCAL

3 anthems, *GB-Ob*: I will magnify the Lord, O Lord God of Hosts, I am well pleased
TeD and Jub, ? to celebrate Peace of Utrecht, 1713, lost, mentioned by Hawkins
6 English Cantatas after the Italian Manner (1716)
4 choruses in Julius Caesar (tragedy, J. Sheffied, Duke of Buckingham), 1723, *Lbl*, *US-Bp*
The Hymn of Adam and Eve (J. Milton: *Paradise Lost* vv.153–208), 2vv, str (1728)
Love and Folly (serenata), 1739, lib *GB-Lbl*, music lost
Chi fra lacci (cant.), S, orch, *Lcm*
5 songs pubd separately (London, ?1730–?1735): As the mole's silent stream; Jolly mortals, fill your glasses (E. Ward); Kind god of sleep; The advice; The fond shepherdess
3 cants. (Hughes); lost, mentioned by Hawkins

INSTRUMENTAL

6 Sonatas, rec, bc, op.1 (1710)
6 Sonatas, bn/vc, bc (1733)
6 Sonatas, vc, bc (1746), pubd with sonatas by Caporale

Lost: 2 ob concs.; ob sonata; sonata, ob, 2 bn, 1704; conc. grosso, 24 bn, vc

ROGER FISKE/RICHARD G. KING

Galliard Ltd. English firm of music publishers formed in 1962 as a wholly owned subsidiary of GALAXY MUSIC CORPORATION.

Galliari. Italian family of stage designers. Its principal members were the brothers Bernardino (*b* Andorno, nr. Biella, 3 Nov 1707; *d* Andorno, 31 March 1794), Fabrizio (*b* Andorno, 28 Sept 1709; *d* Treviglio, June 1790) and Giovanni Antonio (*b* Andorno, 26 March 1714; *d* Milan, 1783). After early tuition from their father, the decorative painter Giovanni Galliari (*b* Andorno, 1672; *d* Andorno, 1722), and further study in Turin and Milan, they worked in northern Italy (and in Innsbruck in 1738) as painters of frescoes and other decoration until, probably towards the end of the 1730s, they became assistants to the theatrical painters Innocente Bellavita, Giovan Domenico Barbieri and Giovanni Battista Medici, When Barbieri died in 1742, Fabrizio and Medici became chief designers at the Regio Ducal Teatro in Milan, and on Medici's retirement a year later, Fabrizio was joined by Bernardino and Giovanni Antonio. From then on the stage designs for the Milan opera houses (Regio Ducal, 1742–76; Itinerale, 1776–8; La Scala after 1778) rested almost exclusively in the hands of the Galliari brothers. Giovanni Antonio settled in Milan, but Fabrizio and Bernardino were also chief stage designers at the Teatro Regio in Turin in 1748 and from 1753 on worked regularly for the Teatro Carignano there and in a number of Italian and foreign opera houses, including Vienna, Berlin and Paris. They retired in the mid-1780s.

The brothers worked together but divided their responsibilities according to their talents. Fabrizio was a creative artist who usually produced the ideas and plans for the sets and carried out the architectural designs. Bernardino, the most talented painter among them, produced equally

Stage design by Fabrizio Galliari for the first performance of Ciampi's opera 'Arsinoe', Teatro Regio, Turin, 1758: pen and ink with watercolour, from 'Album con rilegatura in pelle marone', vi, f.126r (Pinacoteca Nazionale, Bologna)

artistic and mature designs, and ideas for curtains, but was mainly concerned with their realization in paint; his work included excellent figures and landscapes. Giovanni Antonio was exclusively an executant. Their work at the Turin and, to a lesser extent, the Milan court theatres was still essentially under the influence of the *opera seria* tradition. The formalized architectural painting of the Bibiena school, passed down from Barbieri and Medici, is to be found in numerous of their early productions of that genre and even remained efficacious when the Galliaris began to develop a style influenced by and in accord with the 'reform' movement of Jommelli, Traetta and above all Gluck, whose *Alceste* they mounted at Vienna in 1767. Here they aimed to overcome the traditional courtly rationalist formalism through sets based on pictorial composition and the recreation of nature, and through intensified use of landscape and genre motifs and references (albeit superficial) to historical locations and the milieu of the action, like the 'Chinese' sets for Vincenzo Ciampi's *Arsinoe* (1758, Turin). Their aim was to represent truth and humanity in opera and in the conflicts it depicts by using the language of middle-class customs and emotions, though in elevated, idealized form. Further scope for this style was provided by *opera buffa*, for which the Galliaris designed exclusively at the Teatro Carignano in Turin and which accounted for well over half their designs for the Milan court theatre. Their stage realism followed operatic structure not simply by reproducing an everyday middle-class environment but by selection and picturesque arrangement.

When the older generation retired in the 1780s Fabrizio's sons and pupils Giovannino (*b* 1746; *d* Treviglio, 1818) and Giuseppino (*b* Andorno, 1742; *d* Milan, 1817) continued their work at the Teatro Regio and Teatro Carignano in Turin. Giuseppino, who closely followed his father's style, also worked as a designer in Geneva (1778) and Marseilles (1787) and apparently retired about 1792. Giovannino turned to academic classicism, worked with his uncle Bernardino for Frederick the Great in 1772 and was still active in Turin in 1798. Bartolomeo Verona (*b* Andorno, 1744; *d* Berlin, 1813), a son of the brothers' sister Elisabetta, worked for them from about 1762 to 1772 and went with Bernardino and Giovannino to Berlin, where he remained as an influential royal theatrical painter until his death, Gaspare (*b* ?Milan, 1761; *d* Milan, 1823), son of Giovanni Antonio, started his career with the family firm but in 1785 went as stage designer to Parma and elsewhere, including Vienna (1788–94), Venice and Milan. He developed his own style of pictorial classicism with romantic features. Fabrizio Sevesi (*b* Milan, ?1773; *d* Turin, 9 Aug 1837), son of Fabrizio's daughter Ludovica, was the last important designer of the family; he was trained by Giovannino and Giuseppino and succeeded them at the Carignano from 1798 and at the Regio from 1800.

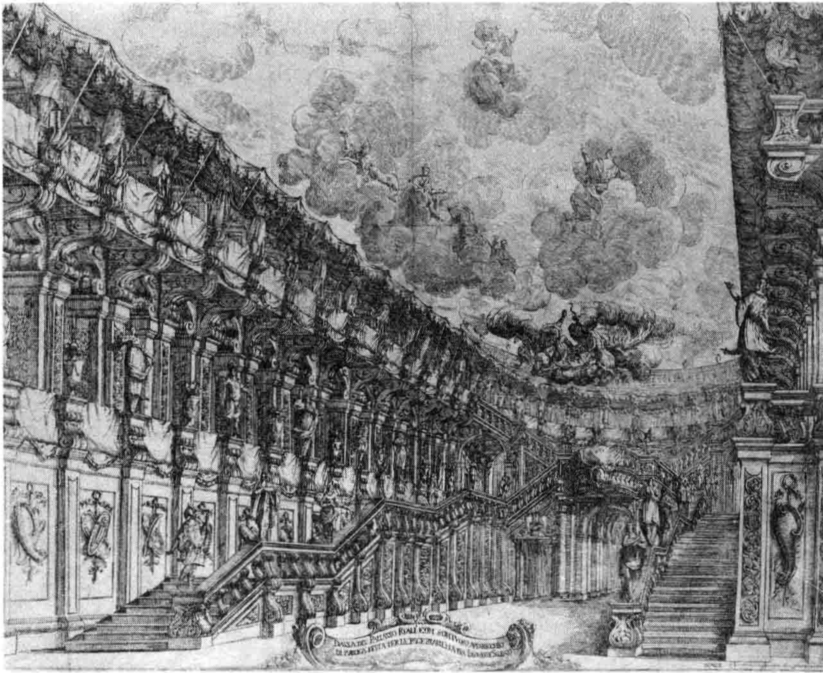
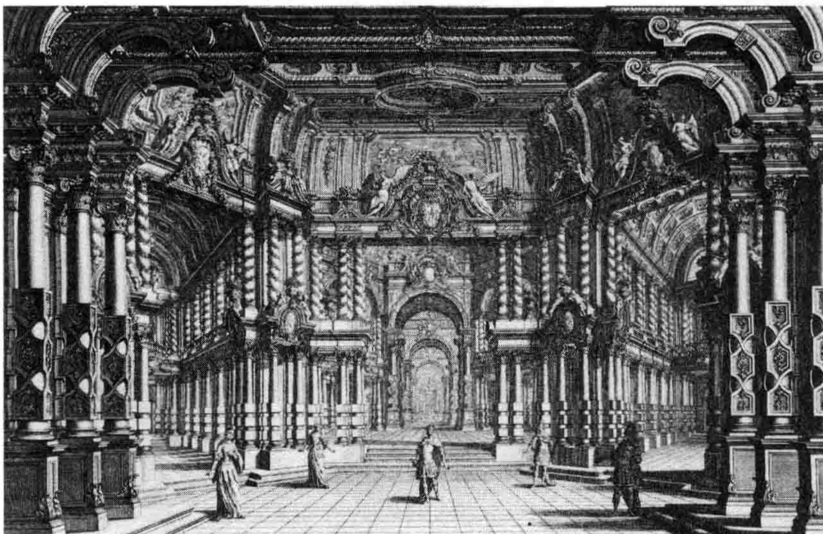
MANFRED BOETZKES



Galli-Bibiena [Bibiena, Bibbiena]. Italian family of stage designers and architects. They had a decisive influence on Baroque musical theatre in Europe. The founder of the family's theatrical activities was Ferdinando Galli-Bibiena (*b* Bologna, 18 Aug 1657; *d* Bologna, 3 Jan 1743), son of the illusionist painter Giovanni Maria Galli (*b* Bibbiena, 1618 or 1619; *d* Bologna, 20 June 1665). Ferdinando studied in Bologna, and from the early 1680s worked as an illusionist painter, architect and stage designer at the court of Ranuccio II in Parma. From 1687, when he was appointed court painter, he became established there and in Piacenza mainly through his work for the stage. He subsequently continued this activity elsewhere in Italy, notably at Bologna (1697–1709). In 1708 he was appointed to the Barcelona court of the Spanish pretender Carlos III; when the latter became Emperor Charles VI in 1711 Ferdinando went with him to Vienna as first architect and theatre architect. He returned to Bologna in 1716, having been succeeded by his son Giuseppe, and taught at the Accademia Clementina.

Early in his career Ferdinando was confronted with a tradition of stage design bound to the central vanishing-point. He was thus unable to do justice to a musical drama dealing with the real world in a more differential way. Using his experience as an architect and decorative painter, he reformed stage design through the introduction of sophisticated stereometric, illusionistic architectural painting. Ferdinando's first scenic designs, with their accentuated asymmetry, were the first experiments with the 'maniera di veder le scene per angolo' (Sabadini's *Didio Giuliano*, 1687), but still bore traces of the traditional deep stage *all'infinito*. However, around 1700 his scenography increasingly emphasized diagonal views and angular perspective (fig.1), as expounded in his treatise *L'architettura civile* (Parma, 1711). His style became associated with the new *opera seria* and was eventually characterized by strong architectonic organization, rationalist principles of construction and 'worm's-eye' perspective which endowed the illusionistic architecture of the stage with a monumental character appropriate to the court spectacle he served, for example at Naples and Vienna.

His brother Francesco Galli-Bibiena (*b* Bologna, 12 Dec 1659; *d* Bologna, 20 Jan 1739) studied in Bologna

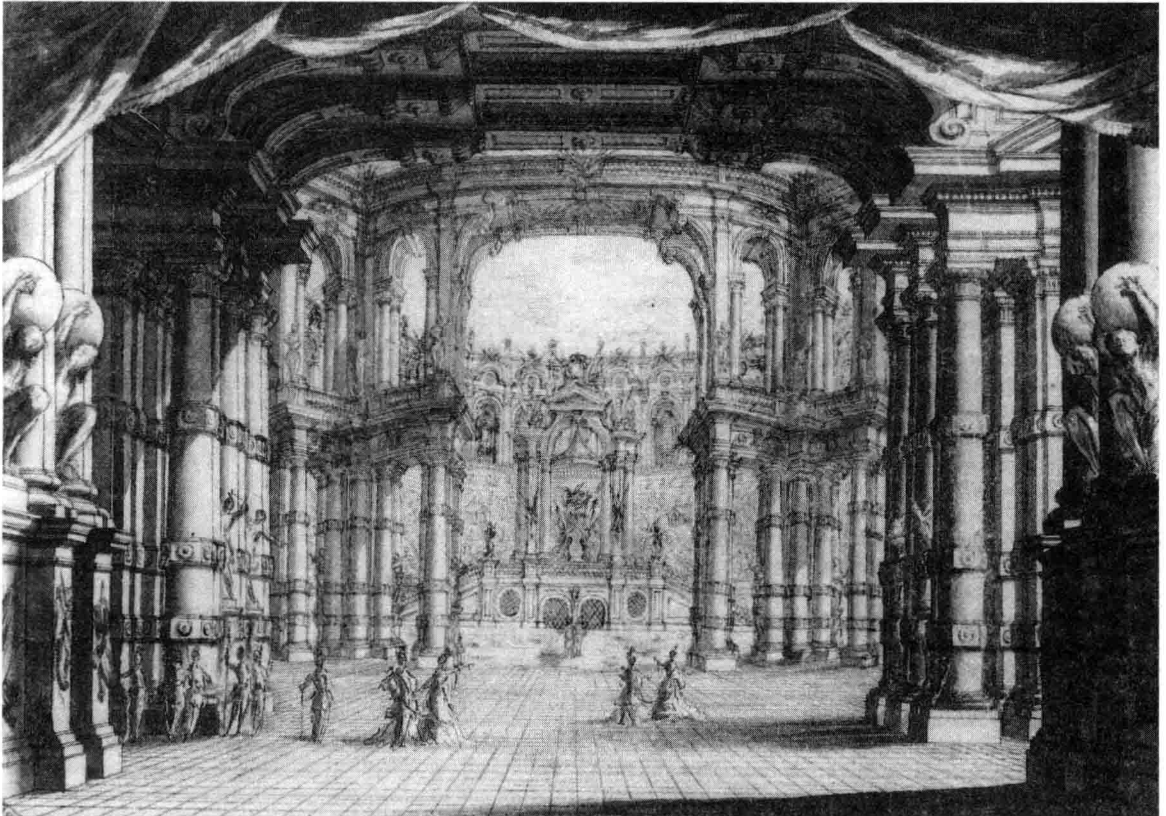


1. Courtyard seen from an angle, illustrating 'operazione 67a: per disegnare le scene vedute per angolo': engraving by an unknown artist from Ferdinando Galli-Bibiena's 'L'architettura civile' (Parma, 1711)

2. Design by Francesco Galli-Bibiena for the Act 3 finale of C.F. Pollarolo's 'La pace fra Tolomeo e Seleuco', Teatro Tordinona, Rome, 1693: engraving by Carl Antonio Buffagnotti

and was active there and elsewhere in Emilia; from about 1682 he worked with Ferdinando in Parma and Piacenza. After his first theatrical works in Genoa in 1689 he was active during the 1690s as a stage designer at many Italian opera houses and foreign courts, including Rome, Reggio nell'Emilia, Bologna and Vienna. Francesco was also a significant innovator, having experimented with angular perspective in his non-theatrical works as early as 1684. The theatres that he designed in Bologna, Vienna, Nancy, Verona and Rome were strongly biassed towards courtly performance. Through his wider sphere of activity, and particularly through his scenery for the operas of Francesco Gasparini, C.F. Pollarolo (fig.2), Scarlatti, Vivaldi, Hasse and Leo, he may have played a greater part than his brother in the propagation of the new style in *opera seria*. By contrast with Ferdinando's technique-orientated works, those of Francesco are masterfully composed and richly ornamented fantasies.

Alessandro Galli-Bibiena (*b* Parma, 1686; *d* Mannheim, 5 Aug 1748), a son of Ferdinando, studied with his father and worked as his associate in Spain from 1708 and Vienna from 1711. In 1716 he was appointed architect and stage designer at the Innsbruck court; in 1720 he settled with the court at its new Mannheim residence, where he worked until his death. The influence of his father and uncle is specially clear in Alessandro's designs for oratorios, sacred dramas and, later, *opera seria*. His *opera seria* sets, with their complex but weightless illusionist architecture and scant decoration, elegantly fulfilled their ostentatious function. Realistic traits also became important in his rustic scenery for pastorales, especially popular at the palatine court and in the genre



3. Design by Giuseppe Galli-Bibiena for Fux's festa teatrale 'Le nozze di Aurora', Favorita, Vienna, 1722: engraving by Johann Andreas Pfeffel II, 1740

scenes for the *commedia dell'arte*. Alessandro designed the provisional opera house in Mannheim (1720) and the opera house in the rebuilt palace (1737–41), his most important work. His brother Giovanni Maria (*b* Piacenza, 19 Jan 1693; *d* Naples, 1777) followed Alessandro to Mannheim about 1722 but went in 1723 to Prague, where he evidently spent most of his life, though he had spells as an architect and stage designer in Rome, Naples and probably Bologna.

A third brother, Giuseppe (*b* Parma, 5 Jan 1695; *d* Berlin, 1757), worked with his father in 1708 in Barcelona and in 1711 in Vienna, succeeding him there in 1716 and becoming principal theatre architect in 1723; he was responsible for the court opera performances under Charles VI in Vienna (fig.3) and at other residences, including Prague, and he also worked in Munich, Linz and Graz. After Charles's death (1740) opera productions became fewer and Giuseppe went to Italy, where he worked in Turin, Bologna and Venice. In 1744 he returned to Vienna but gave up his court position there in 1748, having secured an assignment in 1746 to design the interior of the Bayreuth opera house (completed by his son Carlo in 1748); in 1747 he went to Dresden, where he rebuilt the Opernhaus am Zwinger (completed in 1750). From 1751 he was active as a stage designer in Berlin and in 1753 he entered the service of Frederick the Great. Giuseppe's illusionist architecture painting became typical of *opera seria* and established him as the leading stage designer in Europe. He developed the style of his father and uncle in imaginative sets for more than a hundred opera productions, retaining rationalist principles of composition. His sets expanded in amazing diagonal views, conceived primarily as one or more central structures with star-shaped radiating galleries or stages, in which the standard elements of contemporary court architecture were varied, and rich decoration became more pronounced.

A further son of Ferdinando, Antonio (*b* Parma, bap. 1 Jan 1697; *d* Milan, 28 Jan 1774), studied in Bologna and from 1716 occasionally assisted his brother Giuseppe in Vienna, his father in Bologna and Fano, and his uncle in Verona and Rome. From about 1721 he worked with Giuseppe as a stage designer at the Vienna Hofoper, from 1723 as second architect and theatre engineer. Most of his sets were for *opera seria* productions. He succeeded Giuseppe as principal theatre engineer in 1748 but returned to Bologna in 1751; there he designed the Teatro Comunale (1756–63), for which he produced numerous opera sets. He was also active in other Italian cities as architect and stage designer. He remained within the family traditions in catering for the requirements of court productions, which in Vienna he developed in his brother's shadow and which he continued to use after his return to Italy. His work was unaffected by the ideals of the emancipated middle classes, and he increasingly became subject to criticism; the Teatro Comunale in Bologna in particular figured in treatises of the Enlightenment as a model of 'bad taste'.

The youngest of Francesco's sons, Giovanni Carlo Sicinivale (*b* ?Bologna, 11 Nov 1717; *d* Lisbon, 20 Nov

4. Design by Giovanni Carlo Sicinivale Galli-Bibiena for Act 3 scene ii (a vast hall with an amphitheatre) of Antonio Mazzoni's 'La clemenza di Tito', Opera do Tejo, Lisbon, June 1755: pen and black ink with grey wash (Royal Institute of British Architects, London)

1760), was educated at the Accademia Clementina in Bologna and in the 1740s was active in Bologna and the Emilia region; in 1752 he was appointed architect and stage designer to King José I of Portugal, in whose service he built several opera houses: the theatre at the palace of Salvaterra de Magos (1753), the Opera do Tejo in Lisbon (1755) and the theatre at Ajuda (1756). For the performances of Perez's *opere serie* he created elegant scenery which simplified the style of his family and attempted greater realism, approaching a bourgeois aesthetic without forsaking court traditions.

Carlo Galli-Bibiena (*b* Vienna, bap. 8 Feb 1721; *d* Florence, 1787), son of Giuseppe, studied in Vienna and worked at Bayreuth from 1746. Up to 1756 he designed sets for the works of Hasse and Bernasconi there and in Erlangen; later he also worked occasionally at Brunswick and after the Seven Years War (1756–63) went to Italy, France, the Netherlands and London. In 1765 Frederick the Great appointed him head stage director at the Berlin Hofoper, but he soon returned to Italy where he worked as an architect and stage designer in Treviso, Naples and Milan. Finally, in 1774, he worked for Gustavus III in Stockholm and Drottningholm and Catherine the Great in St Petersburg. Carlo never completely relinquished his father's style, but a reduction of illusionism was already evident in his Bayreuth sets, and his work with *opera buffa* further strengthened the trend towards realism, eventually also including neo-classical elements.

Gallican chant. The composite of traditions of monophonic liturgical music used in the churches of Gaul before the imposition of 'Roman' chant by the Carolingian kings Pippin (reigned 751–68) and Charlemagne (768–814). Although the music of the Gallican rite was almost completely suppressed before the appearance of notation in the 9th century, remnants of this tradition, though heterogeneous in style, are thought to survive in the Gregorian repertory and elsewhere. The term 'Gallican' is also occasionally used in the sense 'non-Roman', so that 'Gallican chant' may mean, in older literature especially, the repertories of the Iberian Peninsula, the Celtic areas and northern Italy (including Milan), as well as of Gaul itself.

1. INTRODUCTION. The 5th century was a period of considerable importance in the history of medieval Gaul and in particular for the Gallican Church. The end of this century saw the establishment of Frankish rule in Gaul by Clovis (*d* 511), first of the Merovingian kings, who converted to Christianity in 496. The Franks eventually extended their kingdom to a territory covering, roughly, modern France, Switzerland, the Low Countries, and Germany west of the Rhine, an area (commonly known as Francia) that later formed the core of the Carolingian empire. The early Merovingian kings inherited the ecclesiastical traditions and liturgical forms of the Gallo-Roman population, which was mostly centred in what is now southern France and which, by the mid-5th century, was solidly Catholic. From this population comes the earliest evidence of the Gallican liturgy.

The first indication of a liturgy in Gaul distinct from the liturgies of other Western Churches occurs in a letter, dated 416, by Pope Innocent I to Bishop Decentius of Gubbio (*PL*, xx, 551–2), in which the pope called for the Churches of Italy, Gaul, Spain and North Africa to celebrate the liturgy in accordance with the rite of Rome. From the 5th century also come several references to the composition of liturgical texts by Gaulish clerics, such as Claudianus Mamertus, Bishop of Vienne (*d* c475), and his nephew Sidonius Apollinaris (*d* c480), and Musaeus of Marseilles (*d* c460), who is known to have compiled a lectionary for the liturgical year, a sacramentary and a responsorial with series of chants and psalms ('psalmorumque serie et cantatione'); this last text is the earliest known reference to a chant book in the Western Church (Gennadius of Marseilles, *PL*, lviii, 1104). None of their liturgical works, however, survives. Several other literary sources written between the 5th century and the first half of the 9th bear witness to the unique character of the Gallican rite and its music. Augustine of Canterbury, for example, in a letter to Gregory the Great (Bede, *Historia ecclesiastica*, i.27), remarked on the differences between the worship in the churches of 'Gallia' and those of Rome. Walahfrid Strabo, writing in about 829 (i.e. after the introduction of 'Roman' chant into Francia), said that 'many people claim that they can distinguish between Roman and other chants by both words and melody' ('plerisque et verbis et sono a ceteris cantibus discernere posse fatentur', *De exordiis*, chap.22).

Evidence for the nature and content of the Gallican liturgy survives in a number of liturgical books, primarily sacramentaries and lectionaries, and in several other contemporary literary sources; there are no extant Gallican chant books. When compared with sources concerning, for example, the Roman and Ambrosian (Milanese) Churches, such texts clearly confirm that the liturgical usage and literary style of the Gallican rite was markedly distinct. However, they also reveal that considerable variation existed within the Gallican Church itself, for individual ecclesiastical provinces and even individual dioceses had their own local forms of worship. For example, the Use of Auxerre, as reflected in the collection of masses published by Mone (1850), differed in its choice of formularies, though scarcely in the form or order of

the chants, from that of Autun in the *Missale gothicum*. Thus, unlike the Roman, Mozarabic and Ambrosian liturgies, the Gallican was not homogeneous, although it shared a group of particular practices in the celebration of the Mass, Divine Office and other special rites (on the character of the Gallican liturgy see Hen, 1996).

This lack of homogeneity, which is also apparent in the Celtic Church (*see* CELTIC CHANT), may be explained by the absence of any central ecclesiastical authority in Merovingian Gaul and of any need or desire for uniformity in the rite (beyond the fundamental elements of worship) before the liturgical and ecclesiastical reforms instituted by the Carolingians in the latter half of the 8th century. The individuality of Gallican liturgical traditions may partly account for the evident willingness of the Church to adopt elements from other rites. For example, in the Bobbio Missal, probably from Burgundy or north Italy, there are Spanish influences, especially in the litany-like *preces* for Holy Saturday; the Roman Church itself influenced the Gallican rite, particularly in the literary style of the prayers (see Vogel, 1960) and to some extent in the structure of the liturgy; chants were borrowed from Milan at Lyons and in south-east Gaul (Provence), and vice versa. Similarly, the many exchanges between the Celtic and continental liturgies left traces in both Francia and Rome. In the 7th and 8th centuries Celtic missionaries went to the Continent taking with them liturgical books, some of which were left there (e.g. the antiphoner *F-Pn* n.a.lat.1628; see Morin, 1905), in Germany (e.g. the fragments in *CH-SGs* 1395, or the Echternach manuscript, *F-Pn* lat.9488) and in north Italy (the Bangor Antiphonary at Bobbio).

Even the Eastern Churches exerted an influence; indeed, the Gallican liturgy is characterized by chants and practices of eastern Mediterranean origin, among them the diaconal litany, the exclamation 'Sancta sanctis' ('Ta hagia tois hagiois'), the Trisagion and the Cheroubikon (see Quasten, 1943). At the time of St Caesarius (*d* 542) chants were sung at Arles in both Greek and Latin. Some Gaulish churches, such as the basilica at Arles, incorporated an altar of the prothesis (*proskomidē*), that is, an altar for the 'setting forth' (preparation) of the oblation, as in the Eastern Churches; during the offertory there was a solemn procession from this altar to the high altar while the choir sang the Cheroubikon or another chant of Eastern origin (see Mâle, 1950). These non-Western influences were more marked at Arles at the time of St Caesarius, and at Marseilles, than at Autun.

The celebration of the Gallican rite and its music came to an end in Francia with the wide-ranging Carolingian ecclesiastical reforms, which demanded the adoption of the Roman liturgy and its chant throughout the Frankish Church. The *Admonitio generalis* issued by Charlemagne in 789 ordered that all the clergy should 'learn the Roman chant thoroughly ... in conformity with what King Pippin strove to bring to pass when he abolished the Gallican chant for the sake of unanimity with the Apostolic See'. The only known evidence of opposition to such reforms may be found in the strongly pro-Roman *Ordo romanus XVI* (Andrieu's numbering) and an anonymous 8th-century work (*Ratio de cursus*) tracing the origin of the Gallican Divine Office and its 'modulatio' (ed. Hallinger, 1963, i, 77–91). During the late 8th century and the early 9th the cantors and clergy of the Gallican Church had to learn not only new liturgical texts but new ways of chanting them. This process is recorded in the writings of some contemporaries, notably Walahfrid Strabo and Hilduin, abbot of St Denis, who observed in a letter (*c*835) that the abbey owned several Mass books containing the *ordo* of the Gallican rite, and that these would need to be recast to conform to the Roman tradition (MGH, *Epistolae karolini aevi*, iii, Berlin, 1899, p.330). Aurelian of Réôme (*fl* 840s) also commented on the difference in the way older cantors sang particular chants compared with their younger contemporaries (see below, §7).

Considerable evidence exists to suggest that the reform of the chant melodies was in many ways imperfect, and that the 'Roman' chant performed by the Franks differed consistently from that sung in Rome itself (*see* OLD ROMAN CHANT, and PLAINCHANT, §2(ii)). This Frankish version of the Roman repertory is generally known as 'Gregorian' and is that preserved in the notated manuscripts copied north of the Alps. By the end of the 9th century the Gregorian tradition was fully established throughout the Frankish lands and little obvious trace of its Gallican predecessor remained; when Charles the Bald wanted to hear Gallican chant he had to send to Toledo in Spain for singers who could perform it (see Levy, 1984, p.50). Yet it is clear that some elements of Gallican music were preserved during the centuries after the Carolingian reform. The Roman Office chants, in particular, on their introduction into the liturgico-musical centres of the Frankish realm, were adapted in some way to the Frankish style of singing (Zijlstra, 1997, pp.31–67), and other vestiges of what may be Gallican practice are generally thought to survive in melodic features such as the preference for two reciting notes in psalmody, the importance of melismatic chants and the use of certain expressive effects. The difficulties involved in trying to identify musical characteristics with certainty, however, has occupied chant scholars for over a century (some of the problems are mentioned in §3 below). The following account discusses the major sources of the Gallican rite and its chant, and surveys the corpus of melodies that may be of Gallican origin according to their liturgical use.

2. SOURCES. Contemporary literature, stemming from Gaulish ecclesiastical authors, includes the works of Gregory of Tours (*d* 594), most notably his *Decem libri historiarum*, which contains many liturgical references, relating particularly to the church of Tours; biographies of Merovingian saints; monastic Rules, which derive principally from southern Gaul; collections of conciliar decrees; poetry, sometimes later pressed into use as hymns; and the *Expositio antiquae liturgiae gallicanae*, a commentary on the Gallican Mass in the form of two letters, which were previously attributed to St Germanus (*d* 576), Bishop of Paris. Preserved in a 9th-century manuscript from the Tours area (*F-AUT* 184), the *Expositio* is thought to have been written, possibly in Burgundy, in the early 8th century (although some scholars consider it to be a much later, Carolingian work; see Hen, 1995, pp.47–9); it offers valuable evidence of the Gallican liturgy, even though the author's interest centres mainly on the symbolism of the liturgy.

The eight surviving Gallican liturgical books, mostly dating from the late 7th century or the 8th but containing texts that are much older, are either collections of prayers for the celebrant (sacramentaries and missals) or lectionaries, and their contents reflect the local uses of particular

churches or areas; chants are not cited. The sources are as follows: *Expositio antiquae liturgiae gallicanae* (*F-AUT* 184, 9th century, from Autun; possibly based on an earlier Merovingian text); *Missale gothicum* (*I-Rvat* Reg.lat.317, early 8th century, Burgundy, written for a church in ?Autun; based on an earlier text *c*690–*c*710); *Missale gallicanum vetus* (*I-Rvat* Pal.lat.439, first half of the 8th century, from ?Luxeuil or ?Chelles; recension of a missal from the late 6th century or early 7th); the Bobbio Missal (*F-Pn* lat.13246, 8th century, probably from Septimania; formerly thought to be from north Italy; copy of an earlier 6th-century text); *Missale francorum* (*I-Rvat* Reg.lat.257, early 8th century, from Poitiers or the Seine valley; based on texts of the 6th and 7th centuries); *Missale vetus gelasianum* (*I-Rvat* lat.316, ff.3–245 and *F-Pn* lat.7193, ff.41–56, copied *c*750 at Chelles; the text is a Gallicanized version of a 7th-century Roman sacramentary and reflects Frankish traditions of the Paris/Meaux area); 'Mone masses' (*D-KA* Aug.253, 22 palimpsest folios, copied ?760–80, from ?Reichenau; based on a text probably dating from 630–40 and composed for a Burgundian church). A fragmentary antiphoner in Irish script, *F-Pn* n.a.lat.1628, ff.1–4 (see Morin, 1905), may be relevant, but it cannot be dated precisely and its script and decoration suggest that it was Celtic rather than Gallican (see Salmon, 1944–53, i, p.lxxxvii).

Remnants of the Gallican chant tradition must be sought mainly in the Frankish liturgical books containing the Roman repertory. Some of the chants were eventually adopted in the new liturgy, though not with their original titles; they often seem to have been used for Frankish ceremonies for which there was no Roman equivalent. A parallel may be drawn with the survival of local styles in the diocese of Benevento after the imposition of Gregorian chant there (*see* BENEVENTAN CHANT). These Gallican elements are not found in the earliest manuscripts after the Carolingian reform, which are copies of the Roman archetype imposed by Pippin and Charlemagne without additions or modifications. Few chants thought to be Gallican occur in the earlier graduals, whether without notation (e.g. Codex Blandiniensis, *B-Br* lat.10127–44) or with neumes (e.g. *F-CHRm* 47, *LA* 239, *CH-SGs* 359). But Gallican chants appear more frequently from the 11th century, particularly in manuscripts from St Denis or south-west France (on the survival of Gallican chants at St Denis, see Robertson, 1985, and 1991, pp.261–71). They were added here and there as alternative chants for festivals, or in the less official sections of liturgical books, for example, as processional chants, which at this time were separated from the gradual into a book of their own (the processional). Gallican chants may also appear in tropers, processionals, and some saint's offices, and were sometimes used in liturgical dramas (see W. Elders: 'Gregorianisches in liturgischen Dramen der Hs. Orléans 201', *AcM*, xxxvi, 1964, pp.169–77). They are also found occasionally in the liturgical books of other Western Churches – Ambrosian, Celtic and Mozarabic – and these are useful in drawing comparisons (see §3).

3. PROBLEMS OF IDENTIFICATION. The central difficulty facing scholars of Gallican chant is the lack of notated sources. Because no notated Gallican chant book survives (it is unlikely that any were written), evidence must be sought in the noted manuscripts of other repertories – principally the Gregorian, but also the Mozarabic and Ambrosian. This in turn leads to the question of how Gallican chants, or Gallican elements within a chant, may be identified as distinct from the chant tradition into which they have been adopted. Contemporary literature mentioning particular features of Gallican music is sometimes of help in indicating the character of the melodies, but such evidence is almost always lacking in concrete details and hence open to considerable interpretation. The most important means of identification remains the comparison of melodies in notated sources, even though these sources date from a century or more after the Gallican rite was suppressed. It must also be remembered that the identification of a chant text as Gallican does not necessarily mean that the music that accompanies it in notated sources is also of the same origin.

Two separate comparisons are necessary in attempting to identify chants from the early Gallican repertory. First, the earliest Gregorian manuscripts of Mass and Office chants must be examined in order to distinguish the 'Roman' repertory imposed in Carolingian times from other chants in the manuscripts. However, a number of these other chants are 'Romano-Frankish' rather than Gallican, that is, they are part of the 'Roman' repertory composed in the Frankish empire during the 9th century though somewhat different in style from the original Roman repertory. Consequently, comparison is then required between these remaining chants and chants with the same texts in Mozarabic, Ambrosian and Celtic manuscripts. When concordances occur, the area of origin of the chants must be determined. For this, three main criteria are employed (individually or in combination): the evidence of liturgical books and other literary evidence, the literary style of the texts, and the musical style.

The results of such comparative procedures have nevertheless proved generally inconclusive (see, for example, Levy's 1984 analysis of a group of offertory chants) and hardly permit the construction of a complete inventory of Gallican chants. The original functions of chants that have often been recognized as Gallican frequently resist identification: in the manuscripts they are never given their ancient liturgical titles – *sonus*, *confractorium* etc. Moreover, the Gallican Mass and Office must have required a larger repertory of chants than the Roman. The long, ornate antiphons may perhaps have been sung at Mass, or the 'responsories' such as *Collegerunt* (actually an antiphon with verse) may have been used as offertory chants, but firm evidence is lacking.

During the latter decades of the 20th century, a number of other approaches were adopted by scholars. Jean Claire of Solesmes used a method of tonal rather than stylistic analysis to identify the origins of the Gregorian repertory, and concluded that melodies of the Gallican rite may be distinguished from the Roman by their use of a particular 'modality'. According to his theory, three fundamental 'modes archaïques' (Do, Ré, Mi) underlie all Western chants; Gallican Office melodies are characterized by the 'Ré' modality, whereas Roman chants are based only on 'Do' and 'Mi' (see Claire, 1975). The theory has been expanded to include the Mass repertory, not only by Claire himself but also by Philippe Bernard and Olivier Cullin, who have focussed attention on sections of the Roman Mass Proper containing exceptionally large numbers of melodies in the 'Ré' mode (e.g. Advent); such chants, they argue, must have been adopted by Rome from the Gallican liturgy at an early date (i.e. the 6th

century). Cullin (1993) suggested that only melodies in the 2nd ('Ré') mode are of Gallican origin, whereas Bernard (1990–92) claimed that the entire Roman Advent Proper was borrowed from the Gallican liturgy. However, these theories have not found universal acceptance. In particular, there is no evidence to support the assumption that the Gallican rite ever possessed a chant Proper, and the reliability of the Old Roman manuscripts (dating from the 11th–13th centuries) as sources for the chant melodies of 8th- and 9th-century Rome has been questioned. Furthermore, in the absence of notated sources earlier than the 9th century, it is highly unlikely that the music attached to a particular feast in later medieval manuscripts bears much resemblance to the melody sung when that feast was first established in the liturgy.

A different approach was adopted by James McKinnon, who examined the contemporary literary sources concerning the contexts and manner in which Gallican chant was performed before the Carolingian reforms. His argument is based on a distinction (originally articulated by Claire, 1962, pp.231–5) between 'lector' chant and 'schola' chant. The former is characteristic of the early Christian period and is essentially a soloist's art whereby a solo singer – often called 'lector' in early documents – sings in alternation with the congregation; this type of chant is almost entirely improvised and the repertory is not fixed. 'Schola' chant, as the name suggests, is the product of a specialist choir and is characterized by a high degree of organization, in particular through the maintenance of a fixed repertory (i.e. a musical Proper); such chant seems to have developed in Rome from about the mid-7th century with the formation of the Schola Cantorum and is also considered to be typical of the Mozarabic and Ambrosian repertories. In a survey of the literary sources concerning the Gallican Church, McKinnon concluded that the conditions did not exist in Francia before the Carolingian era for the creation of a 'schola' repertory; all the evidence suggests that the chants were performed by soloists, that there was no sense of a Proper for either the texts or the music, and that there was no choir or group of singers that could provide the stability necessary for the creation or preservation of a fixed musical repertory. For this reason, he argued, it is implausible that a large number of melodies in the Gregorian repertory could have originally been Gallican (McKinnon, 1995). In other words, one of the most important defining characteristics of the Gallican tradition – its improvised nature – was lost with the imposition by the Carolingians of the largely fixed melodies of the Roman Church; hence even chants within the Gregorian repertory that are generally recognized as being 'Gallican' cannot be considered as examples of the genuine pre-Carolingian tradition.

The various theories behind the methods of identifying Gallican chants are closely bound up with the theories concerning the history of Gregorian chant, its relation to the other medieval monophonic traditions, and the differing effects of oral and written means of transmission on a repertory; all of these are the subject of heated debate (see, for example, Hucke, 1980; and Levy, 1987). The history of particular chants and their transmission remains unclear, although with the help of liturgical and historical sources convincing results have been found (see McKinnon, 1992). However, to what extent Gallican chants were retained as part of the Gregorian repertory is still a matter of conjecture.

4. Liturgical evidence. Chant incipits in Gallican sacramentaries and lectionaries very occasionally correspond with those of chants in noted Gregorian graduals and antiphoners, but such correspondences are sometimes coincidental. A responsory *Probasti* mentioned in the *Missale gothicum* (ed. Bannister, 1917–19, no.398, p.112) and a responsory *Exaltent eum* cited in the lectionary of Wolfenbüttel (see A. Dold, ed.: *Das Sakramentar im Schabcodex M 12*, Beuron, 1952, p.14) may not be the Gregorian graduals *Probasti* and *Exaltent*; and the *responsorium Domine audivi* for Good Friday in the *Missale gallicanum vetus* (ed. Mohlberg, 1929, p.27) is either an interpolated Gregorian chant or a different Gallican chant resembling either the tract *Domine audivi* or the Ambrosian *psalmellus* with the same incipit (see Suñol, 1935, p.290).

A similar difficulty arises with the antiphon *Sanctus Deus archangelorum*, cited in the second letter of the *Expositio antiquae liturgiae gallicanae* as a substitute for the Benedictus during Lent (ed. Ratcliff, 1971, no.4, p.18). Gastoué (1939) claimed that this was the antiphon *Sanctus Deus qui sedes super cherubim* (see also B. Stäblein, *MGG1*, iv, 1306), but his identification seems impossible, not only because the incipit is different but also because the chant is found almost exclusively in Italian manuscripts.

By contrast, certain Gallican elements may be identified in Aquitanian manuscripts with concordances elsewhere. These include the *preces* for Holy Saturday, in the Bobbio Missal, whose refrain (*presa*) appears in Aquitanian manuscripts. Three other Gallican *preces* in Aquitanian manuscripts (*Miserere Pater juste*, *Miserere Domine supplicantibus* and *Rogamus te Rex seculorum*) have textual concordances in Spanish sources (see Huglo, 'Les preces hispaniques', 1955, p.361). The antiphon *Introeunte te*, a Latin translation of a *troparion* originally from Jerusalem, occurs in Aquitanian processionals and Spanish manuscripts; it was cited in a gradual from Pistoia as 'antiphonas gallicanas'. There are similar concordances of the *Benedicite* (see L. Brou: 'Les benedictiones, ou Cantique des Trois Enfants dans l'ancienne messe espagnole', *Hispania sacra*, i, 1948, pp.21–33), the Trisagion (see Stäblein, *MGG1*, iv, 1303–5) and the antiphon *Viri sancti*. The *Viri sancti* is not Gallican, however: a comparison of the texts in the Aquitanian and Spanish versions (see Brou and Vives, 1953, p.186) with the scriptural text (2 *Esdras* viii.52–5 in the Apocrypha) shows that the Spanish text preceded the Aquitanian.

Some Gallican chants may be identified with the help of evidence from Celtic manuscripts. The Bangor Antiphonary, which was copied at the end of the 7th century and is strongly associated with Bobbio, includes a communion antiphon of Eastern origin, *Corpus Domini accepimus* (see Baumstark, 3/1953, p.105). This chant occurs as a *transitorium* at Milan (Suñol, 1935, p.320) and as a *confractorium* in some north Italian graduals, but the latter include a clause 'adjutor et defensor ...', which suggests that the chant was not originally Ambrosian (see Huglo, 'Antifone antiche', 1955); it probably had its Western origin in the Gallican rite.

The same Celtic manuscript at Bobbio includes the hymn *Mediae noctis tempus est*, whose melody was identified by Stäblein (1956, p.448, melody 761; see also *MGG1*, iv, 1323). The melodies of other Celtic *confractoria* (e.g. in the Stowe Missal) and other hymns may not

have survived, although the Maundy antiphon *Si ego lavi* with the verse 'Exemplum' in the Stowe Missal also appears, with the same verse, in certain Aquitanian manuscripts. Usually, however, the verses of antiphons, unnecessary in the Gregorian rite, were simply suppressed or transferred to other contexts by medieval scribes. (*See* CELTIC CHANT.)

Some Gallican chants occur as Ambrosian chants with Gregorian concordances, such as the antiphon *Maria et Martha* (Hesbert, 1935/*R*, no.214), which has the same text as an Ambrosian *transitorium* (Suñol, 1935, p.226), and the antiphon *Insignes praeconiis* (Stäblein, *MGG1*, iv, 1311, cf 1309). The latter was used for the feast of St Denis but had originally been composed for St Maurice; it is still used for St Maurice in the Ambrosian antiphoner (Suñol, 1935, p.536). Another such chant is the *preces Dicamus omnes* (Stäblein, *MGG1*, iv, 1313). The antiphon *Venite populi*, of Gallican origin, is found in some 30 Gregorian manuscripts and in a palimpsest from the 7th or 8th century; it sometimes carries the rubric 'In fractione' and occurs as a *transitorium* at Milan (see Huglo and others, 1956, p.124).

The Palm Sunday processional antiphon *Cum audisset*, probably of Gallican origin, contains in its text a clause 'Quantus est iste cui throni et dominationes occurrunt?', which is found in two other chants, one the Spanish *Curbati sunt* (Brou and Vives, 1953, p.151) and the other the Ambrosian *Curvati sunt* (Suñol, 1935, p.246). This borrowing of fragments of text from various sources, or 'centonization', is common in Gallican liturgical formulae. Similarly, a Gallican origin may be assumed for the antiphons *Post passionem Domini* and *O crux benedicta quae sola*, which have concordances in the Ambrosian antiphoner (Suñol, 1935, pp.218, 274; cf G.M. Suñol, ed.: *Liber vesperalis juxta ritum sanctae ecclesiae mediolanensis*, Rome, 1939, p.356).

The Ambrosian alleluias offer evidence relevant to the Gallican alleluias. In the Ambrosian rite, as in the Gregorian, the alleluias are followed by verses, but the initial alleluias are not always repeated as they would be in the Gregorian rite. Instead, longer alleluias – *melodiae primae* – are sung, resembling the initial alleluias only in their incipits; and these were formerly followed by even longer *melodiae secundae* (not in modern editions of Ambrosian chant). There were thus three alleluias in increasing order of length, all with the same incipits but otherwise similar only in tonality (Stäblein, *MGG1*, iv, 1316; cf *MGG1*, i, 337). One of these melismatic melodies was styled 'alleluia francigena' at Milan (Stäblein, *MGG1*, i, 339); and *melodiae longissimae*, analogous to the Milanese *melodiae*, began to appear in the late 8th century in Francia under the name *sequentia* (Hesbert, 1935/*R*, no.199*a*, MS B; *see also* SEQUENCE (i)). In northern France and at St Gallen they were sung in about 830 (ed. Hughes, 1934/*R*); and at Cluny these long wordless melismas were sung as late as the 11th century: an 11th-century gradual terms them *melodiae annuales* (*F-Pn* lat.1087, f.108) and the melismas *gallicana neuma* (Udalric: *Consuetudines cluniacenses*: *PL*, cxlix, 666).

The melismatic melodies edited by Bannister and Hughes (see Hughes, 1934/*R*) probably represent a part of the Gallican repertory, though with some modifications to bring them into conformity with Gregorian chant. The Gallican alleluias were probably sung in a threefold form at Mass as well as in the *alleluiaticus* of the Office ('habet ipsa alleluia prima et secunda et tertia'; see Ratcliff, 1971, p.13, no.20).

The *melodiae* of the alleluias are also relevant to a consideration of the Christmas responsory *Descendit de caelis*, which has a long melisma at 'fabricae mundi' (noted by Amalarius of Metz in about 830 in his *Liber de ordine antiphonarii*; ed. J.M. Hanssens, Vatican City, 1950, pp.55–6) and another melisma in the verse at 'tamquam' identical to the melisma, or *neuma triplex*, of the responsory *In medio ecclesiae* (also mentioned by Amalarius, ibid., 54). The structure of these melismas resembles that of the *melodiae* of Ambrosian responsories.

A chant of Gallican origin with a Mozarabic parallel is the offertory of St Stephen, *Elegerunt apostoli*, in the León Antiphoner. This chant gradually superseded the offertory *In virtute* in the Gregorian tradition (see Hesbert, 1935/*R*, no.12). Its earliest known occurrence is in a manuscript from St Denis (ibid., no.148*bis*, MS 'S'), and it is found even today in the *Graduale romanum* (p.634). It is possible that other offertories whose texts are similar or identical to Mozarabic *sacrificia* (the Mozarabic equivalent of the offertory) may also have retained some Gallican musical features (see Levy, 1984).

Liturgical and textual evidence proves that two of the chants of Holy Saturday are Gallican: the EXULTET and the hymn *Inventor rutili*. These should have disappeared when the Roman rite was introduced into Francia but were retained, probably because the Roman Easter Vigil seemed too austere to the Franks. There are difficulties, however, in reconstructing any 'original' Gallican melody of the *Exultet* from the various recitatives that survive (see G. Benoit-Castelli: 'Le Praeconium paschale', *Ephemerides liturgicae*, lxvii, 1953, pp.309–34). In Gallican sacramentaries the *Exultet* ends with a collect (prayer); this is followed by a second, styled *post hymnum cerei* ('after the hymn of the [Paschal] candle'). The hymn in question is in fact *Inventor rutili*, whose text was composed by Prudentius; it was probably a part of the daily Gallican Office of Lucernarium and survives in many Gaulish and German manuscripts as a part of the solemn Lucernarium for the Easter Vigil (ed. G.M. Dreves, AH, l, 1907, p.30; melody in Stäblein, 1956, no.1001; see also Combe, 1952, p.128).

Further liturgical comparisons may be made with those *Ordines romani* that include Gallican material; with the exception of *Ordo I*, all the *Ordines* are of Frankish composition and, for the most part, present a mixture of Roman and Frankish elements. The 8th-century *Ordo XV* (Andrieu's numbering), for example, specifies for the Requiem Mass the introit *Donet nobis requiem* (see Andrieu, 1931–61, iii, 127). This introit, which appears in many Aquitanian manuscripts, including that of Albi (*F-Pn* lat.776), is probably Gallican (melody ed. C. Gay, 'Formulaires anciens pour la Messe des défunts', *EG*, ii, 1957, pp.83–129, esp. 91, 128).

5. STYLE OF THE TEXTS. A distinct vocabulary and style characterizes the texts of the Gallican liturgy. The style of the Roman collects and prefaces is rigorously precise in theological formulation and concise in vocabulary: prayer is always addressed to the Father through the Son, and petitions are concisely expressed. By contrast, Gallican prayers develop various aspects of a theme, with an accumulation of rhetorical figures such as repetitions, redundancies, antitheses and metaphors; and the rich and colourful vocabulary contrasts strongly with that of the

Roman liturgy (see Manz, 1941). Gallican prayers are introduced with an admonition (*praefatio*) announcing the theme; these occur at Rome only before the solemn prayers of the Good Friday liturgy. Prayers in the Gallican rite were frequently addressed to the Son and Holy Spirit.

Some conventional rhetorical phrases are characteristically Gallican: the gospels in the Gallican lectionaries generally begin 'In diebus illis' or 'Diebus illis', rather than 'In illo tempore', the Roman formula. For this reason the antiphon *In diebus illis mulier* may be taken to be Gallican; it is prescribed for St Mary Magdalene (22 July) in some late antiphoners (see Hesbert, 1965, ii, nos.102, 146, 4), but more frequently for Maundy Thursday (see Hesbert, 1963, i, nos.72*c*, 147, and in some Aquitanian manuscripts), and it was probably originally part of the Holy Week liturgy in Gaul.

Another such conventional formula is 'Dominus Jesus', in the Milanese and Gallican lectionaries (see Salmon, 1944–53, p.lxxxviii). Chants including this phrase may have a Gallican origin, for example, the antiphon *Cena facta est sciens Dominus Jesus* found in Aquitanian manuscripts. The antiphon for the Dedication of a Church, *Pax eterna*, also begins with a characteristically Gallican phrase (see Manz, 1941, no.700).

In biblical texts there are characteristic divergences from the Vulgate version, for example, in the alleluia with the verse 'Multifarie', which is not identical to its Gregorian counterpart and whose reading is reproduced precisely in the lectionary of Luxeuil (ed. Salmon, 1944–53, p.9). Some of the Maundy (*mandatum*) chants follow the ancient Latin biblical text used in Gaul (ed. A. Dold, *Das Sakramentar im Schabcodex M 12*, Beuron, 1952, p.25); the 11th-century scribe who copied the antiphon *Cena facta* into the Albi manuscript (*F-Pn* lat.776, f.62) wrote 'Venit ergo' under the influence of the Vulgate version, but a contemporary hand restored the Gallican reading, 'autem'.

Textual analysis of the Aquitanian chant manuscripts, especially *F-Pn* lat.776 from Albi, would probably reveal further chants of Gallican origin. (On the Gallican Psalter, see §8 below.)

6. MUSICAL STYLE. Walahfrid Strabo spoke of the distinctive style, in both text and sound, of Gallican chants (see quotation in §1 above); and the chants identifiable according to textual criteria exhibit certain musical peculiarities, in intonation formulae, in melismas and cadences and in the use of distinctive neumes. However, these criteria cannot be used in isolation to identify Gallican chants; after the imposition of the Gregorian repertory in Francia, chant composition continued for a time along traditional lines. Thus a distinction between the older Gallican repertory and chants composed shortly after the Carolingian reform cannot be made on purely musical grounds.

At a second intonation, following an intermediate cadence, the pattern shown in ex.1 is possibly a Gallican

Ex.1

characteristic; another characteristic may be the use of sequential patterns for a descent (ex.2).

Ex.2

The greater antiphons often feature exuberant melismas, like those in Ambrosian and Mozarabic chant, and in this they differ markedly from the Gregorian repertory. In melismatic chants a longer or shorter melisma generally occurs on the penultimate or antepenultimate syllable; if the final word is 'alleluia', it is the antepenultimate syllable rather than the first or last 'a' that carries the melisma, as in Mozarabic chant (see L. Brou: 'L'alleluia dans la liturgie mozarabe', *AnM*, vi, 1951, pp.3–90). These final melismas occur in the following chants, otherwise identified as Gallican: *Elegerunt*, *Venite populi*, *O crux benedicta quae*, *Cum Rex gloriae* (in which the melisma contains more than 80 notes) and *Factus est repente*.

A distinctive neume, the *pes stratus*, occurs only in chants composed in Francia (whether Gallican or Romano-Frankish). It is a *pes* (*podatus*) in which the second note carries an *oriscus* as well (ex.3), and it usually occurs

Ex.3

during a melisma or at intermediate cadences (e.g. in the extended jubilus melisma sung in the repetition of the alleluia after the verse). The neume indicates an interval of a major 2nd or minor 3rd (see illustration) and is found in the following chants, which may be of Gallican origin: *O crux benedicta* (at 'alleluia'), *Cum audisset* (at 'sedens' and 'salve'), *Ave rex noster* (at 'et'), *Collegerunt* (at 'ab'), *Elegerunt* (at '-gerunt' and 'plenum') and *Factus est repente*(at 'replevit', twice; this offertory, in the late 8th-century *B-Br* lat.10127–44, occurs also in nine Beneventan manuscripts; see Hesbert, 1963, p.62).

The formulaic method of composition known as CENTONIZATION is another feature thought to be characteristic of the old Gallican repertory, as of the other ancient repertories. In the antiphons *Cum audisset* and *Ave Rex noster*, for instance, the passages in which the *pes stratus* occurs are musically virtually identical; a passage in the Maundy antiphon *Vos vocatis me* with the verse 'Surgit' is also found, note for note, in an antiphon *Gentem* of the ancient Office of St Remigius (ex.4). Identical phrases occur also in the antiphons *Salvator omnium* and *Hodie illuxit nobis* (Stäblein, *MGG1*, iv, 1311). The chant *Elegerunt* and the offertory *Factus est repente* share the same intonation, and the final alleluia of *Factus est repente* resembles the alleluia of the antiphon *Venite populi*.

7. THE MASS. The structure of the Gallican Mass and the nature of its chants can to some extent be reconstructed from information in a variety of sources, especially the first of the two letters of the *Expositio antiquae liturgiae gallicanae*(ed. Ratcliff, 1971). The items from the Mass are listed below in their liturgical order.

(i) Antiphona ad praelegendum. This chant preceded the lections; it is found (with the same name and function) in the Spanish liturgy. Like its Roman counterpart, the introit, but unlike the equivalent Ambrosian *ingressa*, it included psalm verses: the verses *ad repetendum* in some ancient Gregorian graduals from north France may be of Gallican origin.

(ii) Call for silence. A recitative for this type of diaconal admonition occurs in a processional from St Peter at Cologne (*D-KNa* G A 89*b* (anc.W.105), f.7*v*; cf RISM,

Ex.4

Antiphon *Vos vocatis me*

B/XIV/1, 217; see ex.5). According to the *Expositio*, this enabled the congregation betterto hear the word of God

Ex.5

Sta - te cum di - sci - pli - na et si - len - ti - o au - - di - en - tes in - ten - te.

('ut tacens populus melius audiat verbum Dei'; ed. Ratcliff, 1971, p.3, no.2). The call for silence was followed by the greeting 'Dominus sit semper vobiscum' and the answer 'Et cum spiritu tuo', and the collect.

(iii) Aius (Trisagion). The term 'aius' is a corruption of 'hagios' (Gk.: 'holy'): the letter 'g' was dropped, as occurred also in the tonal formula *noeais*, for *noeagis*. The chant was intoned by the priest and continued by the choir in Greek and Latin ('dicens latinum cum greco'); it was followed by the Kyrie eleison, which was probably not sung, but recited by three boys in unison ('uno ore') as at Milan. The *Trisagion* was mistakenly written as 'Trecanum' in *F-AUT* 184 (see Bernard, 'La "Liturgie de la victoire"', 1996).

(iv) Benedictus (Prophetia). This, the Canticle of Zechariah (*Luke* i.68–79), was probably intoned by the priest (Gregory of Tours, *Decem libri historiarium*, viii, 7: MGH, *Scriptores rerum merovingiarum*, i, 1951/*R*, 330). The *Benedictus* was replaced during Lent by the antiphon *Sanctus Deus archangelorum* (see Ratcliff, 1971, p.18, no.4). It was followed by a collect (*collectio post prophetiam*).

(v) Hymnus trium puerorum (Benedictiones, Benedicite). The synaxis proper began with three readings; the position of this canticle is not clear from the *Expositio* (Ratcliff, 1971, p.5, no.6), but it probably separated the first two readings, the *lectio prophetica* (from the Old Testament) and the lectio *ex apostolo* (drawn not only from the epistles but also from *Acts*, *Revelation* and even the martyrology, according to the festival).

(vi) Responsorium. This chant was probably ornate and was sung by boys ('a parvulis canitur'); in the latter feature it recalls the responsories *cum infantibus* of the Ambrosian rite. It replaced an ancient *psalmus responsorius*, sung by a deacon, with the congregation singing a brief *responsorium* after each verse (Gregory of Tours, op.cit., 328, cf 694).

Kyrie 'Te Christe supplices exoramus' from a Norman troper, 11th century (GB-Lbl Royal 8.C.XIII, f.1); pes stratus occurs in lines 11 (2nd and 4th neume) and 17

(vii) Antiphona ante evangelium. This antiphon was sung during the procession of the deacon to the ambo from which the Gospel was read, and was followed by the chanting of the Gospel by the deacon. The Ambrosian rite provides antiphons of this type for Christmas, Epiphany and Easter, but at no other time; there is, however, a complete series of Ambrosian antiphons to follow the Gospel (*post evangelium*).

(viii) Sanctus post evangelium. During the return of the Gospel procession from the ambo, the Sanctus was sung by the clerics in Latin. Although a passage in the early 7th-century *vita* of St Gaugericus, Bishop of Cambrai, suggests that Greek was used ('aius, aius, aius per trinum numerum imposuit': ed. in *Analecta bollandiana*, vii, 1888, p.393), the reference here may be to the earlier Trisagion (see §7(iii) above) or to the Sanctus after the Preface (see §7(xii) below). This chant was followed by the reading of a patristic homily.

(ix) Preces. Numerous Gallican *preces* survive in Aquitanian manuscripts. They take the form of a litany in which a deacon chants numerous supplications for the spiritual and temporal needs of the people, and each is followed by a short congregational response, 'Domine miserere', 'Kyrie eleison', 'Dona nobis veniam' etc. (see §13 below).

(x) Dismissal of the catechumens. A melody for this item, chanted by the deacon, survives in *D-KNa* G A 89*b*

(see ex.6). *Ordo XV*, a Gallicanized Roman ceremonial written in Francia in the 8th century, has a text varying slightly from this.

Ex.6

(xi) Sonus. This ornate chant ('dulci melodia') was sung during the solemn Procession of the Oblations from the altar of the prothesis (*proskomidē*) to the high altar. The *Expositio* expounded its symbolism at length (ed. Ratcliff, 1971, p.10, no.17). The *sonus* was equated with the Roman offertory by the *Capitulare ecclesiastici ordinis* ('offerenda quod Franci dicunt sonum'; see Andrieu, 1931–61, iii, 123) It concluded with a triple alleluia, except during Lent.

(xii) Sanctus. After the *immolatio missae* (*contestatio*), corresponding to the Preface in the Roman Mass, which was chanted by the priest, the Sanctus followed. It was adopted even though it interrupts to some extent the continuity of the Consecration Prayer, and even though a Sanctus occurred earlier in the Gallican Mass; and it was followed by a transitional prayer, beginning with the words 'Vere sanctus'.

(xiii) Fraction antiphon. In Francia the Fraction occurred before rather than after the Lord's Prayer (see Ratcliff, 1971, p.15, no.24*b*), and an antiphon was sung by the clerics. In Spain and at Milan this was termed the *confractorium*. There are frequent concordances between Ambrosian *confractoria* and Roman communions. On the other hand, Ambrosian *transitoria*, which are equivalent in liturgical function to the Roman communions, are often drawn rather from oriental or Gallican Fraction chants.

(xiv) Pater noster. In Gaul, North Africa and Spain, this was sung by the whole congregation.

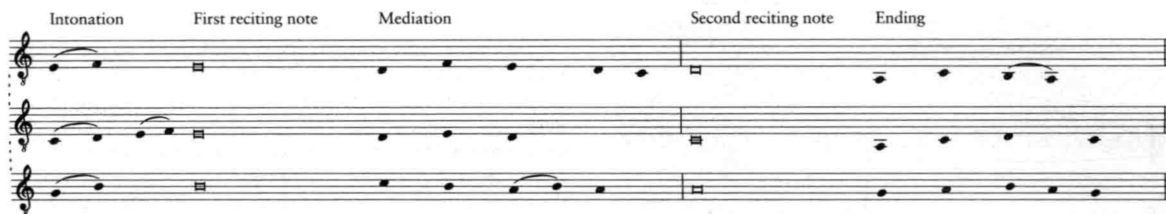
(xv) Episcopal benediction. A solemn benediction was pronounced by the bishop; the formula was shortened if the celebrant was simply a priest (see Ratcliff, 1971, p.15, no.26). After the Council of Agde (506) the faithful were not permitted to leave the church before this benediction. It was preceded by a preliminary admonition from the deacon, 'Humiliate vos ad benedictionem' (melody, from a Soissons manuscript, in Stäblein, *MGG1*, iv, 1318; melody in ex.7, from a Cluniac manuscript from St Martin-des-Champs, *F-Pn* lat.17716, f.14, in Hesbert, 1956, p.217). The verses of the benediction were then chanted by the bishop, with the response 'Amen' from the congregation (melody in Hesbert, 1956, p.216–17). This practice survived in many churches until a late date.

8. The Office. Evidence relating to the Gallican Divine Office is much more scarce than that for the Mass. Practice varied from church to church, for example, in the ordering of the Psalter and in the number and choice of antiphons and responsories; until the reforms of the early 9th century, monastic communitites generally composed their own *regula* and cursus. Most of the surviving evidence concerns the Offices celebrated at Tours, the monasteries of south-east France, including Lérins, and St Maurice at Agaune in the Burgundian Kingdom, where the monks were committed to singing the Office uninterruptedly, according to the practice known as *laus perennis* (see Gindele, 1959). In addition, several *regulae* incorporating a cursus survive from the monasteries established in Burgundy by the Irish monk Columbanus from 590, who exerted a considerable influence on monasticism in Gaul. Columbanus's own *Regula* was particularly ascetic and his followers often combined it with the *Regula Benedicti*. In the early 9th century, however, religious communities were required to follow either the *Regula Benedicti* or the secular 'Roman' cursus.

In broad outline the Divine Office of the Frankish and German cathedrals resembled that of other regions. There was a night Office, divided into various nocturns, with a hymn, psalms and lessons. According to Amalarius of Metz, writing in the first half of the 9th century, the *Pater noster* was sung at the end of each nocturn. The psalms, and after the Council of Narbonne in 589 (canon 2) also the sections of longer psalms, concluded with the Lesser Doxology, *Gloria Patri*, to which the phrase 'Sicut erat' was added at the Second Council of Vaison (529); churches near Spain adopted the distinctive Spanish doxology, 'Gloria et honor Patri et Filio et Spiritui Sancto in secula seculorum' (see Ward, 1935, p.73). Some of the lessons for the night Office are indicated in the Lectionary of Luxeuil (see Salmon, 1944–53, ix, 57). The *Te Deum*, a hymn of Gallican origin, was sung at the night Office on Sundays and festivals (see Kähler, 1958).

The dawn Office included psalms and biblical canticles. From the 6th century, the *Benedicite* and the *alleluiaticum* (i.e. Psalms cxlviii–cl) were recited at this Office on Sundays (Gregory of Tours, *De vitis patrum*, vii: MGH, *Scriptores rerum merovingiarum*, i, 1951/*R*, 685). The *Gloria in excelsis* (Greater Doxology) was sung at Lauds in Gaul and Spain, and at Milan; it was not a part of the Mass.

The day Hours (Prime, Terce, Sext and None) included one hymn each and psalms. Lucernarium (at the 'lighting of lamps', i.e. at sunset) included a greater responsory, as in the Ambrosian and Spanish rites, and a metrical hymn when these were admitted. In cathedrals, Lucernarium ended with an episcopal benediction. The sequence of Offices concluded with Vespers and Compline (Duodecima).



The chants of the Gallican Offices thus resemble those of other regions: they comprise psalms, antiphons with verses, lessons, greater responsories and (in most churches) hymns.

Local liturgical variants appear in a number of areas. The ancient Gallican psalters (e.g. the *Psalterium corbeiense*, the *Psalterium sangermanense* and the psalters of

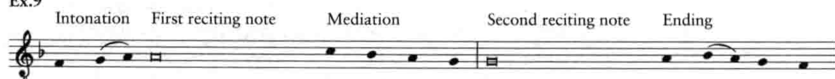
Ex.7

Ex.8

Reichenau; see Capelle, 1925) differ in text from the Italic versions (*see* LITURGICAL PSALTER), and their list of Lauds canticles is different from that of Rome (see Schneider, 1949, p.483). Similarly, the Tours antiphoner differs from that of Marseilles (see Leclercq, 1924, col.588), and that of Toulouse differs from those of Autun and Paris.

Metrical hymns were composed in Italy and Gaul from the late 4th century. Although in the Carolingian era some churches, such as those of Lyons and Vienne, are known to have excluded hymnody (as Walahfrid Strabo commented: 'in some churches metrical hymns [*hymni metrici*] are not sung') on the grounds that the texts were non-biblical, in general hymn singing seems to have been a popular aspect of the Gallican liturgy, and various influences may be noted. In south-east France the hymnal of Milan exerted an influence: Bishop Faustus of Riez (*fl* 5th century) noted that the hymn *Veni Redemptor gentium* was sung almost throughout Gaul (*Epistola ad graecum diac*; ed. A. Engelbrecht, *Fausti Reiensis Praeter sermones pseudo-eusebianos opera*, Vienna, 1891, p.203); and St Caesarius of Arles (*d* 543) in his *Regula ad virgines* (ed. G. Morin, *S. Caesarii Arelatensi episcopi Regula sanctarum virginum*, Cologne, 1932, p.23) prescribed the hymn *Christe qui lux es et dies* for Compline; as a means of retaining the attention of the laity, Caesarius also introduced hymns into the celebration of Mass. The Irish hymnal exerted an influence in an area limited mainly to Francia north of the Loire and Germany (see preface to AH, lii, Leipzig, 1909); and there was Spanish influence in south-west Gaul (see Wagner, 1928). For the repertory of known Gallican hymns see §11 below.

9. SPECIAL RITES. The Gallican rite had a richer repertory of special rites than the Roman. A solemn translation of relics, accompanied by chants, was prescribed at the Dedication of a Church. At baptisms the feet of the neophytes were washed while chants from the Maundy Thursday liturgy were sung: this ceremony was distinctly non-Roman (see Schäfer, 1956). At Extreme Unction the priest chanted antiphons while administering the rites, a practice also common to Spain.



Processions were instituted by Claudianus Mamertus, Bishop of Vienne (*d c*475), on Rogation days (the three days before Ascension Day). These were adopted in the Ambrosian and Spanish rites, but not until a later date at Rome because a similar processional litany was instituted there on 25 April. Gallican processions were long and must have required more chants (antiphons and litanies) than the Roman processions; some of these Gallican chants survived well into the Middle Ages. (*See* PROCESSIONAL.)

10. PSALMODY. In Gaul, as throughout Western Christendom, the psalms were originally sung responsorially: a lector, or a psalmist belonging (according to the canons of the late 5th-century *Statuta ecclesiae antiqua* of southern Gaul) to the lesser clergy, would recite the psalm, and the congregation would sing a short refrain (*responsorium*) to a very simple melody after each verse or pair of verses. The *responsorium* might be drawn from the psalm itself, or other brief responses such as 'alleluia' might be used. *Responsoria* of this type, indicated by an initial 'R' in gold, occur in the Gallican *Psalterium sangermanense* (*F-Pn* lat.11947); an alleluia written in gold should be considered a *responsorium*: for Psalm xliv the *responsorium* was 'Adferentur regi virgines postea'; for Psalm l 'Asperges me hyssopo et mundabor'; for Psalm lvi 'Paratum cor meum Deus'; and for Psalm cix 'Juravit Dominus nec penitebit eum'. (For a list of *responsoria*, see Huglo, 1982.)

Responsorial psalmody of this type was replaced in Francia by antiphonal psalmody, but hardly any psalmody different from the Gregorian survives. It is not known whether a melodic variation occurred at the mediation, midway through each verse, or whether this mediation was reduced to a simple pause on the reciting note, as in Ambrosian or Mozarabic psalmody, because the surviving evidence may have been 'corrected' according to Gregorian procedure. (In the 16th century the mediation was adopted in this way in the Ambrosian rite in direct imitation of Roman practice.)

Psalm tones that seem to be of Gallican origin are shown in ex.8. The first two occur in the *Commemoratio brevis* (*GerbertS*, i, 213–14; Bailey, 1979), an anonymous treatise of Benedictine origin composed in the late 9th century in the area between the Seine and Rhine. Besides the usual eight Gregorian psalm tones, two special tones are given for antiphonal psalmody. One is the *tonus peregrinus* ('wandering tone'), so named in the 12th century because it included two reciting notes and was foreign to the Gregorian system of eight tones (in which only one reciting note is found in each tone). This tone was mentioned by Aurelian of Réôme (*fl* 840s) in his *Musica disciplina*: 'quemadmodum ab antiquis, ita a modernis modo canuntur' ('as it was by the old, it should be sung by the moderns'; ed. Gushee, 1975, p.110). The third tone in ex.8 is the melody of the Gallican *Te Deum*, which is in essence a simple psalm tone with two reciting notes. Ex.9 shows a further psalm tone with two reciting notes, from the 1736 Ventimiglia breviary, where it is described as 'from the ancient use ... of the church of

Paris' and probably represents a corrupt version of a Gallican psalm tone.

Ex.10 shows two somewhat more complex psalm tones, with an antiphonal alleluia. The alleluia is sung once after the first verse, twice after the second group of verses and three times after the last group. The reciting note varies from group to group. This type of psalmody survived in manuscripts from Rouen and in some Anglo-Norman manuscripts. A psalm tone corresponding to the Gallican *alleluiaticum*, that is, Psalms cxlviii–cl (ex.11), is found in pre-13th-century Gregorian antiphoners as part of the alleluiatic Office for Septuagesima (see Oury, 1965, p.98).

11. Hymnody. Three Gallican prose hymns are known: the *Te Deum*, the *Gloria in excelsis* and the hymn for the night Office, *Magna et mirabilia opera tua* (*Revelation* xv.3), mentioned by St Caesarius of Arles and surviving in the Gallican hymnal of a psalter (*I-Rvat* Reg.lat.11).

The melody of the *Te Deum* consists of two sections. The first, ending at 'sanguine redemisti', is a Gallican psalm tone with two reciting notes (see §7 above and ex.8). The melody of the section 'Sanctus, sanctus, sanctus' is the same as that used in the Ambrosian Mass. The second main section consists of a series of psalm verses (*capitella*) that originally formed part of the *Gloria in excelsis*, the hymn of Matins; the manuscript tradition poses difficult problems of interpretation (see Frost, 1933, p.250). The construction of the melody changes at the beginning of the second section ('Aeterna fac'): no general conclusions can be drawn regarding this part of the melody.

Ex.12

Glo - ri - a in ex - cel - sis De - o,

et in ter - ra pax ho - mi - ni - bus... [etc]

Te De - um lau - da - - mus:

te Do - min - um con - fi - - te - mur...[etc]

Textual variants suggest that the Gallican melody of the *Gloria in excelsis* was Gloria XV of the Vatican edition of the gradual. Its features include a syllabic melody, a defective scale and a very archaic structure; the intonation is identical to that of the *Te Deum* (ex.12). The antiquity of this melody is suggested by the text: characteristically Gallican variants ('hymnum dicimus tibi', 'propter gloriam tuam magnam' etc.) are found in manuscripts, both noted and with neumes, containing this melody. Some Western manuscripts include a Greek version of the Gloria, and this may have belonged to the Gallican repertory (see Huglo, 1950, p.35).

The texts of the Gallican metrical hymns survive in two substantially identical versions: the *Psautier de la reine* (*I-Rvat* Reg.lat.11) from northern France between Paris, Corbie and Soissons, and the Murbach hymnal (*GB-Ob* Junius 25). The former is supported by evidence from a Corbie hymnal (*F-Pn* lat.14088) and the latter corresponds with the hymnal of Rheinau (*CH-Zz* Rh.34), which is incomplete. Almost all the hymns in these manuscripts are metrical.

The following list of Gallican hymns can be reconstructed on the basis of these manuscripts. The hymns are remarkably ancient: those borrowed from Milan predate the addition of the so-called Maximianus series to that

Reconstruction of the Gallican Hymnal

R[no.] = no. in *I-Rvat* Reg.lat.11
P[no.] = no. in Hymnal of Corbie (*F-Pn* lat.14088)
O[no.] = no. in Hymnal of Murbach (*GB-Ob* Junius 25)
Z[no.] = no. in Hymnal of Rheinau (CH-Zz Rh.34)
C, A, F = cited by Caesarius, Aurelian of Arles, Faustus
S[no.] = possible melody in B. Stäblein: *Hymnen, I*, MMMA (1956)

The Night Office (*Ad nocturnos*)
Sunday: *Mediae noctis tempus est*: R17; O1; Z1; C; S761
Weekdays: *Magna et mirabilia*: R18; C, A
Tempus noctis: P7; O23
Rex aeterne Domine: O24; C, A; S3 (Ambrosian)
Aeterne rerum conditor: O25; C; S1 (Ambrosian)

Lauds (*Ad matutinas laudes*)
Sunday: *Te Deum laudamus*: R1; O26; C, A; (see ex.11)
Deus qui coeli lumen: P8; O2; Z2
Monday: *Splendor paternae gloriae*: R2; O3; Z3; A; S2 or 3 (Ambrosian)
Tuesday: *Aeterne lucis conditor*: R3; P9; O4; Z4; A
Wednesday: *Fulgentis auctor*: R4; P10; P5; cf Prime
Thursday: *Deus aeterni luminis*: R5; P11; O6
Friday: *Christe coeli Domine*: R6; P12; O7
Saturday: *Diei luce reddita*: R7; P13; O8; Z5
After the Benedictus: *Gloria in excelsis*: C, A; Gloria XV (Vatican edn)

The Little Hours (Ad horas minores)
Prime: *Post matutinis laudibus*: P1; O9; Z9; S4 (Ambrosian)
Fulgentis auctor: C, A; cf Wednesday of Lauds
Terce: *Certo tenentes ordine*: R19; P2; O11; Z10
Dei fide qua vivimus (Lent): P14; O10; S255 or 413
Jam surgit hora tertia (Eastertide): R11; C, A; S6 (Ambrosian)
Sext: *Dicamus laudes Domino*: R20; P3; O12; Z11
Meridie orandum est (Lent); P15; O17
Jam sexta sensim (Eastertide): R12; C, A
None: *Perfectum trinum numerum*: R21; P4; O13
Sic ter quaternis (Lent): P16; O18; cf S14
Ter hora trina (Eastertide): R13; C, A

Lucernarium (*Ad lucernarium*)
Deus qui certis legibus: R14; P5; P15; C, A

Vespers (*Ad vesperas*)
Deus qui claro lumine: P6; O14
Deus creator omnium: R15; C, A; S8 (Ambrosian); see Gastoué, 1939, p.53
Sator princeps: R16
Hic est dies verus (Eastertide): R10; O20; C, A; S5 (Ambrosian)

Compline (*Ad duodecima*)
Christe qui lux es et dies: O16; S9 (Ambrosian)
Sol cognovit occasum: C
Christe precamur adnue: C

Proper of the Time (De tempore)
Intende qui regis (Christmas): R8; F; S6 (Ambrosian)
Illuminans altissimus (Epiphany): R9; S26 (Ambrosian)
Aurora lucis (Easter): P17; O19; S180
Hic est dies (Vespers of Easter): R10; O20; C, A; S5 (Ambrosian)
Ad cenam Agni providi (Vespers of Easter): P18; O21; S103 or 150

Common of the Saints (*De sanctis*)
Aeterna Christi munera: O22

liturgy in the mid-7th century (see Huglo and others, 1956, p.85). Moreover, this list contains no hymns by Prudentius (348–after 405), Paulinus of Nola (353/4–431) or Sedulius (mid-5th century), although many of the Office hymns are cited in the monastic Rules of Caesarius of Arles (470–543) and his brother Aurelian (*d* 551; see Raugel, 1958; and Anglès, 1967, p.73). The *Psautier de la reine* contains only three hymns by St Ambrose for the Proper of the Time: *Intende qui regis* for Christmas, *Illuminans altissimus* for Epiphany, and *Haec est dies verus Dei* for Easter; this archaically brief series is framed by six hymns for Lauds, one for each weekday, and by a series of hymns for the other Offices.

The non-Ambrosian hymn melodies demand separate study from those of the Ambrosian, which must have been the same as those used in Milan (thematic table in Huglo and others, 1956, pp.99–100), except for *Veni Redemptor gentium* and *Intende qui regis*, whose melodies were altered in Francia. Among the other hymns, the melody of *Mediae noctis tempus est*, which appears in noted hymnals, probably has a Gallican origin (see Stäblein, 1956, p.448, melody 761). (*See also* HYMN, §II, 1.)

12. ANTIPHONS AND RESPONSORIES. In the Gregorian repertory only one type of simple antiphon is generally used with the singing of psalms. The Gallican tradition, however, like the Ambrosian and Mozarabic, had antiphons with verses that were chanted during the Offices and at other occasions such as the Washing of the Feet on Maundy Thursday; the Offices of St Denis and St Remigius, which originated before the introduction of Roman chant into Francia, include antiphons of this type. Indeed, antiphons with verses may be found in three of the Gregorian Offices: those of 25 January (the Conversion of St Paul), 30 June (Commemoration of St Paul) and 10 August (St Lawrence). The reason for this anomaly is unknown.

Gallican antiphons with verses include the Maundy antiphons, such as *Si ego lavi* with the verse 'Exemplum' (see §4 above), and *Popule meus* with two verses, 'Quia eduxi' and 'Quid ultra'. *Popule meus* contains a celebrated Gallican intonation on 'aut in quo', which appears from the late 9th century in French antiphoners and which has an Ambrosian parallel (see PalMus, 1st ser., vi, 1900/*R*, 304). Another example is the antiphon *Collegerunt* with the verse 'Unus autem', which may represent a Gallican *sonus*; it is found as an offertory in some Gregorian manuscripts, such as those of Paris.

The Gallican *antiphonae ante evangelium* were sung, as at Milan, without psalm verses. Examples include *Salvator omnium*, *Hodie illuxit* (Stäblein, *MGG1*, iv, 1311) and probably also *Insignes praeconiis* (ibid., 1309, 1311). The Fraction and Communion antiphons also lacked psalm verses: they include *Venite populi* (see §4 above), *Emitte angelum* (ed. P. Cagin: *Te Deum ou illatio?*, Solesmes, 1900, pp.217, 495) and *Memor sit* (Stäblein, *MGG1*, iv, 1315).

The shorter Gallican Office antiphons are not identifiable, although the three antiphons whose texts begin with 'Alleluia' may be Gallican: *Alleluia, Lapis revolutus est*, *Alleluia, Noli flere Maria* and *Alleluia, Quem quaeris mulier* (see J. Claire: 'L'évolution modale dans les répertoires liturgiques occidentaux', *Revue grégorienne*, xli, 1963, p.61). These are similar to the alleluiatic antiphons in the Celtic manuscript fragments *F-Pn* n.a.lat.1628 (see Morin, 1905, p.344); they are not in the Roman Easter Office, which is well known from Amalarius of Metz and the *Ordines romani*.

The Greco-Latin chants of the Western Church include the Cheroubikon, which was chanted at St Denis until the 13th century and which survives in the West only in manuscripts with neumes (see M. Huglo: 'Les chants de la *Missa greca* de Saint-Denis', *Essays Presented to Egon*

Wellesz, ed. J. Westrup, Oxford, 1966, pp.74–83, esp. 79; see also C.M. Atkinson: 'On the Origin and Transmission of the Missa graeca', *AMw*, xxxix, 1982, 113–45). In the West its origin is Gallican. Some manuscripts contain a Greek Sanctus, and this too probably entered the West through the Gallican liturgy (see Levy, 1958–63, pp.7–67).

None of the greater responsories of the Gallican Offices is at present known to survive, except for *Descendit de coelis* (cited in §4 above). It is possible that one or two may survive in the pre-Gregorian Offices of St Denis, St Remigius and St Germanus of Auxerre, for Hilduinus in his letter to Louis the Pious noted that the Office of St Denis included Gallican chants and had to be recast to conform with the Gregorian repertory (see §1 above).

13. 'PRECES'. This category consists of the most substantially intact surviving group of chants thought to be of Gallican origin. *Preces* were assigned to the Minor Litanies in Gregorian books (*see* PROCESSIONAL) and may have been sung mostly in Lent. Nearly 40 *preces* occur in Gregorian manuscripts, not all of them of Gallican origin.

The *preces* consist of an alternation of verses, sung by a deacon, and a brief response (*responsorium* or *presa* in Aquitaine and Spain) sung at first by the congregation. The verses, stating the intention of the prayer, were sometimes arranged as *abecedaria* in alphabetical order of incipit. The melodies of the refrains often included complex melismas and are preceded in 11th-century noted manuscripts by the rubric 'Schola', which indicates that at this period the *responsorium* was sung exclusively by experienced singers, not by the congregation.

The *preces* had no single common origin. Some, in Aquitanian graduals, derived their texts from the Spanish liturgy (see Huglo, 'Les preces hispaniques', 1955, p.361). Others derive from the *Deprecatio Gelasii*, which was excluded from the Roman liturgy at an early date but retained in Gaul. Yet others contain verses that correspond with parts of the two Ambrosian Lenten litanies (see Capelle, 1934, p.130; and P. de Clerck, 1977).

The following list presents the *preces* of Gallican origin in Gallican and Gregorian manuscripts (in the former instance without melodies), but it does not include 9th-century litanies composed at St Gallen in the style of earlier Gallican *preces*. Those indicated with a question mark, however, may have been composed after the suppression of the Gallican chant, rather than being of genuine Gallican origin.

WORKS

?*Ab inimicis nostris*: Sarum processional of 1517, f.cviii

A Patre missus: Bobbio Missal (ed. Lowe, Wilmart and Wilson, 1917–24, p.66), for Holy Saturday; the second stanza begins 'Vide Domine'

?*Audi nos Christe Jesu*: in processionals from St Jiří, Prague – *CZ-Pu* VI.G.3*b*, VI.G.5, VI.G.10*a–b*, VII.G.16, XII.E.15*a*, XIII.H.3*c*; Huglo, RISM, B/XIV/1, 120–30

Clamemus omnes una voce: Domine miserere: *abecedaria* (see *PL*, cxxxviii, 1085) in MSS with Lorraine and Rhenish notation – *F-AS* 230 (907) (ed. L. Brou, *The Monastic Ordinale of St. Vedast's Abbey, Arras*, London, 1957, p.68); *AUT* S.12, f.91; *CA* 78(79), f.39*v* (11th or 12th century); *CA* 77, f.69; *CA* 80, f.17; *CA* 131, f.43*v*

Deus miserere, Deus miserere, O Jesu bone (for the dead): in a Mozarabic book, *E-Mah* 56, f.27, and in an Albi MS in Aquitanian notation, *F-Pn* lat.776, f.138 (see C. Rojo and G. Prado: *El canto mozárabe*, Barcelona, 1929, p.74)

Dicamus omnes [*Deprecatio Gelasii*]: widely diffused, with three versions of the text (see de Clerck, 1977, ii, 215); melodies in Suñol (1935), 116–17; J. Pothier, ed.: *Variae preces de mysteriis et festis* (Solesmes, 1888), 266; A. Gastoué, *Tribune de St Gervais*, ix (1903), 46; Gastoué (1939), 14; Stäblein, *MGG1*, iv, 1313

Domine Deus omnipotens patrum nostrorum [see below, *Kyrie eleison Domine*]

Domine miserere: a *responsorium* of the *preces Dicamus omnes*; see *Processionale cenomanense*, f.xxxvii; Sarum processional of 1517, f.cviii*v*

Exaudi Deus voces nostras: in MSS with Lorraine notation – *F-AUT* S.12, f.96; *Pn* lat.8898, f.137 (ed. in *Rituale seu mandatum insignis ecclesiae suessionensis*, Soissons, 1856); *VN* 130, f.45*v*; melody in Stäblein, *MGG1*, iv, 1313

Insidiati sunt mihi: Bobbio Missal (ed. Lowe, Wilmart and Wilson, 1917–24, p.66; see *Missale mixtum*: *PL*, lxxxv, 372; D. de Bruyne, *Revue bénédictine*, xxx, 1913, p.431; Huglo, 'Les preces hispaniques', 1955, p.363)

Kyrie eleison, Christe eleison: Domine miserere, Christe miserere: in MSS with Messine notation, from Cambrai, Verdun etc.; melody in Gastoué (1939), 15

Kyrie eleison: Domine Deus omnipotens patrum nostrorum: in many MSS from north France in Lorraine notation and in MSS from south-west France with diastematic notation; melody in J. Pothier, *Revue du chant grégorien*, ix (1901), 113–20; Gastoué (1939), 16; Stäblein, *MGG1*, iv, 1313

Kyrie ... qui passus est [see below, *Qui passurus*]

Kyrie ... qui precioso [see below, *Qui pretioso*]

Miserere Domine supplicantibus: in MSS with diastematic notation from south-west France; text and melody ed. Huglo, 'Les preces hispaniques' (1955), 372

Miserere, miserere, miserere Domine populo tuo quem redemisti: in a MS from south-west France (see Gastoué, 1939, p.19)

Miserere, miserere, miserere illi Deus, Christe redemptor (for the dead) [see next]

Miserere, miserere, miserere illi Deus, tu Jesu Christe (for the dead): this and the preceding occur in MSS from Albi, *F-Pn* lat.776, ff.138*v*–139, and Moissac, *Pn* lat.1809, f.386*v*; melodies in C. Rojo and G. Prado: *El canto mozárabe* (Barcelona, 1929), 75; Stäblein, *MGG1*, iv, 1312

Miserere Pater juste et omnibus indulgentiam dona: in MSS from south-west France; ed. Huglo, 'Les preces hispaniques', (1955), 370; Stäblein, *MGG1*, iv, 1312

Peccavimus Domine, peccavimus, parce peccatis nostris: variant incipit of *Dicamus omnes* in Irish MSS – Stowe Missal (ed. G.F. Warner, London, 1906–15, p.30) and *CH-SGs* 1395 (8th/9th century); and in MSS of Corbie and St Denis – *F-AM* 18, f.141*v*; *CH-Zz* Car C.161, f.179 (9th century; see M. Coens, *Etudes bollandiennes*, 1963, p.314); Mont-Renaud Antiphoner (PalMus, 1st ser., xvi, 1955/*R*)

Qui passurus (Litany of Tenebrae): in many French (Dominican) MSS up to the 13th century, at the close of Tenebrae on Maundy Thursday; melody in J. Pothier, *Revue du chant grégorien*, xi (1902–3); PalMus, 1st ser., xv, 1937/*R*, f.277*v*

Qui pretioso sanguine (verse from the Litany of Tenebrae): Sarum processional of 1517, f.cv*v* (see W. H. Frere, ed.: *The Use of Sarum*, ii, Cambridge, 1901/*R*, 171)

Rogamus te Rex seculorum: *abecedaria* in MSS from south-west France; ed. Huglo, 'Les preces hispaniques', 1955, p.374–5 (see also B. Stäblein, *MGG1*, iv, 1313)

Vide Domine humilitatem meam ... miserere pater juste: Bobbio Missal (ed. Lowe, Wilmart and Wilson, 1917–24, p.67; see also Huglo, 'Les preces hispaniques', 1955, p.364)

MICHEL HUGLO (with JANE BELLINGHAM and MARCEL ZIJLSTRA)

Gallichon [Ger.]. *See* CALICHON. *See also* MANDORA.

Gallico, Claudio (Benedetto) (*b* Mantua, 4 Dec 1929). Italian musicologist. He studied the piano with Nunzio Montanari at Parma Conservatory and composition with Renato Dionisi and Franco Margola at Milan Conservatory, taking diplomas in both subjects (1950–1957); he also took the degree in literature at the University of Bologna (1952) with a dissertation on *Baudelaire e la musica* and studied musical palaeography at the University of Parma (diploma 1957). He has lectured in music history at the conservatories of Padua (1957), Bolzano (1962) and Parma (1966), and took up an appointment at the University of Parma (1966, when he took the *libera docenza*), becoming head of the musicology institute (1970) and professor of music history (1976). His intimate knowledge of Mantua has resulted in several important contributions to the music history of that city, including new research on Monteverdi and Isabella d'Este. In addition, he has been concerned with the Italian musical theatre in general (Mazzocchi, Verdi, 18th-century opera, etc.). Gallico's belief is in musicological research not as an end in itself but as a means towards the active revival of early music. This can be seen in his activities both as a performer – as director of his chamber group Nuovo Concerto Italiano and organizer of theatrical performances at the Teatro Olimpico of Sabbioneta – and as an editor. He has prepared several editions of Renaissance and Baroque music, and is a member of the editorial committees of the series Monumenti Musicali Italiani and the journal *Rivista italiana di musicologia*. He was president of the Società Italiana di Musicologia (1968–74) and of the Accademia Nazionale Virgiliana (from 1991).

CAROLYN GIANTURCO/TERESA M. GIALDRONI

Galliculus [Alectorius, Hähnel], **Johannes** (*b* c1490; *d* after 1520). German theorist and composer. Since the name Galliculus is a Latin, humanistic form of Hennel, the composer is probably identifiable with 'Johannes Hennel de Dresden' who matriculated at Leipzig University in 1505. Galliculus was active as a musician in Leipzig in 1520 when his *Isagoge de compositione cantus*, dedicated to his friend Georg Rhau, was published. The *Isagoge*, an introductory work in which rules of counterpoint are set forth in a clear and concise manner, enjoyed considerable success; six editions were published (two of them with the title *Libellus de compositione*), of which five were from Rhau's press in Wittenberg.

Through his association with Rhau, Galliculus became closely allied to the early Protestant Church. His compositions are all sacred with Latin texts, although three of them incorporate German texts, carols and chorale melodies as quodlibet material. They appear in the collections Rhau published for the new church, and in manuscripts devoted to music of the Lutheran Church. Although in a basically conservative style (reminiscent of Isaac and his German successors), his works reflect considerable variety and a good deal of innovation. Cantus firmi are treated in several different ways, and often combined with initial and paired imitation. The cantus firmus models are those of Germanic forms of chant (very much as they are found in Lossius's *Psalmodia* of 1553) rather than Roman. In his motets all voices are of equal significance: pervading imitation is used frequently, particularly in narrative sections, although shifts from four to two voices also occur. Such changes in texture are used to create a contrast in sound, rather than to enhance the drama of the narrative. At times the writing becomes highly melismatic, while at other times accented declamation is combined into the texture. He also makes frequent use of antiphonal and *alternatim* procedures. In all cases the music seems to reflect the nature of the text.

Like Isaac, Galliculus favoured setting the *proprium* of the Mass: two settings of the Proper (as well as of the Ordinary) for Easter are to be found in Rhau's *Officia paschalia* (1539), and a similar setting for Christmas is in the *Officiorum ... de nativitate ... tomus primus* (1545). These represent the composer's most significant contribution to Protestant music and the many manuscript copies made of this work indicate its popularity.

Galliculus also composed motets to a variety of liturgical texts: four settings of Gospel lessons, one of an Epistle lesson, and one of the Passion (in Rhau's *Selectae harmoniae*, 1538). The text of the last combines accounts of the Passion from various Gospels, a common practice at this time. A particularly innovatory feature of his compositions for the Lutheran Church is the incorporation of *Leisen*, both as texts and melodies, into Latin liturgical compositions: his first Easter mass introduces both melodic and textual materials from *Christ ist erstanden* into the sequence and the Agnus Dei; the *Magnificat quinti toni* incorporates Christmas carols with German and Latin texts.

VICTOR H. MATTFELD

Galli-Curci [née Galli], **Amelita** (*b* Milan, 18 Nov 1882; *d* La Jolla, CA, 26 Nov 1963). Italian soprano of Italian-Spanish parentage. She graduated from the Milan Conservatory in 1903 with a first prize as a pianist; on the advice of Mascagni she also had some vocal lessons there with Carignani and Sara Dufes, but was mainly self-taught. She made her début at Trani on 26 December 1906 as Gilda, a role that remained a favourite throughout her career. In 1908 she appeared in Rome with De Luca in the Italian première of Bizet's posthumous *Don Procopio*. During the next eight years she became increasingly successful in the coloratura repertory.

Galli-Curci made a spectacular début at Chicago as Gilda on 18 November 1916. She remained with the Chicago company for eight consecutive seasons, singing Rosina, Amina, Lucia, Linda di Chamounix, Violetta, Dinorah, Juliette, Manon and Lakmé, and an occasional

Amelita Galli-Curci as Violetta in Verdi's 'La traviata'

Mimì and Madama Butterfly. She made her début at the Metropolitan in *La traviata* on 14 November 1921, appearing as a regular member of the company in these and other similar parts until her farewell in *Il barbiere di Siviglia* on 24 January 1930. By that time she had begun to show signs of vocal distress; and, after an operation in 1935 for the removal of a throat tumour, her attempted return to the stage, for a single performance of *La bohème* in Chicago in 1936, was unsuccessful. She was never heard in opera in London; and her English concert tours, in 1924, 1930 and 1934, though at first very popular, did not show her at the height of her powers. She was married twice: to the artist Luigi Curci (1910, divorced 1920); then, in 1921, to Homer Samuels, her accompanist.

Galli-Curci possessed a limpid timbre of exceptional beauty and an ease in florid singing that sounded natural rather than acquired; her highest register, up to *e‴*, remained pure and free from shrillness. Her style, though devoid of dramatic intensity, had a languorous grace and charm of line capable of conveying both gaiety and pathos. Her numerous Victor records, especially those made before 1925 by the acoustic process, deserved their enormous vogue, being among the best of their kind ever made; during the post-1925 electric period she successfully repeated some of her excellent duet recordings with Schipa and De Luca, but by then her work had begun to be affected by false intonation and other flaws. Most of her recordings have been successfully remastered on CD.

DESMOND SHAWE-TAYLOR

Gallicus [Carthusiensis, Legiensis, Mantuanus], **Johannes** (*b* Namur, *c*1415; *d* Parma, 1473). French humanist and theorist, active in Italy. He wrote that he was born at Namur and learnt to sing there, but studied formally under the celebrated educator Vittorino da Feltre (1378–1446) at Mantua, where he later became a Carthusian monk. His primary treatise was written during the pontificate of Pius II (1458–64). One of the manuscripts is in the hand of his pupil Nicolaus Burtius, who recorded his date of death as 1473. Hothby, who stated that they had been students together at the University of Pavia, referred to the theorist as 'Johannem Legiensem' (*Legiensis*, 'of Liége'), which was misread by Seay as 'Legrensem'; Seay mistakenly inferred a family name 'Legrense', which has become widespread in scholarly writings. Hieronymus de Moravia used the name 'Johannes Gallicus' to refer to JOHANNES DE GARLANDIA.

Gallicus's three treatises begin 'Praefatio libelli musicalis de ritu canendi vetustissimo et novo' (*CoussemakerS*, iv, 298–396; ed. in Seay), 'Praefationcula in tam admirabilem quam tacitam et quietissimam novorum concinetiam' (*CoussemakerS*, iv, 396–409) and 'Tacita nunc inchoatur stupendaque numerorum musica' (*CoussemakerS*, iv, 409–21). The first survives in *GB-Lbl* Add.22315, ff.1–60 and Harl.6525, ff.1–76*v*, the others only in Harl.6525, ff.77–96. Coussemaker, however, made them appear to be one continuous work by taking the obituary from f.60 of Add.22315 and placing it after the material transcribed from Harl.6525 (ff.77–96). The first part of the largest treatise, comparing the old and the new, covers the materials of music, proportions, the division of the monochord and the genera. Its second part, an introduction to singing, explains the modes and psalm tones, solmization and counterpoint; an interesting part of this section is concerned with secular music. The second treatise is taken up with arithmetic, while the third discusses musical proportions with reference to Aristides Quintilianus; Seay doubted whether they were actually by Gallicus.

Through random remarks advocating a return to the ideals of an earlier era, Gallicus established himself as the first 15th-century musician to demonstrate the attitudes of the Renaissance. He realized that Boethius had written about the music of late antiquity rather than contemporary music, and in particular he was the first writer to point out that the Greek modes and those of his own time were entirely different systems; in his hands the study of Boethius was transformed from part of the medieval Quadrivium into a humanistic recovery of ancient thought. These ideas are directly attributable to the influence of Vittorino da Feltre, whom he succeeded at Mantua and later at Parma. The spirit of humanism, introduced into music theory by Gallicus, inspired many of his successors whether they agreed with his opinions or not.

CECIL ADKINS/R

Galliera, Alceo (*b* Milan, 3 May 1910). Italian conductor and composer. He studied first with his father Arnaldo Galliera (1871–1934), a composer and teacher of organ composition at the Parma Conservatory, and then at the Milan Conservatory, where he graduated in the piano, the organ and composition; in 1932 he obtained a lectureship there in the organ and organ composition. He made his conducting début at Rome in 1941 with the orchestra of the Accademia di S Cecilia. After a period in Switzerland during World War II he resumed his career in 1945 with a concert at the Lucerne Festival. He subsequently pursued his career mainly in other countries, with tours in Europe, Israel, North and South America, South Africa and Australia. From 1957 to 1960 he was resident conductor at the Teatro Carlo Felice, Genoa, and from 1964 to 1972 was artistic director and resident conductor of the Strasbourg municipal orchestra. He made several recordings with the Philharmonia Orchestra including *Il barbiere di Siviglia* with Callas, and was a noted accompanist in concertos. His own works include the ballet *Le vergini savie e le vergini folli* (1942), *Poema dell'Ala* for orchestra and a *Scherzo tarantella* for orchestra.

CLAUDIO CASINI

Gallignani, Giuseppe (*b* Faenza, 9 Jan 1851; *d* Milan, 14 Dec 1923). Italian composer, conductor and teacher. He studied at the Milan Conservatory from 1867 to 1871 and then travelled in Europe for ten years, studying and conducting. From 1884 until his death he was *maestro di cappella* at Milan Cathedral and from 1886 to 1894 editor of the periodical *Musica sacra*, which strongly supported the return to Palestrina style in church music, exemplified by Gallignani in his own works. In 1888 he published in *Italia* an article on *Otello* that brought him the friendship of Verdi, who in 1891 proposed him as Faccio's successor as director of the Parma Conservatory. In 1897 he moved to the same post at the Milan Conservatory. In both he initiated valuable reforms and improvements, but his outspoken and tactless manner provoked much opposition. Verdi supported him strongly, but he was finally removed as director after an official inquiry. Embittered, he committed suicide a few months later. His wife was a well-known dramatic soprano, Chiara Bernau (1852–1901).

As a composer Gallignani was best known for his church music (more than 150 manuscripts of which, including nine masses, are in the Milan Cathedral archives). Only a few pieces were published. He also composed six operas, notably *Atala* (1876), *Nestorio* (1888) and the chauvinistic *In alto!* (1921); but he was not very successful in this genre, *Nestorio* receiving only three performances at La Scala. In 1903 he conducted his lyric poem *Quare?* for chorus and orchestra at two special concerts there.

WORKS

Galli-Marié [née Marié de l'Isle, Marié], **Célestine(-Laurence)** (*b* Paris, Nov 1840; *d* Vence, nr Nice, 22 Sept 1905). French mezzo-soprano. She was taught by her father, Félix Mécène Marié de l'Isle, a double bass player who became a tenor at the Opéra and eventually a conductor. She made her début in Strasbourg in 1859 as Célestine Marié, but shortly after married a sculptor named Galli (who died in 1861) and took the professional name Galli-Marié. Emile Perrin, director of the Opéra-Comique, engaged her after hearing her in a performance of Balfe's *The Bohemian Girl* in Rouen. She first appeared at the Opéra-Comique to considerable acclaim as Serpina in Pergolesi's *La serva padrona* (1862) and sang there regularly until 1885, creating the title roles of *Mignon* (1866) and *Carmen* (1875), as well as singing in works by Gevaert, Guiraud, Maillart, Massé and Massenet. Though principally associated with the Opéra-Comique, she toured in France and Europe, singing in the Italian première of *Carmen* at Naples and performing in London with a French company at Her Majesty's Theatre in 1886, as well as in Spain. With her return to the Opéra-Comique as Carmen in 1883 the work finally achieved the success in Paris it had enjoyed elsewhere in Europe. Her last appearance in the capital was in this, her most famous role, in a performance with Melba (Micaëla), Jean de Reszke (Don José) and Lassalle (Escamillo) in December 1890 at the Opéra-Comique, to raise funds for a monument to Bizet. She was praised for her intelligence, natural acting ability (as both comedian and tragedian) and musicianship; her voice was not distinguished for its range or volume, but for the warmth of its timbre.

Gallimberto, Ferdinando. *See* GALIMBERTI, FERDINANDO.

Gallini, Giovanni Andrea Battista [John] (*b* Florence, 7 Jan 1728; *d* London, 5 Jan 1805). Italian dancer, choreographer and impresario. He moved to Paris and, according to Antoine de Léris (*Dictionnaire portatif des théâtres*, 1754), was a member of the Académie Royale de Musique company until at least 1754. His first recorded appearance in London was at Covent Garden on 17 December 1757, when he danced in the ballets *The Judgement of Paris* and *The Sicilian Peasants*. In autumn 1758 he joined the *corps de ballet* at the King's Theatre, dancing in operas by Cocchi and Perez, and was named director of dances for Cocchi's *Ciro riconosciuto* (3 February 1759). He continued as dance director as well as a performer through the 1762–3 season, providing ballets for J.C. Bach's first

London opera, *Orione* (19 February 1763). During 1763–4 he returned to Covent Garden as director of dances and was re-engaged in 1765–6. He did not appear on the London stage after that season.

Gallini achieved popularity as a dancing-master and published two treatises on dance. He is said to have been made a Knight of the Golden Spur by the pope, and thereafter was styled 'Sir'. He was also proprietor of the Hanover Square Rooms, where J.C. Bach and C.F. Abel gave their subscription concerts from 1775.

Gallini's involvement with London opera began in 1778, when he attempted to purchase the mortgage on the King's Theatre. He became manager temporarily in 1783 and again, after complex litigation, from 1785 until the opera house burnt down on 17 June 1789. During this period the ballet, under the choreographer Jean-Georges Noverre, became pre-eminent there. Gallini tried to improve the quality of Italian opera in London, engaging Nancy and Stephen Storace and other performers and composers from Vienna. After the destruction of the King's, Gallini had short seasons at Covent Garden and the Little Theatre in the Haymarket, where the main attractions were the singers Luigi Marchesi and Gertrud Elisabeth Mara. After several unsuccessful attempts in the late 1780s to engage Haydn, Gallini (with Salomon) brought him to London in 1791 and commissioned from him *L'anima del filosofo*, which was never performed. He was manager of the rebuilt King's Theatre in the 1791 season, his final season of involvement with London theatre.

ELIZABETH GIBSON (with CURTIS PRICE)

Gallinius [Kurek], **Marcin** (*d* 1562). Polish musician and preacher. He was educated at the Franciscan monastery school and the Jagellonian University of Kraków. In 1530 he graduated Bachelor of Arts, and from then until 1535 he probably taught at his old school. He then went to study in Padua, and after becoming a doctor of theology (probably in 1540) he went to Rome. On his return to Kraków he appears to have moved in the court circles around Sigismund the Old, and in 1544 became court preacher to Sigismund Augustus and moved to Vilnius. In 1546 he visited Italy again, staying until 1549, and was then given a living at Bieżanów, near Kraków; towards the end of his life he was made a canon at Płock.

In his letter *Ad venerabilem virum M. Benedictum Cosminium epistola* (Kraków, 1535; facs. in MMP, ser.D, iii, 1975) to Benedykt of Koźmin, humanist and professor at Kraków University, Gallinius described his musical studies and his views on music. He commented on the difficult situation of musicians, who often enjoyed little respect and lived in penury. He maintained that music should not be classified as a science, because it did not educate the mind but merely required skilled hands and had entertainment as its sole objective. What Gallinius valued above all in music was its moral influence as understood by classical authors. Thus he was critical of music of his day compared with that of the ancients, and held that only by imitating ancient exemplars could music be restored to its earlier standing and importance. Gallinius's text includes numerous references to Carlo Valgulio's *Proemium in musica Plutarchi* (1507) as well as to Henricus Cornelius Agrippa's *De incertitudine et vanitate scientiarum* (1531).

ELŻBIETA WITKOWSKA-ZAREMBA

Gallishon (Ger.). *See* MANDORA.

Gallo, Domenico (*fl* mid-18th century). Italian composer and violinist. According to Fétis he was born in Venice about 1730, wrote much music for the church and was known for his violin sonatas and symphonies. Eitner mentioned an oratorio for two voices dedicated in honour of Giuseppe Calasanzio, founder of the Scuole Pie in Venice; the libretto was published there in 1750. Gallo published two sets of six sonatas, one for two violins and continuo in Venice, and another for two flutes and continuo in London; the latter set probably dates from about 1755. An overture by him was published in a miscellaneous set of *Sei ouverture a piu stromenti* op.6 (Paris, 1758) and his name appears in *A Collection of Marches & Airs* (Edinburgh, 1761). There is a manuscript collection of 36 trio sonatas by him in the Marquis of Exeter's collection at Burghley House, Stamford, and examples of his church music can be found in the conservatories of Naples and Bologna.

Gallo is notable chiefly for his connection with one of the many Pergolesi 'forgeries'. In 1780 Robert Bremner published a set of 12 trio sonatas attributed to Pergolesi (*Pergolesi: Opera omnia*, v, Rome, 1940, pp.1–116); their title-page claims that the 'manuscripts of these sonatas were procured by a curious Gentleman of Fortune during his travels through Italy'. But even in the 18th century, doubt was cast on the Pergolesian authorship of these trio sonatas by such critics as Burney and Hawkins, and it has since been discovered that some of them are attributed to Gallo in several contemporary manuscript sources (at Burghley House, *US-BEm* and *I-Pca*), and the rest are probably his as well. Some of them were used, as Pergolesi's, by Stravinsky in *Pulcinella*. As Walker said (*Grove5*), 'they are not markedly Pergolesian in style' but are rather the work of a competent Italian composer writing in the *galant* idiom of the 1750s and 60s. Owing to the mistaken attribution to Pergolesi, they have been quoted in various modern works on form as early

examples of sonata form, but this early dating depends on the date (1736) of their supposed composer's death.

A 17th-century Domenico Gallo, from Parma, was cited by Eitner as the author of a *Trattenimento musical sopra il violoncello* (*I-MOe*). Hucke suggested that some of the sacred music (in *A-Wgm*, *D-Bsb*, *DS*) ascribed by Eitner to this 17th-century Gallo might be by the 18th-century composer.

CHARLES L. CUDWORTH

Gallo, F(ranco) Alberto (*b* Verona, 17 Oct 1932). Italian musicologist. After schooling in Vicenza he attended Padua University where he took degrees in law (1955) and philosophy (1960). He began a career as a lawyer but his interest in music and his classical training eventually brought him to the study of medieval theory; he published the first of his extensive writings on the subject in 1962. In 1969 he took the *libera docenza* in the history of music theory and joined the staff of the University of Bologna, becoming full professor of medieval and Renaissance music in 1980. He became editor of *Rivista italiana di musicologia* in 1974. He was one of the founders of the Società Italiana di Musicologia, and served as its president, 1979–82. Gallo has transcribed and interpreted early treatises and problems connected with the theory of Italian music; these are not discussed in isolation but in connection with other traditions as well, for example, the French ('Tra Giovanni di Garlandia e Filippo da Vitry', 1969) and Polish ('Lo studio della musica speculativa di Johannes de Muris in Polonia e in Italia', 1969). His writings chiefly concern the medieval philosophy of music, notation, the teaching of music in the Middle Ages and early polyphony. In 1966 Gallo was awarded the Dent Medal by the Royal Musical Association. He was elected a Fellow of Villa I Tatti, Florence (1974–5).

CAROLYN GIANTURCO/THERESA M. GIALDRONI

Gallo, Fortune [Fortunato] **T.** (*b* Torremaggiore, Foggia, 9 May 1878; *d* New York, 28 March 1970). American impresario of Italian birth. The son of a retired soldier, he went to the USA in 1895, worked as a tout among his fellow immigrants, then used his experience as a school bandsman to become an agent for touring Italian bands. When the coming of ragtime upset the band business, he organized a US tour for an Italian opera company which had been touring California and Central America. This led him in 1913 to start his own touring San Carlo Opera Company, a name taken from an earlier troupe. Until 1951, with a break during the Depression (1929–32), it gave many Americans their first experience of opera as both audiences and performers, often through one-night stands in small towns. Although the conductor Carlo Peroni did much to hold it together (from 1916 to 1942), the company was a shifting group of soloists engaged for particular performances; scenery consisted of painted flats, and the chorus was eked out by local amateurs. Almost wholly Italian at first, the San Carlo took on American singers and other languages; a 1922 *Lohengrin* in Edmonton was sung in four languages. Some artists were on the way up (Alice Gentle, Queena Mario, Manuel Salazar early on, Regina Resnik and David Poleri in the 1940s), others on the way out (Maria Jeritza, 1933); many remained little known in spite of Gallo's trick of giving some of them the surnames of famous singers. His meanness comes through even in his ghosted, fictionalized memoirs.

JOHN ROSSELLI

Gallo, Giovanni Pietro (*b* Bari; *fl* *c*1591–1600). Italian composer. The inclusion of one of his pieces in Gumpelzhaimer's *Compendium musicae* (RISM 1591[26]) suggests that his music had already been published in a now-lost Italian collection, since north European anthologies were generally compiled from existing Italian prints rather than from specially commissioned works. He probably spent his youth in Bari under the guidance of Giovanni de Marinis, *maestro di cappella* of Bari Cathedral: he is represented by one piece in Marinis's *Primo libro de madrigali a sei voci* (RISM 1596[13]), and works by Marinis are included in Gallo's *Primo libro de madrigali* (1597[20]), a volume dated from Bari on 25 August 1597 and also containing a piece by Flaminio Tresti, who was probably working at nearby Lodi. It is evident from the dedication of the *Motectorum liber primus* (Rome, 1600, inc.) that Gallo had previously served Pietro Sanseverino, the dedicatee of the volume, and his father, the Prince of Bisignano, in Calabria. This volume contains 25 pieces: 20 for five voices and five for eight voices of which one is a setting of the *Te Deum*. Although the title-page of the only known surviving part (bassus) is dated 1600, the colophon is dated 1599. Gallo's two-voice ricercare (in 1686[5]) does not seem to have appeared in any known earlier publication.

IAIN FENLON

Gallo, Giuseppe [Gioseffo, Josephus]. *See* GALLI, GIUSEPPE.

Gallo, Pietro Antonio [Pietrantonio] (*b* ?1695–1700; *d* Naples, 15 Aug 1777). Italian composer and teacher. On 25 April 1742 he succeeded Giovanni Veneziano as *secondo maestro* of the Neapolitan Conservatorio di S Maria di Loreto. After the death of the *primo maestro*, Francesco Durante (30 September 1755), he shared the musical direction with Gennaro Manna, *maestro di cappella* of Naples Cathedral, and after 10 April 1760 also with the aging Nicolò Porpora. But Porpora and Manna resigned after one year, and on 15 May 1761 Gallo became sole director. Among the students trained there during his 35 years as a master of the conservatory were Pasquale Anfossi, P.A. Guglielmi, Antonio Sacchini, Fedele Fenaroli, Giuseppe Giordani, Domenico Cimarosa and Niccolò Zingarelli. Although Gallo served S Maria di Loreto longer than any master before, he was the least remembered. At first he was overshadowed by Durante, later by his own student and successor, Fenaroli.

Early 19th-century writers confused Gallo's career with that of Ignazio Prota, and a metamorphosis produced the fictitious 'Ignazio Gallo', alleged student of Alessandro Scarlatti, who was credited with Pietro Antonio Gallo's accomplishments. Gallo composed only sacred music, in a late Baroque style characterized by instrumental themes and textures. His *St John Passion* (*I-Nc*) has moments of individual character; the narrative is presented in a mixture of simple and accompanied recitatives, and arioso numbers with ritornellos. The part of Christus is written optionally for bass or tenor.

HANNS-BERTOLD DIETZ

Gallo, R. (*fl* 1420–30). Composer. He is named as the composer of the rondeau *Je ne vis pas* which is extant only in *GB–Ob* Can.misc.213 (ed. in CMM, xi/2, 1959, p.25). The work was originally for two voices, but it appears in this source with a triplum ascribed to Francus de Insula.

TOM R. WARD

Gallo, Vincenzo (*b* Alcara Li Fusi, Sicily, before 1561; *d* Palermo, Dec 1624). Italian composer. He was a priest and a Franciscan friar. He gave his earnings as a professional musician towards the enlargement and decoration of his monastery, established at Palermo in 1588; a capital of a column in the cloister, now destroyed, was inscribed 'Musica Galli'. He was already *maestro di cappella* at Palermo Cathedral in 1604 when, on 27 October, he was appointed director of the royal Palatine chapel. He held both appointments until his death. In 1591 and in 1598 he was in Caltagirone, where he conducted his own *cappella* for the feast of the town's patron, St James. In 1622 he superintended the music for the *Trionfi sacri di S Ignazio Loiola e S Francesco Xaverio* in Messina to celebrate the canonization of the two saints.

Gallo's only extant printed volume, *Salmi del Re David*, consists of impressive concertato works in the style of Giovanni Gabrieli, in which densely woven contrapuntal imitation of short motifs alternates with full homophony. His only surviving madrigal, *Non si levava ancor l'alba novella* (RISM 1598[8]), is of particular interest. The text, by Tasso, had been set by Monteverdi as the opening madrigal of his second book (1590). Gallo, the only other composer known to have set it, used fewer than half the poem's 28 lines, apparently ignoring its universal and teleological implications. By concentrating instead on the lovers' conversation and intensifying the themes derived from Monteverdi's version, he achieved in the music a most impressive erotic effect.

PAOLO EMILIO CARAPEZZA, GIUSEPPE COLLISANI

Gallois, Patrick (*b* Linselles, nr Lille, 17 April 1956). French flautist. He studied with Jean-Pierre Rampal and Maxence Larrieu at the Paris Conservatoire, winning a *premier prix* at the age of 19. He was immediately appointed principal flute in the Orchestre de Lille, and from 1977 to 1984 was principal in the Orchestre Nationale de France. Since then he has pursued an international career as a soloist. In 1990 he founded his own chamber orchestra, the Académie de Paris, and the following year signed an exclusive solo recording contract with Deutsche Grammophon. His many recordings since then have ranged widely through the repertory to broaden the profile of the flute as a solo instrument. Gallois' playing is flamboyant and highly personal in interpretation. His style owes much to his mentor Jean-Pierre Rampal and to his belief in music as 'passion'. He is the dedicatee of works by Takemitsu, Sallinen, Landowski and Tanguy.

EDWARD BLAKEMAN

Gallois-Montbrun, Raymond (*b* Saigon, 15 Aug 1918; *d* Paris, 13 Aug 1994). French composer, administrator and violinist. He studied with the Gallons (theory), Touche (violin) and Büsser (composition) at the Paris Conservatoire, where in 1944 he won the Prix de Rome with *Louise de la miséricorde*. His stay at the Villa Medici was cut short by the fighting in Italy, and he embarked on a career as a violinist, notably in a partnership with the pianist Pierre Sancan. During these years he toured throughout Europe, Africa and Japan. He then took an appointment as director of the Versailles Conservatoire (1957–62), moving from there to a similar position at the Paris Conservatoire, where he remained until 1983, and instigated notable reforms, chiefly the establishment of a course to help performers prepare for their careers (the 'cycle de perfectionnement'). He was elected to the Académie des Beaux-Arts in 1983, in succession to Paul Paray. Towards the end of his life, he took up composition again, notably with a work for the Long-Thibaud competition. He was working on a symphonic poem for violin and orchestra at the time of his death.

ALAIN LOUVIER/BRUNO MANTOVANI

Gallon, Jean (*b* Paris, 25 June 1878; *d* Paris, 23 June 1959). French composer and teacher, brother of NOËL GALLON. He entered the Paris Conservatoire at the age of ten and studied under Lavignac (harmony), Diémer (piano) and Lenepveu (composition). Appointments followed as *maître de chapelle* at St Merri (1894) and St Philippe-du-Roule (1903), and as choirmaster at the Paris Opéra (1909–14). His chief importance, however, was as a harmony teacher at the Conservatoire (1919–49), where his pupils included Duruflé, Dutilleux and Messiaen; he was the first to include consideration of the developments of Fauré, Debussy and Ravel in the courses there. Gallon's compositions are few, but of high quality and elegant craftsmanship; the sacred pieces are particularly fine.

ALAIN LOUVIER

Gallon, Noël (*b* Paris, 11 Sept 1891; *d* Paris, 26 Dec 1966). French composer and teacher, brother of JEAN GALLON. He studied at the Paris Conservatoire with Philipp and Risler (piano), Lavignac (harmony), Caussade (counterpoint and fugue) and Lenepveu (composition), becoming a pupil and friend of Rabaud. In 1910 he won the Prix de Rome. He returned to the Conservatoire as a teacher of solfège in 1920, and in 1926 he took over a class in counterpoint and fugue. As renowned a teacher as his brother, he had more success as a composer, principally of dramatic and orchestral works. His compositions are marked by elegance and clarity, and by a discreet impressionism that veils his contrapuntal skill.

Principal publishers: Hamelle, Leduc, Lemoine, Noël, Salabert

ALAIN LOUVIER

Gallot. French family of lutenists. They were active in the 17th century. Jacques and Pierre, who were also composers, were considered by their contemporaries to be among the most accomplished players of their time.

(1) **Alexandre Gallot** (*b* 1625–30; *d* 1684). Lutenist and composer. He was known as 'vieux Gallot d'Angers' and he was *maître de luth* in that town about 1663. Four pieces are attributed to him in René Milleran's manuscript lutebook (*F-Pn* Rés.823) which was compiled in about 1690.

(2) **Jacques Gallot** (*d* Paris, *c*1690). Lutenist and composer, brother of (1) Alexandre Gallot. He was known as 'vieux Gallot de Paris'. He was a pupil of Ennemond Gaultier. His *Pièces de luth composées sur differens modes* (Paris, n.d.) includes a brief method for the lute. The inclusion of minuets and the arrangement of pieces by keys and forms anticipate the later suite. In addition to this collection most of the pieces in an untitled lute manuscript (*D-LEm* II614) are signed 'vieux Gallot'. These two sources comprise almost all his identified music, but a few other pieces by him are among those signed simply 'Gallot' found in other manuscripts (in *F-Pn*, *B*, *GB-Ob*, *HAdolmetsch*, *A-GÖ*, *KR*, *Wn*, *CZ-Pu* and *S-K*). His compositions include several musical portraits – *La Fontange* and *La Montespan* among others – and *tombeaux* – among them those in memory of Turenne, Condé and Madame – inspired by members of the court. Visée in turn composed a *tombeau* in memory of Gallot.

(3) **Pierre Gallot** (*b* *c*1660; *d* Paris, after 1716). Lutenist and composer, son of (1) Alexandre Gallot. He was known as 'Gallot le jeune' and is reputed to have been a remarkable performer. He also taught the lute and guitar to wealthy foreigners. The incomplete tablature of 'Gallot à Paris' (*CZ-Pu* KK83) contains one lute piece by him, and others appear in manuscripts (at *F-Pn*, *B*, *PL-Lw*, *US-NY* and *A-GÖ*). His *Tombeau de la Princesse de Monaco* is in a manuscript in Vienna (*A-Wn* 17706).

(4) **Henry François de Gallot,** Sieur de Franlieu (*d* after 1684). Guitarist and lutenist. His relationship to the other Gallots is uncertain. He was known as 'Gallot d'Irlande'. In Nantes between 1664 and 1684 he compiled a manuscript (*GB-Ob* M.Sch.C94) entitled *Pièces de guittarre de differends autheurs*, containing music by 'Gallot le vieux', 'Gallot d'Angleterre' (possibly his son, who may have served Charles II), 'Gallot le jeune' and 'Gallot le cadet', as well as Francisque, Dufaut, Corbetta and other composers. An Antoine Gallot (*d* Vilnius, 1647), also a lutenist and composer, is not thought to be related to the other members of the Gallot family. He was employed at the Polish court, where he served King Władisław IV, and a vocal canon by hiim servives in Marco Scacchi's *Cribrum musicum* (Venice, 1643).

MONIQUE ROLLIN

Gallus, Antonius. *See* GALLI, ANTONIUS.

Gallus, Giuseppe [Gioseffo, Josephus]. *See* GALLI, GIUSEPPE.

Gallus, Jacobus. *See* HANDL, JACOBUS.

Gallus, Joannes [Lecocq, Jean] (*fl* mid-16th century). Composer(s) of uncertain identity. On the title-page of a motet collection by Maistre Jhan of Ferrara (RISM 1543[4]), the Venetian publisher Scotto identified Maistre Jhan as Joannes Gallus. Jhan, however, is never described as 'gallus' in the numerous documents surviving from his three decades of service in Ferrara; moreover, a publication emanating from Ferrara at the end of his career there (1538[5]) ascribes one motet to Joannes Gallus and three others to Maistre Jhan, thus implying that the two are separate and distinct. Similarly, several later prints distinguish between Gallus and Petit Jean De Latre (1547[5]) and Gallus and Jhan Gero (1554[10]). In Maistre

Jhan's case, the name 'gallus' may have been mistakenly substituted for 'gallicus' (Frenchman), since he is often described at Ferrara as 'cantor francexe', and one notice identifies his father as 'Paulus del Mistro gallicus'. Apart from Scotto's 1543 publication, no evidence connects Jhan with Gallus and the two names are not used interchangeably in other contemporary sources.

There were, however, diverse *Joannes cantores* employed at Ferrara and elsewhere. At least two other musicians active elsewhere in Italy might also be the 'Gallus' whose work was published in 1538. A Joannes Gallus sang in the Cappella Giulia, Rome, in 1514; and a Joannes Gallicus was *maestro di cappella* of Ravenna Cathedral in the early 1520s.

Outside Italy the problem takes a different turn in prints issued by Susato at Antwerp towards the mid-16th century. A series of attributions to Gallus and Lecocq (the French equivalent of Gallus), although handled with puzzling inconsistency, nonetheless suggests that Susato recognized Joannes Gallus and Jehan Lecocq as one composer. If Scotto's disclosure that Gallus is Jhan could be substantiated, then Lecocq would simply be Jhan in yet another guise. It is now certain, however, that Maistre Jhan of Ferrara was dead before Susato printed the first Gallus/Lecocq chansons in 1543. Besides, a noted Lecocq turns up in the generation after Jhan. Guicciardini counted 'Gian le Coick' among the contemporary masters of music, and he was referring most probably to the singer Johannes de Cockh listed in the imperial chapel, Vienna, from 1564 (or possibly earlier) until his death a decade later. Possibly the Viennese Lecocq is the Joannes Gallus represented in various prints from Germany and the Lowlands between 1542 and 1555.

The body of works attributed to Gallus/Lecocq is fairly slight: nine motets and 22 chansons. The chansons generally exhibit less lightness and flexibility than similar works by Claudin de Sermisy and Janequin, and in several the use of rigid contrapuntal devices produces a somewhat old-fashioned effect. Among the five canonic chansons, the five-voice *Sy des haulx cieulx* is noteworthy for its use of mirror canon at the unison.

Galop (Fr.; Ger. *Galopp*). A quick, lively dance in 2/4 time. Together with the waltz, quadrille and polka it was one of the most popular ballroom dances of the 19th century. It derived its name from the galloping movement of horses and was possibly the simplest dance ever introduced into the ballroom. The partners held each other rather as in the waltz but both facing the line of dance and proceeding rapidly with springing steps down the room. The dance originated in Germany, was popular in Vienna in the 1820s and spread to France and England in 1829. In France it was for a time introduced into the finale of the QUADRILLE and also developed into the CANCAN. In England it remained popular for half a century or so, but in Vienna it was ousted from popular favour by the quadrille in 1840 and later superseded by the 'quick polka'.

The physical demands of dancing a galop meant that the music lasted no more than two or three minutes. The music was played at approximately 126 bars per minute, contained a trio (sometimes two) and was often provided with a short introduction and coda. Schubert left two galops: his D735 no.1 (*c*1822) and *Grazer Galopp* D925 (1827). Later, galops were an important part of the output of composers such as Lanner, Johann Strauss (i), Josef Labitzky and Philippe Musard. The titles often suggested the dance's speed and excitement, and acoustical effects such as pistol shots were sometimes included. Many galops were based on popular songs or operatic themes. The *Posthorn Galop* of Hermann Koenig, introduced at Jullien's concerts in 1844, is the only piece of English origin in the major dance forms of the 19th century to have remained familiar. In Copenhagen H.C. Lumbye specialized in galops, such as the *Champagne Galop* (1845) and the *Copenhagen Steam Railway Galop* (1847). Popular 'quick polkas' include *Unter Donner und Blitz* ('Thunder and Lightning', 1868) by Johann Strauss (ii).

The lively nature of the galop made it suitable for a rousing finish to a ball, and when introduced into ballets it was likewise found appropriate as a finale. Lumbye composed several galops for the ballets of Bournonville, beginning with *Napoli* (1842). In opera, galops are to be found in Auber's *Gustave III* (1833) and Balfe's *The Bohemian Girl* (1843), while in operetta the dance was parodied in Offenbach's *Orphée aux enfers* (1858). Examples of the galop as an instrumental showpiece are provided by Liszt's *Grand galop chromatique* (1838) and his *Galop de bal* (*c*1840). Later examples are to be found in Bizet's *Jeux d'enfants* (1871) and in the light music of

'The Grand Galop' of Johann Strauss (i): colour lithograph by Andreas Geiger II after Johann Christian Schoeller

20th-century Russian composers such as Prokofiev (*Cinderella*, 1945), Khachaturian (*Masquerade*, 1939), Kabalevsky (*The Comedians*, 1940) and Shostakovich (*The Limpid Brook*, 1934). The galop rhythm has also been used to provide a rousing finale to orchestral showpieces, as in Rossini's *Guillaume Tell* overture (1829, using a *passo doppio* composed in Vienna in 1822), Sullivan's *Overture di ballo* (1870) and the Dance of the Hours in Ponchielli's *La Gioconda* (1876).

Galoubet. A three-holed pipe of the PIPE AND TABOR ensemble (it is classified as an AEROPHONE). It is of Provençal origin, and the name probably derives from an Old Provençal verb, *galaubar*, meaning 'to play magnificently'. It was used to accompany dancing throughout the Middle Ages. Elsewhere it was known as a *flute à trois trous* or *flûtet*, but the term 'galoubet' (and its colloquial variant *jombarde*) came into more general use during the 18th century. The *galoubet* was made of wood, usually boxwood, and was about 30 cm long with two front holes and a rear thumb-hole. It had a very narrow cylindrical bore, and was pitched in D. The player held it in one hand, while the other hand played a drone instrument such as the TAMBOURIN DE BÉARN, or a snared drum. Praetorius describes the instrument (which he calls a 'Schwegel'), and in the 18th century its sound was imitated in sailors' scenes in French opera. Pieces for galoubet by Chateauminois (*Oeuvres . . . pour le galoubet, contenant instructions, mélanges, airs*, Paris, n.d.) and Lavallière (*Six sonates en duo pour le tambourin avec un violon seul*, Paris, n.d.) survive in the Bibliothèque Nationale, Paris, and examples of the instrument survive in the Victoria and Albert Museum, London, and the Metropolitan Museum of Art, New York.

MARY CYR

Galpin, Francis William (*b* Dorchester, 25 Dec 1858; *d* Richmond, Surrey, 30 Dec 1945). English collector of musical instruments and scholar. He was educated at King's School, Sherborne, where James Robert Sterndale Bennett, son of the composer, encouraged his aptitude for music. From 1877 he studied classics at Trinity College,

Cambridge (BA 1882, MA 1885), where he played the clarinet under Stanford in the orchestra of the Cambridge University Musical Society. Ordained in 1883, he was curate of Redenhall with Harleston, Norfolk, for four years, then curate at St Giles-in-the-Fields (1887–91), vicar of Hatfield Broad Oak (formerly Hatfield Regis, 1891–1915), vicar of Witham (1915–21) and rector of Faulkbourn (1921–33). In 1917 he was made a canon of Chelmsford Cathedral. From his university years onwards, Galpin made an outstanding collection of musical instruments, which he made freely available for public exhibitions and lectures and described and illustrated in his book *Old English Instruments of Music* (1910). By 1900 his international reputation as a collector of and authority on musical instruments was established. He arranged an important exhibition at the Crystal Palace (1900) and arranged and described the Crosby Brown Collection for the Metropolitan Museum of New York (1902) and the collection of the Musikhistoriska Museet, Stockholm (1903). He was granted the honorary freedom of the Worshipful Company of Musicians in 1905. In 1914 the majority of his collection, comprising between 500 and 600 specimens, was transferred to the Museum of Fine Arts, Boston. In 1938 he was elected president of the Musical Association. He contributed some 60 articles on instruments to the third and fourth editions of *Grove's Dictionary* and many of the plates in these editions illustrate instruments from his collection. His other areas of interest were archaeology and botany. The Galpin Society was formed the year following his death to continue his work.

ROSEMARY WILLIAMSON

Galpin Society. A society founded in Britain in 1946 to commemorate and continue the work of Francis W. Galpin on early musical instruments. Among its founding members were Anthony Baines, Philip Bate, Robert Donington, Eric Halfpenny, Edgar Hunt and Lyndesay Langwill; the first president was Sir Jack Westrup. It set out to further the study of the history, construction, development and use of musical instruments, and to preserve and make available material about instruments of the past. The society, though not directly concerned with performance, has asserted a considerable influence on performing styles, on the study of early techniques and on the revival of interest in period instruments. It has organized exhibitions of British musical instruments, and in 1959 held a joint congress with the International Association of Music Libraries in Cambridge. In 1999 the society had about 1000 members. It has published *The Galpin Society Journal* annually since 1948 and a *Bulletin* three times a year.

□

Galuppi, Baldassare (*b* Burano, nr Venice, 18 Oct 1706; *d* Venice, 3 Jan 1785). Italian composer. He was a central figure in the development of the *dramma giocoso* and one of the most important mid-18th-century *opera seria* composers. Known widely as 'Il Buranello', from his birthplace, he was routinely listed in Venetian documents and early manuscripts as 'Baldissera'.

1. LIFE. Galuppi's father, a barber, played the violin in small orchestras, which provided entr'acte music for theatres of spoken comedy, and was probably the boy's first music teacher. In his 16th year Baldassare composed *Gli amici rivali* for Chioggia (also performed in Vicenza as *La fede nell'incostanza*, probably by the same troupe), but Caffi reported this as a fiasco, a 'scandal'. The boy went for advice to Marcello, who severely scolded him for attempting something so grand on so little experience and swore him to three years' hard labour, studying under Antonio Lotti (first organist at S Marco), refraining from operatic composition altogether and focussing instead on counterpoint and the organ. Evidence for all this is circumstantial, however; other evidence suggests that Galuppi's studies with Lotti had begun earlier.

If the young composer made this promise, he did not keep it, for two years later he was playing the cembalo in opera houses and writing substitute arias for revivals and pasticcios. By the age of 20 he had established a reputation as a cembalist in Venice and Florence, and was soon engaged in the S Angelo (where Vivaldi reigned), the S Samuele and the S Giovanni Grisostomo theatres, performing and supplying arias. He collaborated with his friend and fellow Lotti pupil, Giovanni Battista Pescetti, writing alternate acts of *Gl'odi delusi del sangue* in 1728

(set earlier by Lotti) and *Dorinda* in 1729. This modest success led to further commissions, and by 1738 his operas were appearing outside Venice; at the same time his nickname, 'Il Buranello', is first encountered. *Tobia il giovane*, an oratorio written for Macerata in 1734, was perhaps his earliest attempt in the genre. *Alessandro nell'Indie* was given its première in Mantua at about the same time that *Issipile* graced the stage in Turin (December 1737); the composer was probably present only in Mantua. In 1738 he was in the service of the patrician Michele Bernardo in Venice. Galuppi's music for the festival of S Maria Magdalena in July 1740 at the Ospedale dei Mendicanti led to a permanent appointment there on 4 August. His duties ranged from teaching and conducting to composing liturgical music and oratorios.

Before 1740 and 1741 Galuppi's Venetian career remained diverse, but unexceptional. Neapolitan composers were favoured at Venice's most important theatres, and of the native sons only Vivaldi enjoyed any particular favour. In 1740 and 1741, the year of Vivaldi's death, two serious operas by Galuppi appeared: *Oronte* at the prestigious S Giovanni Grisostomo and *Berenice* at the S Angelo. Galuppi petitioned for nine months' leave and accepted an invitation to travel to London. Permission from the Mendicanti was reluctantly granted, and Galuppi arrived in London in October 1741 and supervised 11 opera productions over the next year and a half, including four original works. Some reported his tenure as less than admirable – Walpole claimed that the 'music displeases everybody' and Handel, in a letter of 29 December 1741, ridiculed the one serious opera he heard – but in general Galuppi's trip was successful and he was well received. His music was often reprinted for the English public, and two more Galuppi works appeared there soon after he had left. Back in Venice by May 1743, he took up his old professions of cembalist and arranger; not much had changed, and his contract with the Mendicanti was extended for three more years. The spread of comic opera from Naples and Rome had just found its way to Venice, however, and Galuppi began adapting these to northern taste, beginning in 1744 with three Roman works by Latilla and Rinaldo di Capua. His own comic opera in Carnival 1745, *La forza d'amore*, was not particularly successful.

Galuppi's fame began to spread and his fees to climb (as attested by documents from Milan, Madrid, Padua and elsewhere). In 1747 (and probably again in 1748) Galuppi was in Milan for *L'olimpiade*; *Vologeso* received its première in Rome in 1748, and Venice was increasingly enthusiastic. Circumstantial evidence suggests that he continued to arrange comic operas throughout these years. In May 1748 he was elected *vicemaestro* of the *cappella ducale* of S Marco. His work for the basilica and the *ospedali* was to lead to an enormous collection of sacred works, but for the near future his focus was on opera. By August he was in Vienna, where *Demetrio* and *Artaserse* were enormously successful, despite Metastasio's criticism that Galuppi's music did not serve the text well; *Demetrio*, performed 19 times over a short period, broke all box-office records. Galuppi left Vienna before the *Artaserse* première and was in Milan for the first performances of *Semiramide riconosciuta*, the second carnival opera of 1749.

The year 1749 marks the beginning of Galuppi's long-term collaboration with the librettist Carlo Goldoni. Over the next eight years a rapid sequence of *drammi giocosi* appeared, beginning with *Arcadia in Brenta* (14 May 1749) and extending through four more works before a year had passed. These operas surged over Europe with unprecedented ease, and by the middle of the next decade Galuppi was the most popular opera composer anywhere. His professional obligations forced his resignation from the Mendicanti in 1751. His *opere serie* continued to command high praise. He wrote his first setting of *Demofoonte* for Madrid in December 1749, to mark the engagement of Maria Antonietta Ferdinanda of Spain to Vittorio Amedeo, heir to the throne of Piedmont, and then supplied the wedding festival music itself, *La vittoria di Imeneo*, for Turin the following June (it was performed more than 20 times). A new *Artaserse* opened the Teatro Nuovo in Padua in 1751. By April 1762 Galuppi was unanimously appointed *maestro di coro* of S Marco, the most important musical position in Venice, and in July he was elected *maestro di coro* at the Ospedale degli Incurabili.

In the meantime Galuppi continued to travel, fulfilling commissions for various (mostly serious) operas. Early in 1764 the Venetian ambassador to Vienna conveyed the wishes of the Russian minister to acquire Galuppi's services; the Russian court knew his work and had already staged seven of his operas. In June 1764 the Venetian senate granted the composer leave to go (with the stipulation that he continue to supply a Christmas mass and other Vespers compositions for the basilica), and, after securing the welfare of his family and resigning from the Incurabili, Galuppi travelled to St Petersburg, visiting C.P.E. Bach (in Berlin) and Casanova along the way and arriving on 22 September 1765. For Catherine the Great's court he produced new works (*Ifigenia in Tauride*, possibly a comic work, now lost, and two cantatas), revived *Didone abbandonata* (in Carnival 1766, an

Baldassare Galuppi: miniature, 1751

enormous success) and *Il re pastore*, and arranged other operas, as well as providing religious and occasional music. His 15 *a cappella* works on Russian texts for the Orthodox liturgy proved to be a watershed. Their Italian, light contrapuntal style joined with native melodic idioms was continued by Traetta and Sarti and maintained by, among others, D.S. Bortnyans′ky, his pupil in Venice and possibly earlier in St Petersburg. Galuppi travelled with the court to Moscow, where comic works were performed (no comic operas were allowed on the St Petersburg stage before 1779). He returned to Venice with many honours and gifts, took up his position at S Marco in late 1768 after visiting Hasse in Vienna, and was reappointed at the Incurabili. In summer 1769 *Il re pastore* was presented in Venice to honour the future monarch, Joseph II.

After this, Galuppi dedicated himself mainly to sacred music, although his operas continued to be performed. Burney reports that the composer was busy all year, playing the organ for Venetian churches and presiding over S Marco. *La serva per amore*, performed in October 1773, was his last operatic work. In May 1782 he conducted performances to honour the pope in Venice (including the sacred cantata *Il ritorno di Tobia*, with 60 musicians from the four Venetian conservatories) and received a visit from the future Tsar Paul of Russia. By 1784 his health declined, but he continued to compose, completing the Christmas mass for S Marco a few weeks before his death on 3 January 1785, after a two-month illness. He was buried in the church of S Vitale (exact location unknown), and a month later was honoured by a lavish requiem mass in S Stefano led by Bertoni, his deputy in S Marco. His wealth was not as extensive as once thought, but his will left inheritances to three sons and the bulk of a sizable estate to his wife, whom he names with tender praise. Seven other children (all daughters) are not mentioned.

Burney offered the most extensive account of Galuppi's personality and appearance from a visit in 1770: 'His character and conversation are natural, intelligent, and agreeable. He is in figure little and thin but has very much the look of a gentleman'. Galuppi's lifelong dedication to his large family was well known, as Burney reported: 'He has the appearance of a regular family man, and is esteemed at Venice as much for his private character as for his public talents'. To Burney he was witty and charming, referring to his study as the room 'where he *dirtied paper*'. Burney named him the most inspired of all Venetian composers, superior to Piccinni and Sacchini and second only to Jommelli, and said that late in life Galuppi had lost none of the fire of his former years. Hasse, writing to Metastasio, referred to him as a 'most excellent composer' and in a poem Goldoni praised him with the epigram 'What music! What style! What masterworks!'.

Galuppi's son Antonio (*d c*1780) wrote the librettos for two of his father's most successful operas, *L'amante di tutte* (1760) and *Li tre amanti ridicoli* (1761), and was probably involved also in arranging other comic works for S Moisè. His poetry and sense of comedy were in the tradition of Goldoni, though less inspired and articulate, more inclined to slapstick, buffoonery and caricature.

2. Works. Galuppi was an extraordinarily popular composer of both serious and comic operas and a prolific composer of sacred and keyboard music. His facile, elegant and flexible melodic style, joined to Goldoni's witty and sometimes poignant poetry, created the central watershed for the dispersion of *drammi giocosi* throughout Europe after 1749; works such as *Il filosofo di campagna* have few peers in that regard. Yet his serious operas were no less important; their performances exceeded his comic operas in number.

Galuppi's stage music embodies the principal Italian tradition of charming and beautiful melody, clear and lucid accompaniment, and virtuoso or emotive display; as he described it to Burney, good music contained 'vaghezza, chiarezza e buona modulazione'. In the comic works vocal phrases tend to be short, usually of two or four bars, and balanced in relation to each other, with subtle variations in lengths and emphasis to avoid rhythmic monotony. Within the melodic line rhythms are strong and lively, frequently contributing much wit to a comic passage. Galuppi always paid close attention to both the sense and the clarity of the text, emphasizing its emotional or humorous content. His musical ideas were fresh, inventive and sometimes surprising, adding a new dimension to a character or situation.

The principal *opera seria* music throughout Galuppi's career was the da capo aria in five parts, a form already well established in the 1720s. The typical variations of his day – *AABAA*, *AA′BAA′* and *ABCAB* – are all present, as are such other later 18th-century innovations as metre and tempo changes for the *B* text, abbreviated internal ritornellos, 'dal segno' returns to the first or second solo and the expansion of cadential or embellishment sections into larger formal entities. His later operas tend to be more innovative in this regard. Other aria forms often merely shorten the da capo design by eliminating ritornellos and textual repetition. In comic operas the full da capo was reserved for serious roles and comic arias were of simpler design, even including popular song. In the 1750s Galuppi increasingly relied on binary designs; after 1755 the simple *AA* and rounded binary, *ABA′*, were most common, modulating from tonic to dominant and back. The text was often merely repeated, sometimes with shifts of tempo or metre, or both.

While many comic operas of the 1730s and 40s featured small ensembles, credit for the creation of the ensemble finale (or chain finale) is jointly shared by Galuppi and Goldoni. From their first effort of this type (*Arcadia in Brenta*, 1749) musical form, tonality and melody were made the servant of the drama. Goldoni's comic, act-ending text mosaics were matched by Galuppi with short musical sections, either open or closed, in contrasting keys, tempos and metres, through-composed to match the rapid shifts of plot and to reflect the insistent, kaleidoscopic emotions. These were usually organized around a central key; related key areas, new textures and melodies created strong contrast. This model for ensemble finales was widely imitated, by Haydn and Mozart among others.

Galuppi's treatment of the orchestra was praised by Burney and others; the ensemble's interplay with the voice, its sharing of structural motifs, themes and figuration, and its clarity of texture in accompaniment are principal hallmarks. Galuppi, like many other important 18th-century composers, was an exacting orchestral taskmaster and took steps during his administration at S Marco to improve the orchestral and choral personnel. The orchestra there was said to lead Italy in its skill, and (according to Stählin) in St Petersburg Galuppi disciplined

the orchestra 'in good Venetian' and brought new precision to the ensemble.

Galuppi was extremely sensitive to the abilities of his singers, just as Goldoni was to those of his actors. In his comic works Galuppi enjoyed the long cooperation of Francesco Carrattoli, Francesco Baglioni and other Baglionis (particularly Clementina, Francesco's daughter, who sang in at least 16 Galuppi productions, both comic and serious). The serious male roles in comic opera were for high voice, but conceived for women in trouser roles. Galuppi also composed for the finest *opera seria* singers, including Caffarelli, Manzuoli, Gioacchino Conti, Caterina Gabrieli, Guadagni and Amorevoli, and here too he followed the 18th-century practice of 'tailoring' arias like a suit of clothes. His compositions for Tenducci during that singer's second Italian career attest to this. That a revival of *Didone abbandonata* for Naples in 1770 was refused by the singers (Insanguine rewrote it) probably attests more to Galuppi's sympathy for the original voices than to any outdated musical style, as is sometimes asserted.

There are about 130 known keyboard sonatas by Galuppi, and other compositions may yet be uncatalogued. The majority are in undated manuscripts, so his role in shaping the genre in the 1730s and 40s is obscure. None of the sonatas was published before 1756, and he wrote such works even late in life (*Passa tempo al cembalo* is dated 1785), yet the graceful, ornamented style of many works seems to have more in common with keyboard styles of a period before 1750. The European vogue for Italian keyboard sonatas (almost all opera composers wrote them) among an amateur audience rested in their undemanding technical requirements and ingratiating style. Galuppi's own virtuosity as a keyboard player is not the focus. There is much idiomatic keyboard writing, with broken chords, scales, motifs shared between hands and the like. About half of the sonatas are in a single movement, while others follow the two- or three-movement arrangement of Alberti or the fast–slow–fast organization of the opera sinfonia and concerto. Binary movements predominate and most sonatas are in major keys. The texture is generally thin and homophonic, with a singing soprano line, clear and regular phrasing and characteristic gestures and motifs reminiscent of aria types, particularly in slow ornamental movements. At times the writing is rhapsodic and developmental. The figuration mimics a variety of styles, from string genres to the French overture and German preludes.

Galuppi's sacred compositions span his creative career and have not been systematically inventoried or studied. Because of his long association with the Mendicanti, the Incurabili, S Marco and other religious institutions, his liturgical music and oratorios (or *azioni sacre*) are plentiful – though at the peak of his career (the late 1740s to the early 1760s) they took a subservient role to works for the stage. There are probably at least 200 liturgical works, including masses, motets, antiphons and psalms. In his petition to the Mendicanti to go to London in 1741 he mentioned the works written over the past year: 16 motets, four Salves, two antiphons and six psalms as well as nine others to be left behind and performed in his absence. This is probably typical of the demands of his regular employment. The liturgical music varies from conservative works using the *stile antico* (favoured at S Marco) to the more operatic, *stile moderno* works for the Venetian conservatories; the four *Magnificat* settings range from the anachronistic, chant-based counterpoint of that in C major (*I-Gl*) to the more *galant* G major setting (*D-Bps*, *Dl*). The *Salve regina* written for the Mendicanti soprano Buonafede in 1746 reveals his early allegiance to the rising *galant* idiom of Neapolitan comic opera, an arrangement of movements similar to the sinfonia and his typical care in writing for specific voices. Liturgical music is for all vocal combinations, including mixed choir of four to six voices and multiple choirs, as well as works for women's voices alone (for the *ospedali*) and more operatic solo works. It is usually accompanied by an orchestra, primarily of strings, although *a cappella* works are also found (including complete masses). Burney reported that at S Marco he heard a mass for six choirs and six orchestras composed and conducted by Galuppi. His liturgical music is less chromatic and varied than that of Hasse and Jommelli, and favours homophony over polyphony, although fugal writing is found. In Russia he wrote Orthodox church music for Catherine the Great and continued to send a Christmas Eve mass each year to S Marco. After his return, his duties at the Incurabili (writing psalms, motets, and a yearly Vespers or oratorio) and S Marco (including a mass for Christmas completed only weeks before his death) occupied most of his time.

Musical sources for the oratorios are few. Burney's description of them is superficial, stating that they were similar to operas but used the chorus more heavily, with a more sacred style in some pieces. It appears that many of the oratorios for the Incurabili were for two choirs and in Latin. *Adamo* (in Italian) is largely in *opera seria* style, with da capo (*da parte*) arias, ornamental coloratura and only a superficial chorus. By all accounts, Galuppi's oratorios for the Incurabili during the 1760s and 70s rose to a high level, in part from the keen rivalry in this genre with Bertoni at the Mendicanti. *Tres pueri hebraei in captivitate Babylonis* (1774) was among his most admired oratorios, with an active dramatic structure and eight soloists; Caffi reported that it was repeated at least 100 times.

DALE E. MONSON

Galusin, Vladimir (*b* Rubtsovsk, 1957). Russian tenor. A graduate of the Novosibirsk Conservatory, he began his career at Novosibirsk Opera in 1981. In 1990 he joined the Kirov Opera, where his roles at home and on tour have ranged from Grigory (*Boris Godunov*), Mikhail (*The Maid of Pskov*), Grishka Kuter'ma (*The Legend of the Invisible City of Kitezh*) and Hermann (*The Queen of Spades*) to Aleksey (*The Gambler*) and Sergey (*Lady Macbeth of the Mtsensk District*); many of these are recorded. From the mid-1990s he also appeared with opera companies and festivals around the world, notably at Bregenz (*Kitezh*, 1995), Amsterdam (*Luisa Miller*), Florence (*Turandot*), New York (*Boris Godunov*) and Buenos Aires (*Yevgeny Onegin*), all in 1997, Vienna (*Don Carlos*, 1998), and Verona (*Aida*), Macerata (*Otello*) and Paris (*Queen of Spades*) in 1999; he returned to Madrid in 2000 for Don Alvaro in *La forza del destino*. Other roles include Puccini's Des Grieux and Pinkerton. Galusin's virile, ringing tone is more italianate than Russian, but his vivid, almost expressionistic acting makes him an exciting interpreter of both repertories.

JOHN ALLISON

Galván [Galbán], **Ventura** (*fl* 1762–73). Spanish composer and actor. Famous first as a comic actor, he was also well known as a composer for the lyric stage by 1762; according to Subirá, he was paid 300 reales for three *tonadillas* and some incidental pieces, and 600 reales for the music to the comedy *Riesgo* in that year. He was celebrated as a composer of *sainetes* and zarzuelas. Galván collaborated with Ramón de la Cruz on various *sainetes* and on the zarzuela *Las foncarraleras* (1772). Four *sainetes* and 20 *tonadillas*, including his famous *Los vagamundos y ciegos fingidos* (ed. in J. Subirá: *La tonadilla escénica*, iii, Madrid, 1930), are in the Biblioteca Municipal, Madrid.

ELEANOR RUSSELL

Gálvez [Cálvez], **Gabriel** (*b* ?Cuenca, *c*1510; *d* Cuenca, *c*11 July 1578). Spanish composer. After serving at S Maria Maggiore, Rome, he was called in September 1560 from Baza and Granada to be *maestro de capilla* of Cuenca Cathedral without the customary competition. Although the cathedral chapter raised his annual pay to 75,000 maravedís in 1562, he left in discontent on 15 September 1563 and was only lured back with the promise of back pay during his absence and of a salary of 82,000 maravedís made at the chapter meeting of 20 March 1564. When his fame caused Segovia Cathedral to offer him a still more lucrative prebend, the Cuenca chapter matched their offer. In 1561 he presented Cuenca Cathedral with a volume of his works (rebound in 1603 but no longer extant) and in 1567 with a book of his hymns and *Magnificat* settings. According to Baini, Palestrina took the basic theme of his four-part *Missa 'Emendemus in melius'* (1594) from Gálvez's 'exquisite' five-part motet of the same name composed for the first Sunday in Lent (the motet is in *I-Rvat*, C.S.293; ed. in Martínez Millán, 1988, pp.372–83).

ROBERT STEVENSON

Galway, James (*b* Belfast, 8 Dec 1939). Northern Ireland flautist. He studied at the RCM on a scholarship (1956–9) under John Francis and at the GSM (1959–60) under Geoffrey Gilbert. Another scholarship enabled him to study at the Paris Conservatoire (1960–61) under Gaston Crunelle and Jean-Pierre Rampal, and privately with Marcel Moyse. He spent the next 15 years as an orchestral

player, with Sadler's Wells Opera (1961–6), Covent Garden Opera (1965), and with the LSO (1966–7), RPO (1967–9) and Berlin PO (1969–75). Because of his interest and outstanding ability in chamber and solo work he decided to follow a career as a soloist, and has subsquently toured throughout the world.

Galway's repertory includes Mozart's concertos (which he has recorded), other Classical and pre-Classical concertos and much chamber music. He is equally sympathetic to contemporary music; works composed for him include Henri Lazarof's Concerto and *Cadence 5*, Musgrave's *Orpheus*, Hanning Schroeder's Variations for flute and orchestra, and concertos by Jindřich Feld, David Heath, Lowell Liebermann and Lorin Maazel. He has made a large number of recordings, including Classical and Romantic works for the flute, arrangements and 20th-century works. Galway has also cultivated a popular image, both by performing and recording many items from popular song repertory and by appearing at high-profile political events in London, Berlin and Davos. On his A.K. Cooper 14-carat gold flute he produces a tone that can range from light and silvery to full and rich, with unforced vibrato, and a brilliant but effortless and gentle articulation. He has published *An Autobiography* (London, 1978), *Flute* (London, 1982) and, with W. Mann, *James Galway's Music in Time* (London, 1982). He was made an OBE in 1977.

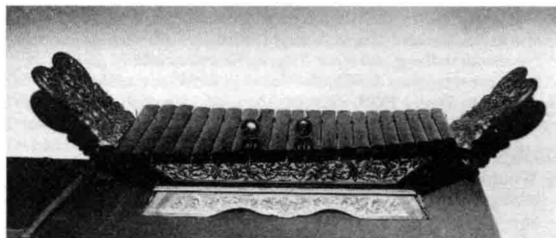
NIALL O'LOUGHLIN



Gamba (i). *See* VIOL and VIOLA DA GAMBA.

Gamba (ii). *See under* ORGAN STOP (*Geigen, Viola da gamba*).

Gamba, Piero [Pierino] (*b* Rome, 16 Sept 1936). Canadian conductor, pianist and composer of Italian birth. He is the son of a violinist who taught him the piano and score-reading as a child, and who organized a rehearsal orchestra and a public concert in the Rome Opera House where, at the age of nine, Gamba successfully conducted Beethoven's Symphony no.1. He repeated it the next year to greater public acclaim, and began touring as a child prodigy in Europe and in North and South America. His British début was in 1947 when, at the age of 11, he conducted Beethoven and Dvořák in a concert by the Philharmonia Orchestra at Harringay Arena, London. In 1952 he moved to Madrid; he resumed his career as a conductor in the late 1950s, returning to London as a guest conductor each year from 1959 to 1963. His performances were praised for clarity of texture, but were thought rigid in rhythm, and cool and impersonal in character. Similar qualities were noted in his recordings made at this time; they included Beethoven's five piano concertos and the Choral Fantasy with Julius Katchen as the widely admired soloist. Gamba was music director of the Winnipeg SO (1970–80) and the Adelaide SO (1980–88). He has continued to work as a guest conductor primarily in the Philippines and Uruguay, but has not maintained the momentum of his early career.

GEORGE GELLES/DAVID E. SCHNEIDER

Gambang [gambang kayu]. Wooden or bamboo XYLOPHONE of Indonesia and Malaysia. In Central Java, it is about 120 cm long and consists of 17 to 23 wooden keys laid stepwise in pitch order on padded cloth over a

1. Gambang (trough xylophone) of the Central Javanese gamelan (Museum of Wayang, Jakarta)

wood trough and kept in place by metal pins (fig.1). The range of the instrument varies from two and a half to more than three octaves. It is played with both hands using two disc-shaped padded mallets. The playing style has a high density and elaborate melodic embellishments.

A complete Javanese gamelan (*gamelan seprangkat*) has three *gambang*, tuned to the anhemitonic pentatonic *sléndro*, the hemitonic pentatonic *pélog bem* scale (based on tones 1, 2, 3, 5 and 6) and the hemitonic pentatonic *pélog barang* scale (based on tones 2, 3, 5, 6 and 7); *see* MODE, §V, 4 (ii). Some gamelan have only one *pélog gambang* with 'extra' keys for substitution purposes. Each *gambang* ranges from pitch 6 of the second octave (6^2) to pitch 5 of the sixth octave of the gamelan (5^6).

An archaic multi-octave variety, the *gambang gangsa*, has bronze keys (*gangsa*: 'bronze'). It is found in both Yogyakarta and Surakarta courts but is rarely played; it has been replaced in the gamelan by the single-octave *saron*. A rustic bamboo-key version is found in some areas; in West Java it consists of 20 keys and has a range of four octaves.

In Bali, four wooden 14-key *gambang* combine with a pir of seven-key metallophones in the *gamelan gambang*. Each *gambang* has a trough resonator and is played with two forked mallets, designed to strike pitches an octave apart. The keys are not placed in sequential order but are arranged to enable elaborate interlocking (*kotekan*) between the four players (fig.2). A five-key *gambang* is found in the east coast area of North Sumatra. It is played by two women, one being the leader (*pamulu*) and the other the follower (*panirka*), and was formerly used at weddings and by girls calling their fiancés. The *gambang tali* of West Malaysia is a wooden or bamboo xylophone, played with a wooden beater. In Sabah, the *gambang* is a small xylophone made of wood or bamboo.

HARDJA SUSILO, ERNST HEINS, MARGARET J. KARTOMI/R

Gambarini, Elisabetta de (*b* London, 7 Sept 1731; *d* London, 9 Feb 1765). Soprano and composer of Italian descent. She was a daughter of Charles Gambarini, counsellor to the Landgrave of Hessen-Kassel. She took the second soprano part at the first performance of Handel's *Occasional Oratorio* in 1746, and in the Covent Garden revival a year later assumed most of Duparc's role as well. She created the Israelite Woman in *Judas Maccabaeus* in 1747, and probably sang Asenath in *Joseph and his Brethren* the same year. Her name appears

2. *Gambang ensemble at Tabanan village, Bali, with (left to right) two saron (metallophones) and four gambang (trough xylophones)*

in the performing scores of *Samson* and *Messiah*, but it is not certain when she sang in these works.

Gambarini's voice seems to have been a mezzo with a regular compass of *d'* to *g''*, extended occasionally down to *b* and up to *a''*. About 1748–50 she published some harpsichord pieces and songs in Italian and English, including a setting of 'Honour, riches, marriage-blessing' from *The Tempest*. Her op.2 has a frontispiece portrait engraved by Nathaniel Hone in 1748; it gives the date of her birth as above, but this may understate her age. She had a benefit at the Great Room, Dean Street, on 15 April 1761, when an ode of her composition was performed together with a cantata by the aged Geminiani; he may have been her teacher. In May 1764, as Mrs Chazal, she is said to have given a concert at which she appeared as organist and composer. According to Gerber's *Lexikon* she was also a painter.

WINTON DEAN

Gambe (Ger.). *See* VIOL.

Gamberini, Michelangelo (*b* Cagli; *fl* 1655). Italian composer. He was *maestro di cappella* of S Venanzo, Fabriano, in 1655, when he published in Venice his *Motetti concertati … libro primo*, for two to four voices and continuo.

Gambia, Republic of **The.** Country in West Africa. With an area of only 11,295 km², it is the smallest country on the continent.

1. Ethnic groups and musical background. 2. Music of the main ethnic groups: (i) The Mandinka (ii) The Fula (iii) The Wolof (iv) The Jola.

1. ETHNIC GROUPS AND MUSICAL BACKGROUND. The 2000 population estimate was 1·24 million, of which 42% are Mandinka, 18% Fula (Fulani, Fulɓe or Peul), 16% Wolof, 10% Jola (Diola or Dyola) and 9% Serahuli (Soninke), with other groups comprising less than 4%, and non-Gambians 1%. The population is 90% Muslim, 9% Christian, and 1% follow traditional religions. English is the official language.

Most Gambians are agriculturalists, though the Wolof and Mandinka also have a strong mercantile tradition. The Fula, now sedentary, were at one time cattle nomads, and they still keep herds of cows. With the exception of the Jola, all Gambian ethnic groups have some degree of hierarchical social organization, one of the marks of which is that certain skilled crafts, including music, are practised primarily by hereditary professionals. The generic term *griot* generally refers to specialists in music, praise-oratory and oral history in West Africa, but each ethnic group has an individual term for this profession.

2. MUSIC OF THE MAIN ETHNIC GROUPS.

(i) The Mandinka. The Mandinka, westernmost branch of the widespread Mande people, have a variety of music genres, but the dominant one is *jaliyaa*, which refers to the music and other skilled activities of the *jali* (pl. *jalolu*), the Mandinka professional. The principal surnames by which the *jalolu* are identified are Kuyateh, Jobarteh, Suso and Saho. In the past, *jalolu* served as court musicians, genealogists, oral historians and even diplomats for leaders at all levels, from the 13th-century emperor of Mali to 19th-century kings and district chiefs. They usually enjoyed permanent patronage. Endogamous marriages (to other *jalolu*) assured that knowledge of the profession remained within the families. As the sole providers of their services, *jalolu* enjoyed a privileged position in Mandinka society, one that gave them power

1. Two Mandinka jali musolu, Mimi and Wude Kuyateh, playing the neo (tubular bell), Bakau Wasulungkunda, The Gambia, 1970

to criticize as well as to praise, but also caused them to be regarded almost as cultural outsiders.

Today marriages between *jali* and non-*jali* are far more common, and the music is taught in schools. Musicians perform in hotels, on the radio and with the national ensemble, in addition to continuing with traditional *jaliyaa*. In spite of these democratizing trends, traditional *jaliyaa* is still the standard for entertainment and commemoration at events such as child-namings, weddings and religious celebrations. Although permanent patronage is now rare, today's politicians, businessmen and religious leaders still regard *jaliyaa* as the music for their social class.

A male *jali* typically learns to sing and to play one of three melodic instruments, according to his particular family tradition. The instruments are the KORA, a 21-string bridge harp which can be tuned to several heptatonic scales, the *konting* or *nkoni*, a skin-faced, slender oval lute with five strings, and the BALO or *balafon*, a gourd-resonated frame xylophone with 17–21 keys tuned to an equiheptatonic scale. In The Gambia, the *kora* is the most widespread of these instruments. Although the *jali* women (*jali musolu*) do not play melodic instruments, they are highly trained and excel as singers, and play the *neo* or *karinya*, a tubular iron bell struck with an iron rod (fig.1).

A fourth melodic instrument, the BOLON or *bolombato*, a large arched harp (a variety referred to as a spike harp) with four heavy rawhide strings (fig.2), is played not by the *jali* but by members of the Kamara family. The *bolon* has a solo repertory of its own, distinct from the *jali* repertory, but it is also used today to provide an improvised bass line in ensembles made up of the *jali* instruments.

2. Bolon (four-string arched harp) of the Mandinka people held by Bajao Kamara, Faraba Banta, The Gambia, 1970

There is one other type of Mandinka *griot* known as the *fina*, also with the surname Kamara, but with a different role. The *fina* plays no instrument, but specializes in singing religious praise from the Qur'an called *hadiso*. He numbers the *jali* among his patrons, thus defining his social status as below that of the *jali*.

Jaliyaa encompasses praise, historical narrative and musical performance. The musical component of *jaliyaa* consists of a repertory of praise-songs that celebrates the achievements of past heroes and contemporary figures. The basic vocal line (*donkilo*) is supported by an ostinato that *kora* players call the *kumbengo*. A typical *kumbengo* consists of a short, paired phrase, polyphonic in texture with enough melodic difference between the half-phrases to suggest harmonic movement. Hemiola, interlocking rhythms and offset accents create rhythmic interest. The basic *donkilo* line is used mainly as a choral refrain, and the bulk of a song consists of long recitative-like extemporizations called *sataro* that incorporate proverbs, philosophical commentary, and formal and spontaneous praise for various individuals present at a performance.

An ideal performing ensemble consists of one or more instruments of one kind (although mixed ensembles are increasingly common today), several singers and one or two vocal soloists. Solo instrumental playing is also a part of the tradition, but without a distinct repertory: skilled performers develop song accompaniments into virtuoso pieces by adding variations and improvised passages called *birimintingo*.

The general word for drum, *tantango*, encompasses two forms occasionally used in *jaliyaa*: the *dundungo*, a cylindrical drum slung from the shoulder, and the *tama*, a small hourglass drum held high under the arm and squeezed to change pitch.

The principal drums of the Gambian Mandinka are the *kutiro* drums. They are not played as part of *jaliyaa* but form a separate, non-hereditary tradition. The ensemble consists of three drums: the *kutiriba* and *kutirindingo*, large and small single-head conical drums, and the *sabaro*, a long, slender conical drum played by the leader of the group. All are played with an open left hand and a pencil-sized stick in the right. Ex.1 presents a typical drum

Ex.1 Interlocking drum patterns

ostinato played on the two *kutiro* drums, over which the *sabaro* player improvises and gives signals to control the dance.

Kutiro drumming is popular entertainment in contrast to the more courtly *jaliyaa*. It animates youth initiation festivities, weddings, rice planting and other farm work (fig.3), wrestling matches, the *Kankurang* masked dance and, most commonly, the recreational dances known as *lenjengo* and *seruba*. Each of these events is easily recognized by its distinctive drum rhythm. *Lenjengo* is a vigorous dance with sequential soloists in which women (and occasionally men) form a circle around the drummers. One or two enter the circle at a time, bend deeply at the waist and swing their arms to the back and then upwards as they stamp their feet. Those not dancing clap

3. Mandinka kutiro drummers performing for a rice planting party, Sotuma-sere, The Gambia, 1970: (from left to right) Jakanko Cham (kutiriba), Momudu Jao (kutirindingo), Demba Sabadi (kutiriba) and the leader Karamo Manneh (sabaro)

their hands in interlocking rhythmic patterns. *Seruba* follows after some time with a more relaxed beat. The emphasis in *seruba* is on songs extemporized by a male singer (the fourth member of the drum troupe). Individuals often request that songs be made up about their friends who are present.

In former times, music associated with hunting societies was another common Mandinka genre, but today one rarely hears the *dana jali* (hunter's musician) or his instrument, the *simbingo*, a small, six string spike harp (fig.4). The *dana jali* formerly sang narrative songs about animals and the hunt, and danced to mime the hunt, while villagers joined in with singing and hand clapping. Although not a *jali per se*, the *dana jali* relied on the patronage of his fellow hunters and, as such, may represent a kind of *jali*, for hunters and warriors (often one and the same) were once the equivalent of royalty in Mande society.

In the 1990s Mandinka *jaliyaa*, especially *kora jaliyaa*, emerged as one of the most familiar West African sounds in the international world of Afro-Pop music.

(ii) The Fula. The Fula are spread across the savanna from Senegal to Cameroon (*see also* FULBE MUSIC). There are three types of Fula *griot*: the *maabo*, *bammbaa'do* and the *gawlo*. The first two play the *hoddu*, a three-string plucked lute similar to the Mandinka *konting*, but larger, or the *nyaanyooru* (*see* GOGE), a monochord bowed lute with horsehair strung on both the instrument and the bow. The *maabo* and *bammbaa'do* are court musicians with a role and status similar to the Mandinka *jali*. The *awlu'be* (pl. of *gawlo*) play more often in groups and for a general audience rather than select patrons although they regard Mandinka *jalolu* as their patrons and may perform for them in expectation of being paid.

The *awlu'be* play the *serndu*, a transverse flute, the *horde*, a large half calabash held against the chest and beaten with palms and rings on fingers, the *laala*, a pair of L-shaped stick-rattles, each a sistrum with discs of calabash loosely skewered on one arm (fig.5), and an hourglass drum. Some typical *horde* and *laala* rhythms

4. Mandinka musician Ndani Manneh playing the simbingo (six-string spike harp), Tujering, The Gambia, 1970

5. Fulani musicians, Boraba, The Gambia, 1970: (from left to right) Bubacar Jalloh (serndu), Abdulai Kanteh (horde) and Sori Jalloh (laala)

are shown in ex.2. The *horde* player is usually an acrobat as well and wears a skirt of wide woven bands to accentuate his movements.

Ex.2 *Horde* and *laala* rhythms

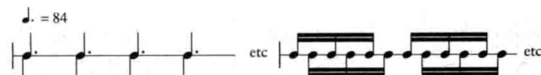
Songs consist of either long, rapid declamatory phrases sung by a soloist, with drone-like responses offered by one of the accompanists, or shorter strophic phrases sung by a soloist and repeated by a second soloist or a chorus. Instruments parallel the voices in heterophony.

(iii) The Wolof. The Gambian Wolof are primarily merchants and farmers who live in or near Banjul, the capital, and on the north bank of the Gambia river. Among the Wolof, the professional musician is known as *gewel*. As with the Mandinka, the *gewel* plays a melodic instrument according to his family tradition. The most common instruments are the *xalam*, a five-string plucked lute similar to the Mandinka *konting*, and the *riti*, a bowed monochord lute less common in The Gambia than the *xalam* (*see* GOGE). The *xalam* and the *konting* share repertories to some extent. Like the *jali* and the Fula *griots*, the *gewel* plays these instruments alone or to accompany singing or narration. The song style and content are similar to *jaliyaa*.

The Wolof play several types of drum. Some are played by the *gewel*, others by non-professionals. The *tabala*, a deep kettle drum, is kept in the mosque and used for songs praising Allah. The dance drum ensemble called *sabar* employs five to seven drums, all played with the stick-and-hand technique. Open-end, slightly conical drums called *nder* and *mbung mbung*, similar to the Mandinka *sabaro*, provide solo and accompanying parts in the higher register, while the closed-end barrel drums *gorong* and *lambe* provide the lower register of the ensemble. To these is sometimes added the *tama*, the same hourglass drum played by the Mandinka.

Sabar drumming is played for a variety of functions but not for funerals or Muslim holy days, when only *xalam* playing is allowed. Wolof drumming is intensely energetic and characterized by complex polyrhythmic combinations. The dance style is similar to the Mandinka, with sequential soloists in the dance circle, but the movements are more sexually suggestive. In one dance, for example, women gently tug at the opening of their wrap-around skirts as they dance towards the drummers.

(iv) The Jola. The Jola live mostly on the south bank of the Gambia river and in the Casamance region of Senegal. They are farmers and have no specialized trades. They form work parties to cultivate rice and groundnuts, and sing to synchronize their work. A distinctive feature of Jola singing, whether for farming, wrestling matches, dances or funerals, is a wordless chorus on the syllables 'wo-eh'. The undulating melodic line sometimes breaks into two-part harmony (ex.3). A soloist extemporizes or sings traditional words between the choruses and also adds further passages of vocalization.



Ex.3 Jola ploughing song

In some areas, the *simbing*, a spike harp larger than the Mandinka *simbingo* and held sideways, is played to accompany groups of men singing.

The *Bugaar* or *Bukarabo* is a celebratory dance in which both men and women dance, stamping or jumping in a pattern resembling the *Lenjengo* dance, but with arms outstretched. A single drummer plays three tall single-skin drums called *bugaar* tuned to different pitches. The men sing and the women clap, at first together and then in interlocking patterns when the dancing starts (ex.4). The *Futamp*, a circumcision festival, is held every

Ex.4 *Bugaar* clapping patterns

15–20 years and is an occasion for other songs and dances and for the appearance of the *kumpo* masked dancer. The *kumpo* also appears frequently today on other occasions. It has no face but looks instead like a haystack with a long pole sticking out the top. As the dancer moves about, he occasionally plants the tip of the pole in the ground, and, with his feet still on the ground, he whirls around the pole's axis in an impressive flurry of grass streamers. A set of Mandinka *kutiro* drums, several iron bells on which interlocking rhythms are played, and *elit*, a pair of long end-blown whistles, accompany this dance.

RODERIC C. KNIGHT

Gambier Islands. *See* POLYNESIA, §II, 3(iv).

Gamble, John (bap. ?London, ? 29 Sept 1610; bur. London, 30 Nov 1687). English cornett player, violinist, copyist and composer. He was perhaps the 'John Gambell' baptized at the London church of St Olave Hart Street on 29 September 1610. According to Anthony Wood, he was apprenticed to Ambrose Beeland, though he is not listed among the seven apprentices Beeland registered with the Draper's Company between 1620 and 1640. Wood wrote that he 'became a musician belonging to a playhouse in London', and in 1641 he was paid for providing the Middle Temple with music, apparently as a member of a group of instrumentalists from the Blackfriars Theatre. Wood thought him and Thomas Pratt 'two eminent musitians of London' when they played in Oxford in July 1658. Gamble published two books of *Ayres and Dialogues* (London, 1656, 2/1657; 1659), which got him 'a great name among the musitians of Oxon' according to Wood, and apparently prepared a third (*GB-Lbl* Add.32339, facs. in Jorgens, 1986, with many of the voice parts in *Lbl* Harl.6947) for publication. There is an engraved portrait of him in the 1656 book.

Gamble became a royal wind musician at the Restoration, and Wood wrote that he was 'one of the cornets in the King's Chapel', though he also worked at court as a violinist, notably in the rosters of string players attending the Chapel Royal in the 1670s and in the masque *Calisto* (1675). In 1662 he wrote music for John Tatham's Lord Mayor's water pageant *Aqua Triumphalis*, and became a member of the Waits of London in 1665. He lost everything in the Fire of London the next year, and seems to have been beset by financial problems in his later years. He made his will on 30 November 1680 'crazed and

infirme of body', though he did not die until 1687; he was buried at St Bride's, Fleet Street, on 30 November.

Gamble was a prolific song composer, though he had little imagination or technique, and his declamatory settings in particular are close to being harmonically illiterate. However, his commonplace-book dated 1659 (*US-NYp* Drexel 4257, facs. in Jorgens, 1987) is an anthology of more than 300 songs by his contemporaries, and it is for this that he deserves to be remembered. He also copied music by Locke, Coleman and Lanier into the Jacobean court wind manuscript *GB-Cfm* Mu.734, adding a tenor part of an otherwise unknown suite of his own. Bass parts of five dances by him survive (*Ob* Mus.Sch.D.220).

IAN SPINK/PETER HOLMAN

Gamble and Huff. American songwriting and production team. Kenny (Kenneth) Gamble (*b* 1943) and Leon Huff (*b* 1942) first worked together in 1964 on a session for the girl group Candy and the Kisses. At the time Gamble was singing in the Romeos, a vocal group from Philadelphia that Huff would shortly join. Continuing to work together on a variety of projects, in 1967 Gamble and Huff wrote and produced a top ten hit for the Soul Survivors, *Expressway to your Heart*. Over the next four years the duo formed the Excel and Gamble labels recording a number of local Philadelphia groups, the most notable being the Intruders (*Together*, *Cowboys to Girls*). At the same time they wrote and produced hits for a number of major label artists including Archie Bell and the Drells (*I can't stop dancing*, Atlantic, 1968), Jerry Butler (*Only the strong survive*, Mercury, 1969) and Wilson Pickett (*Don't let the green grass fool you*, Atlantic, 1971). In 1971 Gamble and Huff founded Philadelphia International Records, a custom label which was financed and distributed by Columbia. Heavily influenced by the Motown operation, Gamble and Huff developed a company sound (dubbed 'The sound of Philadelphia') by using the same core of session musicians, songwriters and the Sigma Sound recording studio for every record. A series of hits followed for the O'Jays, Harold Melvin and the Blue Notes, Billy Paul, MFSB, the Three Degrees, McFadden and Whitehead, Lou Rawls and Teddy Pendergrass until the early 1980s. They also produced *The Jacksons* (1976), the first recording by that group for Epic Records. Gamble's lyrics typically addressed a wide variety of social and political topics including slavery, ecology, spiritual enlightenment and corruption.

The sound of Philadelphia soul was one of the prime influences on disco, and typically featured medium tempo compositions with dramatic string arrangements, multi-layered backing vocals, vibraphone, a minimized or absent backbeat, bass guitar and kick drum parts that emphasized the first and third beats and the following off-beats, and Latin percussion.

WORKS
(*selective list*)

Expressway to your Heart, 1967; Together, 1967; I can't stop dancing, 1968; Cowboys to Girls, 1968; (Love is like a) Baseball Game, 1968; Never Give You Up, 1968 [collab. J. Butler]; Hey, Western Union Man, 1968 [collab. Butler]; Only the strong survive, 1968; Get me back on time, engine number 9, 1970; If you don't know me by now, 1972; Me and Mrs Jones, 1972 [collab. C. Gilbert]; Love Train, 1972; T.S.O.P., 1973
For the Love of Money, 1973 [collab. Jackson]; When will I see you again, 1973; Give the people what they want, 1975; You'll never find another love like mine, 1976; Don't leave me this way, 1976; I don't love you anymore, 1977; Close the door, 1978; Turn off the lights, 1979

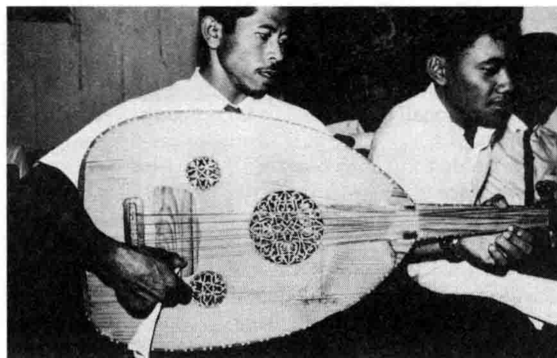
ROB BOWMAN

Gamboa, Pero de (*d* Vila Nova de Famalicão, nr Braga, 17 March 1638). Portuguese composer. He was *mestre de capela* of Braga Cathedral from at least 1585 to at least 1587, and probably until 1591. He was also, from July 1584, abbot of S Paio, Arcos, and from 1591 was resident priest at S Salvador, Bente. On 26 April 1635 he endowed anniversary masses at Braga Cathedral for his former patron, Archbishop João Afonso de Menezes.



Works by Gamboa, all for four voices, are preserved in *P-Pm* 40 and 76–9: in the latter a setting of the *Te Deum* and nine motets (of which the brief *Hodie Maria virgo* might have been intended for liturgical performance as an antiphon), and in the former an introit setting (with cantus firmus in the lowest part) and two motets; a setting of *Jesu redemptor* in this source bears a later attribution to Gamboa, and a communion setting, *Beata viscera*, which follows the introit just mentioned, might also be his work. Although conventional enough in their reliance on imitative counterpoint, Gamboa's motets are often imaginative in their expressive harmony and in other respects, such as the dense textures and low scoring of *O crux ave*.

OWEN REES

Gambus. Long- or short-necked wooden lute, probably of Middle Eastern origin, found in Muslim areas of Sumatra, Java, Sulawesi and other parts of Indonesia, and in

Gambus (lute) player, Minangkabau, Padang, West Sumatra, 1976

Malaysia. Its pear-shaped body has a decorated soundhole and tapers to form the neck, ending in a receding pegbox. Handmade *gambus* vary considerably in shape and size. They usually have four or six pairs of strings and sometimes another single string. The instrument is plucked with a feather quill (see illustration), horn plectrum or the fingernails. It is used for solo instrumental music, to accompany a singer, and in a large or small *orkes gambus* (*gambus* orchestra) which may include *gambus*, violin, *gendang* (double-headed drum), *rebana* (frame drum), tambourine, harmonium, a set of *marwas* drums, maracas and female singers, who perform religious and love songs at weddings and other ceremonies. It resembles the Middle Eastern *'ūd*; *see* QANBŪS.

In northern coastal Java the *gambus* is featured in the *gambusan* ensemble, and in Malaysia it is the leading melody instrument accompanying the folk theatre *boria* and the singing of *ghazal* (poetry).

MARGARET J. KARTOMI

Gamelan. A generic term used for various types of Indonesian orchestra. These vary in size, function, musical style and instrumentation, but generally include tuned single bronze gongs, gong-chimes, single- and multi-octave metallophones, drums, flutes, bowed and plucked chordophones, a xylophone, small cymbals and singers. *See also* INDONESIA, §§II, 1(iii), III, 4, IV, 2 and V, l(ii)(e); MODE, §V, 3; and SURINAME, §5.

I. South-east Asia. II. Outside South-east Asia.

I. South-east Asia

The present article deals with gamelan as ensembles; for information on individual instruments see separate entries. Discussion of context, musical structure and performing practice can be found in the respective country entries.

1. History. 2. Social functions. 3. Distribution. 4. Tuning systems. 5. Instrumentation: (i) Central Java (ii) West Java (iii) East Java (iv) Bali (v) Malaysia (vi) South and East Kalimantan. 6. Related ensembles in South-east Asia.

1. HISTORY. An accurate history of gamelan awaits an adequate accumulation of sources. Bronze kettledrums of the Dongson culture of the 3rd and 2nd centuries BCE found in Sumatra, Java, Bali and other parts of South-east Asia suggest that a high level of workmanship in metal had been reached by that period and that bronze and other metal instruments in the region are very old. However, there is no evidence of a direct line of development between the BRONZE DRUM and the bronze instruments of gamelan and related orchestras. Perishable instruments made of wood, leather and bamboo have also presumably existed in South-east Asia since ancient times, but there is no direct evidence of this.

Kunst (1927, 2/1968) accumulated a number of archaeological, iconographical and literary sources proving the existence of prototypes of most Javanese and Balinese gamelan instruments in the latter part of the 1st millennium CE or the early part of the 2nd. For example, xylophones, bamboo flutes and double-headed drums are depicted in reliefs on the 9th-century Borobudur temple in central Java. Other important sources include the Kediri-period carvings in Java (1043–1222), reliefs on the 14th-century Candi Panataran and a number of Old Javanese literary texts. The *Rāmāyaṇa*, probably dating from the the 1st or the early 2nd millennium CE, uses the word 'gong' and other musical terms.

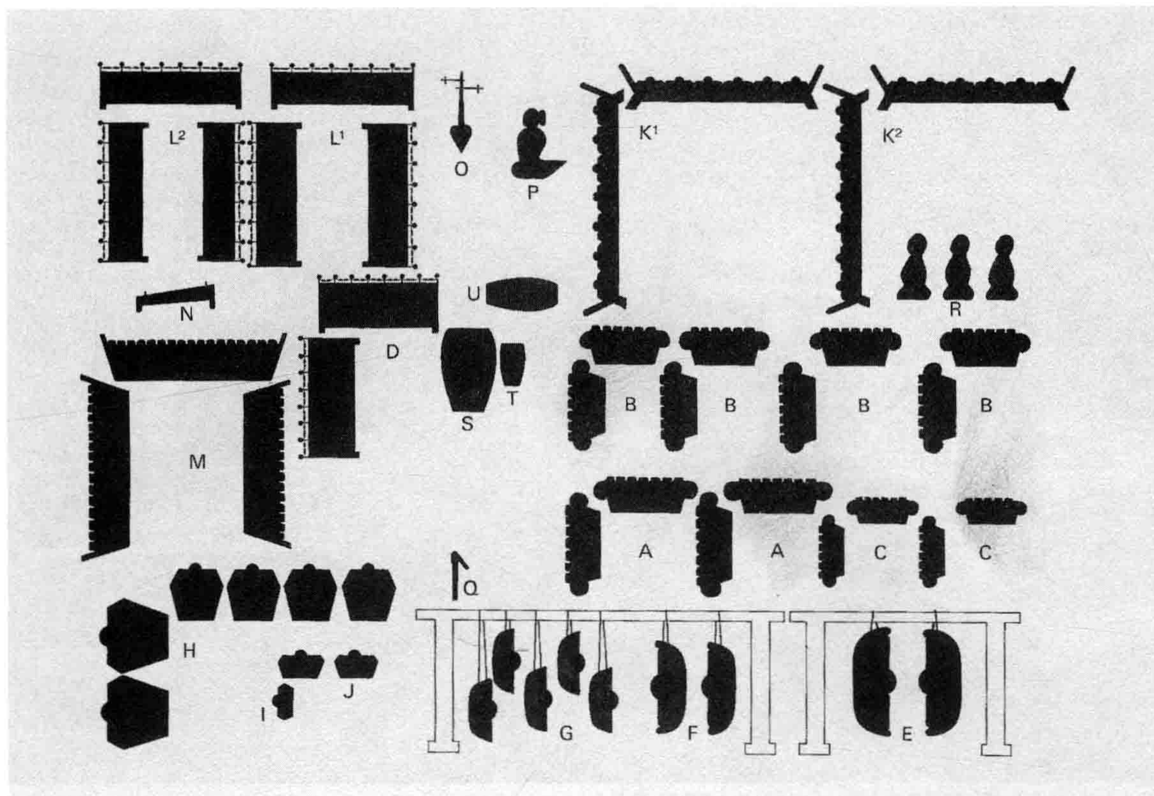
The sources suggest that a distinction has long been made between loud-sounding and soft-sounding gamelan. The former consisted of drums, gongs, oboes and the like and were used for outdoor occasions such as processions and trance ceremonies, as they still are today. The latter included soft metallophones, xylophones and the flute and were reserved largely for indoor occasions. Kunst (1934) postulated that loud and soft ensembles were combined into large gamelan in Java from about the 16th century. Speculations by him and other scholars about some historical implications of archaic Javanese gamelan await the discovery of convincing data, as do theories about which of the two major tuning systems, *pélog* ('seven-note') and *sléndro* ('five-note') came first.

Resemblances between gamelan and similar ensembles in West Java, Central Java, East Java, Bali and other parts of the region may be explained by a common Central and East Javanese origin, as has been suggested, but they are more likely to have resulted from constant contact over the centuries between the changing centres of power in the southern part of South-east Asia. Some Balinese orchestras appear to be a direct continuation of 15th-century Hindu-Javanese orchestras brought to Bali by refugees from the Majapahit kingdom in the early 16th century. Some Sundanese gamelan in West Java are also direct descendants of orchestras moved there from Central Java after the fall of the Hindu-Sundanese kingdom of Pajajaran in 1579.

The combination in Java of two gamelan, one tuned in *sléndro* and the other in *pélog* (see §4), seems to have become widespread during the second half of the 19th century with the development of some forms of musical theatre, mostly in the courts. However, separate *sléndro* and *pélog* orchestras are still found. For example, although incorporation of the *pélog* gamelan into Central Javanese shadow puppet performance (*wayang kulit*) is increasingly common, more traditional forms of *wayang kulit* usually feature the *sléndro* gamelan alone, following a centuries-old practice. Some ensembles exist that predate the development of *sléndro* and *pélog* and contain some obsolete instruments and instrumental combinations. Archaic ceremonial gamelan housed in the Central Javanese courts include the *gamelan carabalèn* (tuned to a four- or six-note *pélog* scale) in which there are two gong-chimes (*bonang klènang* and *bonang gambyong*), one or two large horizontally-suspended gongs (*kenong* and *penontong*), drums (*kendhang gendhing* and *kendhang ketipung*) and a *gong ageng*. Another archaic

ensemble is the *gamelan kodhok ngorèk* ('croaking frog'), tuned to a three-note scale and generally comprising two *bonang*, a *byong* (bell tree), *kenong japan* (horizontally-suspended gong), *rojèh* (cymbals), *kendhang gendhing*, *kendhang ketipung* and *gong ageng*. In Yogyakarta, the ensemble is enlarged with *saron*-type instruments, and in Surakarta, with the *gendèr* (14-keyed metallophone). The ensemble known as *gamelan monggang* (fig.1), like the *carabalèn* and *kodhok ngorèk*, is thought to have originated in the Majapahit period (late 15th to early 16th centuries). It is tuned to a three-note *pélog* scale and consists of four *bonang*-type gong-chimes each with three notes, *kenong japan*, a pair of *penontong*, *kendhang gendhing*, *kendhang ketipung*, two *gong ageng* and a pair of *rojèh*. The instrumentation of the 16th-century *gamelan sekati* (*sekaten*), tuned to a seven-note *pélog* scale, is similar to that of the regular 'loud' gamelan (gongs, metal-keyed instruments, drums and gong-chimes) but the instruments are much larger in size. The ensemble comprises several types of *saron*, two *gong ageng* with only one double-row *bonang* (played by two players), a pair of *kempyang* and a *bedhug*; there are no *kendhang* or *kempul*.

Archaic Balinese gamelan include the *gamelan caruk*, consisting of two *saron* and a *caruk* (bamboo xylophone); the *gamelan gambang*, comprising four *gambang*, played with an unusual technique (*see* GAMBANG), and two pairs of *saron*, each pair played by one person; the *gamelan luang*, where bronze and bamboo instruments are combined so that each *luang* has a unique instrumentation; and the *gamelan salunding*, featuring only iron-keyed metallophones and primarily associated with the Bali Aga peoples who trace their culture back to pre-Hindu times. These ensembles are used mainly for specific ritual contexts, and with *salunding*, for example, are so sacred that people are not permitted to see the instruments except on ceremonial occasions.



2. SOCIAL FUNCTIONS. Gamelan and related ensembles have traditionally been used to accompany religious rites and dances which have survived from pre-Muslim times (before about the 15th century CE). The instruments are shown respect; no-one may walk over them and special offerings of incense are made before an ensemble is played. In Java a gamelan is often given a revered name of its own. The gamelan's main function is still to accompany ceremonial or religious rituals, held chiefly in the temples in Bali and in village or court environments in Java and elsewhere. Gamelan are played in rain-inducing ceremonies in Central Javanese ricefields, in processional dance genres such as *réyog* in East Java, and for erotic dances such as that of the singer-dancer in *tayuban* in Java. They are also played to welcome guests at weddings and other ceremonies, although cheaper recorded music has often been substituted in recent times.

Gamelan in Bali are used primarily to accompany dance and dance-drama on religious and (in recent times) secular occasions. In Central Java and Sunda they are likewise used to accompany dance and dance-dramas and also to accompany shadow (Central Java) or three-dimensional (West Java) puppet theatre and to provide music for contemplative listening (Central Java, *klenèngan*), sometimes at concerts or similar gatherings.

3. DISTRIBUTION. Thousands of gamelan in Java and Bali are owned by puppeteers and other private individuals, communal organizations, government offices, radio and television stations, theatres, museums and palaces. Kunst (1934, 3/1973) showed that gamelan were widely distributed throughout the villages and towns of Java in the 1930s; no similar survey has been published since

1. 'Gamelan monggang' at the Kraton of Yogyakarta, Central Java: back (left to right), 'kenong japan' (horizontal gong), pair of 'rojèh' (cymbals), pair of 'gong ageng' (large suspended gongs), pair of 'penontong' (smaller suspended gongs); front (left to right), 'kendhang ketipung' and 'kendhang gendhing' (double-headed drums), four 'bonang' (gong-chimes)

2. Ground plan of the predominant type of central Javanese gamelan showing positions of instruments arranged in functional groups. One-octave metallophones (A–C = 'saron'): A 'demung'; B 'barung'; C 'panerus' or 'peking'; D 'slenthem'. Vertically suspended gongs: E 'gong ageng'; F 'gong suwukan' or 'siyem'; G 'kempul'. Horizontally suspended gongs: H 'kenong'; I 'kethuk'; J 'kempyang'. Gong-chimes ('bonang'): K^1 'barung'; K^2 'panerus'. Multi-octave metallophones ('gendèr'): L^1 'barung'; L^2 'panerus'. Xylophone: M 'gambang'. Zither: N 'siter'. Spike fiddle: O 'rebab'. Female solo singer: P 'pesindèn'. End-blown flute: Q 'suling'. Choir: R 'gérong'. Double-headed drums: S 'kendhang gendhing'; T 'kendhang ketipung'; U 'kendhang batangan' or 'ciblon'

then. Some gamelan were destroyed during World War II and the war for Indonesian independence, which ended in 1949; some have been broken up since then and sold, instrument by instrument, by impoverished owners; and some have been exported overseas. However, gamelan instruments are still being made in West and Central Java, Bali and elsewhere.

The export of gamelan has grown in recent years (see §II), however export of antique gamelan is forbidden by law. Composers in many South-east Asian countries have increasingly incorporated musical ideas derived from gamelan into their works.

4. Tuning systems. There are no 'correct' standard tunings for gamelan, and no two gamelan are tuned exactly alike. However, most modern gamelan are tuned in either an anhemitonic five-note system or a hemitonic seven-note system. The former is called *sléndro* in Central and East Java, *saléndro* in West Java, and *saih gender wayang* in Bali; the latter is called *pélog* in Central, West and East Java, and *saih pitu* ('row of seven') in Bali. In addition, Balinese gamelan are characterised by paired tuning, where the individual instruments of a pair are carefully tuned slightly apart from one another, creating a 'beating' effect which is part of the characteristic shimmering timbre of most ensembles.

Rarely are all seven notes of the *pélog*-type scale used in a piece, but rather five-note modal scales derived from the seven available. In Central Java both hemitonic and anhemitonic systems are divided into three main *pathet* (modes). The *sléndro* modes (*nem*, *sanga* and *manyura*) all use the same five basic tones of the tuning system, but in *pélog*, one mode (*barang*) uses a different subset of tones (2 3 5 6 7) from the other two (*nem* and *lima*, using tones 1 2 3 5 6). Thus, while gamelan tuned in *sléndro* usually include only one of each type or size of instrument, those tuned in *pélog* must have two of each of the instruments that are tuned to a five-note scale, but only one of each type or size tuned to the seven-note scale. *Pélog* gamelan have therefore two *gendèr barung* (low-pitched metallophones), two *gendèr panerus* (high-pitched metallophones) and two *celempung* (zithers) in order to accommodate the two modal tunings; as it is possible to quickly swap the keys concerned on *gambang* (xylophone), two instruments are not always necessary (for a detailed discussion of *pathet*, *see* Mode, §V, 4(ii)).

Complete Central Javanese gamelan (*gamelan seprangkat*) consist of two sets of instruments, one tuned in *sléndro* and one in *pélog*, with a few instruments doubling for both. Instruments tuned in *pélog* are usually placed at right angles to those tuned in *sléndro*, so that players can move easily and quickly from one to the other.

Gamelan in *sléndro*-type tunings only are traditioanlly used to accompany *wayang kulit purwa* ('ancient' shadow puppet plays) in Central Java and *wayang golék purwa* ('ancient' three-dimensional puppet plays) and *sandiwara*

3. Central Javanese 'gamelan seprangkat', Jakarta, 1977: on the platform (left to right), 'kenong' (horizontal gongs), pairs of 'gong siyem' and 'gong ageng' (large suspended gongs, back), 'kempul' (suspended gongs, centre), 'kethuk' and 'kempyang' (small horizontal gongs, front), four 'saron' (metallophones); centre row (front to back), three 'celempung' (zithers), 'slenthem' (metallophone), 'kendhang ciblon', 'kendhang ketipung', 'kendhang gendhing' (double-headed drums); right-hand row (front to back), one 'gambang' (xylophone), four 'gendèr' (metallophones), 'bonang' (gong-chimes), two 'rebab' (spike fiddles)

(plays with music) in West Java. The Balinese *wayang kulit* is also accompanied by instruments tuned in the *saih gender wayang* (the scale of the quartet of *gender* for *wayang* theatre. Most East Javanese traditional pieces, including those for the *gamelan asli Jawa Timur*, the *wayang kulit* and the *ludruk* theatre, are played on *sléndro* orchestras, as are the *angklung* and *gandrung* pieces of the Osinger people in East Java. *Saih angklung*, an anhemitonic four-note version of the *gender wayang* scale, is used for the *gamelan angklung* in Bali (in some areas, principally North Bali, a fifth tone has been added to the ensemble). Some *gamelan arja* in Bali are tuned in anhemitonic four- or five-note scales which resemble those of the *gender* quartet.

In Java, gamelan in *pélog* tunings only are found in some rural parts of the central and eastern regions, for example the *prajuritan* ensemble of the mountainous Kopeng area. Pieces played in the almost extinct *wayang gedog* (drama enacting stories of the hero Panji) are almost always in *pélog*. Most archaic gamelan, including the three-note *gamelan monggang*, the four- or six-note *gamelan carabalen* and the seven-note *gamelan sekati*, are considered to be forms of *pélog*. In West Java seven-note *pélog* tunings are found only in *gamelan pélog*, but the *gamelan degung* and the *goong rénténg* use two different types of five-note *pélog* tunings.

Of the many different types of Balinese gamelan, the most commonly found tuning is the five-note *selisir* (of unequally-spaced tones and therefore bearing resemblance to *pélog* tunings), used for such orchestras as the *gamelan gong gede*, *gamelan gong kebyar* and *gamelan palegongan*, and for some pieces of the *gamelan arja*. The *selisir* scale is derived from the *gamelan gambuh* tuning, but omits the auxiliary pitches (for detailed discussion of Balinese gamelan tunings, *see* INDONESIA §II, 1(ii–(iii))).

The tunings of the numerous related ensembles in other parts of South-east Asia are extremely varied. Various pentatonic and heptatonic scales are used, together with three- and four-note scales and others with varying intervallic structures. In Sumatra heptatonic scales are the norm in many coastal areas, and pentatonic, four-note, three-note and other scales, are often typical of inland areas. As in Java and Bali, the concept of absolute pitch is not relevant, and in some areas the same type of ensemble may vary in tuning from village to village. A complete picture awaits detailed research in all the relevant regions.

5. INSTRUMENTATION.

(i) Central Java. A 'complete' gamelan, called *gamelan seprangkat* (or *gamelan sléndro-pélog*; fig.3), comprises two sets of instruments, one tuned in the *sléndro* system and the other in the *pélog* system (see §4). Each is complete in itself and has a total range of seven octaves (about 40 to 2200 cycles per second). Normally the two tuning systems have one note in common: *tumbuk* ('to collide').

A complete gamelan includes three sizes of *saron* (one-octave slab metallophone), of which there are usually

several of the middle size (*saron barung*) and one or two of the largest size (*saron demung*), two or three sizes of *bonang* (double-row gong-chimes), a *gambang* (20-key trough xylophone), two sizes of *gendèr* (two-and-a-half-octave metallophone with thin keys suspended over resonating tubes) and the deeper-toned *slenthem* or *gendèr panembung* (similar in construction to the *gendèr* but with a range of one octave only). Horizontally-suspended gongs include a set of *kenong* (large gongs), a *kethuk* (low-pitched single gong) and the *kempyang* (high-pitched small gong). All instruments or instrument sets exist in both scales: in the case of the *gambang* and the *gendèr* there are three each (see §4).

The complete gamelan includes also three sizes of vertically suspended gongs, the *kempul* being the highest-pitched; there may be as many as 12 of these, tuned in *pélog* and *sléndro*. There are several *gong suwukan* (or *gong siyem*, an octave lower than the *kempul*) and one or two *gong ageng* (large single gongs). The string instruments are the *rebab* (two-string spike fiddle) and the *celempung* (zither), which can be replaced by the smaller *siter* (zither). The only wind instrument is the *suling* (bamboo flute). There are three sizes of *kendhang* (double-headed laced drum) and a *bedhug* (double-headed barrel-shaped drum). Some additional instruments, either obsolete or rarely used, are the *kemanak* (a pair of banana-shaped bronze handbells), the *slento* (a *saron demung* with a boss on each key) and a *gambang gangsa* (bronze gambang). A female vocalist (*pesindhèn*) and choral group (*gérongan*) are an integral part of the soft-style ensemble.

The complete gamelan in Central Java belongs in court, urban and village contexts; there are additional small village ensembles which are sometimes referred to locally as gamelan. One such rural ensemble in the Banyumas area is the *èbèg* ensemble, consisting of *selomprèt* (oboe), *saron wesi* ('iron *saron*'), gongs and drums; it is used to accompany hobby-horse trance dancing which in other areas is also called *jaranan*, *kuda képang*, *kuda lumping* or *jathilan*. The *jaranan* ensemble of Central and East Java is similarly constituted. Another gamelan-like ensemble of the Banyumas area is the CALUNG, consisting of tuned bamboo idiophones plus drum; the melody instruments are bamboo xylophones and a blown bamboo tube serves as a gong. Also made up mainly of bamboo instruments is the small *gamelan bumbung* ('bamboo gamelan') in the rural areas in and around Kediri and also in Surakarta and Yogyakarta; it usually consists of stick-beaten bamboo zithers, a bamboo xylophone and a *kendhang*.

A small ensemble of small bossed gongs and drums (*prajuritan*) accompanies the *prajuritan* folk drama in eastern parts of Central Java and in East Java; this relates the story of the mythical battle fought between the Majapahit and Blambangan kingdoms in the 15th century. Also from Central and East Java was the *gamelan kethoprak* which accompanied performances of the *kethoprak* dance-drama. It originated in the 1920s in Surakarta and consisted of wooden instruments: three slit-drums, a *lesung* (log-drum) and a *suling*. The instrumentation was later radically altered, gongs and drums replacing the wooden percussion, and the drama is now accompanied in the theatre by a common gamelan.

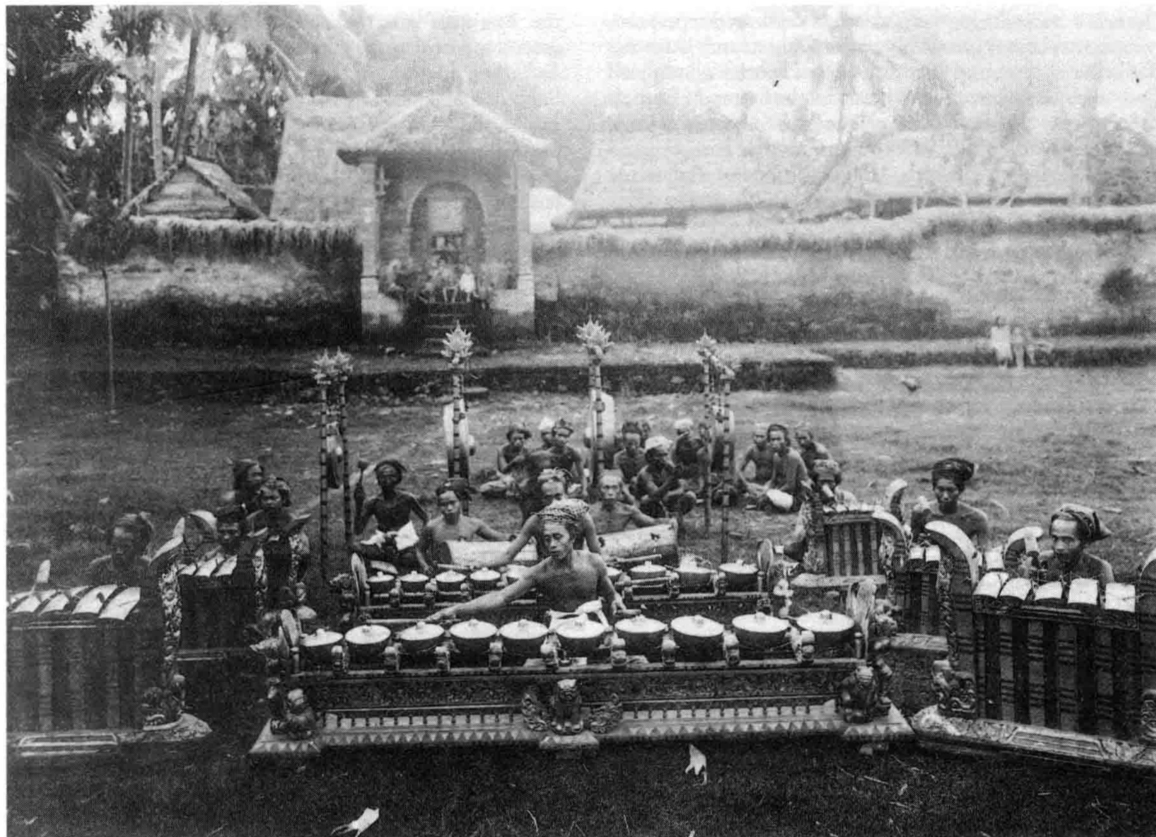
(ii) West Java. In Sundanese-speaking areas of West Java the main orchestras are the *gamelan degung*, the *gamelan rénténg*, the *gamelan saléndro* and *gamelan pélog*. *Gamelan degung* was formerly associated with courts and *gamelan rénténg* with villages. The *gamelan saléndro* is used for a variety of contexts including *wayang golék* (puppet theatre), *sandiwara* (plays with music) and dance, and the *gamelan pélog* for dance and *wayang cepak* rod puppet theatre originating from Cirebon and based on local stories. The instrumentarium of each orchestra varies, but a *gamelan degung* may consist of a *bonang*, a *panerus* or *cémprés* (three-octave keyed metallophones), one or two single-octave *saron*, a *jengglong* (set of bossed gongs, either vertically suspended or lying on crossed cords in a frame), a *goong* (large gong), a set of *kendang* (double-headed drums) and a *suling degung* (small bamboo flute).

The sacred *goong rénténg* is used for harvest purification rituals, communal gatherings and, in some areas, to accompany *kuda lumping* (hobby-horse trance dancing). In Lebukwangi the ensemble comprises a U-shaped *rénténg* (gong-chime), a *rebab*, a *suling*, a *saron* (multi-octave eleven-keyed metallophone), *kecrék* (idiophone of hanging metal plates), *jengglong*, and one or two *goong*. In Klayan, Cirebon, a hobby-horse trance ensemble comprises an L-shaped *rénténg*, a *selomprèt*, *kecrék*, a *kenong*, two *kethuk*, three *kebluk* (horizontal bossed gongs in a frame), a pair of *goong* and a *kendang* and *ketipung* (large and small drums).

While the flute and oboe play the main melodic role in the *degung* and *rénténg* orchestras respectively, the *rebab* (spike fiddle) and *pasindén* (female vocalist) are prominent in the *gamelan saléndro* and *gamelan pélog*, together with the *gambang*. A standard *gamelan saléndro* in addition includes two *saron*, a *bonang*, a *kempul*, a *goong* and three *kendang*, metallophones *peking* and *panerus*, and the two gong-chimes *rincik* and *jengglong*. *Kenong* and *kethuk* may also be added.

(iii) East Java. The *halus* ('refined') gamelan centring on the cities of Surabaya and Majakerta in the eastern part of East Java is called *gamelan asli Jawa Timur* (or *gamelan Surabaya*). Although its instrumentarium is similar to a large Central Javanese gamelan, its musical style, performing practice, repertory and *pathet* (modal) system are different. In the extreme eastern part of East Java, among the Osinger people of Banyuwangi Regency, two styles of *sléndro*-tuned *angklung* ensemble are found. The new-style ensemble has one or two pairs of *angklung* (bamboo xylophone), *slenthem*, *saron barung*, *saron panerus* (all made of iron), one *kendang*, one *suling* or double-reed aerophone and one *gong* . The Osinger people also play the *gandrung* ensemble, which uses a *sléndro* tuning. It comprises two *biola* (violins), *kendang*, a *kempul*, two *kethuk*, a *kloncing* (small triangle) and a small *gong*. It takes its name from the female dancer-singer it accompanies, and is used at important all-night functions such as wedding receptions.

In the Ponorogo area of East Java the *réyog* ensemble (fig.4) accompanies the processional dance of the same name. The ensemble may consist of *selomprèt* (oboe), two *angklung* (of the rattle variety), a *kendhang* and *ketipung* (large and small double-headed drums) and various gongs. The *saronèn* (or *tètèt*) is the most widespread type of *kasar* ('coarse') ensemble in the eastern part of East Java and the offshore island of Madura (where it is called *gamelan kerapan sapi* because it accompanies the bull races known as *kerapan sapi*). The *saronèn* (wooden



4. 'Réyog' ensemble in Ponorogo, East Java, 1963, with (front, left to right) 'ketipung' (double-headed drum), 'selomprèt' (oboe), 'kempul' (suspended gong), 'kethuk' (small suspended gong); and (back, left to right) 'kendhang' (large double-headed drum), two 'angklung' (bamboo rattles)

oboe) is the principal, or only, melodic instrument; the others vary considerably, but may include large and small *kethuk* and *kendhang*.

(iv) Bali. Balinese theatrical gamelan include the *gamelan gambuh*, notable for its use of *suling gambuh* (long flutes) and *rebab* rather than melodic percussion instruments; it includes also a pair of *kendang*, several gongs, a pair of *rincik* and a pair of *kangsi* (cymbals), a rack of bells and the *gumanak* (a struck copper or iron cylinder). The seven-tone *gambuh* tuning system (from which many modes are derived) is believed to be the foundation for many other Balinese gamelan tuning systems. Another theatrical ensemble is the *gamelan arja*, using four- and five-note scales of both hemitonic and anhemitonic varieties, and consisting of three *suling*, two *guntang* (tube zithers), *kelenang* (small gong), a pair of *kendang* and a pair of *rincik* (cymbals).

There exist in Bali various large ensembles more commonly referred to as *gong*. The stately *gamelan gong* (or *gamelan gong gede*; fig.5) may consist of *jegogan*, *jublag* and *panyacah* (metallophones), *trompong pangarep* and *trompong barangan* (gong-chimes), *kendang wadon* and *kendang lanang* (double-headed 'female' and 'male' drums), *bende* (suspended gong), two *gong ageng* (*wadon* and *lanang*, suspended gongs), *kempur* (smaller suspended gongs) and *ceng-ceng* (cymbals). Once a court ensemble of about 40 instruments, it is now a village ensemble of some 25 instruments. About half of these are single-octave *gangsa* (*gender*- and *saron*-type metallophones) which play the nuclear melody in unison and octaves. The expanded melody is played on one or two *trompong*, and a four-kettle *reyong* is used for simple figuration. The modern development of the *gamelan gong*, the virtuoso *gamelan gong kebyar*, is the most vigorously creative musical medium among contemporary Balinese musicians; it uses the *gamelan gong* repertory as well as its own continuously expanding one. Many instruments are derived from the *gong gede*, but are all on a much smaller scale. In addition there are some significant alterations: these include the addition of the *reyong*, a 12–kettle gong chime played by four people and the expansion of the range of the *gangsa* to two octaves (ten keys). In North Bali a harder, more brilliant tone is preferred, and *saron* are used as metallophones in the *kebyar* ensemble, suitably adapted to accommodate bamboo resonators.

The *gamelan semar pagulingan* ('gamelan of the god of love') is a delicate-sounding seven-tone gamelan on which some six-tone and five-tone modes are played, including five-tone *selisir* instrumentarium resembles that of the *gamelan gong* but low-pitched *saron* or large cymbals; as a court gamelan it became rare, but has been revived as part of the recent interest in seven-tone tunings. Even

5. *'Gamelan gong gede': sacred ensemble at Gianjar, Bali, c1935, with (left and right sides, front to back) 'jegogan', 'jublag', 'panyacah' (metallophones); centre (front to back), 'trompong pangarep', 'trompong barangan' (gong-chimes), 'kendang wadon', 'skendang lanang' (double-headed drums); back row (left to right), 'bende', 'gong wadon', 'gong lanang', 'kempur' (gongs); the musicians at the back are playing 'ceng-ceng' (cymbals)*

more delicate in timbre is the *gamelan palegongan*, used to accompany the *legong* dance and other dances and dramas. It replaces the *trompong* with two pairs of 13-key *gender* and includes a pair of smaller drums. The *slendro*-tuned *gamelan pajogedan* replaces the metallophones with instruments with split-bamboo keys over bamboo tube resonators and the gong with two bronze slabs of slightly different pitch, struck simultaneously; *Suling* are also featured. It is known colloquially as *joged bumbung*.

The *gamelan bebonangan* (known also as *balaganjur* or *kalaganjur*) is a processional ensemble consisting of a pair of *gongs* a pair of *ceng-ceng kopyak* and a pair of *kendang* plus other portable instruments extracted from the larger staionary ensemble of the village (usually a *gamelan gong kebyar*). Particulary featured are *reyong* kettles (sometimes referred to in Bali by their Javanese name, *bonang*), each held by one player and played in an intricate interlocking style. The *gamelan gegenggongan*, used for dance and musical performance, consists of *genggong* (bamboo jew's harps), *suling*, *kendang*, *guntang* and *ceng-ceng*. The *gamelan angklung* is a small Balinese ensemble used for temple festivals, processions and cremations. Tuned in four-tone equidistant *saih angklung*, it features single-octave metallophones, gongs, *reyong*, *kendang* and *ceng-ceng*; the bamboo slide-rattles (*angklung*) which gave the ensemble its name are no longer included.

(v) Malaysia. *Joget gamelan* (also known as *gamelan Terengganu* or *gamelan Pahang*), has its origins in Central Javanese gamelan. It was first known in the mid-18th century Malay court in Riau-Lingga (Indonesia), where the dance and music genre flourished for around 150 years. When the last Sultan of Riau-Lingga abdicated in 1912 it ceased to be performed there, but had reached the fief territory of Pahang in the early 19th century, where it was heard by Frank H. Swettenham in 1875. When the Sultan of Pahang died in 1914 the practice of gamelan also died out in Pahang. His daughter, however, borrowed the Pahang gamelan and brought it to the palace of her husband, the Sultan of Terengganu, where it continued to develop as entertainment for royalty in various court celebrations and ceremonies. Performance ceased in 1942, following the Japanese invasion and death of the Sultan, but in the 1960s it was revived and sponsored by the Terengganu government. It is now considered a national art, performed on state occasions. Though the genre is danced by women, *joget gamelan* is played by men. The ensemble comprises *gong agung*, *gong suwukan*, five *kenong*, *kerumong* (gong-chime), *saron barung* and *peking* (metallophones), *gambang* (xylophone) and *gendang* (double-headed drum).

(vi) South and East Kalimantan. The gamelan culture and related ensembles of South and East Kalimantan are almost totally unknown outside those two provinces.

Gamelan and *wayang kulit* (leather shadow puppet) sets were transplanted (probably in the 17th century) into the Banjarese community near the coast of South Kalimantan. They are said to have been gifts from the Sultan of Demak (in north-east coastal Java) to the first Sultan of Banjar (near Banjarmasin, South Kalimantan) after he converted from Hinduism to Islam. Although the last Sultan of Banjar lost power to the Dutch in 1860, his descendants kept the performance of the repertory alive until Indonesia's independence in 1945, after which knowledge of the performance practice and repertory declined sharply. These formerly Sultan-owned ensembles of large Javanese-style bronze instruments are now preserved and sometimes played in state museums in Banjar Baru (near Banjarmasin) and Tenggerong (near Samarinda, East Kalimantan) as well as in the National Museum in Jakarta. The set in Samarinda comprises 35 instruments tuned in *selindero* (Jav.: *sléndro*, but with four modes) and a smaller number tuned in *pelok* (Jav.: *pélog*).

Related ensembles or offshoots of the court gamelan are still alive, however. They accompany shadow puppetry (*wayang kulit Banjar*) and hobby-horse dance (*kuda gipang*) performances as well as providing interludes or postludes in modern *mamanda* theatre shows among the Banjarese in West and East Kalimantan. A modern *gamelan Banjar* used to accompany *wayang kulit* (tuned in *selindero* only) comprises between 8 and 13 musicians playing a *babun* (large, two-headed drum), gongs (*agung ganal* and *agung kecil*), two seven-key *saron*, a *dawo* (double-row, ten-piece bossed-keyed gong-chime), with an optional *angkelong* or *kurung-kurung* (shaken bamboo idiophone), five *kanong* (bossed keys), a *katrak* (wooden hammer). Metal instruments are usually made of iron. In South Kalimantan the gamelan also often includes a *rebab, suling, gambang* and *gendir* (Jav.: *gendèr*).

A *gamelan kuda gipang* comprises two or three *saron*, a pair of cup cymbals (*kangsi*), a pair of suspended gongs (*kampul*) and a *babun* (drum).

A partly gamelan-like Malay orchestra called *orkes panting*, used to accompany local *mamanda* theatre shows, usually comprises one or two violins (*biul*), a pair of gongs (*gaduk*), a pair of small two-headed drums (*ketipung*), a pair of lutes (*panting*) and a singer. Other gamelan instruments such as the *babun* may also be added.

6. Related ensembles in South-east Asia. Gamelan are related in their instruments and musical qualities to other ensembles throughout the southern part of South-east Asia. Whether this is due to diffusion from one or from several sources it is not possible to say, although the high level of metal workmanship in Java since ancient times suggests that this island may have been a main source of diffusion of metal instruments. Most ensembles in the area broadly consist of double-headed drums and gongs (or their substitutes), to which gong-chimes, wind and string instruments are often added. Gongs may be vertically-or horizontally-suspended; wind instruments are normally oboes or flutes; and strings are either bowed, as in the case of the *rebab* and *biola*, or plucked, as in the case of the *kacapi* and *celempung*. Less common instruments include xylophones, keyed metallophones and percussion bars. Solo or choral singing may also be a feature of some ensembles.

Ensembles comprising only drums and gongs include *gendang bergung* in Riau and the *genrang dan gong* in the Buginese area of Sulawesi. Orchestras consisting essentially of drums, gongs and gong-chimes include the *kulintang* in the southern Philippines, the *gendang* in Pakpak Dairi (Sumatra), the *keromong* and *kelintang* in Jambi, the *kelittang* (*keromong* or *tabuhan*) in Lampung, the *keromongan* in south Sumatra and the *keromong duabelas* in Bengkulu. Drum, gong and wind or string ensembles are exemplified by the *gendang gung* in Serdang, the *nobat* in Riau and West Malaysia (with cymbals in the latter case) and the *genderang* of the Pakpak (Dairi) to which cymbals and two types of percussion plates are added.

Ensembles combining drums, gongs, gong-chimes and wind are exemplified by the Mandailing *gondang* and *gordang* ensembles, the Serdang type of *alat-alat makyong* ensemble (to which bamboo clappers are added), the *gendang gung* in Langkat and the *kelintang* in Bengkulu (to which a string instrument is added). The *talempong* in West Sumatra minimally comprises drums and gong-chimes, but a wind instrument or gong may be added in some areas.

In bamboo or wooden ensembles which do not possess drums or metal gongs, other instruments often have similar functions; for example, in the *kolintang* ensemble of Minahasa the nine xylophones play drum-like, gong-like and melodyic roles. Drums play an important role in most South-east Asian ensembles, but in exceptional cases they are omitted altogether, as in the *kulintang lunik* in Lampung. Gongs or gong substitutes also play an important role, except in the *talempong* as it occurs in most areas of West Sumatra, where gongs are traditionally reserved for special royal and theatrical occasions.

II. Outside South-east Asia

1. Pre-1940s. 2. Post-1940s.

1. Pre-1940s. Although ensembles of instruments appear not to have been imported from the East Indies until the 19th century, it seems that individual gamelan instruments, unallied to cultural or performance context, were circulating in Europe before this time, probably as a result of trading in the East Indies. One intriguing example is suggested by Klotz (1984), regarding the bell-making Hemony brothers (François and Pieter) , who were active in the 17th century. Known for the refinements they introduced to the bell-tuning process, it is reported that they 'compared the pitches obtained with those of a metallophone (perhaps from Indonesia) made up of a series of metal rods' (Klotz, 1984). The composer Rameau owned in his private instrument collection a 'gambang', (*see* Xylophone, fig.1) which has been the subject of some scholarly detective work. It was believed by early commentators (including musicologist Charles Burney) to be of Chinese origin, although Schaeffner (1955) and later, Burns (1983) present strong arguments that the instrument was of Javanese rather than Chinese origin.

The first gamelan ensembles outside South-east Asia were brought to England by Stamford Raffles at the end of his governorship of Java in 1816. Raffles brought over two sets, one currently housed in the British Museum's Department of Ethnology, and the other which for several generations has been in the possession of the Verney family, and is on display at Claydon House, their home in Buckinghamshire. These sets have been the subject of much speculation as a result of their unusual (and in some cases, seemingly unique) carving, instrumentation and tuning. Quigley (1996) has concluded that these sets were built on or around the northeastern coast of Java and, rather than representing older, now-defunct Javanese ensembles, were probably commissioned by Raffles specifically for his return to England. As a result of conforming to his aesthetic preferences they omit certain instruments, are carved unusually and approximate diatonic tuning. The first mention of European gamelan performance (in an extremely limited sense) also dates from Raffles' return to England; he was accompanied by the Javanese nobleman Rana Radèn Dipura who took part in musical demonstrations and whom (as noted in Raffles, 1817, p.470) 'played upon this instrument [the xylophone *gambang kayu*] several of his national melodies before an eminent composer [William Crotch]'.

Instruments from the Raffles gamelans featured in the 19th-century acoustical experiments of Charles Wheatstone (acoustician and inventor of instruments, including the English concertina) and, more significantly, Alexander Ellis, who also drew on a wide range of European gamelan sources (instruments based in Europe, scholars' measurements of Europe-based gamelan sets, a performance in Europe by a visiting Javanese group, other scholars' written observations of such performances) for his work 'On the Various Scales of Musical Nations' (1885), which is considered by many to be one of the first publications of the then-nascent discipline of ethnomusicology.

However, apart from occasional soundings of the instruments, ensemble performance on sets of gamelan instruments outside South-east Asia only began to occur in the latter half of the 19th century, by visiting troupes which were predominantly from Java. Examples include the Mangkunegaran Palace troupe's performances at the Arnhem exhibition (1879), observed by J.P.N. Land and the 1882 performances at the London Aquarium, described in Mitchell (1882). The most famous is perhaps the Java village of the 1889 Exposition Universelle in Paris, where Claude Debussy first encountered gamelan performance; however the idea of importing a whole performing community was initiated earlier at the 1883 International and Colonial Exhibition in Amsterdam. Groups of Balinese performers began to tour somewhat later: the 1900 Exposition Universelle in Paris appears to be the first major performance of Balinese gamelan outside South-east Asia. Occasionally such groups left behind the instruments they brought with them, for example the gamelan featured in the 1893 Chicago-based World's Columbian Exposition, which is currently housed at the Field Museum in Chicago.

It should not be assumed that the repertory performed by such groups necessarily conformed to 'traditional' regional gamelan material. The ensembles featured at the expositions were part of larger commercial concerns (the promotion of foodstuffs from the Dutch East Indies, for example) and repertory often included material familiar to the audience at these expositions, in addition to traditional pieces. The 1883 Amsterdam group, for example, included arrangements of patriotic Dutch and English songs in their performances for the visits of the monarchs Wilhelmina and Victoria. (Unfortunately there was some confusion, and 'God Save the Queen' greeted Wilhelmina, while 'Wien Neerlandsch Bloed door den Aâdren vloeit' and 'Wilhelmus' accompanied Victoria's visit.) The 1893 Chicago gamelan performed not only Javanese and Sundanese repertory, but also Western music: wax cylinder recordings made by folklorist Benjamin Ives Gilman of the performances at the exhibition include tunes such as 'America' and 'Yankee Doodle' as well other more traditional repertory.

Aside from visiting groups from Indonesia, diasporic gamelan activity during this period seems to have been confined to the Netherlands. Around the turn of the 20th century, Indonesian students instigated gamelan performances for other students (and later the Dutch public) with the aim of raising awareness of East Indies culture and highlighting the Indies independence debate. Several of these students went on to become leading figures in the Indonesian independence movement, such as Soewardi (who later adopted the name Ki Hadjar Dewantara), Noto Soeroto and Soerjo Poetro. In the 1920s onwards, groups such as Insulinde and Ardjoeno (made up of Indonesian students and workers) incorporated gamelan and other Indonesian musics in a dance context and enjoyed considerable success not only within the Netherlands, but also across Europe.

Prior to World War II, gamelan performance by peoples other than South-east Asians seems to be limited to one occasion. On 5 May 1857 in Delft, trainee Dutch civil servants, bound for the East Indies, undertook a procession involving the performance of a 'garebeg' ensemble (see Heins, 1989). The first instance of more long-term gamelan performance by non-Indonesians also occurred later in the Netherlands. Babar Layar (named after the Javanese composition) was formed by teenagers in German-occupied Harlem in 1941. Led by Bernard Ijzerdraat (who later adopted the name Suryabrata), the group studied Central Javanese repertory under the guidance of ethnomusicologist Jaap Kunst, in the process constructing their own set of Javanese-style instruments. Babar Layar performed in the Netherlands and (after the War) throughout Europe until the early 1950s.

2. Post-1940s. After World War II, interest in the gamelan ensemble and its various regional performance traditions has spread considerably outside South-east Asia, resulting in the wide distribution of sets of instruments all over Europe (including over 40 sets of instruments in Britain), North America (where there are over 150 sets), East Asia, Australia and New Zealand, as well as parts of Latin America and also Africa. Although Central Javanese gamelan could be said to dominate above other regional gamelan ensembles outside South-east Asia, Balinese and Sundanese gamelans are also represented. This interest in gamelan has resulted not only in the increased export of ensembles from Indonesia, but also (in several locations) in the construction of self-made instruments after Indonesian models. Although the history and nature of gamelan development varies considerably from location to location, there are several important general characteristics which can be identified.

The discipline of ethnomusicology has often played an important role in the spread of gamelan outside South-east Asia. Although Jaap Kunst (sometimes identified as the 'father' of ethnomusicology) never performed gamelan, his student Ki Mantle Hood (who observed Babar Layar whilst studying in the Netherlands) researched gamelan performance in Java and went on to become one of the first to champion the inclusion of performance in the discipline of ethnomusicology. His interest in gamelan performance was central to this stance, which had considerable impact upon the discipline, particularly in the US. Indeed, a large proportion of the gamelan sets now in the US are attached to ethnomusicology programmes at universities. Gamelan performance within American ethnomusicology has also influenced the development of gamelan performance in other parts of the world. In Japan, for example, ethnomusicologist Koizumi Fumio was inspired to initiate Javanese gamelan performance as a result of observing the ethnomusicology programme at Wesleyan University (CT) during a sabbatical leave. Similarly, the first gamelan ensembles in Taiwan (Balinese, followed by Javanese) arrived as a result of ethnomusicologist Han Kuo-Hang's exposure to gamelan performance at Northern Illinois University.

Another important force behind the spread of gamelan outside South-east Asia has been the Indonesian embassy. In several global locations the embassy has been the sole possessor (at least initially) of instruments (predominantly, but not exclusively, Javanese). The embassy has also facilitated the development of gamelan performance by providing scholarships for foreign nationals to study in major Indonesian performing arts institutions, as well as employing Indonesian musicians and dancers in its overseas administration.

However, although the Indonesian embassy has played an important supportive role, it is notable that, with the exception of the Javanese in Suriname (*see* Suriname, §5), the spread of gamelan has not necessarily been driven by the migration of a South-east Asian ethnic group. This makes gamelan unlike many other musics 'transplanted' from their country of origin. Indonesian musicians living outside of the country certainly play an important part in the spread of regional gamelan repertories. However, in general the majority of participants in gamelan performance outside South-east Asia have, interestingly, tended not to be of Indonesian or Malaysian ethnicity, their connection with the music lying instead in the realm of 'affinity' (see Slobin, 1993).

New contexts for gamelan performance have inspired modifications to instruments created in Java. These range from increasing the number of metallophones in the ensemble to accommodate large school workshop groups, to incorporating motifs in carving designs which are specific to the commissioning body (for example, several gamelans commissioned for British schools and institutions feature the institution's crest or logo carved on the cases of the instruments). Other modifications have been more fundamental, ranging from combining sounding parts made in Java with frames made by local furniture makers for portablility (e.g. the Manchester Mobile gamelan), to commissioning traditional instruments from Javanese makers, but in western (rather than Javanese) tuning.

In several locations, interest in the gamelan ensemble has intersected with instrument building. This is perhaps epitomised by the American composer Lou Harrison, who with William Colvig has built several gamelan ensembles ('American gamelan') which draw on traditional Javanese models but incorporate important innovations in design, in the material used (aluminium instead of bronze or iron for the sounding parts) and in tuning (just intonation interpretations of Javanese *sléndro* and *pélog*). Whereas Harrison's construction of gamelan has arisen from a broader interest in composition (an interest which has also led others to build their own gamelan), the creation of gamelan instruments has sometimes beena response to different circumstances. Both Babar Layar (see above) and the Boston Village Gamelan, for example, constructed their Javanese-style instruments in order to play traditional repertory and to experiment with replicating traditional Javanese instrument-building processes. However the majority of self-built ensembles (whatever the motivations behind their construction) have generally been produced by 'cold' techniques rather than forging.

It is difficult to make any generalisations about the repertory performed on gamelan ensembles outside South-east Asia. While many groups solely perform regional South-east Asian gamelan styles, others focus instead on the creation and performance of new repertory. An increasingly large number of groups combine both. Although, as mentioned above, the desire to compose new repertory for gamelan has often prompted the creation of self-made instruments, this has not always been the case. There are several groups specialising in new composition for gamelan (for example, Gending, in the Netherlands) have performed on and commissioned pieces for a

traditional set of gamelan instruments (in this case, Javanese). Similarly, several groups based around self-made instruments perform traditional material. Whatever the nature of the repertory performed, in the majority of cases gamelan activity outside South-east Asia is characterised by dialogue and exchange with performers, composers and makers within South-east Asia, which is facilitated by several national and international organisations and festivals.

MARGARET J. KARTOMI/R (I), MARIA MENDONÇA(II)

Gamma (It.). *See* SCALE.

Gamma ut. The note G in the HEXACHORD system.

Gamme (Fr.). *See* SCALE.

Gamut. (1) The note G; a contraction of *gamma ut*, which is the full SOLMIZATION name for *gamma*, the lowest note of the medieval system of letter notation that dates back to the *Dialogus de musica* (*c*1000; ed. in *GerbertS*, i, 251–64) formerly attributed to ODO of Cluny. Throughout the later Middle Ages the lowest note with a Roman letter name was *A* (A *re*), a 10th below middle C: this was logical not only because it was considered the equivalent of *proslambanomenos*, the lowest note of the Greek Greater Perfect System which had served up until the time of the *Dialogus* for virtually all note nomenclature, but also in that it was the lowest note used within the Gregorian chant repertory (bearing in mind Apel's observation, p.248, that the mere 11 examples with notes below *A* he found in the entire repertory are probably 'of a later date', and are in any case not confirmed by all sources). Whether the new extra note below *A*, apparently first mentioned by the author of the *Dialogus*, was added to account for new expanded chants, or whether, as seems possible, it was necessary to explain the lowest A and B within a hexachordal or tetrachordal system, is not at all clear. But from that time on nearly all descriptions of the scale or of the monochord began with the lowest note called *gamma*, *gamma ut* or *gamma graecum*. This also found its way into the vernacular: Tobler and Lommatzsch listed Gautier de Coincy's use of 'gamaüt'; English uses may be found in the *Oxford English Dictionary* and in Kurath and Kuhn.

(2) The hexachordal system or, more broadly, any system. Early uses in English seem to have taken the form 'gamme': at the end of the 14th century John Gower wrote 'Nou hihe notes and nou lowe,/As be the gamme a man mei knowe,/Which techeth the prolacion/Of note and the condicion'; and shortly afterwards Leonel Power began his work on discant: 'This tretis is contrived upon the gamme for them that will be syngers or makers or techers'. From similar references listed in Kurath and Kuhn it seems that 'gamme' meant 'hexachordal system'. French uses of the word in that sense are plentiful and go back to *Le roman de Thèbes* (mid-12th century). More recently the French word *gamme*, like the Italian *gamma*, has been the normal word for a musical scale. From the end of the 15th century the word 'gamut', which is apparently peculiar to English, has meant 'hexachordal system', 'scale' or 'system'. *See also* HEXACHORD.

(3) Range. Strictly, the gamut in this sense comprised those notes shown on the Guidonian hand (*see* SOLMIZATION, figs.1 and 2). More loosely, and more often, it has been used figuratively. References in the *Oxford English Dictionary* date back to the early 17th century.

DAVID FALLOWS

Ganassi, Giacomo (*b* Treviso; *fl* 1625–37). Italian composer. He became a Franciscan friar and was *maestro di cappella* of S Francesco, Belluno, north of Venice, from 1625 to 1634. He was exclusively a composer for the church and was more interested in producing music for Mass and Vespers, sometimes for large forces, than in following the current fashion for small concertato motets. Whereas the psalms of 1625 are for double choir throughout, only two of the four masses of 1634 are definitely conceived for this medium: the others follow a recently established practice by which the second choir is an optional ripieno and the first choir, consisting of soloists, sings throughout. However, the effect of the music is considerably altered by the presence of the second choir, since the soloists often continue their counterpoint in tuttis while the ripieno has chordal writing, resulting in a decorated homophonic texture instead of a purely contrapuntal one.

JEROME ROCHE

Ganassi dal Fontego, Sylvestro di (*b* ?Venice, 1492; *d* mid-16th century). Italian instrumentalist and writer. He was the author of two treatises on instrumental performance. Ganassi joined the *pifferi* of the Venetian government in June 1517, when he was hired as 'contralto' to fill a vacancy. From the 1517 document it is clear that his nickname 'dal Fontego' was derived from his place of residence near (or at) the Venetian 'Fontego', the palace by the Rialto where German merchants lived and traded. He is also mentioned in a few other documents from the late 1540s, and he might be the 'Silvestro del cornetto' who rented a storeroom near the Rialto in 1566. In his capacity as 'piffero del Doge' he probably supplied ceremonial and court music for the Doges and instrumenal music at the Basilica di S Marco.

Ganassi published two treatises, one on the recorder, *Opera intitulata Fontegara* (Venice, 1535), and one in two volumes on the viola da gamba, *Regola rubertina* (Venice, 1542) and *Lettione seconda* (Venice, 1543). Most 16th-century books on instruments are either quasi-encyclopedic surveys, like those by Sebastian Virdung (1511) and Martin Agricola (1528 and later), or else very simple sets of instructions for tuning, fingering and intabulating, like the lutebooks by Hans Gerle (1532 and later) and Adrian Le Roy (1574). Ganassi's works differ from all others in their detail and subtlety. They offer a complete discussion of instrumental technique up to its most sophisticated aspects: how to produce a good sound, rules for articulation (including advanced problems in bowing, tonguing and fingering), how to improvise ornamentation and, most important, how technique must be subordinated to expressiveness. In short, Ganassi's volumes should be regarded as the starting point for any serious study of 16th-century performing practice, for together they give the most extended and most complete statement on the subject and reveal the high level of achievement the instrumentalists of the time had reached. Unfortunately the volumes are not easy for the English-speaking musician to use since they are written in a difficult Italian and partly in Venetian dialect. The existing translations of *Fontegara* into German and English are not wholly satisfactory.

Fontegara purports to be an exposition of the principles of playing wind instruments, dealing with ways of controlling the breath, tongue and fingers. Much of the volume is taken up with a rather scholastic presentation in a series of tables of the sorts of *passaggi* which may be applied to a melodic line; this merely dramatizes the central position improvised ornamentation held in the education of young instrumentalists and in the professional activity of master players. Besides *passaggi*, Ganassi also explains trills by semitones, whole tones and 3rds; various sorts of articulation including several varieties of double tonguing; fingerings, among them some that extend the range of the recorder to more than two octaves; and breath control, for good intonation, dynamic contrast and expressive performance. Throughout his book Ganassi holds up the human voice as the model for instrumentalists to follow. The copy of *Fontegara* in *D-W* has an appendix in Ganassi's own hand setting out some 175 varied diminutions on a melodic formula.

In the two volumes of *Regola rubertina*, Ganassi first describes the most elementary aspects of viol playing – how to hold the instrument, how to finger it and so on – and then proceeds to explain in a complicated way various sorts of bowings, fingerings and tunings, including several scordatura tunings and some for viols with only three or four strings. He discusses techniques for playing above the frets, how to transcribe vocal music into tablature, how to place frets on the instrument, how to tell good from bad strings, how to improvise unaccompanied ricercares and how to play polyphonically. The volumes are illustrated with a number of charts, tables and diagrams.

HOWARD MAYER BROWN/GIULIO ONGARO

Ganche, Edouard (*b* Baulon, Ille-et-Vilaine, 13 Oct 1880; *d* Lyons, 31 May 1945). French scholar. A doctor by profession, he wrote books on medicine, but is best remembered for his writings on Chopin. These show his conviction that Chopin owed most of his development to his Polish origin and upbringing and that the influence of French culture on his music was negligible. This opinion ran counter to those held by all other French scholars, but greatly endeared him to the Poles. In 1911 he founded in Paris the Société Frédéric Chopin and became its first president. During the next 25 years he travelled extensively in Poland and France, lecturing on the works of Chopin. The culmination of Ganche's work was his three-volume *The Oxford Original Edition of Frédéric Chopin*. It was based chiefly on Jane Stirling's printed copies of Chopin's works, annotated by the composer for her use, with the first volume containing a facsimile of the thematic catalogue written for her by Chopin.

MAURICE J.E. BROWN/JEAN GRIBENSKI

Gand (i). French family of violin makers. Charles-François Gand (*b* Versailles, 5 Aug 1787; *d* Paris, 10 May 1845), known as Gand *père*, was the elder son of Charles-Michel Gand (*b* Mirecourt, 11 Oct 1748; *d* Versailles, 25 Aug 1820), a little-known violin maker who moved to Versailles about 1780. From 1802 to 1806 he was apprenticed to NICOLAS LUPOT. In 1807 he returned to his father's workshop but in 1811 he went back to Paris to work at Lupot's shop. In the same year he married Cornélie Squimbre, whom Lupot considered an adopted daughter. In 1819 he purchased the shop of a dealer and restorer named Jean Gabriel Koliker at 24 rue Croix-des-Petits-Champs, the same street as Lupot. He continued to work for Lupot, however, and succeeded him in his business on his death in 1824, and also in his official duties as violin maker to the royal chapel and the Paris Conservatoire. Among his regular customers were some of the best violinists of the time. He was a hard worker, a skilful craftsman and had a good business sense. His instruments are rare but excellent in every way, though in due course he was overshadowed by the rising fame of J.-B. Vuillaume. Gand *père* was certainly Lupot's finest pupil. His brother Guillaume-Charles-Louis Gand (*b* Versailles, 22 July 1792; *d* Versailles, 29 May 1858) also worked for Lupot, then for Charles-François, but returned permanently to Versailles, succeeding his father there in 1820. He was an excellent craftsman, whose work closely resembles that of Lupot.

Gand *père* had two sons, Charles-Adolphe Gand (*b* Paris, 11 Dec 1812; *d* Paris, 24 Jan 1866) and Charles-Nicolas-Eugène Gand (*b* Paris, 5 June 1825; *d* Boulogne, nr Paris, 5 Feb 1892). Charles-Adolphe inherited his father's shop in 1845. Although an excellent workman he made few instruments, being mostly occupied with the running of the business. He was in charge of the maintenance of the instruments of the Opéra-Comique and the Paris Conservatoire. Charles-Nicolas-Eugène learnt his trade in the family shop, and in 1855 became his brother's partner, the firm becoming known as Gand Frères. In the same year their instruments won a first-class medal in the Exposition des Produits de l'Industrie in Paris. On Charles-Adolphe's death, the house was merged with that of BERNARDEL and became Gand & Bernardel Frères, with Gand as senior partner. He was considered a person of integrity and a renowned expert, and the firm was held in high repute.

CHARLES BEARE/SYLVETTE MILLIOT

Gand (ii) (Fr.). *See* GHENT.

Gandini, Gerardo (*b* Buenos Aires, 16 Oct 1936). Argentine composer, pianist and conductor. He began his studies in Buenos Aires with Pía Sebastiani and Roberto Caamaño (piano) and with Ginastera (composition). After completing his piano training with Loriod, in 1964 he moved to the USA on a Ford Foundation scholarship, and there he took part in the Young Artists' Project under the auspices of the Institute of International Education. Two years later an Italian Government scholarship took him to Rome to study with Petrassi at the Accademia di S Cecilia. In Buenos Aires he established, under his own direction, the Grupo de Experimentación Musical, which gives first performances of avant-garde music. In 1970 he was appointed to teach at the American Opera Center of the Juilliard School. He organized concerts of contemporary music and, as Director of the Experimental Centre for Opera and Ballet (CEOB) sponsored by the Teatro Colón, he promoted, commissioned and performed a series of chamber operas by Argentine composers. Among them is his own *La Casa sin sosiego* (1992) on a libretto by Griselda Gambaro. He is also one of the founding members of Agrupación Música Viva, an experimental new music group which included Hilda Dianda, Armando Krieger, Alcides Lanza and Antonio Tauriello. The prizes he has won included one from the city of Buenos Aires (1960, for the Piano Concertino). He has also received important commissions, and his works have been heard at festivals in Europe and the Americas. Particularly noteworthy are three pieces heard at Washington festivals: the *Variaciones orquestales*, *Contrastes*, and the *Fantasía impromptu* for piano and orchestra. The first of these, written in 1962, is a very free treatment of a 12-note series. *Contrastes* creates a series of contrasts in texture, dynamic, timbre, tempo and density between a chamber orchestra and two piano soloists. At the Washington première in 1968 the pianists were Gandini and Krieger, and a third Argentine musician, Tauriello, conducted. Gandini also played in the first performance of the *Fantasía impromptu* (Washington, 1971), in which an imaginary portrait of Chopin is drawn in a sequence of superimpositions and fragmentations, beginning and ending with a re-creation of the B flat minor Mazurka. Some of his recent more mature works show a tendency toward Impressionism and are surrounded by a profound poetic aura. *Paisaje imaginario* (1988) for piano and orchestra was commissioned by the BBC Welsh SO.

SUSANA SALGADO

Gando. French family of type founders. Nicolas Gando (*b* Geneva, early 18th century; *d* Paris, 1767), having first

established himself in Geneva, moved in 1736 to Paris, where he took over the foundry of his uncle Jean Louis Gando. Nicolas issued a specimen of his types in 1745, and another in 1758 to show the resources of Claude Lamesle's foundry, which he bought that year. His son Pierre François (*b* Geneva, 1733; *d* Paris, 1800) was a partner in the foundry and succeeded him.

The Gandos owe their place in history less to the qualities of their type than to their polemical exchanges with Pierre-Simon Fournier on the question of typographical music printing. In his *Traité historique*, which is both a general account of developments in music printing and a bitter attack on the exclusive privilege enjoyed by the Ballard family, Fournier accused the Gandos, in terms very damaging to their reputation, of passing off as their own in 1764, music characters which he had published in 1756. The Gandos replied in support of Ballard and the printing establishment, highlighting errors in Fournier's historical account and accusing him of plagiarizing the methods devised for typographical music printing by Breitkopf (1754–5). They also described their own system. They cast clefs, bar-lines, minims, crotchets, detached quavers (and sub-divisions of the quaver) in one piece as complete characters, without fragments of staff attached. Beams to join the stems of tied quavers and the like were also cast as single pieces in various lengths so that the only junction required was between the stem of the note (a crotchet with its stem reduced if necessary) and the small connecting strokes cast on the beam at standard intervals. The staves were made up of continuous pieces of metal.

It was necessary to pass the sheet through the press twice for a complete impression: once to print the notes, clefs, key signatures, rests, bar-lines etc., and once to print the staves, words and other ancillary material. Under normal printing conditions it was difficult to align the notes and staves exactly, because of the fine adjustments that had to be made in the relative position of type material in the two separate formes. After damping, inking and being passed through the press to take an impression of the first forme there was a danger that the paper might lose its integrity while it was waiting to be

put through the press with the second forme. The Gandos claimed the invention of a press which avoided this: the two formes were worked in rapid succession and the paper was not moved from its original printing position between impressions. These two factors ensured that the size of the sheet did not vary.

In their *Observations* the Gandos offered a four-page setting of Psalm cl by the Abbé Roussier as a specimen of their types printed on their special press. Of much greater interest, they also showed specimens of six early music types from the stock-in-trade of the Ballard concern (see illustration).

H. EDMUND POOLE

Gandolfi, Michael (*b* Melrose, MA, 5 July 1956). American composer. At the age of eight he began to play the guitar, teaching himself to improvise in rock and jazz styles. Formal study in composition began in his early teens, and he went on to study with McKinley and Martino at the New England Conservatory and with Knussen at Tanglewood (1986). He worked with Davidovsky and Finney at the Composer's Conference and was an instructor at Harvard University before, in 1997, joining the composition faculty of the New England Conservatory. In 1998 he also began to teach part of the composition course at Tanglewood along with Osvaldo Golijov. Gandolfi's music is concerned with processes of transformation and becoming, exemplified by his earliest orchestral work, *Transfigurations* (1987), commissioned by Tanglewood. In *Points of Departure* (1988) such processes are applied with originality to musical gesture, explicitly recognizing the different implications a gesture may contain in a chain of radically contrasting transformations across separate movements. Working out relationships of shared material between movements or separate sections, as opposed to within a single movement, has become increasingly prevalent in his work.

STEVEN LEDBETTER

Ganer, Christopher (*fl* 1774–1809). German piano maker, active in England. He came to England from Leipzig, settling at 47 Broad Street, London, in 1774 and staying there until the end of 1809 (he also took on the neighbouring premises at no.48 in 1782). Letters of denization were granted to Ganer on 11 February 1792. He started getting in arrears with his rates from 1805 onwards, possibly an indication of financial difficulties.

Ganer mainly made square pianos. His earliest surviving square piano is marked 'Christopher Ganer Londini fecit 1775', and has a compass of nearly five octaves, from *G'* to *f'''*. This Latin inscription appears again on a 1778 square piano: until the mid-1780s he used either Latin or English inscriptions. Later models, such as the one at the Russell Cotes Museum in Bournemouth, have a striking Battersea enamel plaque bearing the inscription in capital letters.

In outward appearance Ganer's square pianos vary; some are more attractively inlaid than others. The earlier ones tend to be plain with a simple trestle stand whereas later models are Sheraton in style, with brass medallions covering the bolts in the tapered legs of the trestle. Musically, however, the instruments vary little: a compass of five octaves or slightly less, single action with overdampers, and two or three handstops raising the dampers and engaging a buff stop. The piano maker John Broadwood hired out Ganer's pianos. A descriptive catalogue of extant Ganer instruments is given in M.N. Clinkscale: *Makers of the Piano, 1700–1820* (Oxford, 1993).

MARGARET CRANMER

Ganga. (1) The most common name for the double-headed cylindrical snare drum used in the music of a number of West and North African cultures, including parts of Niger, Benin, Nigeria, Chad, Cameroon, Upper Volta, Libya, Algeria and Tunisia. The musical prominence of this kind of drum is largely a result of its use with the *kakaki* trumpet and the *algaita* oboe in Hausa ceremonial music, together with the spread of Hausa political influence from the beginning of the 19th century.

The term 'ganga' is applied generically by the Hausa to a number of double-headed cylindrical snare drums, the most common, in ascending order of size, being the *kurya*, a traditional infantry drum about 17 cm long and with a diameter of about 21 cm; the *gangar algaita*, used with the *algaita*, about 33 cm long and about 24 cm in diameter; the *gangar fada* or royal *ganga* (see illustration), used with the *kakàki*, about 45 cm long and with a diameter of about 33 cm; and the *gangar noma*, beaten for farmers, about 65 cm long and about 45 cm in diameter. Except for the *gangar noma*, which is occasionally laid on the ground, all these drums are suspended from the left shoulder and lie in a near-horizontal position under the performer's left arm. The drum has a wooden body with two goatskin heads lapped over leather hoops and laced together with leather thongs. A piece of cloth is sewn round the body under the lacing, the colour of the cloth indicating the emir to whom the instrument belongs.

Gangar fada (cylindrical drum) of the Hausa people

The snared skin on the *gangar algaita*, *gangar fada* and *gangar noma* is to the front while on the *kurya* it is to the rear. Apart from the *gangar noma*, which is normally beaten with two sticks, the drums are beaten with a curved stick with a flattened head, held in the right hand, and with the fingers of the left hand. Two techniques, or series of strokes, are used in beating the drum; in *hannun gaba* the left hand beats the front skin and in *hannun baya* or *taushi* the rear. Free or open strokes produced with the flat of the stick-head on the centre of the front skin are the lowest in pitch. Notes of medium, high and extra-high pitch are produced from muted or closed stick strokes: medium notes are made with the flat of the stick-head on the centre of the front skin; high with the edge of the stick-head on the centre of the front skin; and extra-high with the flat or the edge of the stick-head on the centre of the front skin together with pressure from the fingers of the left hand on the top edge of the rear skin. A rising pitch is produced by a free stroke with the flat of the stick-head on the centre of the front skin followed by pressure with the knuckle of the left-hand thumb on the centre of the rear skin.

Performance on the Hausa *ganga* is based primarily on the high and low speech-tones of an unverbalized text and secondarily on its long and short syllabic quantities. Such a text, in praise of the patron of a performance, is called a *take*. The use of strokes of low, medium, high and extra-high pitch to realize the low and high tones of the *take* also allows the musician, if he so wishes, to superimpose certain intonational features on its tonal patterns. A straightforward *take* is shown in KAKAKI, ex.1.

A drum of the name 'ganga' is used by many other peoples such as the Nupe, Gunga, Dakakari, Duka, Chawai, Jukun, Tigong, Yeskwa, Bolewa, Tangale, Burum, Ngizim, Tera, Bura, Bata, Zaberma and Kanuri in Nigeria, and in Niger by the Songhay, Djerma and Beri-beri, in Chad by the Salamat Arabs, the Mului, Kanembu and Barma peoples, and in southern Libya by the people of Fiwet, Ghat and Traghan. Other peoples using closely related terms for the instrument are: the nomadic Fulani (*gunguru*), in Nigeria the Janji, Kurama and Piti (*oganga*), Ankwe (*kangak*), Gurka (*gungak*), Kerikeri (*gonga*), Margi (*akangga*), Mumuye, Kam and Pero (*ganggang*), in Benin the Dendi (*gangan*) and the Taneka (*gangangu*), in Chad the Zaghawa (*ganggang*) and in Upper Volta the Mossi (*gangado*); in Libya in the Fezzan region and in Algeria in Batna the drum is known as *gaga*.

Usage varies according to the degree of social stratification: in highly stratified societies the *ganga* forms part of an ensemble of court musicians, usually with long trumpets or oboes; in others it is used mainly to accompany song and dance. In Nigeria court usage is exemplified among the Kanuri, where the *ganga kura* (big drum) is beaten only for the Shehu of Borno, and among the Nupe at Bida (where it is known locally as *enyabo*), Abuja, Bauchi and Wase. Elsewhere in Nigeria usage is more varied; the Gunga use two or three professional *ganga* players to accompany teams of wrestlers, the Burum play a large *ganga* in drumming for farmers, and the Bura have incorporated the *ganga* into their xylophone ensemble to accompany dancing, a practice common throughout the northern states, where drums of the *ganga* type but with local names are used: for example, *dang* and *Mbangak*.

In Benin the Taneka *gangangu* is played with side-blown horns and clapperless bell for masked dancing, and the Dendi *gangan* with hourglass drums in praise singing for a village chief. In Niger the Songhai *ganga* and the Djerma *ganga* at Dosso are similarly used for praise singing, and the Djerma, like the Beri-beri, use the drum with the *algaita*. In Upper Volta the Mossi *gangado* is used as part of a drum ensemble at the court of Tenkodogo to accompany praise singing and declamation of the history of the rulers.

In Chad the drum is played by professional musicians and is found particularly in the Kanem region. It has a wooden cylindrical body, 60 to 65 cm high and 30 to 35 cm in diameter, cowhide heads and leather lacing in a Y pattern. The upper head, which has two snares, is struck with a hooked stick with a flattened end; this provides the 'masculine' voice. The lower head is struck with the hands and has no snare but in its centre it has a baked disc made from brains, butter and charcoal; its sound is deeper and is the 'female' voice. Sometimes the *ganga* is used alone to convey signals but in a musical context it is always played with another drum, the *trembel*, and very often with the *algaita*. This ensemble also forms part of the orchestras of the sultans of the Kotoko.

The Zaghawa *ganggang* accompanies dancing during rites for a chief and is also used for special rites in case of drought. The Salamat Arabs and Barma are reported to use their *ganga* with other drums and end-blown flutes respectively to accompany dancing or to encourage canoeists, and the Kanembu and Mului with other drums and either long *gachi* trumpets or *algaita* oboes, or both, in the performance of praises and greetings for chiefs.

In Libya in central Fezzan the *ganga* drums are identical with those in Chad, except that sometimes the body is

metal, and in performance instead of using the *trembel* two *ganga* drums are paired, one being considered 'male' and the other 'female'. As in Chad these instruments are reserved for professional musicians who, in Fezzan, are usually of slave origin and from regions south of the Sahara. In the large oases in the extreme west of Libya (Ghat, Ghadames) the *ganga* has a comparatively flat body, 10 to 12 cm in height and 30 cm in diameter, although all other features are the same as in Chad. Playing is exclusively by professional musicians who in these oases are generally blacksmiths.

(2) Single-headed drum of the Sara people of southern Chad. It has a wooden body and its head is attached by wooden sticks driven into the body of the drum. The instrument is played upright and the head is struck with the hands.

ANTHONY KING/MONIQUE BRANDILY, K.A. GOURLAY

Gangar [rull]. A Norwegian folkdance in duple time. It may be notated in 2/4 or 6/8 time and is similar to the HALLING, by which name it is known in some districts. It is danced in couples. The *gangar* is known both in Hardanger fiddle districts and in areas where the violin is used as a folk instrument. The term *rull* is used in parts of the Hardanger fiddle areas of western Norway.

See also NORWAY, §II, 3.
For bibliography *see* HALLING.

NILS GRINDE

Gangsa (i). Flat bronze or brass gong of the Kalingga, Ibaloi, Karao, Tinggian and Bontoc peoples of the northern Philippines. Among the Ifugao they are called *gangha*, which refers to both the individual gong and an ensemble of three gongs, and among the Isneg, *hansa*. *Gangsa* have a diameter of approximately 30 cm and their perpendicular rims are about 5 cm high. They produce diffused sounds with or without a focussed pitch. The ways in which they are played increase their timbral variety; they may be played with the hands (slapping, tapping or sliding) and with a beater (hitting the upper or under side of the gong). Various resonating effects are achieved by suspending gongs freely from the left hand, swinging them in the air, resting them partly or fully on the ground, or laying them on the lap (*see* PHILIPPINES, fig.2; damping effects are produced with the wrist or forearm, or with pressure from the beater.

Gangsa are played in a variety of ceremonies: gong music is necessary for dancing, for honouring people of the community, for celebrations and for providing the proper ambience for ritual proceedings. Gongs are considered to be objects of great value and status: during ceremonies, to play the *gangsa* is an honour, for only prominent members of the community are invited to start the performance. *Gangsa* music itself is particularly popular among the Kalingga, and on occasions when *gangsa* playing is not permitted, its music is often played on other instruments.

See also PHILIPPINES, §II, 1(i)(b).

JOSÉ MACEDA

Gangsa (ii). A term used for metallophones in various Balinese ensembles (*see* GAMELAN, §I, 4(iv) and INDONESIA, §II, 1(ii)(d)). They are of two types: with bronze slabs resting on rattan, cork or rubber which in turn rests on a wooden trough resonator (e.g. *gangsa jongkok*); and with bevel-edged keys suspended by cord above tuned bamboo tubes arranged in a wooden frame (e.g. *gangsa gantung* or *gender*; see illustration). Both types are beaten with a wooden or horn hammer in the right hand (which is padded in the case of the lowest-pitched *gangsa gantung*, i.e. *jegogan*) or with a hammer in each hand in the case of the *gender wayang* ensemble. Each key is damped as the next key is struck. *Gangsa* are tuned in pairs, one pitched slightly higher than the other so that when the two instruments are struck simultaneously an acoustic beat is produced.

MARGARET J. KARTOMI

Gangsa (metallophone) of the gender type, played with wooden hammer, in a gamelan gong Kebyar, Bali, 1968

Gangsta [gangster] **rap.** A style of rap whose texts emphasize the violence of street life. In the mid-1970s hip hop had reacted against the prevailing gang violence of the time by deflecting the territorialism of New York's street gangs into a less destructive verbal rivalry. As the music began to assert its independence against pacifying influences from the music industry, rappers increasingly exploited the imagery of gang warfare in order to 'dis' (disrespect) other competing groups. Baltimore rapper Schooly D's *Gangster Boogie* (1984), Boogie Down Productions' *9mm Goes Bang* as well as Ice-T's *Colors*,

recorded for the 1987 film of the same title, were indications that lyrics based on territorial gang wars and shootings could become a sub-genre of hip hop. Ice-T's début album, *Rhyme Pays*, Too Short's *Born to Mack*, Eazy-E's *Eazy-Duz-It* and NWA's *Straight Outta Compton* established California as the home of this new approach. Dr Dre's 1992 solo album, *The Chronic*, produced after his departure from NWA, defined this style with slow, bass-heavy grooves based on samples from Isaac Hayes and George Clinton. Featured rapper Snoop Doggy Dogg became a major star in his own right but was soon embroiled in a shooting charge; similar problems affected other gangsta rap artists, including Da Lench Mob and Tupac Shakur. Art and life became indistinguishable as bitter rivalry between Los Angeles gangsta rap and New York hip hop climaxed with the fatal shootings of Shakur and the Notorious B.I.G.

DAVID TOOP

Gann, Kyle (*b* Dallas, 21 Nov 1955). American musicologist, composer and critic. He attended Oberlin Conservatory (BMus 1977) and Northwestern University (MMus 1981, DMus 1983), where he studied composition with Peter Gena, Morton Feldman and Ben Johnston. An early fascination with the music of Ives developed his interest in polyrhythmic music and led to study of the music of the Hopi, Zuni and Pueblo Indians, which in turn informed the rhythmic language of his own compositions (notably in Snake Dances, 1991–5). Further exploration of tempo structures came from his association with Nancarrow, about whom he wrote the first book (1995). Gann composed several canons extending Nancarrow's techniques. His interest in polytempos, Amerindian music and just intonation (his electronic works employ scales of up to 37 pitches per octave) came together in his electronic opera, *Custer and Sitting Bull* (1995–8).

In 1986, after writing for several Chicago papers, Gann became contemporary music critic for the *Village Voice*. As a musicologist and critic, he has championed an indigenous American classical tradition from Ives and Cowell to Partch, Cage and others. After teaching at Columbia University and Brooklyn College, Gann joined the faculty of Bard College (1997).

DON C. GILLESPIE

Ganne, (Gustave) Louis (*b* Buxières-les-Mines, 5 April 1862; *d* Paris, 14 July 1923). French composer and conductor. He was a pupil of Dubois and Franck at the Conservatoire, where he won a first prize in harmony and an organ prize. He made his début as a composer with a ballet-divertissement, *Les sources du Nil*, given in 1882 at the Folies Bergère (the first of several given there or at the Casino de Paris). His most important ballet is *Phryné*; he also composed several operettas, notably *Les saltimbanques* (Paris, 1899) and *Hans, le joueur de flûte* (Monte Carlo, 1906). Ganne conducted the orchestra for the balls at the Opéra, and was for many years musical director at the casino at Monte Carlo. He wrote more than 200 works, including songs, salon pieces and some excellent dance tunes such as the *Valse des blondes* and the mazurkas *La czarine* and *La tzigane*. He is chiefly known for two marches, the *Marche lorraine* (1887) and *Le père la victoire* (1888). His works, though intended for popular consumption, never became banal.

J.G. PROD'HOMME/ANDREW LAMB

Gänsbacher, Johann (Baptist Peter Joseph) (*b* Sterzing, South Tyrol [now Vipiteno, Italy], 8 May 1778; *d* Vienna, 13 July 1844). Austrian composer and conductor. He was the son of a choirmaster and teacher, Johann Gänsbacher (1751–1806), and as a boy sang in church choirs in Sterzing, Innsbruck, Hall and Bolzano; he also had lessons in piano, organ, violin, cello and thoroughbass. In 1795 he went to the university at Innsbruck and studied first philosophy, then law, supporting himself by giving music lessons, playing the organ, singing in church choirs and playing in the theatre orchestra. His first compositions date from this period. While at university he took part in four campaigns against Napoleon. In 1801 he went to Vienna to continue his musical studies, and was relieved of financial worries when Count Firmian, who further promoted his career as a musician, took him into his family as a son in about 1803. In Vienna he had lessons from the Abbé Vogler (1803–4) and from Albrechtsberger (1806). A Mass in C, composed through the offices of Vogler for Nikolaus Esterhazy in 1806, established his

reputation as a composer. Nevertheless, he returned to Vogler in Darmstadt for a short period in 1810, where his fellow-pupils and friends included Weber and Meyerbeer, who admitted him as a founder-member of the 'Harmonische Verein', for which he was active until 1813. In January 1813 he met Weber in Prague and recommended him for the post of Kapellmeister of the theatre. In the summer of the same year Gänsbacher returned to the Tyrol to join the fighting to liberate the province from the Bavarian occupation. After the end of the war he did not return to the Firmian family but joined the army as a first lieutenant (1814). He was stationed first in Italian garrisons, in Trient, Mantua and Padua then at Innsbruck in 1815, where he again tried to gain a foothold as a musician. He worked as a conductor and director of a church choir, and helped to found the Musikverein, though he did not gain the position of chief conductor. He did not accept the post of director of music in Dresden, offered him at the instigation of Weber in 1823, since (after representations against the election of Joseph Weigl), he was appointed Kapellmeister of the Stephansdom in Vienna as successor to Josef Preindl in September 1824. One of the choristers (who were also his pupils) was his nephew Anton Mitterwurzer (1818–76), later famous as an opera singer. From this time on Gänsbacher composed mainly church music, and only a few homage cantatas. By the time of his death he was one of the most famous musicians in Vienna.

Some of Gänsbacher's early instrumental compositions, such as the Clarinet Concertino and the sonatas in F major (1803) and G minor (1810), are remarkable for the individuality of their ideas and their unconventional structure, while his Italian canzonettas and terzetti are effective for their reticent simplicity. Yet the works he composed later for social performance clearly show a deterioration of quality. Even before his 20 years at the Stephansdom, sacred music was becoming central to his output. Starting with the masses in C and B (1806/8) and the Requiem (1812), he wrote some creditable and well-regarded works in this field. Although they do not stand out from the manner of their time, and show little stylistic innovation, they nonetheless show Gänsbacher's considerable skill as a composer.

His son Josef (*b* Vienna, 6 Oct 1829; *d* Vienna, 5 June 1911) studied the piano, the cello and singing, and went to university to read law, graduating in 1855. He practised law for a number of years, but concurrently gave piano and singing lessons, and in 1868 devoted himself entirely to teaching singing. From 1875 to 1904 he was a tutor at the conservatory of the Gesellschaft der Musikfreunde, becoming by the turn of the century the most highly-regarded singing teacher in Vienna. Some of his pupils achieved international recognition, including Maria Wilt, Milka Ternina, Leopold Demuth and Julius Liban. Brahms dedicated his cello sonata op.38 to him. He was a composer, chiefly of songs but also of piano and choral pieces, and was a co-editor of the Schubert complete edition.

WORKS

principal MS collections: A-Imf, Wn, Wgm, Innsbruck, Städtlisches Konservatorium; D-BSb, Mbs; GB-Lbl; I-MOe, Fc

printed works pubd in Vienna unless otherwise stated

SACRED CHORAL

for 4 voices, organ, orchestra, unless otherwise stated

Masses: op.32, B♭ (1825); op.41 'Jubilaei', C (1832); op.45, F (Augsburg, 1836); 28 unpubd (incl. 1 lost)

Requiem: op.15, E♭, 1811 (Prague, 1812), rev. 1826 (1826); op.38, d (1834); 5 unpubd

Offertories: Domine Deus, with B, op.33 (1810); Inclina Domine, with B, op.43, 1827 (1832/3); Diligam te Domine, op.44 (1834); many others unpubd

Graduals: Si ambulavero, op.42, 1825 (1832); In te Domine speravi (*c*1838); many others unpubd

Ecce sacerdos magnus, op.39 (1834); Te Deum, op.45 (1834); 6 vespers, 5 litanies, Marienlieder, motets: all unpubd

4vv, org: 2 Ave Maria, op.34 (1825–6); 2 Salve regina, op.35 (1825); Ave regina coelorum, Alma redemptoris mater, op.36 (1826–7); Regina coeli laetare, Ave Maria, op.37 (1830); Salve regina, Ave Maria, op.40 (1834)

SECULAR VOCAL

Des Dichters Geburtsfest (Liederspiel, F. Treitschke), 1810; Die Kreuzfahrer (incidental music, Kotzebue), 1811

*c*10 cants., chorus, orch; 3 cants., male chorus, pf/gui; 3 serenades, chorus, orch

3 terzetti, 2 S, T, op.1 (Berlin, 1809)

1v, pf/gui: 6 Lieder op.3 (Leipzig, 1809); Der sterbende Patriot (C. Schubart), *c*1809; Abendfantasie (L. Brachmann) (Bonn, *c*1810); An mein Clavier, 1809; Die Erwartung (Schiller), op.7 (Bonn, *c*1810); Wiedersehn (J. Kosegarten), op.4 (Leipzig, ?1810); Nachtgesang (Kosegarten) (Leipzig, *c*1814); Abendlied (C. Tiedge) (Innsbruck, 1817); 4 deutsche Lieder (Berlin, *c*1819)

INSTRUMENTAL

Orch: Sinfonie, D, 1807, ed. in *The Symphony 1720–1840*, ser. B, vi (New York, 1984); Concertino, cl solo, 1819; Tiroler Schützen-Freuden, with pipes, drums etc, 1824; marches, other military music

Chbr: Sonata, F, vn, vc, pf (Bureau d'Arts, 1803); Sonata, g, m, pf; Serenade, fl, vn, va, gui, op.12 (Bonn, 1810); Serenade, cl, vn, vc, gui, op.24 (Augsburg, 1818); Introduktion und Variationen, cl, hn, pf; pf trios; sonatas, vn, gui; sonatas, fl/vn, pf; other works for fl/vn, gui; vc, pf etc.

Pf 4 hands: divertimentos, sonatinas, marches (most unpubd)

Pf solo: numerous variation sets (most on opera themes), marches, ländler

WALTER SENN/JOACHIM VEIT

Gantez, Annibal (*b* Marseilles, *c*1600; *d* Auxerre, 1668). French ecclesiastic, composer and writer on music. An alphabetical list of places where Gantez served as *maître de chapelle* or *maître des enfants* shows the geographical diversity of his professional life (dates of known appointments are shown in brackets): Aigues-Mortes, Aix-en-Provence (15 April 1636–22 June 1638), Annecy, Arles (5 July 1638–31 March 1640), Aurillac, Auxerre (1643, awarded a partial prebend; there again on 1 November 1661), Avignon, Carpentras, Grenoble (29 March 1628–Easter 1629; there again 28 June–9 October 1656), La Châtre, Le Havre, Marseilles, Montauban, Nancy (in

1665 as *maître de chapelle* to Duke Charles IV of Lorraine), Nevers (on 26 January 1657), Paris (at St Innocent, St Jacques de l'Hôpital, St Paul), Rouen (on 21 June 1629), Toulon and Valence.

Although Gantez wrote a small amount of music, including two masses (both printed by Ballard about 1642), a *Te Deum* (1661, lost) and collections of court *airs* and *chansons à boire*, he is best known as a trenchant observer of the musical scene. His *L'entretien des musiciens* (Auxerre, 1643; ed. E. Thoinan, Paris 1878/*R*) is lively ('a musician is not esteemed if he is not a good drinker'), its social comment pointed ('it is shameful that in France there are only one or two printers ... whereas Spain, Italy and Flanders have almost as many printers as there are towns') and its value judgments direct and forceful ('the one whom I find [in Paris] the most "agréable" in his music is Veillot ... and the one whom I recognize as the most serious in his is Péchon ...'). *L'entretien* includes references to Aux-Cousteaux, Bertaut, Antoine Boësset, Bournonville, Bouzignac, Cosset, Du Caurroy, Du Cousu, Formé, Frémart, Gobert, De Gouy, Hotman, Intermet, Lambert, Etienne Moulinié, Mersenne, Métru, Péchon, Veillot, Vincent and Zarlino.

JAMES R. ANTHONY

Ganz. German family of musicians.

(1) **Adolf Ganz** (*b* Wiesbaden, 14 Oct 1795; *d* London, 11 Nov 1869). Violinist, conductor and composer. He studied harmony with Hollbusch. From 1821 to 1845 he was music director at the Stadttheater in Mainz (1819). He was made Kapellmeister to the Grand Duke of Hessen-Darmstadt in 1825 and ducal Hofkapellmeister in 1835. On 9 July 1840 he conducted the first British performance of Gluck's *Iphigénie en Tauride* at the Prince's Theatre, London. In 1846–7 he worked as a conductor in Nuremberg. In 1851 he settled in London, where for a time he was chorus master under Balfe at Her Majesty's Theatre. He composed overtures, marches, songs, male-voice choruses and a melodrama. His elder son Eduard (*b* Mainz, 29 April 1827; *d* Berlin, 26 Nov 1869) studied the piano with Moscheles and Thalberg in London, settled in Berlin and founded a music school there in 1862.

(2) **Moritz Ganz** (*b* Mainz, 13 Sept 1802; *d* Berlin, 22 Jan 1868). Cellist and composer, brother of (1) Adolf Ganz. He was the leading cellist in the Mainz Hofkapelle under his elder brother, then succeeded B.H. Romberg as leading cellist in the royal orchestra in Berlin in 1827. He visited Paris and London in 1833, then returned to London four years later to play at the Philharmonic Concerts (1 May 1837) with his younger brother Leopold (*b* Mainz, 28 Nov 1806; *d* Berlin, 15 June 1869), a violinist who frequently joined him in concerts and with whom he composed a number of virtuoso duets. He was the principal cellist at the Beethoven Festival in Bonn in 1845 and was noted for his full, mellow tone and brilliant execution.

(3) **Wilhelm Ganz** (*b* Mainz, 6 Nov 1833; *d* London, 12 Sept 1914). Organist, violinist and conductor, son of (1) Adolf Ganz. He was the most celebrated member of the family. He studied the piano and conducting with his father and Karl Anschütz, and made his first trip to England in 1848. He and his father went back to Mainz after the London season but they returned in 1851 to settle permanently in London. In 1856 Ganz was an accompanist on Jenny Lind's tour of England and Scotland, and for some years thereafter he accompanied many of the leading singers in London. He was also the organist at the German Lutheran church in the Strand.

Ganz joined Henry Wylde's New Philharmonic Society as second violinist in 1852. In 1874 he became joint conductor of the society (with Wylde) and in 1879, on Wylde's resignation, continued the concerts alone, first under the former name and after 1880 as 'Mr Ganz's Orchestral Concerts'. During his three seasons as conductor, Berlioz's *Symphonie fantastique* and Liszt's *Dante Symphony* were performed in their entirety for the first time in London, and a number of eminent artists, including Annette Essipov, Sophie Menter, Saint-Saëns and Pachmann, appeared as soloists. For many years Ganz was a professor of singing at the GSM, where a jubilee concert was given in his honour in 1898. His memoirs, *Memories of a Musician*, were published in London in 1913.

M.C. CARR/ROBERT PASCALL

Ganz, Rudolf [Rudolph] (*b* Zürich, 24 Feb 1877; *d* Chicago, 2 Aug 1972). Swiss pianist. Following early cello lessons with Friedrich Hegar, he studied the piano with Robert Freund in Zürich and subsequently with his great-uncle, Carl Eschmann-Dumur. He also took lessons in composition with Charles Blanchet at the Lausanne Conservatoire. In 1897–8 he continued his studies with F. Blumer in Strasbourg before going to Berlin to work with Busoni, in addition to studying composition with Heinrich Urban. In 1899 Ganz made his Berlin début with Beethoven's Fifth Concerto and Chopin's First, and the following year he conducted the Berlin PO in the first performance of his own First Symphony. Following the success of these performances Ganz undertook a major European tour and in 1901 went to the USA where, in 1906, he appeared in New York and Boston with Weingartner and Wilhelm Gericke. Between 1901 and 1905 he was head of the piano faculty of the Chicago Musical College. He toured extensively throughout the USA and Canada between 1905 and 1908, after which he returned to Europe, performing a wide repertory including works by Alkan, Ravel, Brahms, Grieg and Liszt. He was appointed director of the Chicago Musical College in 1929 and president five years later, continuing as both teacher and administrator until 1954.

From 1921 until 1927 Ganz was music director of the St Louis SO and between 1938 and 1949 he conducted a series of Young People's Concerts with the New York PO and in San Francisco. Although he retired from the Chicago College in 1954, he continued to teach. The dedication of Busoni's First Sonatina and Ravel's *Scarbo* to Ganz reflects his championship of modern music, and

he introduced many works by Bartók, d'Indy, Korngold, Loeffler and others to American audiences. He was also a persuasive exponent of the works of Macdowell. As a composer, Ganz's eclectic style reflected his own wide-ranging sympathies and understanding of the modern idiom, while acknowledging a clear indebtedness to the Romantic tradition. His compositions for the piano reveal in their bravura writing the virtuoso command of his own playing, particularly in the early *Konzertstück* and the E♭ Concerto. He also composed numerous songs to English, French and German texts (he was married to the American singer Mary Forrest), as well as in Swiss and Alsatian dialects.

CHARLES HOPKINS

Ganze-Note (Ger.). *See* SEMIBREVE (whole note); *Ganze-Taktnote* is also used. *See also* NOTE VALUES.

Gänzl, Kurt (Friedrich) [Gallas, Brian Roy] (*b* Wellington, New Zealand, 15 Feb 1946). New Zealand writer on musical theatre. He studied law and classics at Canterbury University, New Zealand, subsequently joining the New Zealand Opera company as a bass singer. After moving to London he became a casting director and then a theatrical agent in musical theatre; from 1990 he devoted himself to writing and broadcasting on this subject. His pioneering two-volume study *The British Musical Theatre* (London, 1986), won several awards: its thorough survey of performances has ensured its place as an essential reference work. His later *Encyclopedia of Musical Theatre* (Oxford, 1994) is ambitious in its scope, displaying both the breadth of Gänzl's interest and, through its selections and judgments, his characteristically personal view of the subject. His other books include *Gänzl's Book of the Musical Theatre* (with Andrew Lamb; London, 1988), a companion guide in the manner of Kobbé, *The Blackwell Guide to Musical Theatre on Record* (Oxford, 1990) and illustrated histories of musical theatre for a more popular market, such as *Song and Dance* (New York, 1995; London, 1995 as *Musicals*) and *The Musical: a Concise History* (Boston, 1997).

JOHN SNELSON

Ganzschluss (Ger.). *See* AUTHENTIC CADENCE.

Ganzton (Ger.). *See* TONE (i).

Gapped scale. A SCALE that contains at least one interval greater than a whole tone, for example the PENTATONIC scale.

Gaqi, Thoma (*b* Korça, 21 Aug 1948). Albanian composer. He studied the violin and theory in Korça with Kono and later in Tirana at the Jordan Misja Art Lyceum. He then studied with Zadeja (composition) and Ibrahimi (counterpoint and orchestration) at the Tirana Conservatory (1966–72), where he was appointed professor of harmony in 1972. After a period as artistic director of the Tirana Theatre of Opera and Ballet (1979–83), he returned to the Conservatory as professor of harmony and composition, becoming head of the composition department in 1988. In 1992 he moved to Korça to become director of the Tefta Tashko Koço music school. He returned to the Tirana Conservatory to teach composition in 1996. Like many Albanian composers after the fall of socialism, he almost stopped composing between 1991 and 1994.

Gaqi's orchestral works are among the most popular composed in Albania during the country's period of cultural isolation after 1973. They include *Shqipëria në feste* (1977), where thematic development gives way to the folk-like repetition of melodic formulas, and the Double Concerto (1979), which again uses folksong themes, while giving both solo instruments ample opportunity for virtuoso display. The second of his three symphonic dances has been compared to Ravel's *Boléro* in the way that obsessive repetitions of a single theme, with ever denser orchestration, culminate in a dramatic climax.

WORKS
(*selective list*)

Dramatic: Përballimi [Confrontation] (film score, dir. V. Ghika), 1976; Rapsodi koreografike [Choreographic Rhapsody] (A. Aliaj), 1983; Gjëzojmë, për ditët tona [Our Happy Days] (choreographic scene, (P. Agalliu), 1983; Maratonomak [The Marathon Runner], film score, 1985

Vocal-orch: Në luftën nacionalçlirimtare [In the War for National Liberation] (cant., S. Mato), mixed chorus, orch, 1974; Këndon zemra jonë [Our Heart Sings] (trad.), mixed chorus, orch, 1982; O, ditë e re [Oh, New Days] (G. Zheji), T, orch, *c*1987; 15 transcrs. of Byzantine liturgical chants, mixed chorus, str, 1992–6

GEORGE LEOTSAKOS

Garage. A form of 20th-century club dance music. As 'garage' rock, the term had earlier been used to denote movement primarily outside the commercial rock mainstream, predominantly in the USA and beginning in the 1960s, and with a philosophy somewhat akin to later INDIE MUSIC. It originated at the Paradise Garage nightclub in New York City, from where the genre takes its name. Like house music, it was derived from and shares many of disco's characteristics, with simple, rigid 4/4 rhythm tracks and pulsating basslines (often influenced by dub reggae). However, while disco used large orchestras to add texture to the music, garage is nearly all electronic. It is slower than house, with 115-20 beats per minute as opposed to 122-6, and, in contrast to the more rhythmic arrangements found in more generic house music, is smoother, more melodic and frequently contains a female soul vocal. Early garage records included D-Train's *You're the One for Me* and the Peech Boys' *Don't Make Me Wait* (both 1981). By the late 1990s, it found a new popularity in the UK as 'speed garage', sometimes inappropriately called 'underground garage', which increased the tempo to that of house, and became the dominating club sound for several years.

WILL FULFORD-JONES

Garant, (Albert Antonio) Serge (*b* Quebec, 22 Sept 1929; *d* Sherbrooke, PQ, 1 Nov 1986). Canadian composer.

Largely self-taught, he left school in 1945 to devote himself full-time to studying music. He began learning the saxophone on his own, studied the clarinet with Marcel Marcotte, the piano with Sylvio Lacharité and theory with Paul-Marcel Robidoux. He continued his training with Yvonne Hubert (piano) and Claude Champagne (composition). In 1950 he won first prize for the clarinet at the Congrés de fanfares de Granby. This success propelled him to the Juilliard School, where he studied with Richard Franco Goldman among others. In 1951 his *Musique pour sax alto et fanfare* and *Adagio et Allegro pour piano et harmonie* won the composition prize at the Youth Festival. Later that year he went to Paris where he studied counterpoint with Andrée Vaurabourg-Honegger and attended Messiaen's analysis classes. During this period he met both Boulez and Stockhausen and discovered the works of Schoenberg, Berg and Webern for the first time. His cycle of five mélodies, *Concerts sur terre*, reflects these experiences.

Upon his return to Canada, Garant pursued a career in Montreal, where he earned a living until 1966 as an accompanist, arranger and conductor for radio and television broadcasts. He wrote a number of articles, sometimes polemical in character, promoting the work of contemporary composers, and organized contemporary music concerts with François Morel and Gilles Tremblay. His *Caprices* and *Musique rituelle* (both 1954) were performed on 1 May 1954 at the first of these concerts. Other works on the programme included compositions by Messiaen, Webern and Boulez, with whom, in the following months, Garant entered into regular correspondence. One year later he organized a concert 'In memoriam Webern', for which he composed *Nucléogame* (1955), the first Canadian work for instruments and tape. His entirely serial work *Asymétrie* (1958) was performed a short time later by Musique de Notre Temps, a group founded by the composer with Jeanne Landry and Otto Joachim. In August 1961 the producer and composer Pierre Mercure organized an international week of contemporary music which included a performance of Garant's *Anerca* (1961), a major work based on Inuit texts that integrates aleatory processes into a primarily melodic compositional conception.

In 1966 Garant joined the faculty at Montreal University as a professor of analysis and composition. The same year he was appointed to the post of artistic director for the newly created Société de Musique Contemporaine du Québec, an institution that flourished under his administration. From 1969 he also presented the CBC radio series 'Musique de notre siècle' for Radio Canada. The compositional cycles *Offrandes* and *Circuits*, both based on the theme of J.S. Bach's *Das musikalische Opfer*, were composed between 1969 and 1973. In these works, Garant creates networks of mathematical relationships that link the serialized pitch structure with the organization of other parameters (duration, dynamics, density, timbre). *... chant d'amours* (1975), composed after a trip to Italy in 1973–4, is one of Garant's most significant compositions, signalling a return both to lyricism and to a fascination with musical colour. *Quintette* (1978) and *Plages* (1981) were his last works.

Garant's many awards and achievements include the Etrog Prize for the film score *Vertiges* (1969), the medal of the Canadian Council of Music (1971), the Harold Moon Prize of the Canadian Performing Rights Society for his significant contribution to the promotion of Canadian music abroad (1978), the Calixa-Lavallée Prize of the Société Saint-Jean-Baptiste de Montréal (1980) and the Jule Léger Prize for chamber music (1980). The Serge Garant Prize, created by the Emile Nelligan Foundation, is awarded every three years. Garant leaves the memory of a generous and deeply committed man, an outstanding teacher, an exacting conductor and a tireless promoter of contemporary music.

MARIE-THÉRÈSE LEFEBVRE

Garat, (Dominique) Pierre (Jean) (*b* Bordeaux, 26 April 1762; *d* Paris, 1 March 1823). French tenor and baritone. He studied with Franz Beck at Bordeaux, but developed his technique chiefly by imitating the best Italian singers of the day after moving to Paris in 1782. At his father's instigation he studied law in Paris but discontinued when his voice became in demand at the French court. He performed frequently at Versailles, and to maintain his leadership of Paris fashion, sinecures were arranged for him; Marie-Antoinette twice paid his debts. As he found it politically expedient to leave Paris during the Terror, he and the violinist Rode, with whom he frequently gave

concerts, went to Rouen, where he was imprisoned for nine months – time he spent composing. On his release, he travelled to Hamburg, Holland, Belgium, Spain and London, returning to France in 1794. Although he was obliged to sing professionally after the Revolution he never adopted a stage career. From 1795 he appeared at the Concerts Feydeau and after 1800 at the Concerts de la rue de Cléry. Later he performed mainly at private salons; he lost his voice while in his 50s. He assisted at the Conservatoire from 1796 and taught full time from 1799 to 1823. His teaching emphasized interpretation and expression rather than vocal training; his pupils included Mme Branchu, Nourrit *père*, Ponchard and Levasseur.

Garat's voice was soft and sweet rather than powerful, but his three-octave range enabled him to sing arias for tenor, bass and even female voices. Renowned for his powers of expression and mastery of all styles, he was considered the supreme interpreter of Gluck, to whose music he refused to apply the brilliant ornamentation he customarily employed. For aesthetic reasons he attempted to suppress the sound 'r' in French speech. Scudo considered him the first French singer to combine French insistence on verbal clarity and expressiveness with fluent Italianate vocalization; in this respect he may be considered to have prepared the way for Rossini's reform of French singing. He composed (probably with outside assistance) about 40 *romances* in a conventional style.

PHILIP ROBINSON

Garaudé, Alexis(-Adélaide-Gabriel) de (*b* Nancy, 21 March 1779; *d* Paris, 23 March 1852). French composer and singing teacher. He studied composition with Cambini and Reicha and singing with Garat and Crescentini in Paris. In 1808 he took up a post at the imperial chapel of the Tuileries, where he remained during the Restoration until 1830. In 1816 he was appointed singing teacher at the Paris Conservatoire, a post he held until his retirement in 1841. As a composer, he is known mainly for his songs, about one third of which were published in the *Journal d'Euterpe* from 1813 to 1827; he also wrote a few pieces of piano and chamber music and an unperformed opera, *La lyre enchantée*.

One of the most famous French singing teachers, Garaudé published a large number of didactic works, including solfèges, vocalization exercises and singing tutors. He also published some of his ideas on singing in the *Revue musicale*, and contributed to the music journal *Les tablettes de Polymnie*, which he edited from 1810 to 1811. Extending the usual debate between French and Italian schools of singing, he suggested combining their respective advantages in his *Méthode de chant* (1809). One of the most important composers of French song in the early 19th century, Garaudé wished that, in his vocal works, 'the accompaniments were richer in harmony than was customary in this genre of composition'.

His most famous pupil, Clotilde Colombelle, who sang under the name of Mlle Coreldi, enjoyed a brief and brilliant career on stage in Milan and Naples. She bore him a son, Alexis-Albert-Gauthier de Garaudé (1821–54) who was also a composer and who distinguished himself chiefly by his piano reductions of orchestral scores.

JEAN MONGRÉDIEN/GUY GOSSELIN

Garau Femenia, Francisco. *See* GUERAU, FRANCISCO.

Garay, Luis de (*b* Villa de Veteta, province of Cuenca, 6 Nov 1613; *d* Granada, 1673). Spanish composer. He was choirmaster of the cathedrals at Guadix, Toledo (1644) and Granada (1645). He also competed for the post of choirmaster of Málaga Cathedral in 1642 but was beaten by Pérez Roldán. When, however, it was offered to him in 1655 and 1666, he chose to remain in his post at Granada. He composed many sacred works, which survive in manuscripts in the libraries of Málaga Cathedral and Zaragoza Cathedral.

GUY BOURLIGUEUX

Garay, Narciso (*b* Panama, 12 June 1876; *d* Panama, 27 March 1953). Panamanian ethnomusicologist and composer. He received his musical training at the Instituto Nacional, Cartagena, at the Brussels Conservatory, and in Paris with Marsick and at the Schola Cantorum; he was a pupil of Fauré in 1902–3. On his return to Panama he directed the new Escuela Nacional de Música from 1904 to 1918. During these years he made several collecting trips among indigenous tribes, the results of which were published in *Tradiciones y cantares de Panama* (Panama and Brussels, 1930). This study, written in diary format, recounts his visits and includes numerous musical transcriptions (mostly taken by ear), linguistic discussions and photographs of instruments. Garay also wrote shorter essays on Panamanian folklore. He later

became active in the diplomatic service and was at one time Minister of Foreign Affairs.

JOHN M. SCHECHTER

Garbarek, Jan (*b* Mysen, 4 March 1947). Norwegian jazz soprano and tenor saxophonist. He was influenced at an early age by the music of John Coltrane and in 1965 came to the attention of Krzysztof Komeda and George Russell; the following year he appeared at festivals in Warsaw, where he made his first recording, and Prague. Later he performed and recorded with the sextet and big band of Russell, with whom he also studied music. In the late 1960s he formed a quartet with Terje Rypdal that often performed with Russell, and from 1973 he led a trio. He toured Europe and the USA as a member of Keith Jarrett's quartet in 1977, then formed a group with Eberhard Weber, the guitarist David Torn and the drummer Michael Di Pasqua that performed in Warsaw in 1982 and later toured Europe, the USA, Japan and Norway. In 1994, after nearly reaching the top of the classical charts with his recording *Officium* (1993, ECM), on which, with the Hilliard Ensemble, he interpreted works by Morales, Perotinus, Du Fay and La Rue, Garbarek made a tour of the USA. He has composed most of the music that he has recorded, and he has also written works for the theatre, television and films. Among post-Coltrane saxophonists he has an important approach, combining elements of free jazz, jazz-rock, folk music and the music of the European avant garde.

RANDI HULTIN

Garbi, Giovanni Francesco (*b* ?Florence; *d* Rome, after 30 June 1719). Italian organist and composer. A priest, he was organist of the Cappella Giulia at S Pietro, Rome, on and off from 1691 to 30 June 1719. He was a member of the Congregazione di S Cecilia from 1677 and in 1698 was *guardiano degli organisti* there. In the same year he was also *maestro di cappella* of the nearby S Maria dell'Anima church. He wrote four oratorios: *David penitente*, *David trionfante*, *Il trionfo del celeste amore nel pentimento di Davide* and *Virtutum triumphus*.

ANGELA LEPORE

Gärbig, Johann Anton. *See* GÖRBIG, JOHANN ANTON.

Garbin, Edoardo (*b* Pauda, 12 March 1865; *d* Brescia, 12 April 1943). Italian tenor. His teachers in Milan were Alberto Selva and Vittorio Orefice. In 1891 he made his début at Vicenza in *La forza del destino*, appearing at La Scala two years later as Fenton in the world première of *Falstaff*. He subsequently married his Nannetta, Adelina Stehle, with whom he then appeared for many years, principally in the Puccini operas. His other important première was that of Leoncavallo's *Zazà* in 1900, also at La Scala, where he remained until 1918. His European successes were not repeated in London where he met with a critical press in 1908. His records show a voice that often bewilders the ear, sometimes ringing, sometimes white in tone, and mixing some rather forced singing with passages of considerable delicacy. (*GV*, R. Celletti and R. Vegeto)

J.B. STEANE

Garbousova, Raya (*b* Tbilisi, 25 Sept 1906; *d* de Kalb, IL, 28 Jan 1997). American cellist of Russian (Georgian) birth. She studied at the Tbilisi Conservatory (1914–23), and made her début in Moscow in 1923. Later she was coached by Casals and Alexanian; she was also greatly influenced by the playing of Emanuel Feuermann. Leaving Russia in 1925, she made her Berlin début in 1926 and appeared in Paris (1927) and London (1928). She was heard in New York in 1935 and settled in the USA in 1939, and appeared as soloist with most major orchestras in Europe and America. She also played with the Vermeer Quartet and with Rostropovitch. Among the works written for her are the Cello Concertos by Samuel Barber (1946) and Vittorio Rieti (1956), and the *Rapsodia notturna* by Karol Rathaus (1950). She also introduced works by Creston, Hindemith, Lopatnikoff, Martinů and Prokofiev, most of which she edited for publication. In addition to her concerts and recordings she gave master-classes at Aspen, Colorado, at the Cleveland Institute of Music, and at Indiana University. She was professor of the cello at the Hartt School of Music, 1970–79, and professor of the cello at Northern Illinois University, 1979–91. Her playing was distinguished by charm, outgoing temperament, beautiful tone and elegant technique, which won her wide acclaim among the cellists of her day. She played a cello by Guadagnini of 1743, formerly owned by Nikolay Graudan.

BORIS SCHWARZ/MARGARET CAMPBELL

García. Family of Spanish, later French and English, musicians. For over a century they made an impact on the history of opera and of singing in their various countries of residence. The original family name of García was always spelt in the manner of the country of residence.

(1) Manuel (del Pópulo Vicente Rodríguez) García (i) (*b* Seville, 21 Jan 1775; *d* Paris, 10 June 1832). Composer, tenor, director and singing teacher. He was baptized Manuel del Pópulo Vicente Rodríguez in the church of S María Magdalena on 23 January 1775, the son of a shoemaker, Gerónimo Rodríguez Torrentera (1743–1817), and Mariana Aguilar (1747–1821). The name 'del Pópulo' comes from the Augustinian convent (S María del Pópulo) near the family's home. García seems to have lived a stable family life with his parents, maternal

grandmother and sisters Maria and Rita until he was at least 14, when his name disappears from the parish censuses of S María Magdalena. After musical studies in Seville with Antonio Ripa and Juan Almarcha, García made his début in Cádiz, where he married the singer Manuela Morales in 1797. The next year the couple joined Francisco Ramos's company in Madrid. García's début with the company, in a *tonadilla*, took place on 16 May 1798 in the Teatro de los Caños del Peral. The premières of his own *tonadillas*, *El majo y la maja* and *La declaración*, followed in December 1798 and July 1799. After a fight with the military guard at the Teatro del Príncipe, for which he was briefly imprisoned early in October 1799, García left Madrid. In 1800–01 he was in Málaga, where he achieved considerable success as a composer and singer. In a letter to the Marquis of Astorga dated 29 November 1800 he expressed an interest in returning to Madrid to promote the cause of Spanish opera. The king's permission was solicited by Astorga in March 1801. García returned to Madrid as first tenor and sang the role of the Count in the Madrid première of Mozart's *Le nozze di Figaro* on 20 May 1802. From this time until 1807 he dedicated himself to a rigorous schedule of singing, directing and composing. Among García's operettas, *Quien porfía mucho alcanza* and *El criado fingido* became extremely popular. The latter continued to be performed up to 1832; Julien Tiersot argued that it was the famous *polo* from this work, 'Cuerpo bueno, alma divina', which inspired the entr'acte to the final act of Bizet's *Carmen*.

While in Madrid, García also sang in oratorios and concerts at the Caños del Peral and composed and directed incidental music for plays. Of note are the choruses with orchestra he composed for performances of Racine's *Athalie*and *Esther* during Lent 1804. On 28 April 1805 he sang in his monologue opera *El poeta calculista* for the first time. It was a tremendous success: the aria 'Yo que soy contrabandista' gained enduring popularity throughout Europe, and both of his daughters later interpolated it in the lesson scene of *Il barbiere di Siviglia*. In 1836 Liszt composed a *Rondeau fantastique* based on the aria, which in turn inspired a dramatic work, *Le contrebandier*, by George Sand.

In 1806 García was named supernumerary composer of the Teatro del Príncipe in Madrid. Political problems in the administration, however, led to his decision to seek his fortune outside Spain. His last operetta composed there, *Los ripios de maestro Adán*, was given its première on 18 January 1807. At the beginning of April he departed from Madrid, leaving behind his wife and two daughters, and after passing through Valladolid, Burgos, Vitoria, Bayonne and Bordeaux, he settled in Paris with the singer Joaquina Briones, who became his second wife. He made his début at the Théâtre de l'Odéon in Paer's *Griselda* on 11 February 1808. The following year, on 15 March, he presented *El poeta calculista* to the Parisian public with great success.

In 1811 García travelled to Italy; he sang at Turin before making his début at the Teatro S Carlo in Naples on 6 January 1812 in Marcos Portugal's *Oro non compra amore*. At this time he began formal vocal training (for the first time in his life) with the tenor, Giovanni Ansani. García's *Il califfo di Bagdad* and *Tella e Dallaton, o sia La donzella di Raab* were performed in Naples in 1813 and 1814 respectively, and it was there in 1815 that he created the role of Norfolk in Rossini's *Elisabetta, regina d'Inghilterra*. In 1816 in Rome he sang Almaviva in the première of *Il barbiere di Siviglia* under its original title *Almaviva, ossia L'inutile precauzione*.

Towards the end of 1816 García and his wife returned to Paris to sing at the Théâtre Italien. Paolino in *Il matrimonio segreto*was the role of García's *rentrée* on 16 October. *Il califfo di Bagdad* had its Paris première on 22 May 1817 at the Théâtre Italien. It was performed regularly until García and his wife left the company after a contretemps with the director, Mme Catalani, purportedly resulting from García's receiving more applause than she in a single performance of Portugal's *La morte di Semiramide* on 20 September 1817. He turned to the Opéra-Comique, where his first French opera, *Le prince d'occasion*, was performed on 13 December 1817. In 1818 he travelled to London, appearing at the King's Theatre with great success in *Otello* and *Il barbiere di Siviglia*.

Now in his vocal prime, García returned to Paris the next year and became a sensation in roles such as Almaviva, Otello and Don Giovanni (see illustration). At the same time he composed prolifically and his operas were given at the Opéra-Comique, the Théâtre Italien and the Gymnase-Dramatique, as well as the Académie Royale. Most notable was *La mort du Tasse* (Opéra, 7 February 1821). While finding fault with the libretto, critics praised the music, in particular the duet 'O moment plein d'attraits!'. Towards the end of 1822 García founded a musical society in Paris, the Cercle de la rue Richelieu, for which he was censured by the opera management.

Manuel García (i) in the title role of Mozart's 'Don Giovanni', Théâtre Italien, Paris: lithograph by Godefroy Engelmann I, c1821

Offended, in March 1823 he left Paris for a final season in London. In 1824 he opened a singing academy in Dover Street and published his *Exercises and Method for Singing*. The following October he embarked for New York with his wife and children, Manuel, Maria (later MARIA MALIBRAN) and Pauline (PAULINE VIARDOT). There he directed the first performances of opera in Italian in the USA. As well as Rossini's operas (*Otello*, *Barbiere*, *Cenerentola*, *Tancredi*, *Il turco in Italia*) and his own (*L'amante astuto*, *La figlia dell'aria*), García, at the urging of Lorenzo da Ponte, presented Mozart's *Don Giovanni*. From New York he went in 1827 to Mexico City where he was received with great enthusiasm. After a debate on language which raged for months in the Mexican press, García obligingly translated Rossini's and his own operas into Spanish. *El amante astuto* was chosen for the anniversary celebration on 5 October 1828 of the nation's constitution of 1824.

García had planned to remain in Mexico, but political events (following upon the decree of expulsion of all Spaniards in December 1827) forced him to leave. In December 1828, en route from Mexico City to Veracruz, García (in a convoy of 500 Spaniards) was robbed of all his New World earnings by the escort that had been provided by the Mexican government. He sailed for France on 22 January and made his reappearance as Almaviva on 24 September 1829. Despite the warm reception from the public, critics noted that his voice was but a shadow of what it had been. García was not even able to finish his final performance of *Don Giovanni* on 23 December 1829. Undaunted, he dedicated himself fully to teaching, for which he was extraordinarily gifted. Among his most successful students, apart from his children, were the tenor Adolphe Nourrit, the Countess (María de las Mercedes Santa Cruz y Montsalvo) Merlin, Henriette Méric-Lalande and Josefa Ruiz-García (his daughter by his first wife). Never ceasing to compose, in 1830 García published a delightful collection of Spanish songs dedicated to his 'aficionados'. He continued to perform, and his tremendous energy 'in spite of his white hair' was noted in the *Revue musicale* of March 1831. His last appearance, in August 1831, was in a *buffo* role in a student performance of Count Beramendi's *Le vendemie di Xeres*. His death certificate shows that he died on 10 June the following year (not 2 or 9 June, as stated by Fétis and Richard respectively). He was buried in Père Lachaise cemetery. In his funeral oration Fétis honoured García above all as a composer, remarking that his best works remained unpublished. Among his numerous compositions, of greatest interest are those in a Spanish style where he successfully fused Andalusian and bel canto elements. An important collection of his songs has been published (C. Alonso, ed.: *Manuel García: Canciones y caprichos líricos*, Madrid, 1994).

Throughout García's career critics commented above all on the remarkable flexibility of his voice. He was also praised for his musicianship, skilful acting and gift of invention. This last led to reproofs for his tendency towards crowd-pleasing ornamentation. His voice was, according to Fétis, a deep tenor, enabling him to take the title role of *Don Giovanni* which, according to Fétis, he sang with a 'Herculean force'. His expert delivery of recitative, as well as the Andalusian fire of his stage presence, made him ideally suited to dramatic roles such as that of Otello and Don Giovanni. García's dynamic perfectionism left its impact on three continents and his legacy, in the hands of his children, was carried into the 20th century.

(2) Manuel (Patricio Rodríguez) Garcia (ii) (*b* Madrid, 17 March 1805; *d* London, 1 July 1906). Baritone and singing teacher, son of (1) Manuel García. He studied singing with his father and harmony with Zingarelli at Naples in 1814; later he continued with his father in Paris, where he also studied harmony with Fétis. He sang in his father's New York season in 1825 but decided not to pursue an operatic career after an unsuccessful Paris début as Figaro on 7 October 1828. He did, however, continue to sing in amateur performances with his father's students. After a few months of military service in Algiers in 1830 he carried out administrative work in military hospitals in France, where he studied the physiological aspects of the voice. His *Mémoire sur la voix humaine*, presented to the Académie des Sciences (Paris, 1841), was the foundation of all subsequent investigations into the voice, and his invention of the laryngoscope (1855) brought him world fame. His *Traité complet de l'art du chant* (1840–47) remained a standard work for many years. He was a professor at the Paris Conservatoire (1847–50), and at the RAM, London (1848–95); he spent the latter half of his life in England. His school of singing, a perfection of his father's methods, produced remarkable results. His pupils included Jenny Lind, Hans Hermann Nissen, Erminia Frezzolini, Julius Stockhausen, Mathilde Marchesi, Charles Bataille and Charles Santley. His first wife was Eugénie Mayer (*b* Paris, 1815; *d* Paris, 12 Aug 1880), an operatic soprano (active 1836–58) and singing teacher.

(3) Gustave Garcia (*b* Milan, 1 Feb 1837; *d* Paris, 15 June 1925). Baritone and singing teacher, son of (2) Manuel Garcia. He studied with his father, and followed a theatrical career in England and Italy from 1862 to 1880. He settled in London in 1874 and for some years had an operatic school in Berners Street; he also taught at the RAM (1880–90), the RCM (1883–1925) and the GSM (1883–1910), and published three pedagogical works: *The Actors' Art* (London, 1882), *The Singing Teacher's Notebook* (London, 1910) and *A Guide to Solo Singing* (London, 1914). He married the Italian soprano L. Martorelli; their son (Angelo) Albert(o) Garcia (*b* London, 5 Jan 1875; *d* London, 10 Aug 1946), a baritone, was a pupil of his great-aunt, Pauline Viardot. He sang in England, France and Germany, and taught at the RCM and GSM, London. He married the soprano Florence Storm Taylor.

JAMES RADOMSKI (1),
APRIL FITZLYON/JAMES RADOMSKI (2 and 3)

García (Arancibia), Fernando (*b* Santiago, 4 July 1930). Chilean composer. He studied composition with Orrego-Salas, Botto, Allende-Blin and Becerra-Schmidt; he also studied musicology. Until September 1973 he held teaching, technical and managerial posts at the University of Chile's Institute of Further Musical Education. As a consequence of the coup d'état that year he was obliged to leave Chile, settling first in Peru and (from 1979) in Cuba. Towards the end of 1989 he returned to Chile and the arts faculty of the University of Chile, where he is a professor and sub-editor of the *Revista musical chilena* and continues his work as a composer, scholar and educator.

García has introduced to the concert hall a social and political genre called the 'Latin-american musical epic', characterized by the expressive force of the music, richness of tone and solid compositional skill. In almost all his works he avoids reference to the traditional tonal system, and in the early works he adopts 12-note serialism which in his later works is freely combined with aleatory procedures. Also characteristic is the varied and elaborate repertory of timbres, especially in his orchestral works, where he gives free rein to his lucid and dramatic imagination.

RODRIGO TORRES

Garcia, José Maurício Nunes (*b* Rio de Janeiro, 22 Sept 1767; *d* Rio de Janeiro, 18 April 1830). Brazilian composer. He was the most important composer of his time in Brazil, where he is generally referred to as José Maurício.

1. LIFE. He was the son of a modest lieutenant, Apolinário Nunes Garcia, and a black woman, Victoria Maria da Cruz. There is no evidence that he studied music at the Fazenda Santa Cruz, established by the Jesuits outside Rio de Janeiro, as has often been reported. It seems that he had some training in solfège under a local teacher, Salvador José, and he did receive formal instruction in philosophy, languages, rhetoric and theology. In 1784 he participated in the foundation of the Brotherhood of St Cecilia, one of the most important professional musical organizations of the time, and he officially entered the Brotherhood São Pedro dos Clérigos in 1791. He was ordained priest on 3 March 1792: the fact that he was a mulatto does not seem to have interfered in the process of his ordination. Many of his contemporaries praised his intellectual, artistic and priestly qualities.

On 2 July 1798 Garcia was appointed *mestre de capela* of Rio de Janeiro Cathedral, the most significant musical position in the city. The appointment required him to act as organist, conductor, composer and music teacher; and he also had the responsibility of appointing musicians. Before that date he had begun a music course open to the public free of charge. He maintained this activity for 28 years, teaching some of the best-known musicians of the time, including Francisco Manuel da Silva. By the arrival of Prince (later King) Dom João VI and the Portuguese court in 1808, Garcia's fame was well established in the colony; he had by then composed several works, including graduals, hymns, antiphons and masses. Following the tradition of the Bragança royal house, Dom João was a patron of music; and Garcia's talents were immediately recognized. In 1808 he was appointed *mestre de capela* of the royal chapel, for which he wrote 39 works during 1809 alone. The prince's appreciation was marked by the bestowal of the Order of Christ. Soon the composer became fashionable and famous in noble salons for his skills in improvisation at the keyboard. The Austrian composer Sigismund Neukomm (1778–1858), a former pupil of Haydn who lived in Rio from 1816 to 1821, referred to Garcia as 'the first improviser in the world'.

But after the arrival in 1811 of Marcos Portugal, the most famous Portuguese composer of his time, Garcia's position and production tended to decline. His humility and benevolence kept him from counteracting Portugal's intrigues. His activities as composer and conductor

concentrated henceforth on the city's brotherhoods, although his position at the royal chapel was nominally maintained. In about 1816 his health began to decline, considerably reducing his working capacity. Yet on 19 December 1819 he conducted the première in Brazil of Mozart's Requiem, an event reported by Neukomm in the *Allgemeine musikalische Zeitung*. The return of Dom João and part of the court to Portugal in 1821 had the effect of reducing the importance of the city's musical life. Although Emperor Pedro I was himself a musician, the years following independence (1822) were not favourable for artistic development. Financial difficulties and precarious health undermined Garcia's last nine years, and he died in extreme poverty.

2. WORKS. According to de Mattos, some 237 of Garcia's works (including secular and instrumental works) are extant. The oldest manuscript dates from 1783 (the antiphon *Tota pulchra es*) and the last work (*Missa de Santa Cecília*) from 1826. His most productive period ranges from about 1795 to 1811. Some 11 works attributed to the composer are of doubtful authorship, mainly on stylistic grounds. At least 171 undiscovered works are known to have existed through written references or previous catalogues compiled in the late 19th century. Among these is an opera *Le due gemelle*, known to have been produced at the Teatro Régio in 1809 in observance of Queen Maria I's birthday.

Garcia's production, mostly of sacred music, has been divided into two distinct periods, but with little justification. Throughout his life, he wrote major works in a well-defined style, but concurrently produced music of lesser quality. The years 1810–11, however, showed a change in stylistic orientation, probably resulting from the new performance possibilities arising from the presence in Rio of the royal court, and from the influence of Marcos Portugal. The latter dictated the stylistic trend of Portuguese music, which continued at that time under the influence of the old Neapolitan school. Influences from Italian opera permeate Garcia's mass settings and other works after about 1810. The *Missa de N Sra da Conceição* (1810) contains the clearest evidence of the transformation of style that affected the sacred music of the colony at that time. Rossinian bel canto style appears in the solo sections (da capo arias) of this mass, and there are also concertante passages. The *Missa pastoril para a noite de Natal* (1811) recalls the mass settings of Cherubini. This mass calls for nine solo singers and four-part (SATB) chorus, accompanied by an orchestra without violins; the elaboration of the viola parts indicates the presence of accomplished viola players in Rio at that time. (A rather low-pitched orchestral accompaniment reappears in subsequent works.) The opening of the Gloria illustrates the prevalence of operatic models, not only in the three-bar introduction for clarinets but also in the initial unison choral phrase (ex.1). The arias are highly ornamented and virtuoso; the original manuscript indicates that the soprano parts were intended for castratos, brought over with the royal court.

The choral treatment of the early works is generally more refined than that of later ones in which operatic choral numbers have a tendency to prevail. The simpler, clearer means of the pre-1808 pieces seem to respond to a desire for devotional expression. Almost all of the early motets, graduals and pieces for Holy Week, among others, reveal this intention in different degrees. An example is

Ex.1

Allegro spiritoso

cl

org

unison chorus

Glo-ri-a in ex-cel - cis in ex - [celsis]

the *Crux fidelis* (Person de Mattos, 205), whose expression is enhanced by chromaticism in a prevailing homophonic texture (ex.2). But most of Garcia's sacred works are for four-part chorus with orchestral accompaniment. Until about 1800 he frequently had to restrict his orchestra to strings and a few wind instruments (in general two flutes and two horns), but after about 1808 he typically included double woodwind, two trumpets and sometimes a trombone. In later works the clarinet becomes the leading woodwind instrument. The influences of the Classical Viennese style are found along with the continuation of Baroque practices. It is known that a splendid music library was at his disposal, with the best European works of the time, so it is not surprising that he had a perfect knowledge of contemporary European musical practices.

The masses form the backbone of Garcia's output; of some 32 settings known to have been written, 19 survive, excluding the requiem settings and Holy Week services. Only seven of the extant masses include the five sections of the Ordinary, and seven of the remaining ones are limited to the Kyrie and the Gloria. In spite of their diversity, the masses present some general characteristics. The Credo is generally short, while the Kyrie and the Gloria are of large proportions. Garcia showed obvious

fi - - de - - lis Crux

preferences in the distribution of solo parts, in the character assigned to the various movements, and in the use of homophonic or imitative texture in specific sections. For example, the 'Christe eleison' is often treated as a fugue or a fugato-like section, the 'Laudamus' generally appears as a soprano solo or duet and the 'Cum Sancto Spiritu' is often divided into two contrasting sections, a short and slow one followed by a fugal one on the same text or on 'Amen'. The settings written after 1808 present fugato passages or real fugues more frequently. Not all the elements of fugal procedure are present; de Mattos drew attention to the rather narrow modulatory scope of the various expositions, and to the frequent presence in the first subject exposition of a contrapuntal line which does not function as counter-subject. In addition, Garcia rarely used the stretto and seldom followed the conventional practices of fugue writing.

Among the several funeral service settings, the Requiem Mass of 1816 is considered one of the composer's best works. Indeed it is one of the most successful masses ever written in the Americas. Apparently commissioned by Dom João for the exequies of Queen Maria I, the mass presents the noble and grandiose character of court funeral music of the time, although it is not devoid of religious eloquence. It is scored for four-part chorus and soloists, with strings, two clarinets, two horns, 'flutes, trumpets and kettledrums ad libitum', as described in the autograph. The work presents a great deal of thematic repetition, suggesting that it had to be composed in a short period, although the Dies Irae is quite elaborate and given unusual proportions. This requiem and the *Missa de Santa Cecilia* confirm Garcia's position as the most distinguished Brazilian composer up to his time.

GERARD BÉHAGUE

García, Juan Francisco ['Don Pancho'] (*b* Santiago de los Caballeros, 16 June 1892; *d* Santo Domingo, 18 Nov 1974). Dominican composer. He studied solfège and the cornet at the Academy of Music in Santiago with José Ovidio García, though he was self-taught in the cello, the piano and composition. He gained a reputation for his high range and technical proficiency as a cornettist and trumpeter in his early career; later he became the principal cellist of the National SO (founded 1941). He conducted symphonic ensembles and municipal bands including those of Puerto Plata (1927–9) and Santiago (1941–4). He was also active as a teacher.

By 1912, García had begun to draw inspiration and material from national sources in his compositions. His early works include the first published *merengue*, considered the national dance genre, *Ecos del Cibao* (1918). His first and second string quartets were based on folk motifs; the latter formed the basis of the *Sinfonía Quisqueya* (1935). Named after the indigenous Taíno name for Hispaniola, this is his best-known work, and was the first and perhaps the most influential Dominican nationalist symphonic work. Later compositions, not based on folk material, include the symphonic fantasy *Simastral* (1947), inspired by theosophy, and the Fantasía concertante (1949), a Romantic work for piano and orchestra. In the late 1940s and 50s García returned to composition based on folk motifs, reworking earlier pieces; he also experimented with dodecaphonic music. Among his national awards, he was made an officer of the Order of Duarte, Sánchez and Mella. His writings include *Panorama de la musica dominicana* (San Francisco, 1947).

WORKS

MARTHA ELLEN DAVIS

García, Maria-Felicia. *See* MALIBRAN, MARIA.

García, Pauline. *See* VIARDOT, PAULINE.

García Abril, Antón (*b* Teruel, 19 May 1933). Spanish composer. He studied music in Valencia with Pedro Sosa, Manuel Palau and Enrique Gomá, and (from 1953) at the Madrid Conservatory with Julio Gómez and Francisco Calés. He later studied composition with Frazzi, conducting with Paul van Kempen and film music with Lavagnino at the Accademia Chigiana in Siena. In 1964 he studied with Petrassi in Rome. At the Madrid Conservatory he taught solfège and music theory (1957–69) and composition and musical forms (from 1974). His works have won many awards, including those for the best film scores for *La fiel infantería* (1960) and *No busques los tres pies* (1968), the National Theatre Prize for the musical comedy *Un millón de rosas* (1971) and the Segovia prize for *Evocaciones* (1981). In 1983 he became a member of the San Fernando Academy of Fine Arts.

The intensity of his efforts as a composer has borne fruit in a variety of areas: instrumental music for orchestra, chamber ensembles, vocal genres and an important corpus of music for films and television. His aesthetics are connected to the more conservative trends in the current

musical scene, with traits, particularly his emphasis on melody, that relate his work directly to Spanish and Italian traditions. However, García Abril has been able to combine in his compositions the Mediterranean spirit of his origins with the enlarged evolutionary sense that one can see in his mature works. He has transformed his expressive language into something more than moderation, with a judicious combination of technique and expression. His work as an educator, teaching generations of young musicians, also stands out.

WORKS
(*selective list*)

Stage: Don Juan (ballet, A. Mañas), 1965; Un millón de rosas (musical comedy, J. Solelo), solo vv, chorus, pic, eng hn, sax, perc, gui, pf, otr, 1971; Danzas y tronío (ballet), 1984; Doña Francisquita (ballet), 1985 [orch. version of zarzuela by A. Vives]; Divinas palabras (op., F. Nieva), 1991, Madrid, Real, 18 Oct 1997; Pórtico de España y América (cant. andaluza, ballet), 1992

Vocal with orch: 3 canciones españolas (F. García Lorca), S, ens, 1962; Cantico delle creature (St Francis of Assisi), S, Mez, Bar, B, mixed chorus, orch, 1964; 12 canciones (R. MARTA CURESES

García de Basurto, Juan (*b* Calahorra diocese, *c*1490; *d* ?Oct 1547). Spanish composer. Despite assertions to the contrary, he never served Cardinal Ximénez de Cisneros. On 15 April 1517 the cathedral chapter at Tarazona, recognizing his superior singing ability, hired him at an annual salary of 1200 sueldos, increased on 14 May 1518 to 1600 sueldos (100 gold florins). He left the cathedral shortly before 1 March 1521, presumably to accept the post of *maestro de capilla* at Nuestra Señora del Pilar, Zaragoza. However, on 28 September 1521 he was named *cantor, maestro del coro* and master of the boy singers at Palencia Cathedral, a post he held until 22 August 1524. After 1531 he may have sung in the chapel of Isabella, consort of the Holy Roman Emperor Charles V (Charles I of Spain). On 15 October 1539 he was appointed *maestro de capilla* to Cardinal Juan Tavera at a munificent annual salary of 50,000 maravedís. He remained in this post until 26 September 1543 when he was transferred to the newly formed chapel of Prince Philip, in whose service he remained until his death.

His Easter motet *Angelus Domini locutus est*, which is extant in two intabulations for vihuela, is clearly tonal, and makes effective use of contrast between duos and trios in upper and lower voice. Basurto's chief extant work is the four-voice *Missa in agendis mortuorum* which is copied in *E-TZ* 5 and probably dates from after 1525. Only the introit, Kyrie and gradual are assuredly by Basurto. The interpolated tract for two high voices is the 'Sicut cervus' from Ockeghem's Requiem copied in *I-Rvat* Chigi C.VIII.234, while the communion is from Antoine Brumel's *Missa pro defunctis* (see Russell).

WORKS

2 motets intabulated for vihuela in 1552[35], 1 also in 1576[8]; 1 Requiem, 2 motets, 4vv, *E-TZ*; Magnificat [1 page only], *Tc*; 2 motets, 4vv, formerly in *Mmc*

ROBERT STEVENSON

García Demestres, Albert (*b* Barcelona, 16 May 1960). Catalan composer. He qualified in piano and voice at the Barcelona Conservatory, and his later teachers included Berio. Having initially dedicated himself to poetry, he turned to composition after meeting Soler, from whom he gained a sense of the transcendental nature of the composer's craft and the attraction for Berg which is evident in some of his early works. His music is full of references to the music of the past (especially to opera), skilfully interwoven and leaving ample room for humour.

WORKS

ANGEL MEDINA

García de Salazar, Juan (*b* Tuesta, Alava, bap. 12 Feb 1639; *d* Zamora, 8 July 1710). Spanish composer. He was a choirboy at Burgos Cathedral, where he studied composition with the *maestro de capilla* Francisco Ruiz Samaniego. In November 1661 he was appointed *maestro de capilla* at the collegiate church in Toro, and in May 1663 he was elected to a similar post at El Burgo de Osma Cathedral. From 1668 until his death he was *maestro de capilla* at Zamora Cathedral.

Only a few of his numerous settings of Spanish texts, and of his compositions in modern style, are extant, but several *a cappella* works survive. These date from his Zamora years, but he sent copies of several of them to the cathedral chapters of El Burgo de Osma and Burgos in token of his gratitude to them. They consist of masses,

hymns, motets etc., all in the *stile antico* and yet full of expression and often quite modern in idiom. They show him to have been a skilful contrapuntist.

JOSÉ LÓPEZ-CALO

García de Zéspedes [Céspedes], **Juan** (*b* ?Puebla, 1619; *d* Puebla, 5 Aug 1678). Mexican singer, viol player and composer. He was appointed as a soprano at Puebla Cathedral on 16 August 1630, with an initial stipend of 50 pesos to cover the cost of choir robes; in January the following year the cathedral chapter offered him the annual salary of 80 pesos, and in 1632 it was almost doubled to 150 pesos. In the ensuing decades the chapter experienced economic problems, and García's salary began to diminish in 1651, although his prestige within the cathedral hierarchy was ascending. The Capitular Acts of 19 June 1654 assigned him the tasks 'of teaching plainchant, polyphony, and viols to the young choirboys that are sopranos and to the other cantors who are worthy of instruction, and that he give lessons every day at the Church'. Robert Stevenson has pointed out that this job description is slightly unorthodox, for under normal circumstances the *maestro de capilla* (in this case Juan Gutiérrez de Padilla) would have assumed these tasks; however, in 1658 and 1660 Padilla was formally urged to respect his teaching obligations, but to no avail, so the work fell to the younger García. In the August following Padilla's death (April 1664) García was appointed interim *maestro de capilla* with a pay increase of 150 pesos on top of his salary as a singer; the post became permanent in 1670. In July 1672 the chapter expressed displeasure that he was neglecting the teaching of plainchant and polyphony to two choirboys, and in the same year he was instructed to bring back 'the viols, music paper, and books that belong to this Church' that he had been borrowing. He was chastised again in 1676 for sloughing off and not recruiting with the vigour that the chapter expected, and he was also found to be emphasizing instrumentalists at the expense of singers. Late in life his health declined and he became paralysed.

His surviving compositions reveal him as a composer adept at several styles. He was capable of handling rigorous counterpoint, as is amply demonstrated by his seven-voice *Salve regina*. He captured the spirit of the Mexican villancicos in his vivacious *Convidando está la noche*, which opens with an introductory *juguete* (vocal prelude) in majestic, four-voice homophonic chords, and proceeds with a *guaracha* for two voices, opening with 'Ay que me abrazo ¡ay!'. The piece is driven forward by a hypnotic rhythmic hemiola coupled with inexorable loops of I–IV–V harmonies. It exhibits the defining characteristics of the *guajira* that was later to become popular in Cuba.

CRAIG H. RUSSELL

García Fajer, Francisco Javier [Garzia, Francesco Saverio; 'Lo Spagnoletto'] (*b* Nalda, La Rioja, 2 Dec 1730; *d* Zaragoza, 9 April 1809). Spanish composer. He was trained as a cathedral choirboy in Zaragoza and then went to Naples, where he allegedly studied at the Conservatorio della Pietà dei Turchini. At least from April 1752 he was *maestro di cappella* at Terni Cathedral, where he engaged several Neapolitan singers. In 1752 he composed the oratorio *Il Tobia* and two years later *La Susanna*, both for the Oratorio dei Filippini in Rome and dedicated to Cardinal Gian Francesco Albani; *Il Tobia* was performed again in Rome as late as 1773. Between 1754 and 1756 García Fajer composed three comic pieces and an *opera seria*, *Pompeo Magno*, for Roman theatres. *La pupilla* was later performed at Mannheim and Vienna in 1763; *La finta schiava* was also given in Bologna (1756) and Bonn (1767).

García Fajer was appointed *maestro de capilla* at La Seo Cathedral in Zaragoza on 20 March 1756, replacing José Lanuza. He remained in Zaragoza until his death, refusing an offer to become *maestro de capilla* at Santiago de Compostela in 1769. In the same year he complained of ill-health, and eventually in 1784 his duties were reduced to the training of the choirboys.

García Fajer's long tenure at Zaragoza coincided with the growing suppression of the Spanish devotional villancicos and cantatas traditionally sung at Matins at Christmas and Epiphany in place of the Latin responsories. (This did not apply to the arias known as *villancicos al Santismo*, sung during Mass, which García Fajer regularly composed in the Italian operatic style.) By 1775 villancicos were regularly replaced by liturgical responsories at both the Pilar and La Seo cathedrals in Zaragoza; García Fajer composed his first dated set in 1773. From 1761 he composed an oratorio each year to celebrate the local feast of St Dominic del Val, patron saint of choirboys. In the 1790s he actively promoted his compositions as 'reformed' and tried to influence practice at the main Spanish cathedrals. He openly criticized some of the music performed at La Seo as 'arrebatada e impía' in 1793, and he presented a new set of masses to the chapter the following year. He later sent responsories to several other cathedrals.

Although the exact significance of García Fajer's 'reformed' compositions and their relation to the enlightened political changes in Spain during the second half of the 18th century has still to be assessed, it is clear that he exerted a crucial influence on Spanish church music through the extraordinary dissemination of his works in the Hispanic world; copies survive in Lima (the Archivo Arzobispal), Mexico City (the cathedral and Instituto Nacional de Antropología e Historia) and Santiago (the cathedral and Biblioteca Nacional). He also had an impact through his pupils, who included his assistant Baltasar Juste, Mariano Rodríguez de Ledesma and Ramón Félix Cuéllar y Altarriba.

JUAN JOSÉ CARRERAS (text, bibliography), RAÚL FRAILE (work-list)

García Gutiérrez, Antonio (*b* Chiclana, nr Cádiz, 5 Oct 1813; *d* Madrid, 26 June 1884). Spanish playwright. He gave up medicine to devote himself to poetry and the theatre, but spent most of his later life in government service (including a spell in London). From 1872 to 1884 he was director of the Museo Arqueológico in Madrid. He was an enthusiastic admirer of the French Romantic theatre in its more extravagant manifestations, which he developed to excess in his own work. His output covered a wide range of genres, including zarzuelas, but his musical reputation rests on the use of his plays for librettos. *El trovador* (1836), his first triumphant success, was used first by Francisco Porcell (1842, Pamplona; libretto by A. Porcell), then by Francesco Cortesi (1852, Trieste; libretto by A. Lanari) and finally by Verdi (1853, Rome; libretto by Cammarano). *Simón Bocanegra* (1843) was also used by Verdi (1857, Venice; libretto by F.M. Piave); in 1857 Verdi expressed interest in *El tesorero del rey* by García Gutiérrez and Asquerino (though the project came to nothing), and again, in 1870, he sent for a copy of *La venganza catalana*.

JOHN BLACK

García Leoz, Jesús. *See* LEOZ, JESÚS GARCÍA.

García Lorca, Federico (*b* Fuente Vaqueros, nr Granada, 5 June 1898; *d* Víznar, nr Granada, ?19 Aug 1936). Spanish poet and dramatist. His fascination with Spanish folklore and Gypsy flamenco music coloured much of his poetry. He is reported to have hummed tunes before he learnt to talk, and his early training was musical: soon after 1909, in Granada, he studied the piano with Antonio Segura and then with Francisco Benítez. From 1914 he studied at Granada and from 1920 at Madrid University, reading law, philosophy and letters. Between 1919 and 1928 he lived at the Residencia de Estudiantes in Madrid where he met, among others, Buñuel, Dalí, Turina, Sainz de la Maza and the musicologists Martínez Torner and Salazar. He first met Falla in Granada in 1919, wrote penetratingly about his music (see the editions of Gallego Morell and Eisenberg) and collaborated with him on several occasions, notably in 1922 when they organized a celebrated concourse of *cante jondo*, in 1923 when they performed plays and a puppet show in the Lorcas' home, and in the same year when they put on a '*fiesta* for children' (see Pahissa, Laffranque and Río). In 1931 he was appointed director of La Barraca, a student travelling theatre, for which he himself wrote incidental music. In the early days of the Civil War he was shot, apparently by supporters of Franco, for his left-wing sympathies.

Although Torner and Trend said that Lorca made his own collections of Spanish folksongs, he also drew on other cancioneros, especially the Renaissance songbooks of Barbieri and Pedrell and modern ones by Olmeda, Ledesma, Torner and Schindler. Something of a latterday minstrel, he refused to write down his arrangements of songs, but he did make a recording of a judicious selection sung by La Argentinita accompanied by himself at the piano, and these pieces were subsequently transcribed anonymously and published by the Hispanic Institute in New York (see Río).

A large number of musical works have been based on García Lorca's writings. His play *Amor de don Perlimplín con Belisa en su jardín*(1931) inspired operas by Vittorio Rieti (1949), Fortner (1962) and Coria (1992), a radio opera by Maderna (1962) and a ballet, *Il mantello rosso*(1954), by Nono. Fortner (1957), J.J. Castro (1943), Szokolay (1964) and LeFanu (1992) wrote stage works on the drama *Bodas de sangre* (1933), and its flamenco treatment by the Spanish dancer Antonio Gades was successfully filmed by Carlos Saura (1981). Among George Crumb's many settings of his texts are four books of madrigals (1964–9) and *Ancient Voices of Children* (1970). Other composers who have written pieces based on or inspired by García Lorca's works include Shostakovich (in his 14th Symphony), David Macbride and

Simon Holt. Several works commemorated García Lorca's death, including Poulenc's Sonata for violin and clarinet (1942–3) and Nono's *Epitaffio per Federico García Lorca* (1952–3).

JACK SAGE/ALVARO ZALDÍVAR

García Mansilla, Eduardo (*b* Washington, DC, 7 March 1871; *d* Paris, 9 May 1930). Argentine composer. Son of an Argentine ambassador, he spent most of his life abroad, studying music in France, in Vienna with Carl Fuchs and in St Petersburg with Rimsky-Korsakov. He also received advice from Massenet and Saint-Saëns in Paris. As a diplomat, his interest in music remained amateur. However, his technique and artistry was equal to that of professional composers from Argentina of the time. He helped in particular to develop the song genre, setting contemporary French poetry in the main, but also Italian and Spanish, including texts by his brother Daniel and himself. He also composed sacred vocal works to French and Latin. Much of García Mansilla's music was played in fashionable European salons and published in Paris. He composed orchestral music, choral-symphonic works and two operas. *Ivan* (1901), based on a traditional Ukrainian legend with a French libretto by the composer, was first performed in St Petersburg and dedicated to Tsar Nicholas II. The opera was subsequently staged in Milan, Rome (the title role taken by Schipa) and Buenos Aires. *La angelical Manuelita* (1915), by contrast, is set in Argentina to a Spanish libretto; as the country's first nationalistic opera, it retains a historical significance.

WORKS

Ops: Ivan (1 act and 3 tableaux, García Mansilla), 1901, staged St Petersburg; La angelical Manuelita (2, García Mansilla), 1915, Buenos Aires, Colón, 5 Aug 1917
Other works: Chant pour le temps de Noël, 4 solo vv, orch, 1892; Oraison dominicale (Lord's Prayer), 1v, pf, vc (Buenos Aires, 1893); Chant hivernal, orch prelude, *c*1900
4 symphonic works; 1 work, solo vv, chorus, orch; 66 songs, 1v, pf; 17 sacred songs with inst acc.; 3 vocal duets; 12 pf works; chbr works

JUAN MARÍA VENIARD

García Matos, Manuel (*b* Plasencia, 4 Jan 1912; *d* Madrid, 26 Aug 1974). Spanish collector of and writer on folk music. He studied the violin, flute, piano and composition with Joaquín Sánchez, the *maestro de capilla* of Plasencia Cathedral. By the time he was 18 he had founded a choir in his home town, the Masa Coral Placentina, which he conducted; subsequently he reorganized the choir into smaller groups, the Coros Extremeños, better suited to performing his own versions of the increasing number of Extremaduran folksongs he collected. In 1941 he was appointed assistant lecturer in folklore at the Madrid Conservatory and then professor (provisionally 1951, confirmed 1958). He was commissioned by the Instituto Español de Musicología from the year of its inception (1944) to do research on folksong and was the initiator of the first International Congress of Folklore to be held in Spain (Palma, 1952). He was a member of the UNESCO international committee on music and of the executive of the International Folk Music Council.

García Matos estimated that between 1942 and 1967 he notated or recorded over 10,000 songs, tunes and dances from virtually every region of Spain, of which 800 were published in the *Cancionero popular de la provincia de Madrid* (1951–60) and some appeared as records under the auspices of UNESCO entitled *Antología del folklore musical de España* (Madrid, 1960–71). His scholarly reputation as an authority on Spanish folk, traditional and popular music in the line of Pedrell and Torner was established with his articles on 'Cante flamenco' (1950) and 'Folklore en Falla' (1953). In 1955 he accepted a commission from the Sección Femenina Falangist Movement to devise a system for notating the choreography of traditional Spanish dances, a system which bore fruit in the *Danzas populares de España* (1957–71), and in 1964 he began an inventory of Spanish folk-music themes for the Sociedad General de Autores de España. The bulk of his collection, unedited, is owned by the Instituto Español de Musicología, Barcelona, the Hispavox Record Company, and his trustees.

JACK SAGE

García Morillo, Roberto (*b* Buenos Aires, 22 Jan 1911). Argentine composer and music critic. He studied at the Buenos Aires National Conservatory with Ugarte (harmony), Gil (counterpoint), Gaito (orchestration) and André (composition), later taking lessons in Paris with Nat. In 1952 a grant from the Dante Alighieri Society enabled him to travel to Italy where he studied the development of the lyric theatre. He was appointed music critic of *La nación* of Buenos Aires in 1938 and has contributed to Argentine and North American periodicals. In 1942 he joined both the national and the municipal conservatories in Buenos Aires as a composition professor. A prolific and diverse composer, he has developed an individual, non-nationalist style. There are occasional hints of the archaic in his work, and nearly all of it shows the influence of Spanish culture – its harshness, seriousness and introversion. This feeling for Spain appeared first in *Las pinturas negras de Goya* for six instruments (1939), a work that also shows his predilection for basing compositions on pictorial or literary works; it received the Buenos Aires municipal prize in 1939. One of his finest stage pieces is the mime drama *Usher*, which was first choreographed by Massine and which received the Buenos Aires municipal music prize of 1942. In later years García Morillo came to take an interest in new compositional developments. In addition to his newspaper and magazine criticism he has written several books: *Musorgsky* (1943); *Rimsky-Korsakov* (1945); *Estudios sobre la danza* (in collaboration with Dora Kriner, 1948), *Siete músicos europeos* (1949), *Carlos Chávez, vida y obra* (1960), and *Estudios sobre música argentina* (1984).

WORKS
(selective list)

Dramatic: Usher (mime drama, after E.A. Poe), 1940–41; Harrild (ballet, after H. Jacques), 1941; Moriana (cant. coreográfica, after Sp. romance), 1957–8, Colón, 1958; Tungasuka (incid music, B.C. Feijoo), 1963; film scores
Choral: Marín (cant.), T, chorus, orch, 1948–50; El tamarit (chbr cant., F. García Lorca), 1953
Orch: Berseker, 1933; 3 pinturas de Paul Klee, 1944; 3 syms., 1946–8, 1954–5, 1961; Variaciones olímpicas, 1958; 3 pinturas de Piet Mondrian, 1960; Ciclo sobre Dante Alighieri, 1970; Dionysos, 1971
Chbr: Qt, cl, vn, vc, pf, 1935–7; Las pinturas negras de Goya, fl, cl, bn, pf, vn, vc, 1939; Str Qt no.1, 1950–51; Divertimento sobre tema de Paul Klee, wind qnt, 1967, orchd 1970
Pf: 5 sonatas, 12 other works

SUSANA SALGADO

García Pacheco, Fabián (*b* Escalonilla, Toledo, *c*1725; *d* Madrid, *c*1808). Spanish composer. He was admitted as a *seise* on 23 July 1735 in Toledo Cathedral where he studied with Casellas. In 1756 he was *maestro de capilla* of Soledad church in Madrid and in 1770 at Victoria convent. After making a reputation as a composer of *sainetes*, *tonadillas* and incidental stage music he was commissioned to write the music for Ramón de la Cruz's two-act zarzuela *En casa de nadie no se meta nadie o el Buen marido*, staged at the Teatro del Príncipe in Madrid on 28 September 1770 (music in *E-Mm*). No religious music by any of his Iberian contemporaries circulated more widely in Spain and Spanish America; important collections of his orchestral villancicos and of Latin music survive at the Archivo nacional in Sucre (Bolivia; formerly at Sucre Cathedral), at the Archivo Arzobispal in Lima and in Spanish libraries (including *E-Ac*, *CU*, *E*, *LPA*, *Mn*, *PAL*). Two of his villancicos have been published in *Antología musical colonial americana*, ed. W.A. Roldán (Buenos Aires, 1986). He prized nothing so much as vigour and cheerfulness, even going beyond Haydn by heading a *Crucifixus* 'allegro brillante'.

ROBERT STEVENSON

García Robles, José (*b* Olot, 28 July 1835; *d* Barcelona, 28 Jan 1910). Spanish composer. He studied music (with Francisco Vidal) and art at Reus, Vich and later Barcelona. He was appointed professor of drawing at the Colegio Valdemia in Mataró, and it was there that his first compositions, short overtures and sacred vocal works, were performed by the school choir and orchestra. Resigning his professorship, he went to Barcelona, where he devoted the rest of his life to composition and teaching. He was one of the founders of Barcelona's celebrated choral group, the Orfeó Català, for which he composed many works based on popular Catalan songs; his most popular work of this genre was *La bandera catalana*. He also composed two operas, *Julio César* (1880) and *Garraf* (performed posthumously), and a Requiem which was performed at his funeral.

WORKS
many in MSS at E-Boc

THEATRICAL

Julio César (op, 3), Barcelona, 1880
Garraf (op, 4), Barcelona, 1917
Operettas: El ángel de Puigcerdá; Las coronas; El Olimpo de Narbona; Charles IV

VOCAL

ANTONIO IGLESIAS

Garcin [Salomon], **Jules Auguste** (*b* Bourges, 11 July 1830; *d* Paris, 10 Oct 1896). French violinist and conductor. His maternal grandfather, Joseph Garcin, was director of a travelling company playing *opéra comique* in the central and southern provinces of France. Having entered the Paris Conservatoire in adolescence, Garcin took the *premier prix* for violin in 1853, and entered the Opéra orchestra in 1856. He became solo violinist, then third conductor in 1871 and finally chief conductor in 1885. His long and successful teaching career at the Conservatoire began in 1875.

Garcin's association with the Société des Concerts du Conservatoire began in 1860, again as orchestral and then as solo violinist. In 1885 he was elected principal conductor of the Conservatoire concerts. In this post he actively promoted German choral and symphonic masterpieces, from Bach's B minor Mass (in 1891) to works of Brahms and Wagner (Brahms's music was then the object of much adverse criticism in Paris). Franck's Symphony was first performed under Garcin at the Conservatoire on 17 February 1889. Three years later he relinquished the post because of bad health, but continued teaching. Garcin was a founder-member of the Société Nationale de Musique in 1871. He wrote some music (including a violin concerto and viola concertino), a certain amount of which was published by Lemoine (some now in *US-Bp*).

DAVID CHARLTON

Gardano [Gardane]. Italian family of music printers. They were active in Venice.

(1) Antonio [Antoine] **Gardano** (*b* southern France, 1509; *d* Venice, 28 Oct 1569). Printer and publisher. Called 'musico francese' in Venetian documents, he was probably from the region around Gardanne in southern France, an area that included the diocese of Fréjus, episcopal see of Gardano's first patron, Bishop Leone Orsini. Gardano's printer's mark, a lion and a bear facing each other, was inspired by the *leone* and *orso* of his patron's name. Until 1555 he used the French spelling 'Gardane' in his imprints; afterwards he and his sons adopted the Italian form. Gardano probably moved to Venice in the late 1530s, becoming a member of the city's intellectual and artistic circles, and may have conducted a music school before opening his printing house and bookshop on the calle de la Scimia in 1538. He was a friend of Pietro Aretino's secretary, Nicolò Franco, and published his letters and a dialogue before Franco fell into Aretino's bad graces and left the city. These were the only non-musical works Gardano printed.

Of his nearly 450 music books, more than half are devoted to madrigals. But since many of these were new editions of previous publications, the actual size of the repertory is much smaller than it might at first appear. Motets make up the next largest category, with about 70 editions and far fewer reprints than in the secular output. Gardano published about 40 books of *canzone villanesche* and villottas, 28 editions of lute and keyboard music, 26 of French chansons and still fewer of masses, *Magnificat* settings, psalms and other sacred genres. Four composers – Arcadelt, Willaert, Rore and Lassus – figure especially prominently in Gardano's list; editions devoted chiefly to their works make up a quarter of his total output. Others whose works appear often in his publications are Ruffo, Nasco, Morales, Verdelot, Costanzo Festa, Jacquet of Mantua, Janequin, Wert and Gombert, in descending order of frequency.

Many of Gardano's music books were specially commissioned by composers for a patron who underwrote the publication costs, or who had previously given the composer financial support. In other cases, composers apparently hoped to gain future favour from a dedicatee. Most such composers were minor ones or at the early stages of their careers, but there are a few exceptions. Corteccia's madrigal collections all contain dedications to Cosimo de' Medici, and Jacquet de Berchem dedicated his madrigal book of 1546 to his patron. In both cases, the composers expressed in their prefaces the need to present correctly edited and attributed versions of their music.

Gardano sometimes signed dedications himself. These suggest that either the dedicatee had made a financial contribution towards the publication, or Gardano was indebted to him in some way; most of these books were devoted to the music of a single composer. At the outset of his career, Gardano wrote dedications even in Arcadelt's madrigal books and in motet books containing music of known popularity. But once his financial position was more secure, such prefaces were used mainly for editions of music by lesser-known composers, those whose commercial appeal Gardano might have doubted. By contrast, editions without obvious signs of private patronage are those that were deemed commercially viable on the basis of their composers' fame or contents' popularity. Examples include most of the publications devoted to the music of Verdelot, Willaert and Rore, and the *note nere* madrigal books of the mid-1540s.

Competition for repertory, especially in the early years of Gardano's career, is suggested by his celebrated quarrel with the Ferrarese printer Buglhat. The dispute is reflected in Buglhat's use of satirical title-page woodcuts for his *Mottetti della scimia*, of a monkey (representing Gardano's address on the calle della Scimia) eating fruit (Gardano's *Mottetti del frutto*) and, in a later *frutto* volume, Gardano's use of a woodcut showing his lion and bear attacking Buglhat's monkey. Gardano's relationship with Girolamo Scotto was much more complex. Comparisons of readings indicate that the two sometimes cooperated in publication or copied from each other directly (apparently with no culpability), but that at other times they had separate sources of supply for the same groups of pieces and thus competed for the same new repertory and market.

While Gardano clearly received some of the music he printed directly from composers themselves, many of his repertory sources remain obscure. His primary suppliers were undoubtedly his friends in Willaert's circle. A series of poems by Hieronimo Fenaruolo, published in 1546, depicts Gardano receiving the homage of such musicians

Page from Cristóbal de Morales's 'Magnificat omnitonum' (Venice: Antonio Gardano, 1562)

as Rore, Cambio, Parabosco and Festa, and of the poets Gaspara Stampa and Domenico Venier. But many musicians, including Rore, were unconvinced of the benefits of publication, and Gardano was often hard-pressed to obtain works from the most famous and commercially attractive composers in Italy.

Together Gardano and Scotto created a virtual monopoly in music printing in Italy. Through their connections with leading composers and popular repertories, their use of the sophisticated Venetian distribution networks and their introduction on a large scale of the cheaper, more efficient single-impression printing method, they extended the processes of musical commerce begun in France a few years earlier by Attaingnant and Moderne. Their production of large editions at low cost made polyphonic music available to a far wider public than ever before, and introduced the element of financial gain for publishers and composers alert enough to seize the opportunity. Gardano's estate inventories and tax documents show that he became comfortably wealthy from his business, owning land, houses and many valuables.

Gardano took out a patent for a new printing method, probably one that allowed more efficient, and hence cheaper, setting of material common to the several partbooks of an edition. Most of his editions were skilfully printed in oblong quarto, with simple but elegant decorative initials. Later in his career Gardano adopted a smaller, oblong octavo format for editions of villottas, introduced a large upright quarto for deluxe editions such as Willaert's *Musica nova* (1559; *see* WILLAERT, ADRIAN, fig.2), and even printed a few folio choirbooks, starting with an edition of Morales, *Magnificat omnitonum* in 1562 (see illustration).

Gardano was also a composer, and published his own chanson arrangements. Moderne published two masses in 1532 and 1546. His seven motets appeared in his own publications and in those of Moderne, Montanus and Neuber, and Du Chemin, while his 69 chansons appeared in, besides his own editions, those of Moderne, Attaingnant, and Le Roy and Ballard. A French psalm of his appeared in Fezandat's *Premier livre de psalmes et cantiques* of 1552. In his motets, Gardano tended towards the style of pervading imitation and disguised cadences that associated with Willaert and Gombert, and this dominates his early motet publications. Although he lived for half of his life in Italy, he apparently set no Italian texts.

WORKS

Missa 'Si bona suscepimus', 4vv, 1532[6]; 3 sections 2vv repr. in 1543[19]
Missa 'Vivre ne puis', 4vv, in Harmonidos ariston tricolon ogdoameron (Lyons, 1546)
7 motets, 2, 4, 5vv, 1538[4], 1539[3], 1539[10], 1539[13], 1544[6], 1547[2], 1549[16], 1554[7]
French psalm, 4vv, 1552[3]
69 chansons, 2, 3, 4, 6, 7, 8vv, 1538[18], 1539[21], 1543[14], 1544[7-8], 1546[14], 1547[8], 1547[9], 1547[11-12], 1549[21-22], 1553[20], 1553[22], *c*1555[24], Livre de meslanges (Paris, 1560)

(2) **Alessandro Gardane** (*b* Venice, before 1540; *d* ? Rome or Venice, ? 1591 or 1603). Printer, son of (1) Antonio Gardano. After his father's death in 1569, he published over 100 musical editions in Venice together with his brother Angelo. He withdrew his assets from the family business in 1575, and until 1581 issued over a dozen musical and non-musical editions in Venice under the spelling 'Gardane', often employing a printer's mark of two lions in place of the lion and bear associated with his father and brother. Sometime between 1581 and 1583 he moved to Rome, where he continued his printing activity until 1591, frequently in collaboration with other printers and booksellers including Domenico Basa, Ascanio, Bernardino and Girolamo Donangeli and Jacomo Tornieri. In Rome he printed more non-musical than musical editions, although he issued sacred works by some of the most important composers of the late Renaissance, among them G.F. Anerio, Guerrero, Marenzio, Palestrina and Victoria. He also published a series of *laude spirituali* edited by Francisco Soto de Langa for the Congregazione dell'Oratorio. Alessandro's output is clearly dwarfed by that of his brother Angelo. After the division of family assets in 1575, Alessandro published only about 50 musical editions and rather more non-musical books, while Angelo issued about 850 musical publications. Barbieri cites the baptism of Alessandro's illegitimate child in Rome in 1583 and Alessandro's death in 1591. Indeed, after 1591 Alessandro's firm appears to have ceased publication altogether, although Barbieri's claim that he died in that year is contradicted by archival documents recording payments from Alessandro to the Scuolo Grande di San Teodoro, Venice, in 1593 and 1594; these too suggest that he died in 1603.

(3) **Angelo Gardano** (*b* Venice, *c*1540; *d* Venice, 6 or 7 Aug 1611). Printer, son of (1) Antonio Gardano. He and his brother Alessandro ran their deceased father's business as 'Li figliuoli di Antonio Gardano' from 1569

until 1575, when Alessandro claimed his inheritance and withdrew from the firm. Angelo, although in partnership with his young siblings Mattio and Lucieta, continued the firm under his own name, retaining the lion and bear printer's mark inherited from his father. Lucieta took her dowry in 1582, but Mattio evidently stayed on as a silent partner, since his widow began legal action that forced Angelo to publish under the rubric 'Angelo Gardano et fratelli' after 1605. He printed music in a variety of formats, including chant books in folio and the first surviving score publications with more than two staves, *Tutti i madrigali di Cipriano di Rore a quattro voci, spartiti et accommodati per sonar d'ogni sorte d'instrumento perfetto* (1577/R) and *Musica de diversi autori ... alcune canzoni francese, partite in caselle* (RISM 1577[11]). In all Angelo published almost 1000 editions (if those produced with his brother Alessandro are included), over twice the number produced by his prolific father. He and his immediate successor published music by most of the well-known composers of the period, including Arcadelt, Asola, d'India, Andrea and Giovanni Gabrieli, Vincenzo Galilei, Gastoldi, Gesualdo, Lassus, Luzzaschi, Marenzio, Merula, Merulo, Monte, Monteverdi, Morales, Palestrina, Rore, Schütz, Striggio, Vecchi, Victoria, Wert and Willaert, as well as many composers with only local reputations. After Angelo's death in 1611, the firm passed to his daughter Diamante and her husband, Bartolomeo Magni, though he, and later his son Francesco, often signed their book with the illustrious name of Gardano.

MARY S. LEWIS (1), RICHARD J. AGEE (2, 3)

Garde, Pierre de. *See* LA GARDE, PIERRE DE.

Gardel. French family of dancers and ballet-masters.

(1) **Claude Gardel** (*d* Paris, 1774). In 1741 he became ballet-master in Mannheim, where he was partly responsible for the choreography in *Meride* which opened the opera house on 17 January 1742. He later held appointments in Stuttgart, Metz (where he married the actress Jeanne Darthenay) and from 1755 at the Nancy court of Stanislas Leczinksi; in 1760 he went to Paris, where he became court choreographer. He had two sons (see below) and a daughter, Marie Française Lucie (*b* 1755), who had a brief career as a dancer.

(2) **Maximilien Léopold Philippe Joseph Gardel** (*b* Mannheim, 18 Dec 1741; *d* Paris, 11 March 1787). Son of (1) Claude Gardel. He entered the Paris Opéra about 1755, and soon became a leading dancer along with such celebrities as Gaetano Vestris. Vestris, for unknown reasons, did not appear in Rameau's *Castor et Pollux* on 21 January 1772, and Gardel was called on to take his place. He agreed to do so only if allowed to dance without a mask and with his own blonde hair instead of Vestris's customary black wig. His appearance caused a sensation and in time led to the abolition of masks and wigs for male dancers.

In 1773 Gardel and his colleague Jean Bercher, called Dauberval, were appointed assistant ballet-masters to Vestris. On Vestris's retirement in 1776 the two assistants expected to take his place, as was the usual practice at the Opéra; but Marie Antoinette had Noverre, formerly her dance teacher in Vienna, nominated to this position. Gardel and Dauberval started a campaign against Noverre, and by November 1779 had succeeded in making him agree to relinquish his position, for a pension of 3000 livres from the Opéra and an additional 500 livres as academician. Early in 1781 Noverre left and his place was taken by Gardel and Dauberval; but the latter, too, soon departed.

During his tenure as ballet-master Gardel danced leading parts in nearly all the ballets and divertissements, and was responsible for the choreography of a large number of ballets and operas. Among his famous ballets were *La chercheuse d'esprit* (1 March 1778), *Ninette à la cour* (18 August 1778), *Mirza* (3 November 1779), *La rosière* (29 July 1783 or 1784), *Le déserteur* (10 October 1784) and *Le premier navigateur* (26 July 1785). His death was caused by a toe injury. Gardel was also an

excellent musician; he played several instruments and arranged or composed music for his ballets.

(3) **Pierre Gabriel Gardel** (*b* Nancy, 4 Feb 1758; *d* Paris, 18 Oct 1840). Son of (1) Claude Gardel. In 1771 he entered the Opéra, where his elder brother was largely responsible for his training. He quickly became one of the best pupils of the Ecole de Danse, and soon after his début in 1774 reached the ranks of the leading dancers. In 1783 he became his brother's assistant. In 1786 the brothers produced the ballet *Les sauvages*, for which they also wrote the music. On his brother's death in 1787 Pierre was appointed ballet-master, a post he held for over 40 years with many successes both as dancer and as choreographer. Two of his best-known ballets were produced in 1790, *Télémaque anns l'île de Calypso* and *Psyché*; the latter remained in the repertory until 1829, reaching over 1150 performances. During the Revolution Gardel choreographed *Le jugement de Paris* (6 March 1793) and such patriotic displays as *Le triomphe de la république* (1793) and *La rosière républicaine ou La fête de la raison* (1794). In 1795 he married the brilliant dancer Marie-Elisabeth-Anne Boubert (1770–1803), better known as Mlle Miller. Possessing great personality and creative powers – even Noverre praised her – she danced leading parts in many of her husband's ballets.

Soon after his marriage Gardel ceased to appear as a dancer. His later ballets included *La dansomanie* (14 June 1800), *Le retour de Zephire* (3 March 1801 or 1802), *Daphnis et Pandrose* (14 January 1803) and *Paul et Virginie* (24 June 1806). He was responsible for the dances in *L'inauguration du temple de la victoire* (*intermède*, 2 January 1807), in *Le triomphe de Trajan* (*tragédie lyrique*, 23 October 1807) and produced his ballets *Alexandre chez Apelles* (20 December 1808), *La fête de Mars* (26 December 1809), *Vertumne et Pomone* (24 January 1810), *Persée et Andromède* (8 June 1810) and *L'enfant prodigue* (28 April 1812). In spite of the engagement of Milon as second ballet-master, the dances of most productions were still by Gardel. He was assisted by Milon in the ballet *L'heureux retour* (25 July 1815). His last ballets appear to be *Proserpine* (18 February 1818) and *La servante justifiée* (30 September 1818), but he continued to choreograph the dances for many operas, his last being *Macbeth* (29 June 1827) with music by Chelard. He retired in 1829. Gardel was also a famous teacher; for many years he was the director of the Ecole de Danse and numerous ballet celebrities, such as Carlo Blasis, were his pupils. He was an able musician and excellent violinist, appearing in concerts and sometimes playing in his ballets. His ideas on ballet remained conservative; he advocated maintaining the three styles of the classic dance in his day, that of the *danseur noble* (his own style), the *demi-caractère*, and the grotesque or comic. He fought a losing battle against the Romantic ballet, in which these distinctions were lost and which in his eyes meant the loss of the beauty of the classics.

FRIDERICA DERRA DE MORODA

Gardel, Carlos [Gardes, Charles Romuald] (*b* ?Toulouse, Dec 1890; *d* Medellín, 24 June 1935). Argentine composer and tango singer. Although Gardel's origins have been widely debated, he was probably born in Toulouse in 1890; in 1893 he and his mother emigrated to Buenos Aires. Together with the Uruguayan singer José Razzano, he formed a duo in 1911, which lasted until 1925. About 1917 Gardel performed and recorded Samuel Castriota's popular tango tune *Lita*, under the title *Mi noche triste* (to words by Pascual Contursi). By the early 1920s he was firmly established as Argentina's leading tango singer, and several successful European tours followed. He was killed in a plane crash in 1935.

Gardel's chief contribution was to popularize the sung tango, although both his career and songs were criticized by some as lacking a critical, political thrust. In addition to recording almost 900 songs, he appeared in several classic films; his best-known compositions include *El día que me quieras*, *Mi Buenos Aires querido*, *Por una cabeza*, *Volver*, *Silencio* and *Cuesta abajo*. Gardel's impact was profound: a product of the *arrabal* (districts) who came to symbolize the fulfilment of the dreams of the Argentine *porteño* (from the port, i.e. Buenos Aires), he remains a crucial figure, 'the tango made flesh' as described by the singer Libertad Lamarque.

CLIFF EISEN

Gardelli, Lamberto (*b* Venice, 8 Nov 1915; *d* Munich, 17 July 1998). Swedish conductor and composer of Italian birth. He studied at the Liceo Musicale Rossini in Pesaro, and later in Rome. He worked as an assistant to Tullio Serafin in Rome and in 1944 made his début at the Teatro

Reale dell'Opera, Rome, in *La traviata*. From 1946 until 1955 he was resident conductor with the Swedish Royal Opera in Stockholm, where he was chiefly responsible for Italian and modern Scandinavian repertory. He appeared frequently at the Berlin Staatsoper and in Helsinki, and became music director, from 1961, of the Hungarian State Opera, where he was still conducting into the 1990s. His American début was at Carnegie Hall in 1964 in Bellini's *I Capuleti e i Montecchi*, which led to his first appearance at the Metropolitan Opera in 1966 conducting *Andrea Chénier*. In England Gardelli first conducted at Glyndebourne in 1964 (Verdi's *Macbeth*), returning in 1968 with *Anna Bolena*; his début at Covent Garden (1969) was with Verdi's *Otello*. His long list of recorded operas is particularly noteworthy for *Macbeth*, *I Lombardi*, *Nabucco* and an outstanding *La forza del destino*, for the first complete recording of Rossini's *Guillaume Tell* (1972), including a rediscovered aria for Jemmy, and for the first recordings, made in Budapest, of Respighi's *La fiamma* (1985), *Belfagor* and *Maria egiziaca* (both 1990). One of the finest Verdi conductors from Italy of his generation, Gardelli showed a strong command of both structure and expression; he has also successfully championed lesser works of the *verismo* school. His compositions include symphonic works, songs and five operas, of which only one, *L'impresario delle Americhe* (1959), has been performed. (A. Blyth: Obituary, *Opera*, xl (1998), 1164–5)

ALAN BLYTH

Garden, Edward J(ames) C(larke) (*b* Edinburgh, 28 Feb 1930). Scottish musicologist. He studied at the RAM from 1950 to 1954, taking organ lessons from C.H. Trevor. From 1954 to 1957 he was on the music staff of Clifton College, Bristol, while there gaining the FRCO in 1956 (with the Harding and F.J. Read prizes) and the BMus in 1957. From 1957 to 1966 he was director of music at Loretto School, near Edinburgh; he then became lecturer in music and organist at Glasgow University and in 1970 senior lecturer. In 1975 he became professor of music at Sheffield University, and was dean of the faculty of arts from 1988 to 1990. He retired in 1993. In 1969 he was awarded the Edinburgh DMus for a dissertation on the music of Balakirev. Garden's studies have been almost exclusively in the field of Russian music, his preoccupation having begun as early as his period at the RAM. He was given much encouragement by Gerald Abraham and Jack Westrup. He was active as an organist and choir trainer, and published choral and chamber music.

DAVID SCOTT/R

Garden, Mary (*b* Aberdeen, 20 Feb 1874; *d* Inverurie, Scotland, 3 Jan 1967). American soprano of Scottish birth. Taken to the USA in 1883, she studied singing in Chicago with Sarah Robinson-Duff, supported financially by wealthy patrons David and Florence Mayer. In 1896 the Mayers financed her further studies in Paris, chiefly with Trabadelo and Lucien Fugère. When her patrons withdrew their support in 1899, Garden was coached by the American soprano Sybyl Sanderson, through whom she met Albert Carré, director of the Opéra-Comique, and Massenet. After much preparation she was engaged for the Opéra-Comique, making an acclaimed unscheduled début as Charpentier's Louise on 10 April 1900 when, after the first act, Marthe Rioton succumbed to illness. Other leading roles soon followed: she created Marie in Lucien Lambert's *La Marseillaise* and Diane in Pierné's *La fille de Tabarin*. She was coached by Sanderson for *Thaïs* at Aix-les-Bains, then sang Manon and Messager's *Madame Chrysanthème* at Monte Carlo (conducted by the composer). Her success was sealed when Debussy chose her (against the wishes of Maeterlinck) to sing Mélisande in the première of *Pelléas et Mélisande* (1902). At Covent Garden, where she appeared in the 1902 and 1903 seasons, she sang Manon, Juliet and Gounod's Marguerite, but London did not please her and she was never to return to the house. Meanwhile, at the Opéra-Comique she sang in Massenet's *Grisélidis* (1902), then created the title role in Leroux's *La reine Fiammette* (1903). She carried off superbly the coloratura writing in the role of Violetta (1903), triumphed in Saint-Säens's *Hélène* in 1905 and the same year created Massenet's Chérubin, a role specially written for her, at Monte Carlo.

By now Garden was recognized as a supreme singing-actress, with uncommonly vivid powers of characterization (her dramatic style influenced by both Sarah Bernhardt and Coquelin Ainé) and a rare subtlety of colour and phrasing. Two years after creating Chrysis in Erlanger's *Aphrodite* (1906) she left the Opéra-Comique for the Opéra, where she sang Ophelia in Thomas' *Hamlet* and, in 1909, the title part in Henry Février's *Monna Vanna*. Enticed by Oscar Hammerstein for his battle against the Metropolitan, Garden astonished America with her impersonation of a young boy in Massenet's *Le jongleur de Notre Dame* (1908). As Salome the following year, her lascivious kissing of the severed head of the Baptist outraged the guardians of morality even more than her Dance of the Seven Veils (which she executed chastely in a body-stocking). By now a household name in America, in 1910 she began a long association with the Chicago Grand Opera, where she was admired in such roles as Fanny in Massenet's *Sapho*, the Prince in *Cendrillon*, Carmen, Tosca and Dulcinée in *Don Quichotte*. After two disastrous forays into film with Goldwyn (including a silent version of *Thaïs*), other powerful stage interpretations followed, including the title roles in Massenet's *Cléopâtre* and Février's *Gismonda* (both 1919), Fiora in Montemezzi's *L'amore dei tre re* (1920), Charlotte in *Werther* (1924), Katiusha in Alfano's *Risurrezione* (1925, in French) and the heroine of Honegger's *Judith* (1927), the last two both American premières.

Garden was a controversial director of the Chicago Opera Association in the 1921–2 season (uniquely, for a

Mary Garden as Mélisande in Debussy's 'Pelléas et Mélisande'

director, continuing to sing leading roles), and was responsible for innovatory works, including the première of Prokofiev's *The Love for Three Oranges* (1921). After retiring from the opera stage in 1934, she worked as a talent scout for MGM and gave lecture-recitals and talks, mainly on Debussy. She was decorated by the French and Serbian governments during World War I and made a Chevalier of the Légion d'Honneur in 1921. For much of her life she openly encouraged young singers and even secretly paid for them to receive training. She herself died in penury, almost forgotten.

MICHAEL T. R. B. TURNBULL

Gardi, Francesco (*b* ?1760–65; *d c*1810). Italian composer. He directed and composed for the women's choir and orchestra of the Venetian Ospedale dei Poveri Derelitti from about 1787 until 1791, when it closed. In 1797, and perhaps earlier, he was *maestro di cappella* of a sister institution, the Ospedale dei Mendicanti. In a Venetian libretto of 1799, he is described as Accad. Filarmonico. For nearly 20 years his settings of comic texts (especially Giuseppe Foppa's one-act farces) were extremely popular in Venice. His several collaborations with the eccentric Count Alessandro Pepoli, who briefly maintained theatres in Venice and Padua and who served Gardi as librettist, impresario and printer, suggest his readiness to participate in movements of experimentation and reform. His last recorded work for Venice was a cantata in honour of Napoleon's brother-in-law, Joachim Murat, King of Naples, on 20 August 1809. In 1811 and 1813 the ducal theatre at Parma performed *La pianella perduta*, a revival of Gardi's most popular farce, *La pianella persa*.

SVEN HANSELL/REBECCA GREEN

Gardiner, Henry Balfour (*b* London, 7 Nov 1877; *d* Salisbury, 28 June 1950). English composer. He learnt the piano from the age of five, and by nine had begun composing. In 1891 he entered Charterhouse with a junior scholarship, gaining also a senior one. He continued his musical studies at the Hoch Conservatory in Frankfurt (1894–6) under Knorr for composition and Uzielli, a pupil of Clara Schumann, for piano. At Frankfurt he was strongly influenced by Wagner, whose operas he heard for the first time, and Tchaikovsky. His hopes of becoming a concert pianist were dashed by partial paralysis of the hand muscles so he devoted himself instead to composition. In 1896 he entered New College, Oxford, returning to Frankfurt during vacations for further, private study with Knorr. After Oxford he resumed studies with Knorr, and in 1901 went to Sondershausen where he studied conducting and had an early symphony and overture performed. His first English performance was of a String Quintet heard at a Broadwood Concert in 1903. A quartet and other orchestral works soon followed. Between 1905 and 1907 he collected nearly 100 folksongs in Hampshire, and in 1909 was for a term on the music staff of Winchester College. Living first in London, in 1909 he settled in Ashampstead, Berkshire. In 1911 his *Shepherd Fennel's Dance* became an instant success at the Proms, but his finest achievement was the remarkable series of eight choral and orchestral concerts almost exclusively of British music which he organized, financed and in part conducted in Queen's Hall in 1912 and 1913. These helped establish the reputations of several of his contemporaries, including Bax, Holst and Vaughan Williams as well as those of his fellow Frankfurt students, Grainger, Scott, Quilter and O'Neill. War caused the cancellation of a further series. Throughout his life Gardiner used his private wealth astutely yet unassumingly to help friends in many ways: he provided Holst with the first, private performance of *The Planets*, and he relieved Delius of his financial worries by buying his house at Grez-sur-Loing and allowing him free tenancy for life. From 1919 to 1922 he gave financial assistance to the Royal Philharmonic Society and its newly-formed Philharmonic Choir.

As a composer Gardiner was frustrated by the narrowness of his early musical environment, by his academic tuition, which he saw as a severe curb on originality, and by an almost pathological self-critical nature which led him to destroy many of his works. By 1925 he felt his music out of place in the postwar climate and ceased composing altogether. In 1927 he moved to Dorset where he devoted the rest of his life to pioneering afforestation. His *Overture to a Comedy* and *News from Whydah* display an infectious vitalty and exuberance as well as a vivid, resourceful wealth of orchestral colour, while his minor masterpieces *April*, *Philomela* and *A Berkshire Idyll* reveal a more poignant, strongly Delian side to his musical personality.

WORKS

STAGE

The Pageant of London (spectacle, 3 movts), Crystal Palace, June 1911, lost; Old King Cole (children's play, 3, C. Bax), 1920–21, ?unperf., unpubd

STEPHEN LLOYD

Gardiner, Sir **John Eliot** (*b* Fontmell Magna, Dorset, 20 April 1943). English conductor. He read history and Arabic at King's College, Cambridge, before studying music with Thurston Dart at King's College, London, and with Nadia Boulanger in Paris. He also studied conducting with George Hurst. While still at Cambridge he founded the Monteverdi Choir, with whom he made his conducting début at the Wigmore Hall in London in 1966. He commemorated the 400th anniversary of Monteverdi's birth in 1967 with a performance of the Vespers in a new edition of his own at Ely Cathedral, repeating the work at a Proms concert in 1968. In that year he founded, as a complementary body to the choir, the Monteverdi Orchestra. He drew from his singers a (then unfashionable) brightly focussed tone in the Continental tradition, bringing to their Baroque repertory an unaccustomed clarity and incisiveness. These qualities influenced other groups in the ongoing search for an 'authentic' performing style; and the choir's vitality was matched by the English Baroque Soloists, a period-instrument ensemble which Gardiner founded in 1978 as a successor to the Monteverdi Orchestra. Gardiner has directed the choir and instrumentalists in an impressive range of repertory from Purcell, through Bach and Handel (many oratorios) to Haydn and Mozart (including recordings of the complete piano concertos with Malcolm Bilson, and the seven mature operas). In 1990 he founded the Orchestre Révolutionnaire et Romantique to perform 19th-century repertory, from Beethoven to Brahms, on instruments of the period. With the orchestra he has recorded an exhilarating cycle of Beethoven symphonies and in 1993 gave the modern première of Berlioz's *Messe solennelle* from a manuscript lost for over 150 years. Performers find Gardiner a hard taskmaster, but when the chemistry works, as for example in his powerfully dramatic readings of the Bach Passions, he is unsurpassed.

His exceptional feeling for dramatic pacing and effect is reflected in his direction of opera. Between 1973 and 1975 he conducted new editions of Rameau's *Dardanus*, *Les fêtes d'Hébé* and *Les boréades* (which he also recorded). He made his Covent Garden début with Gluck's *Iphigénie en Tauride* in 1973 and from 1983 to 1988 was music director of the Lyons Opéra, introducing several rare works there, including Charpentier's *Médée* and Leclair's *Scylla et Glaucus*. His other operatic recordings include Gluck's *La rencontre imprévue*, *Iphigénie en Aulide* and *Iphigénie en Tauride*, and Beethoven's *Leonore*.

Although his reputation was initially based on performances with period instruments, Gardiner has received many invitations to work with modern orchestras; these

John Eliot Gardiner

include the Vienna PO (with whom he has recorded Lehár's *Die lustige Witwe*), the Royal Concertgebouw Orchestra, the Boston SO and the Cleveland Orchestra. He was principal conductor of the NDR SO in Hamburg for four years from 1991.

Gardiner has made over 250 recordings, reflecting the breadth of his repertory, and has received more Gramophone awards than any other artist. He has also received an honorary doctorate from the University of Lyons, has been created a Commander of the Ordre des Arts et des Lettres and is an honorary fellow of King's College, London, and the RAM. He was made a CBE in 1990 and knighted in 1998.

GEORGE PRATT

Gardiner, William (*b* Leicester, 15 March 1769; *d* Leicester, 16 Nov 1853). English hosiery manufacturer, writer on music, minor composer and editor. Procuring a copy of Beethoven's E♭ String Trio op.3 in Bonn, he played the viola in a Leicester performance in 1794, three years before its London publication. He was thus regarded as the introducer of Beethoven's music to England and was asked, at the unveiling of Beethoven's statue in Bonn (1848), to sign the inauguration parchment beneath the names of Victoria and Albert. He was a member of the semichorus at Victoria's coronation (1838) and trained a 100-voice chorus for the important 1827 Leicester Musical Festival; some of his songs, glees and duets appeared under 'W.G., Leicester', with one psalm tune, published as by Paxton. He provided linking music for *Judah*, an oratorio freely based on Beethoven, Haydn and Mozart (the slow movement of Beethoven's Seventh Symphony quickening into the March of the Philistines). Gardiner wrote to Beethoven offering 100 guineas for an overture to *Judah*, but his letter miscarried, as had some stockings, woven with themes, addressed to Haydn some years previously. *Sacred Melodies*, 'barbarous compilations' according to the *Dictionary of National Biography*, contain extracts from religious works adapted to English words. Gardiner's observations on contemporary musical, literary and artistic life appear in *Music and Friends*, and *The Music of Nature* contains lucid discussions of the vocal practices of many leading singers. A portrait of Gardiner attributed to Artaud is in the Leicester Museum Collection.

WORKS

Sacred Melodies, i–vi (London, 1812–38), arr. from works by Haydn, Mozart, Beethoven and others; The Psalms and Hymns (London, 1814), arr. from Sacred Melodies; Judah, orat (London, 1821), incl. arr. of works by Haydn, Mozart, Beethoven; The Universal Prayer (London, 1840), Pope's words set to music by Haydn, Mozart, Beethoven; Anthems, glees, songs, *GB-Lcm*

WRITINGS

The Music of Nature (London, 1832, 3/1849)

Music and Friends, or Pleasant Recollections of a Dilettante (London, 1838–53)

Sights in Italy, with some account of the Present State of Music ... in that Country (London, 1847)

7 musical papers read before Leicester Literary and Philosophical Society, 1839–51; abstracts in transactions of the society, of which Gardiner was a founder-member

Annotations to C. Berry's translation of H. Beyle's [Stendhal's] version of Carpani's biography of Haydn (London, 1817); annotations to R. Brewin's translation of Schlichtegroll's biography of Mozart (London, 1817)

JONATHAN WILSHERE/R

Gardner, Johann von (*b* Sevastopol, 10/22 Dec 1898; *d* Munich, 26 Feb 1984). German musicologist of Russian origin. He was familiar with Russian church music from his childhood and specialized in studies of Russian chant, becoming an authority on the repertory, history and stylistic analysis of chant from the early 17th century. He was in Belgrade after the Russian Revolution of 1917 and completed his theological studies at the University of Belgrade in 1928, also studying composition and choral conducting with Kosta Manojlović. After a brief teaching career in Cetinje (Montenegro) and Carpathian Ruthenia he became a monk, serving in Jerusalem and elsewhere. He was in Vienna in 1939 and Potsdam in 1942, and by 1944 had returned to laity as a choral conductor in Salzburg. In 1954 he was appointed to teach courses on the liturgical chant of the Russian Orthodox Church at the University of Munich, where, in 1965, he took the doctorate with a dissertation on problems of notation in Russian chant. Besides a valuable bibliography of the literature on Russian church music he wrote numerous articles including descriptions of Russian musical manuscripts in various western European libraries and a discography of performances of Russian chants. The publication (1978–82) of his extensive study of the liturgical chant of the Russian Orthodox Church was his crowning achievement.

MILOŠ VELIMIROVIĆ

Gardner, John (Linton) (*b* Manchester, 2 March 1917). English composer and teacher. He was organ scholar at Exeter College, Oxford (1935–9), where his teachers included Armstrong, Walker and Morris. After war service he was a répétiteur at the Covent Garden Opera Company (1946–52); tutor (1952–76) and director of music (1965–9) at Morley College; visiting director of music at St Paul's Girls' School (1962–75); and professor of harmony and counterpoint, RAM (1956–86). He was made a CBE in 1976.

Gardner composed copiously from childhood. At Oxford the influence of Adorno was more significant than his teachers, and before World War II some chamber works were performed although they were subsequently withdrawn. His compositional career effectively recommenced with the première of the Symphony no.1 (1946–7) at the 1951 Cheltenham Festival under Barbirolli. Its success led to several major commissions including *Cantiones sacrae* (1951–2) for the Three Choirs Festival, and the opera *The Moon and Sixpence* (1954–7) for Sadler's Wells Opera. Gardner's music is characterized by skilful craftsmanship and an eclecticism often arising from the nature of a particular work. For example, *The Moon and Sixpence* is an exception to his normal adherence to tonality, where the use of serial procedures creates a harmony suitable to portray the heightened emotions of the plot; and in the Second Symphony (1985) he consciously adopts a 19th-century style. He has successfully integrated jazz into his works: the use of the alto saxophone in the Mass in D (1982) may be cited, as well as passages in the opera *Tobermory* (1976). Similarly, he has a flair for writing in a vein derived from popular music as in *Tomorrow Shall be my Dancing Day* (1965). The use of contrapuntal devices is another hallmark, demonstrated in a masterly fashion in *A latter day Athenian speaks* (1961) for unaccompanied chorus and in the Second String Quartet (1978). Choral and vocal works form the backbone of Gardner's compositions; significant among these are the *Herrick Cantata* (1960–61), and the *Seven Songs to Poems of Stevie Smith* (1976). Works such as the Second Oboe Sonata (1986) and the Oboe Concerto (1990) also show the idiomatic nature of his writing for instruments.

WORKS
(*selective list*)

Ops: The Moon and Sixpence (3, P. Terry, after W.S. Maugham), op.32, 1954–7, London, Sadler's Wells, 24 May 1957; The Visitors (chbr op, 3, J.O. Greenwood), op.111, 1971–2, Aldeburgh, Jubilee Hall, 7 June 1972; Bel and the Dragon (children's op, 1, T. Kraemer), op.120, 1973, London, St James Norlands, 15 Dec 1973; Tobermory (1, G. Ewart, after Saki), op.137, 1976, London, RAM, 26 Oct 1977

ANDREW BURN

Gardner, Kay (*b* Freeport, NY, 8 Feb 1941). American composer and performer. In addition to formal study at the University of Michigan (1958–61) and SUNY at Stony Brook (MM 1974), she studied with Samuel Baron (flute) and Antonia Brico (conducting, 1977, 1978) as well as Balinese flute and gamelan in Bali during 1988. A pioneer of women's music who declared her lesbianism in 1971, she has been an active composer-performer of women's music since 1973, appearing regularly at National Women's Music Festival and Michigan Women's Music Festival; in 1978–9 she co-founded and conducted the New England Women's SO. Her exploration of healing music has gained recognition through her presentations to medical schools and health workers, as well as her work to develop the use of music as a substitute for surgical anaesthesia. Combining eastern and western philosophy, physics, medicine and empirical evidence, her book *Sounding the Inner Landscape: Music as Medicine* (Stonington, ME, 1990/*R*) summarizes this work. Melody is the foundation for all her compositions, which often use modal scales as heard in *Rainforest* (1977) and *North Coast Nights* (1989). Her albums *Garden of Ecstasy* (1989) and *One Spirit* (1993) show the influence of world music and feature Gardner playing a variety of flutes.

J. MICHELE EDWARDS

Gárdonyi, Zoltán (*b* Budapest, 25 April 1906; *d* Herford, 27 June 1986). Hungarian musicologist and composer. He studied composition with Kodály at the Budapest Liszt Academy of Music, musicology with Blume, Hornbostel, Schering, Schünemann and Wolf at Berlin University (as a scholar of the Collegium Hungaricum) and composition with Hindemith at the Berlin Staatliche Hochschule für Musik, where he graduated in 1930. He took the doctorate at Berlin University in 1931 with a dissertation on Liszt. Subsequently he taught music at the teacher-training college in Sopron and conducted the music society there (1931–41). In 1941 he was appointed professor at the Liszt Academy of Music, where he remained until his retirement in 1967, teaching musicology and giving special lecture courses on Liszt and Bach. He was also chairman of the department of Protestant church music there from 1946 until 1949, when it was abolished. In 1972 he resettled permanently in West Germany. Gárdonyi made a significant contribution to research on Liszt, the European Baroque and musical analysis. He planned the Neue Liszt-Ausgabe, and with István Szelényi edited the first four volumes (1970–73). He was a member of the committee for musicology of the Hungarian Academy of Sciences. He composed prolifically in a wide variety of forms; his works include a large number of choral works, among which is an oratorio *A tékozló fiú* ('The Prodigal Son', 1971), various orchestral works, for example, a Clarinet Concerto (1942), a Concertino for Violin and Orchestra (1959) and a Sinfonic Suite (1980), as well as various chamber and instrumental works, including three string quartets and pieces for the organ. Many of these works are recorded on two CDs made in 1986 to celebrate his 80th birthday, and following his decease, nearly 70 of his works have been published posthumously in Germany, Hungary and the USA.

IMRE SULYOK/ZSOLT GÁRDONYI

Gar-dpon, Pa-sangs Don-grub (*b* Pa-snam dBang-ldan, 1917/18; *d* Lhasa, 1998). Tibetan *gar* master. He was selected at the age of nine to be a *gar* dancer at the court of the 13th Dalai Lama and became teacher of the troupe at 21 and director at 32, while studying literature with dGe-'dun Chos-'phel. He worked as a lay official (*zhol-drung*) in the 'old' (pre-communist) Tibetan government and was the first *gar* master to be promoted to the seventh rank of its administrative hierarchy. He developed the instrumental technique of the *gar* tradition. In 1982, after more than 20 years in prison, he initiated the resurrection of *gar* music and dances and was appointed music teacher at Tibet University (Lhasa). With bSod-nams Dar-rgyas Zhol-khang, he was regarded as an authority on various

kinds of folksongs, sitting at most of the government conferences on traditional Tibetan performing arts. In 1985 and 1997 he went to India to teach *gar* to Tibetan exiles. The dances that he and Rig-'dzin rDo-rje (1927–84) taught at the Tibetan Institute of Performing Arts (Dharamsala) are still performed today before the Dalai Lama. He edited two books, made a series of recordings of *gar* and wrote a series of articles in Tibetan journals.

ISABELLE HENRION-DOURCY

Garducci, Tommaso. *See* GUARDUCCI, TOMMASO.

Gareth, Benedetto ['Il Chariteo'] (*b* Barcelona, *c*1450; *d* Naples, 1514). Catalan poet-improviser. He was active in Aragonese Naples for most of his career, notably as secretary to Ferdinand I and as secretary of state to Ferdinand II, for whom he used to sing Virgil's poems. According to Cortese (see Pirrotta) Spaniards sang in a 'lugubrious' manner and inflected Virgil's verses in a 'simple' variety of the Lydian that resulted in a 'rather languid modulation'. At Ferdinand's wedding in 1496 Gareth performed 'mille sue frottole', composed in honour of 'La Luna', a poetic name for his beloved. His amorous lyrics about her (collected in *Endimione*) show the influence of Petrarch. He was a leading member of the Accademia Pontaniana, where he was known as 'Chariteus' (favourite of the *charites*, or graces). Serafino Aquilano came to know him while in Naples (1478–80) and is said to have been inspired by Andrea Coscia's performances of his lyrics at the Sforza court in Milan. A musical setting of one of Gareth's 32 *strambotti*, *Amando e desiando* is attributed to him in Petrucci's *Frottole libro nono* (RISM 1509[2]) and also in an arrangement for voice and lute in Bossinensis's *Intabulati* (1511; ed. in IMi, new ser., iii, 1964). His *strambotto Qual fu del primo dì* was included in a Mantuan collection of *cansoni per canto*. Some *strambotti* refer to his singing in a dolorous vein (nos.1, 2, 9, 23, 32); he mourns the death of a singer named Moletto in *sonetto* 184. Six scurrilous *canzoni alla napolitana* attributed to 'Don Caritheo' in RISM 1546[18] cannot be Gareth's. However, the initial lines of his *strambotti* (e.g. *Tu dormi e amor veglia*) were frequently cited in various forms of popular poetry.

DONNA G. CARDAMONE

Gargallo, Luis Vicente (*b* at or nr Valencia, *c*1636; *d* ?Barcelona, ? Feb 1682). Spanish composer. He received his early musical training as a choirboy at Valencia Cathedral. He was choirmaster of Huesca Cathedral from 7 June 1659 to 15 November 1667, succeeding Babán. Two days later he was appointed to a similar position at Barcelona Cathedral, succeeding Albareda. In November 1667 he was an unsuccessful candidate for the post of *maestro de capilla* of the Real Colegio del Corpus Christi, Valencia, and in October 1679 he sat on the jury that judged the competition for the post of organist at S María del Mar, Barcelona. He disappeared from Barcelona cathedral in February 1682, and the chapter was forced to presume that he had died. Gargallo had many pupils. His surviving works, all of them sacred, show that he was a talented composer, with a sound technique and a strong personality. He may have been related to José Gargallo (*b* Morella, 1702; *d* after 1734), who served at Valencia Cathedral until 1731 and then at Albarracín Cathedral, or to Francisco Gargallo, a beneficed priest and *maestro de capilla* of S María la Mayor, Morella, in the 18th century. Another José Gargallo (*b* 1744; *d* 1794) was a musician at the cathedral of La Seo, Zaragoza, and then, from 1776, *maestro de capilla* of León Cathedral.

GUY BOURLIGUEUX

Gargano, Giovanni Battista (*fl* early 17th century). Italian music printer. In partnership with Lucrezio Nucci, he was active in Naples when it was a centre for music printing: the firms of Carlino & Pace and Sottile were also flourishing at the time. The bookseller P.P. Riccio financed a number of Gargano and Nucci's early publications including *Teatro de madrigali* (RISM 1609[16]) edited by Scipione Riccio. Between then and 1618 the firm published nearly 20 musical editions, mostly of secular music by local composers such as Camillo and Francesco Lambardi, Maiello, Montella and Montesardo. The most important publication was Cerone's treatise *El melopeo y maestro* (1613).

Lucrezio Nucci published a few musical works on his own during 1616 and 1617. His 1616 edition of Alessandro Di Costanzo's first book of madrigals is remarkable for its colophon, which refers to an earlier edition in the following terms: 'Naples, Giovanni Battista Sottile, 1604, and reprinted at the instigation of Giacomo Voltaggio by Lucrezio Nucci, 1616'. During 1618 Lucrezio Nucci was replaced by Matteo, presumably his son. With Gargano he published four editions of music, three of them by Giaccio; during the 1630s he published editions of musical treatises by Cavalliere and Picerli.

STANLEY BOORMAN

Gargari, Teofilo (*b* Gallese *c*1570; *d* Rome, July 1648). Italian composer, singer and organist. In 1588 he was an alto in the choir of S Lucia del Gonfalone, Rome. From 1592 until 1597 he served at S Luigi dei Francesi. After a failed attempt to enter the Cappella Pontificia in October 1599, he was accepted in May 1601, perhaps on the recommendation of Cardinal Montalto, in whose church of S Lorenzo in Damaso he had been organist in March of that year. He twice served as *maestro di cappella* of the papal choir (1620 and 1622). The repertory-specific 1616 *Diario Sistino* lists his music on a number of occasions, particularly at the more up-to-date *Vespri Segreti*. A set of Vespers music for the feast of Saint Peter and Saint Paul (five double-choir psalms and a hymn) was copied in 1628 (*I-Rvat* C.S.102); three Magnificat settings, a *Miserere* and three motets, all for double choir, also survive (*Rvat* C.S.31, 91, 100; C.G. XIII 25). All are good examples of the Roman polychoral style, combining contrapuntal skill with attention to the words. His only surviving concertato motet (RISM 1616[1]), while demanding virtuoso singers, relies too heavily on ornamental formulas. Gargari is not known to have composed any secular music.

NOEL O'REGAN

Gargiulo [Gargiulio], **Terenzio** (*b* Torre Annunziata, Naples, 23 Nov 1903; *d* San Sebastiano al Vesuvio, Naples, 13 Nov 1972). Italian composer and pianist. He studied the piano, with Florestano Rossomandi and Attilio Brugnoli, and composition, with Antonio Savasta and Gennaro Napoli, at Naples Conservatory. After embarking on a career as a concert pianist, he came to recognition as a composer at the 1939 Rassegna Nazionale di Composizione with his Piano Concerto. From 1928 onwards he taught at the conservatories of Bari, Parma, Palermo and Naples. He was later director of the conservatories in Palermo (1960–63) and Naples (after 1963).

As a composer Gargiulo remained faithful to tonal music models. His orchestral and chamber works reveal a marked inclination towards folk melodies, while his two operas, both settings of librettos by the critic and theatre director Vittorio Viviani, derive their style from late 19th-century Neapolitan *verismo*. (*DEUMM*; *GroveO*, R. Pozzi)

VIRGILIO BERNARDONI

Garimberti, Ferdinando (*b* Mamiano di Traversetolo, 6 Jan 1894; *d* Madrid, 26 March 1982). Italian violin maker. He studied with Romeo, then Riccardo Antoniazzi; he then worked for Giuseppe Pedrazzini and Leandro Bisiach, and later set up independently in Milan. Between 1927 and 1949 his instruments won important awards at the exhibitions held at Rome and Cremona. He taught at the International School of Cremona from 1963 to 1966. During his long career his models and style remained almost unvaried. His work is meticulous, very precise and clean, always extremely careful and very elegant. He was discriminating in his choice of wood and he clearly preferred to fashion the backs out of one piece. He applied the varnish with great skill; this varies in consistency and colour depending on the period. The most usual colour is a beautiful red-orange which sometimes becomes lighter towards the centre but is sometimes a darker red. He also did much repair work and was considered an expert in old Italian violins. He often marked his instruments with a signed label and a brand on the inside.

ERIC BLOT

Garinus [? Guayrinet] (*fl* late 14th century). French composer. The isorhythmic rondeau *Loyauté me tient en espoir* is ascribed to him in *F-CH* 564. He may well have

been the man mentioned in the two musician motets *Musicalis scientia/Scientie laudabili* and *Apollinis eclipsatur/Zodiacum signis/In omnem terram*; in the first piece he is called Garinus de Soissons. (However, Hoppin and Clercx put forward another candidate, Garinus de Arceys, who became chaplain to the pope in 1370 and Bishop of Chartres in 1371, but is not known to have been a musician.) His rondeau (ed. W. Apel: *French Secular Compositions of the Fourteenth Century*, Amsterdam, 1970, p.62; also in CMM, liii/1, 1970, no.31, and PMFC, xix, 1982, no.2), which is an example of the lengthy syncopations used in the late 14th century, is divided into two halves identical in rhythm.

It has been suggested (see Stäblein-Harder) that he was also the composer of the Credo transmitted in *I-IV* 115, ff.46*v*–47 (ed. in CMM, xxix, 1962, no.40), whose tenor bears the designation 'Tenor Guayrinet'. The two lower voices of this three-voice work are isorhythmic; the opening of its upper voice, plainly a chant paraphrase, is rhythmically similar to that of the even more fragmentary Credo in *F-Sm* 222, no.78 (see RISM B/iv/3), which is, however, written an octave lower and in only two voices.

Garip (Provençal). A term used primarily for instrumental versions of the lai form, though also implying dance music. *See* LAI, §1(vi).

Garland. American firm of publishers. It was established in New York by Gavin Borden in 1969 as a book reprinting concern. The firm expanded its list by 1975 to include original titles, especially reference works on a range of topics including music. Since then it has established several specialized series such as the Composer Resource Manuals (begun 1981), Music Research and Information Guides (1984) and Perspectives in Music Criticism and Theory (1995). Shortly after 1975 Garland issued its first scores, the series Italian Opera 1640–1770 (97 vols., begun 1977), Early Romantic Opera (72 vols., 1978) and The Symphony 1720–1840 (60 vols., begun 1979). Since 1983 Garland has produced more than two dozen multi-volume anthologies of scores and source materials in facsimile (notably of J.C. Bach, Handel, Hummel, Mendelssohn, Mozart, Spohr, the Italian cantata and oratorio, Renaissance music, 18th-century continuo sonata and French cantata; and, from the 19th century, London and Parisian piano music, French song and American musical theatre), as well as new editions devoted to the 16th-century chanson and motet, the Italian madrigal and Italian instrumental music.

CALVIN ELLIKER

Garland, Judy [Gumm, Frances Ethel] (*b* Grand Rapids, MN, 10 June 1922; *d* London, 22 June 1969). American popular singer and actress. With her elder sisters, Virginia and Suzy, she became one of the Gumm sisters, making her vaudeville début at the age of three. Her father was a cinema and theatre owner-manager who eventually settled in California. At first she took the stage name Frances Garland, but after a period studying at a theatre school in Los Angeles, she became Judy Garland, billed as 'the little girl with the great big voice'. She appeared in her first film in 1929 (*The Meglin Kiddlie Revue*), and in 1934 after a meeting with the composer Harry Akst she auditioned for Louis B. Mayer at MGM and was put under contract. She made several successful films including *Broadway Melody of 1938*, in which she sang 'You made me love you', before gaining stardom in *The Wizard of Oz* (1939), for which she was awarded an Academy Award as best juvenile performer. The film's song 'Over the Rainbow', by Harold Arlen, with lyrics by E.Y. Harburg, became her signature tune. She married the composer and arranger David Rose in 1941.

Throughout the 1940s she gradually moved into 'adult' roles, with special success in *Meet Me in St Louis* (1944; songs by Ralph Blane and Hugh Martin, including 'The Trolley Song' and 'The Boy Next Door') and *The Pirate* (1948; by Cole Porter, including 'Love of My Life' and 'Be a Clown'). Both these films were directed by her second husband, Vincente Minnelli. Garland's singing style harked back to the traditions of vaudeville and in several of her films – *For Me and My Gal* (1942), *Easter Parade* (1948) and *In the Good Old Summertime* (1949) – she sang songs of the 1900s and 1920s with a mixture of sentiment and raucous energy that would mark her later performances.

Psychiatric problems exacerbated by drug-addiction led to the termination of her contract with MGM in 1950. The following year she parted from Minnelli and began a new career as a solo performer. Her appearances at the London Palladium and the Palace Theater, New York, were received by the public with almost hysterical applause. In 1954 she returned to the screen to give what is widely acknowledged as her best performance, in *A Star is Born* (songs by Arlen and Ira Gershwin, including 'The Man that Got Away'). The rest of her life found her problems dogging her career, which nevertheless achieved its zenith on stage in 1961 with her concert at Carnegie Hall. 'She used the mike as though it were a trumpet', wrote the columnist Hedda Hopper, and this fierce element in her later performances, each one seeming to be another stage in her self-destruction, marred her very considerable abilities as a singer.

Towards the end of her life she sometimes appeared in performances with her daughter LIZA MINNELLI, and made two final musical films, with songs by Arlen and Harburg: *I Could Go On Singing* (1963) and *Gay Purr-ee* (1962), the latter being an animated cartoon in which only her voice was heard. Lorna, her daughter by her third husband, Sid Luft, also became a singing actress. Garland's fame increased in the years following her death, partly because of the following she inspired among gay men.

PATRICK O'CONNOR

Garland, Peter (Adams) (*b* Portland, ME, 27 Jan 1952). American composer, publisher and writer on music. He studied with Tenney and Budd at the California Institute of the Arts (BFA 1972). He is best known as the editor and publisher of *Soundings* (1971–91), a journal that included scores by many now well-known American avant gardists and experimentalists such as Lou Harrison, Nancarrow and Partch as well as composers of his own generation. Like some of his mentors, Garland has chosen to live outside the academic and commercial musical worlds. He has travelled widely and been strongly influenced by the musics of Mexico and Indonesia. His works are spare but lyrical, often using exotic instrumentation though much of his output is for the piano (he has written a number of works for the pianists Herbert Henck and Aki Takahashi). His most ambitious work is *The Conquest of Mexico*, a shadow puppet dance-drama. In more recent works, such as *Love Songs* and *Another Sunrise*, a disarming simplicity of spacious, open sonorities, juxtaposed with a rugged, rhythmic vitality, offsets sections of understated sweetness. He was a Deutscher akademischer Austauschdienst fellow in Berlin in 1993 and the recipient of an Asian Cultural Council grant for study and travel in Japan in 1994.

Garmonica [garmoshka] (Russ.). A type of accordion. *See* ACCORDION, §2(iii).

Garner, Erroll (Louis) (*b* Pittsburgh, 15 June 1921; *d* Los Angeles, 2 Jan 1977). American jazz pianist. He first played professionally in the Pittsburgh area with Leroy Brown's orchestra (1938–41). By 1944 he had moved to New York, where he started to play in night clubs; he served as a substitute for Art Tatum in Tatum's trio with Tiny Grimes and Slam Stewart, remaining when it became the Slam Stewart Trio (1945). He then formed his own trio with bass and drums, a format he retained for the whole of his career when not playing as a soloist, and quickly captured a large audience. In 1947, while working in the Los Angeles area, he recorded with Charlie Parker. In the 1950s and 1960s he was one of the most frequently seen black jazz musicians on television, and in 1957–8 he undertook the first of many overseas tours. He remained active until February 1975, becoming one of the most familiar figures on the jazz scene and issuing a great many recordings.

A completely self-taught musician who never learnt to read music, Garner developed an individual style that stands largely outside the main tradition of jazz pianism and, because of its virtuoso technique, has attracted few imitators. Although some of his early recordings show him using stride left-hand patterns, by the late 1940s he had developed a characteristic four-beat fixed pulse of block chords in the left hand, using wide-spaced voicings reminiscent of swing rhythm-guitar playing and often 'kicking' the beat in the manner of a swing drummer. Against these patterns he embellished or varied a given melody with brilliant octave or chordal passages, sometimes lagging as much as a quaver behind the beat to generate enormous momentum and swing. Other trademarks of Garner's style were his sensitive manner of 'strumming' right-hand chords at medium tempo and his witty passages of improvised two-part counterpoint. All of these qualities may be heard on the album *Concert by the Sea* (1955, Col.). His interpretations of popular songs were orchestral in conception, exploiting the full range of the keyboard and employing contrasting textures and dynamics in the manner of big-band arrangements. In the 1950s he enriched his rhythmic basis by adopting Latin American dance rhythms.

Garner's recorded output is remarkably consistent in approach and level of invention. Of particular interest are his fanciful introductions (for example, on *Fantasy on Frankie and Johnny*, 1947, Dial), which function as small-scale, independent compositions, arresting the listener's attention with their dissonance or novelty without betraying the thematic material to follow. Garner also composed the well-known ballad *Misty* (1954, Mer.), which exemplifies his rich, overly ornate manner at slow tempos.

J. BRADFORD ROBINSON

Garnesey [?John] (*b* ? *c*1415; *d* ? Wells, 1459). English church musician and composer. He is probably to be identified with the John Garnesey who served as a vicar choral of Wells Cathedral from 1443 to 1458 and (most unusually) was promoted to a residentiary canonry there just a year prior to his death in 1459. His sole surviving work is a setting of *Laudes Deo*, a troped lesson sung in the Sarum Use during the Mass 'at Cock-crow' on Christmas Day; the work is preserved in *GB-Cmc* Pepys 1236. In the Sarum missal the performance of this lesson is deputed to two *clerici*, and Garnesey supplied two-part polyphony. It is a suave and resourceful if somewhat extended exercise in manipulation of the imperfect consonances of the 3rd and 6th. Freedom is preferred to rigour in compositional approach; reference to the chant is perfunctory and soon abandoned.

ROGER BOWERS

Garnier [Grenier, Guarnier] (*fl* 1538–42). French composer. Four four-voice chansons by him were published in Paris by Attaingnant and Moderne (RISM 1538[11], 1538[13], 1538[15], 1542[14]; 2 ed. in PÄMw, xxiii, 1899/*R*). A four-voice motet by him, *Lectio actuum apostolorum*, was printed in the first book of Gardano's *Mottetti del frutto* volumes (1539[13]; ed. in SCMot, xiii, 1993). Like the other pieces in that anthology, Garnier's motet dwells in a densely contrapuntal idiom, with overlapping points of imitation and a carefully controlled approach to consonance and dissonance. It is unlikely that he was the Guillaume Garnier who was a teacher in Naples around 1480 or Alain Grenet, a chaplain at the Ste Chapelle in 1494.

FRANK DOBBINS/RICHARD FREEDMAN

Garnier, François. *See* GRANIER, FRANÇOIS.

Garnier [*l'aîné*], **François-Joseph** (*b* Lauris, Vaucluse, 18 Jan 1755; *d* Lauris, *c*1825). French oboist, flautist and composer. He studied the oboe with Antoine Sallantin, and from 1775 to about 1808 played in the Paris Opéra orchestra (he was first oboist from 1786). He was also oboist in the royal chapel at Versailles from 1784, and performed with much success at the Concert Spirituel. He taught at the Ecole de la Garde Nationale (later the Conservatoire) from 1793 to 1797. For some years he was a musician in Napoleon's armies. Garnier belonged to the Masonic lodges 'Les Amis Réunis' and 'Le Contrat Social', which included some of the best musicians of the time. He wrote light instrumental works, primarily for the oboe, and a valuable method for that instrument. His brother Joseph, known as Garnier *le jeune*, was a flautist in the Opéra orchestra and composed for the flute.

ROGER J.V. COTTE

Garnier, Gabriel (*d* Paris, *c*1730). French organist. He held posts first at St Louis-des-Invalides, Paris, from 1684, and then at the Chapelle Royale at Versaille from 1702, where the other organists were Nivers, Buterne and François Couperin. In 1719 he was appointed organist of St Roch in Paris.

Titon du Tillet said Garnier was 'among our most skilful organists', and François Couperin clearly paid him tribute in one of his finest harpsichord pieces, *La Garnier*, from the *second ordre* of his first book of *Pieces de clavecin* (1713). Pierre-Louis d'Aquin said that Garnier played Couperin's harpsichord music better than the composer himself. None of Garnier's music survives.

EDWARD HIGGINBOTTOM

Garnier, Louis. *See* GRANIER, LOUIS.

Garrana, (Muhammed) Rifaat (*b* Cairo, 29 Jan 1924). Egyptian composer. He took up the trumpet at the age of 12 and later attended the Cairo Institute for Theatre Music, from which he graduated in 1948. Composition studies with Hickmann and Minato followed, and he then worked as a school music teacher. In the 1960s he conducted the television orchestra, subsequently assuming the direction of the television music department. He won the state prize for composition in 1966.

With Abdel-Rahim and El-Shawān, Garrana belongs to the second generation of 'modern' Egyptian composers. He establishes a national atmosphere in most of his works by the use of melodic elements from folk and traditional Arab music. In later compositions, such as the symphonic poem *Journey to Czechoslovakia*, his harmonic style has become rather more dissonant, probably under the influence of contemporary Czech music; but dissonance is not a functional or essential part of his language. Formally, he is at his best in programme music, though the Qānūn Concerto is a notable work, being the first in Egypt to use the *qānūn* with a symphony orchestra. The third movement is based on the tune of an Islamic chant: the antiphonal, recitative-like call to prayer of the *baïram* (feast days). Garrana's writing for the instrument is quite new, and the soloist has to play with two plectra in each hand, instead of one in each hand as in traditional music. He has received the state prize for composition and other awards.

SAMHA EL KHOLY

Garre, Edmée Sophie. *See* GAIL, SOPHIE.

Garrelts [Garrels], **Rudolph** [Redolph] (*b* Norden, Ostfriesland, 25 March 1675; *d* The Hague, 5 April 1750). Dutch organ builder of German birth. He worked first as a woodcarver and furniture maker (a well-known example of his work is the pulpit of the Ludgeri-Kirche, Norden) before becoming one of Arp Schnitger's master pupils. He began building organs in North Germany and the Dutch provinces of Groningen and Drenthe. The organ he built for the village church of Anloo, Drenthe, in 1718, was well preserved until a fire in an organ builder's workshop destroyed much of the internal parts of the organ.

Garrelts first moved to the Dutch city of Leiden in 1725 and later to The Hague, where he filled the place left vacant by the last great Dutch organ builder Johannes Duyschot. He came under the influence of Aeneus Egbertus Veldcamps, organist of St Jacobskerk, who was a staunch defender of the Dutch organ-building tradition and a fierce opponent of the then modern North German style as exemplified by the Schnitger sons' rebuilding of the organ of St Laurenskerk, Alkmaar. Though Garrelts immersed himself in the Dutch tradition of Duyschot, his organs nevertheless form a most interesting synthesis of the best of both Dutch and North German styles. His best-known organs are those built for the Grote Kerk, Maassluis (1732), a large three-manual instrument which combines traits of both Duyschot and Schnitger; for the Marekerk, Leiden (1735; enlargement); and the Grote Kerk, Purmerend (1739–42), with a Hamburg-style case, but a Dutch-style stop-list.

ADRI DE GROOT

Garreta (Arboix), Juli [Julio] (*b* Sant Feliu de Guíxols, Girona, 12 March 1875; *d* Sant Feliu de Guíxols, 2 Dec 1925). Catalan composer. His father was a watchmaker and musician who instructed the young Garreta in both pursuits, but he was essentially self-taught. He taught himself the piano and the violin in order to join the local orchestra of Villanueva y Geltru, near Barcelona, where he worked as a watchmaker. There too he founded a quintet and made his home into a musical centre where Casals was a frequent visitor. His first compositions were small-scale orchestral pieces, but he soon turned to writing *sardanas*, becoming known as 'the Wagner of the *sardana*'. Encouraged by Casals, he wrote his first big orchestral work, the *Impressions sinfóniques*, in 1901, and in 1920 he won the prize of the Festa de la Música Catalana with the *Suite empordanesa*. He was very much influenced by the aesthetic and orchestration of Strauss. The death of this 'genial and profoundly intuitive man' (Casals) came only two days after the first performance of his Violin Concerto.

WORKS

ANTONIO RUIZ-PIPÓ

Garrett, George (Mursell) (*b* Winchester, 8 June 1834; *d* Cambridge, 8 April 1897). English organist and composer. Trained as a chorister at New College, Oxford, with S. Elvey, in 1851 Garrett became pupil assistant to S.S. Wesley at Winchester Cathedral, where his father was master of the choristers. He was subsequently organist of Madras Cathedral (1854) and St John's College, Cambridge (1857); in 1873 he succeeded J.L. Hopkins as organist to Cambridge University. He wrote many anthems and services that held a place in the repertory for more than a generation; their organ parts demonstrated the independent accompaniments that S.S. Wesley's pupils often developed from his early examples. Garrett also produced an oratorio *The Shunamite* (1882), several cantatas, a chant collection, some songs and partsongs, and organ music. (O. Way: 'Letters to a Daughter: a Selection of Letters written between 1890 and 1896 by G.M. Garrett, Mus. Doc.', *MR*, liii (1992), 7–31)

BERNARR RAINBOW

Garrett, Lesley (*b* Doncaster, 10 April 1955). English soprano. She studied at the RAM from 1977 to 1979 and while there made her mark as a spirited Lazuli in Chabrier's *L'étoile* (1979); the same year she won the Kathleen Ferrier Prize, and entered the National Opera Studio. After appearances in small roles at Batignano, she made her official stage début as Dorinda (Handel's *Orlando*) in 1980 at the Wexford Festival, singing Mozart's Zaide there the following year. In 1981 she sang Carolina (*Il matrimonio segreto*) at the Buxton Festival and in 1982 Susanna at Opera North. After singing Despina for Glyndebourne Touring Opera, she joined the ENO in 1984 where, among other roles, she has sung Bella (*The Midsummer Marriage*, 1985), Atalanta (*Serse*, 1985), Zerlina (1985), Yum-Yum (1986), Offenbach's Eurydice (1988), Oscar (*Un ballo in maschera*, 1989), Susanna (1990), Adèle (1991), Rose (*Street Scene*, 1992), Dalinda (*Ariodante*, 1993), the title role in *The Cunning Little Vixen* (1995) and Rosina (1998), in all of which

she sang and acted with a natural command of the stage. With her outgoing personality and powers of communication, thanks not least to her perfect diction, she has been an enthusiastic proselytizer of opera on television, notably in her own programmes 'Viva la Diva' and 'Lesley Garrett – Tonight', and on her mixed recitals on CD. In all this, however, she has never compromised her musicianship, excellent technique or keen sense of style.

ALAN BLYTH

Garrick, David (*b* Hereford, 19 Feb 1717; *d* London, 20 Jan 1779). English actor, manager and playwright. He was the greatest Shakespearean actor of the mid-18th century and an influential manager of Drury Lane from 1747 to his retirement in 1776. He was also knowledgeable about ballet and opera. In 1749 he married the dancer Eva Maria Veigel, who had come to London in March 1746. Garrick visited Paris and established contact with such figures as Noverre, the pyrotechnist Morel Torré, the violinist-composer F.H. Barthélemon (who provided music for Garrick's burletta *Orpheus*) and J.P. de Loutherbourg, who revolutionized stage design at Drury Lane in the 1770s. Garrick's relatively 'naturalistic' acting style – he broke with the pompous declamatory styles in fashion since Dryden's day – made him an important influence on such theatrical and operatic reformers as Algarotti, Diderot and Noverre. He is said to have taught his acting style to Guadagni, who was to be Gluck's Orpheus (1762).

Early in his long reign at Drury Lane he staged Boyce's all-sung afterpiece *The Chaplet* (1749), Arne's *Don Saverio*, an innovatory opera set in the present (1750), and Burney's burletta *Robin Hood* (1750). He extended the boundaries of pantomime in both music and ballet in a series of important ventures with Henry Woodward, the best-known of which is *Queen Mab* (1750). His importation of Noverre's *Les fêtes chinoises* (1755) was wrecked by anti-French riots. Garrick staged J.C. Smith's operas, notably *The Fairies* (1755). The success of Arne's *Artaxerxes* at Covent Garden in 1762 threw Garrick operatically on the defensive. He struggled for some years to find a counter-attraction to the popular series of comic operas at the rival theatre, beginning with *Love in a Village* (1762). With Charles Dibdin and *The Padlock* (1768) he finally found his man. Their relations were frequently strained, however, and Dibdin's view of Garrick in his autobiography *The Professional Life of Mr Dibdin* (1803) is caustic.

Garrick had a major influence on the development of English opera in the late 18th century. He was both eclectic and innovatory. His 1770 revival of Dryden and Purcell's *King Arthur* (revised by Arne) is a major landmark in the rediscovery of Purcell. He produced all-sung mainpieces and afterpieces, burlettas, ballad operas, pastiches and sophisticated pantomime-ballets. The near-domination of musical works at Drury Lane and Covent Garden in the last quarter of the 18th century simply extends an artistic policy inaugurated by Garrick and developed by John Beard in the 1750s and 60s.

ROBERT D. HUME

Garrido (Vargas), Pablo (*b* Valparaíso, 26 March 1905; *d* Santiago, 14 Sept 1982). Chilean composer and ethnomusicologist. He studied the piano, the violin and composition in Valparaíso, where his composition teachers were Edward van Dooren and Giuseppe Quintano. Until the end of the 1940s he focussed on popular music, with a particular emphasis on jazz; he was one of the founders of the Hot Jazz Club of Chile (1939). The influence of jazz can be discerned in his works, along with that of atonality and of the indigenous music of Chile and Latin America. In keeping with his support of the avant garde of the 1920s and 1930s, he was one of the first Chilean composers to set texts by the Chilean poets Vicente Huidobro (*Poéte*, 1926) and Pablo Neruda (*Poema veinte*, 1930). One of his most notable works is the chamber opera *La sugestión* (1959; libretto by Cipriano Rivas Cherif), his contribution to a genre little cultivated by his compatriots. His most important research deals with the Chilean national dance, the *cueca* (*Biografía de la cueca*, Santiago, 1943; *Historial de la cueca*, 1979). He also published more than 2000 articles in newspapers and journals both in Chile and abroad.

WORKS

FERNANDO GARCÍA

Garrido-Lecca (Seminario), Celso (*b* Piura, 9 March 1926). Peruvian composer. He began his composition studies at the Lima National Conservatory with Rodolf Holzmann.

In 1950, with a scholarship from the University of Chile (Santiago), he worked with Domingo Santa Cruz. He continued studying privately in Santiago with the Dutch teacher Fré Focke, who introduced him to serialism, and joined the University theatre as composer and consultant. He went to New York on a scholarship from the International Institute of Education and then from the Guggenheim Foundation; there he completed his studies of orchestration with Copland. On his return to Chile he became professor of composition at the University of Chile; he took up a similar position at the conservatory in Lima in 1973, later becoming its director (1976–9). Garrido-Lecca's interest in traditional and especially Andean music resulted in, apart from his academic teaching, the formation and direction of the Talleres de la Canción Popular, from which emerged many outstanding groups. His work also included musicology and the conservation and development of Peruvian musical traditions in association with UNESCO and the Instituto Nacional de Cultura.

His first period – which displays characteristics of inter-war European music – includes *Orden* for piano (1953) and three orchestral works, *Sinfonía en tres movimientos* (1960), *Laudes* (1963) and *Elegía a Machu Picchu* (1965), the last of which was commissioned by Scherchen. Between 1973 and 1980 indigenous traditional styles are more evident. Such works as *Pequeña suite peruana* for piano (1979), *Retablos sinfónicos* for orchestra (1980) and the *Danzas populares andinas* for violin and piano (1981) recreate, in his own musical language, the atmosphere and poetics of peasant and popular expression. Later this language was extended to include a range of Latin American song, particularly that of Chile. As Garrido-Lecca increasingly affirmed a native cultural identity, so his music achieved greater solidity and definition; he has, in his own words, avoided both 'a rootless, academic cosmopolitanism and a naive, provincial indianism'. The *Trío para un nuevo tiempo* (1986) – based on the song *Gracias a la vida* by the Chilean singer Violeta Parra – exemplifies his search for synthesis, musical and social.

ENRIQUE ITURRIAGA

Garrigues, Malvina. German soprano, wife of LUDWIG SCHNORR VON CAROLSFELD.

Garrison, Lucy McKim (*b* Philadelphia, 30 Oct 1842; *d* West Orange, NJ, 11 May 1877). American collector of slave songs. The only practising musician among the collectors of slave songs in the South Carolina Sea Islands during the Civil War, she accompanied her father to this Union enclave in June 1862, remaining only three weeks. Deeply impressed with the songs of the freedmen, she notated them, and on her return north tried unsuccessfully to bring them to public notice.

On 6 December 1865 she married Wendell Phillips Garrison, literary editor of *The Nation*, who assisted her in gathering the first comprehensive collection of slave songs, in collaboration with William Francis Allen and Charles Pickard Ware. The resulting book, *Slave Songs of the United States* (New York, 1867), was a seminal work of lasting importance, still the best-known source of slave music. She arranged two slave songs for voice and piano (*Poor Rosy, Poor Gal* and *Roll, Jordan, Roll*) which were published in 1862, and a letter of hers on 'Songs of the Port Royal "Contrabands"' was printed in *Dwight's Journal of Music*, xxi (1862), 254–5.

DENA J. EPSTEIN

Garrison [Siemonn], **Mabel** (*b* Baltimore, MD, 24 April 1886; *d* New York, 20 Aug 1963). American soprano. She studied singing at the Peabody Conservatory with W.E. Heinendahl and Pietro Minetti, and later in New York with Oscar Saenger and Herbert Witherspoon. Using her married name of Siemonn, she made her stage début with the Aborn Opera Company in Boston as Philine in Thomas' *Mignon* in 1912. She joined the Metropolitan Opera two years later, making her official début as Frasquita in *Carmen* in November 1914. She only attracted real attention, however, when she substituted at short notice for Raymonde Delaunois as Urbain in *Les Huguenots* the following month. Similarly, she made a fine impression two years later when she replaced Frieda Hempel as the Queen of Night, and she scored her greatest success as the Queen of Shemakha in Rimsky-Korsakov's *The Golden Cockerel*, covering for Maria

Barrientos, in 1918. Among her other roles were Olympia, Gilda, Martha, Rosina, Adina (*L'elisir d'amore*) and Lucia di Lammermoor, Oscar and Mme Herz (*Der Schauspieldirektor*).

After her final Lucia at the Metropolitan in 1921, Garrison performed extensively in Europe for several years. She sang Rosina with the Chicago Civic Opera in 1926 and later took part in a series of Baroque operas under Werner Josten in Northampton, Massachusetts, which included the American premières (in English) of Handel's *Serse* (1928) and *Rodelinda* (1931). Also a recitalist, she was admired for the clarity of her voice and her smooth and elegant style.

PHILIP L. MILLER

Garro, Francisco (*b* Alfaro; *d* Lisbon, before 27 March 1623). Spanish composer. After working in Logrono he was appointed *maestro de capilla* at Valladolid in March 1580 but soon relinquished the post: his appointment as *maestro de capilla* of Sigüenza Cathedral of the same year was approved on 17 October. In 1587 he applied unsuccessfully for the equivalent post at Zaragoza. Garro was paid as *mestre* of the royal chapel in Lisbon from 27 September 1592, a post which he retained until his death.

Two publications containing Garro's works appeared in 1609, both dedicated to Philip III of Spain, and one comprising polychoral works. No complete set of the partbooks containing polychoral works has survived, although the existence of three partial sets (in *GB-Lbl*, *P-Cug* and Braga, Arquivo da Universidade do Minho) means that only one part is missing from each work. Garro published both paraphrase and parody masses; among the former, the *Missa 'Saeculorum' primi toni* is built upon the first termination for the first psalm tone, while a subtle and imaginative parody technique is seen in the *Missa 'Maria Magdalena'* (based upon Guerrero's motet). Rhythmically animated and syncopated writing is prominent in the polychoral works.

WORKS

Missae quatuor, defunctorum lectiones: Missa 'Cantate Domino', 8vv, bc; Missa 'Domine in virtute tua', 12vv, bc; Missa 'Fili quid fecisti nobis sic', 8vv, bc; Missa pro defunctis, 8vv; Alleluia, ego vos elegi/Assumpta est Maria, 8vv; Alleluia, tanto tempore, 8vv; Alleluia, vidimus stellam, 8vv, Parce mihi Domine, 8vv; Responde mihi, 8vv; Spiritus meus, 8vv: (Lisbon, 1609), inc.

Opera aliquot: Missa 'Saeculorum' primi toni, 5vv; Missa 'O quam pulchra es', 4vv; Missa 'Tu es qui venturus es', 4vv; Missa Maria Magdalena, 6vv; Asperges me, 5vv; In principio erat verbum, 5vv; Parce mihi, Domine, 5vv; O magnum mysterium, 6vv; Vidi aquam, 6vv: (Lisbon, 1609) [copy formerly in Ivo Cruz's private collection, Lisbon, now in *P-Ln*]

OWEN REES

Garsi, Ascanio. Italian composer, son of SANTINO GARSI.

Garsi, Donino. Italian composer, son or grandson of SANTINO GARSI.

Garsi [Garsi da Parma], **Santino** [Santino detto Valdès] (*b* Parma, 22 Feb 1542; *d* Parma, ?17 Jan 1604). Italian lutenist and composer. He studied in Rome and quickly gained renown as a lutenist. He was summoned back to Parma by the music-loving Duke Ranuccio I Farnese, who appointed him as lutenist and teacher of the pages from 1 October 1594; he held these positions until his death. Some 50 compositions by him survive, mostly in manuscripts of north Italian provenance (one manuscript of Neapolitan origin, *PL-Kj*, has links with Fabrice Dentice and Lorenzini, both of whom were connected with the Farnese family). Apart from the payments registered at the Parma court, the only biographical information is given by Pico, who described him as a man with a cheerful disposition but a bad reputation at the end of his life. One source calls him Santino detto Valdès, a name that could connect him with the heretical sect the Waldensians. He was buried in an unmarked grave. Two epitaph poems on his death were published by Tommaso Stigliani in 1605.

His compositions consist mainly of conservative, idealized, Renaissance-orientated court dances for lute, many bearing emblematic titles (*La Mutia*, *La Balduvina*, *La Giulianina*, *La Cesarina* and so on) referring to prominent persons at the Parma court. Over 30 of the pieces are galliards, some with doubles; among the others are a capriccio (*D-DO*, also attrib. 'Lavrencini'), Ruggieri 'per cantare', *Aria del gran duca* (*aria di Fiorenza*) and favourite dances of the period such as the ballo, balletto, corrente and *moresca*. Some dances acquired a wide reputation, being copied in several sources, including printed anthologies for guitar (L. Monte, 1625[12]) and violin (Zanetti's *Scolaro*, Milan, 1645/*R*).

After Santino's death, his salary continued to be paid to his widow, Ottavia, to help her support his sons and grandsons, also lutenists. Among them were his son Ascanio Garsi, who is known only by a corrente dated February 1621, and his son or grandson Donino Garsi (*d* Parma, 30 March 1630). The latter obtained a position at the Farnese court on 1 August 1619 with a monthly salary of 8 ducats. His extant works and that of Ascanio are all contained in the lutebook that he prepared at Padua (in 1620–21) for one of his pupils, the Polish or White Russian nobleman K.S.R. Dusiacki (*PL-Kj* Mus MS 40153, *D-Bsb*; ed. in Osthoff, 1926/*R*). The manuscript contains some 78 pieces in French tablature with attributions to Santino, Ascanio and Donino Garsi (Dusiacki himself later added ten Polish dances anonymously): *arie alla napolitana*, balletto s dedicated to the

dukes of Mantua and Parma, correntes, pavans, toccatas, preludes, many galliards, a folia and a longwinded battaglia, which ends with a section titled 'sonata con il tamburo per la vitoria' and has imitations of fifes, trumpets and drums. The pieces require a *liuto attiorbato* with seven diapasons and have careful indications (marked 'T') for vibrato in the manner of Piccinini and P.P. Melli.

ARTHUR J. NESS, HENRY SYBRANDY/DINKO FABRIS

Garth, John (*b* ?Durham, *c*1722; *d* ?London, *c*1810). English composer. He lived in Co. Durham and is known to have been organist at Sedgefield and to have played an active part in local musical life. He was a friend of Charles Avison, whom he assisted with his publication of 50 of Benedetto Marcello's psalm paraphrases (i–viii, London, 1757).

As a composer, Garth's main area of activity was the accompanied keyboard sonata: not the common form for keyboard with violin but a type used almost exclusively by composers in north-east England (Avison, Ebdon and Hawdon as well as Garth) where a trio sonata ensemble of two violins, cello and harpsichord is required, with the strings either doubling the harpsichord, providing harmonic support or resting. Garth was no doubt following Avison's example in using this unusual genre. The presence of crescendo marks suggests that he had the piano in mind. The first of Garth's five sets, op.2, achieved particular popularity; at least six editions are known between 1768 and 1790, when the first sonata appeared separately in an anthology. It was referred to by William Gardiner (*Music and Friends*, London, 1838) as affecting him powerfully and arousing his interest in music. The sonatas are in two movements, usually an Allegro followed by a minuet, gavotte or rondo. Garth's fluent technique served well for what are mainly light, unpretentious pieces, of which only occasional ones have real substance. In the second set the chief interest lies in the melodically attractive dance movements, though no.6 in G minor has a vigour and contrapuntal elaboration rare in Garth's music. The later sets are lighter to the point of triviality. His cello concertos (a form rare in England at the time; Garth's are the earliest published there) show some apt and fluent melodic writing.

STANLEY SADIE

Gartner. Bohemian family of organ builders. Johann Anton (*b* Tachov, 5 July 1707; *d* 11 July 1771) was an important local organ builder of his day. His work included the organ in the Premonstratensian Monastery at Teplá (1755–60; three manuals and 34 stops), which still survives, and the organ for St Vitus's Cathedral, Prague (1762–5; three manuals, 40 stops), of which the case survives. His great-grandson Josef the younger (*b* Tachov, 30 Aug 1796; *d* Prague, 30 May 1863) became well known for his restoration of large Baroque organs: surviving examples include St Mary (1825) and St Nicholas Kleinseite (1835), Prague. Several of his own organs also survive. As organ builders the Gartner family belong, broadly speaking, to the school of Abraham Stark. In 1825 Josef the younger made a special study of Silbermann organs in Saxony: his essay, *Kurze Belehrung über die innere Einrichtung der Orgeln*, was published in 1832 (2/1845) and appeared in 1834 in a Czech translation. From 1830 onwards he taught at the organ school in Prague.

HANS KLOTZ/JIRÍ SEHNAL

Garugli [Garulli], **Bernardo** [Garullus, Bernardinus] (*b* Cagli, 1535; *d* after 1565). Italian composer and singer. Eitner incorrectly identified his place of birth as Calliano, near Rovereto. He moved to Fano, where he was a singer, and he probably completed his studies there. For a time he was a pupil of Zarlino in Venice, later returning to Fano, where on 16 July 1562 he was appointed to the cathedral chapel 'to sing and to teach the boys to sing on festive days and whenever music in church is required'. In the same year he dedicated to the chapter his *Modulationum quinque vocum . . . liber primus* (Venice, 1562), comprising 20 motets, for which he received a payment of one thaler. He devoted much of his energy to improving the musical standards at Fano and for a time he employed a soprano at his own expense. In 1565 he asked the chapter to relieve him of his position, and on 20 September he was succeeded by Bernardo da Urbino. Garugli's only known secular composition is *Quante gratie* (in RISM 1562[6]).

Garūta, Lūcija (*b* Rīga, 14 May 1902; *d* Riga, 15 Feb 1977). Latvian composer and pianist. She attended the Latvian Conservatory, where she graduated from Vītols's composition class in 1924 and Ludmila Gomane-Dombrovska's piano class in 1925. In Paris she continued her piano studies with Cortot (1926) and her composition studies with Dukas (1928). Both as a soloist and an accompanist, she played in numerous concerts in Latvia and abroad. From 1940 she taught music theory and composition at Latvian State Conservatory, eventually becoming professor (1973). As a composer Garūta concentrated on programme music conceived in the manner of post-Romanticism and of Skryabin.

Garzia, Francesco Saverio. *See* GARCÍA FAJER, FRANCISCO JAVIER.

Gas [Gaz], **José** (*d* Gerona, 27 Dec 1713). Spanish composer. In 1675 he was appointed choirmaster at the collegiate church in Mataró, where he remained until 1685, when he moved to a similar post at the basilica of S María del Mar in Barcelona. Even though in 1682 he unsuccessfully competed for the post of choirmaster at Gerona Cathedral, in 1690 he was offered that post (without competition), and was appointed on 16 July. He retired at an advanced age in 1711. A number of Gas's sacred works, including two masses, eight motets and two Passions as well as several Spanish villancicos and *Música para la comedia de odio y amor*, survive (*E-G*), along with some 40 further works in Latin and Spanish, including the exercises presented at a public competition, apparently that of Gerona in 1682 (*Bc*).

Pedrell (*Catàlech de la Biblioteca musical de la Diputació de Barcelona*, i, 1908, p.255) mentioned a José Gas as choirmaster at Gerona, 1711–35, and later at S María del Mar in Barcelona, where he died in 1743; these assertions (repeated in *LaborD* and in *Enciclopedia Salvat de la música*, ii, 1967) seem to be the result of some confusion. Pedrell (*Catàlech*, i, 259) described some of Gas's compositions as being 'highly recommendable, as indeed are all the works of maestro Gas'.

JOSÉ LÓPEZ-CALO

Gascon, Adam-Nicolas (*b* Liège, bap. 14 March 1623; *d* Liège, shortly before 10 July 1668). Flemish composer. On 1 February 1644 he was appointed *maître de chant* of the collegiate church of Onze-Lieve-Vrouwekerk, Maastricht. He resigned on 6 September 1658 and from 1659 to 1668 was *maître de chant* of the collegiate church of St Paul, Liège, where he also held a minor ecclesiastical position. As a composer he is known only by one sonata for four instruments and continuo (*GB-Ob*), which appears alongside several similar works by Lambert Pietkin and J.H. Schmelzer. In his sonata, as in the others, slow and fast movements alternate; it includes interesting use of syncopation and echo effects. (J. Quitin: 'Tasmore, sonate à quatre d'Adam Gascon (Liège, 1623–1668)', *Bulletin de la Société liégeoise de musicologie*, no.6 (1973), 1–5)

JOSÉ QUITIN

Gascongne [Gascogne, Gascongus, Gascone, Gasconia, Guascogna], **Mathieu** [?Johannes] (*fl* 1517–18). French composer. A supplication of 17 December 1518 identifies him as a priest of the diocese of Meaux, as chaplain of Ste Marie-Magdalène in Tours Cathedral and as a singer in the king's chapel. He appears near the top of a list of singers in the royal chapel dated 1517–18. These documents would seem to indicate that his motets *Christus vincit, Christus regnat* and *Deus regnorum* were composed for the coronation of François I in 1515; two others, *Caro mea vere est cibus* and *Cantemus et laetemur*, refer directly or indirectly to that king. Gascongne may also have been responsible for the revision of Mouton's motet *Non nobis Domine*. In Attaingnant's print (RISM 1535[3]; the only source to attribute the work to Gascongne) the motet's text has been extensively revised to honour François I. According to Brobeck (1991, p.467) Gascongne may have been associated with the royal court as early as 1500: his motet *Bone Jesu dulcissime* sets a prayer for an unnamed monarch, probably Louis XII. Attaingnant, holder of a royal patent for printing music, attributed 13 sacred works to Gascongne in his anthologies of 1534–5 (though not all are now thought to be by him) and also included his *Missa super 'Nigra sum'* in the sumptuous *Liber primus tres missas continet* (1532). Willaert, in a statement quoted by Zarlino (*Dimostrationi harmoniche*, 1571/*R*), named Gascongne along with Josquin, Ockeghem and his own teacher, Mouton, as the 'buoni antichi', and took Gascongne's motet *Osculetur me* as the model for an early parody mass. Jean Daniel, in his noël *Ung gracieulx oiselet* (*c*1525), paired Gascongne with Mouton: 'Gascoigne y fut bien nommé, Et Mouton fort renommé'.

Six of Gascongne's eight known masses appear in two Cambrai manuscripts written in about 1527–8. This, and the existence of a document identifying him as a *magister* and priest in the diocese of Cambrai (*BrenetM*, pp.68–9), led Lesure and others to group him with Crispin van

Stappen, Louis van Pullaer and Johannes Lupi as a member of a Cambrai school functioning in the first half of the 16th century, but the lack of archival evidence connecting Gascongne with Cambrai considerably weakens the argument. Further, two of these masses, *Missa 'Pourquoy non'* and *Missa 'Myn hert'*, are found in earlier sources. The distribution of his music reinforces the association with the French court. Three masses are found in Vatican manuscripts connected with Pope Leo X (*d* 1521), another was published by Antico in 1521 alongside works by Mouton and de Silva, and the ten pieces in *GB-Cmc* Pepys 1760 are next to a large collection of music by Antoine de Févin, known to have been in the service of Louis XII.

Gascongne's reputation as a chanson composer rests mainly on his works for three voices. The Pepys manuscript contains a group of six three-voice chansons, all of which are based on a popular monophonic tune in the tenor. *Celle qui m'a demandé*, with its simple structure, running melismas, stereotyped cadential formulae and popular cantus firmus, is a typical Parisian *chanson rustique*. Lawrence Bernstein cited Gascongne and Févin as the original proponents of this genre, ranking Févin ahead of Gascongne in his ability to work more flexibly within the conventions of the technique. He noted that several of Gascongne's chansons, surviving only in Le Roy & Ballard's anthologies of 1578, exhibit the same forward-looking traits found in the best of those that appeared earliest.

WORKS

Edition: *Treize livres de motets parus chez Pierre Attaingnant en 1534 et 1535*, ed. A. Smijers and A.T. Merritt (Paris and Monaco, 1934–63) [S]

MASSES

Missa 'Es hat ein Sin', 4vv, *B-Br* IV 922 (Bs only, in Josquin's Missa 'Pange lingua'), *D-Mbs* F, *E-MO*, *F-CA*, *I-Rvat*; ed. in MMB, ix (1963) (opening quotes from Ockeghem's Missa 'Mi-mi')

PETER GRAM SWING

Gasdia, Cecilia (*b* Verona, 14 Aug 1960). Italian soprano. After winning the RAI Maria Callas competition in 1981, she sang Giulietta (*I Capuleti e i Montecchi*) in Florence. The following year she took over at short notice the title role of *Anna Bolena* at La Scala, and sang Amina (*La sonnambula*) at S Carlo. She has appeared throughout Europe and the USA, making her Metropolitan début in 1986 as Gounod's Juliet. Her repertory includes Verdi's Violetta, Gilda, Hélène (*Jérusalem*) and Desdemona; Puccini's Lauretta, Mimì, Musetta and Liù, as well as Alice (Salieri's *Falstaff*), Nedda, Teresa (*Benvenuto Cellini*) and Salome (*Hérodiade*). A specialist in bel canto, Gasdia excels particularly in such roles as Rossini's Zelmira, Armida, Hermione and Corinna (*Il viaggio a Reims*), all of which she has recorded, and Bellini's Beatrice di Tenda. She has a well-schooled voice, with a brilliant coloratura technique, and phrases stylishly.

ELIZABETH FORBES

Gaslini, Giorgio (*b* Milan, 22 Oct 1929). Italian composer, pianist and conductor. Having studied the piano from a young age, he began to appear at the age of 13 as a conductor and orchestral pianist specializing in light music, and in jazz groups. After the war, while establishing himself as a jazz musician, he completed his studies of the piano, composition and conducting at the Milan Conservatory (with, among others, Renzo Bossi, Antonino Votto and Giulini) and at the Accademia Musicale Chigiana, Siena (with Paul Van Kempen). Active for many years as a conductor of various musical groups and as a composer, his growing interest in jazz led him during the second half of the 1950s to attempt to combine jazz and classical music composition.

A key work was the octet *Tempo e relazione* (1957) – a piece in five movements based on two 12-note series – and from that point on Gaslini became recognized as a major figure of the Italian and wider jazz avant garde. His music continued to be characterized by a determination to integrate different idioms, including free jazz, serialism, pop and electronics. Alongside this 'multi-lingual' approach, set apart from the American Third Stream, he made manifest a political commitment to working-class and student left-wing movements after 1968. Gaslini's most important works include the suite *Nuovi sentimenti*, with Don Cherry, Gato Barbieri and Steve Lacy, and the jazz opera *Colloquio con Malcolm X*. He has frequently collaborated with Max Roach, Antony Braxton and, latterly, the Italian Instabile Orchestra. Gaslini has written a number of film scores, including that to Antonioni's *La notte*, and incidental music. He has also been important as a teacher, giving the first jazz courses in Italian conservatories, starting in Rome (1972), followed by Milan (1978). His musical ideas are summarized in *Musica totale* (Milan, 1975) which anticipates some of the most recent trends in overcoming ideological barriers between musical styles.

WORKS
(*selective list*)

Stage: Jab (jazz pocket op), Sanremo, 1965; Una specialità delle Cantine Verità (pocket op), Milan, 1967; Un quarto di vita (opera da strada, 2, Gaslini), Parma, 1968; Drakòn ballet, Palermo, 1969; Colloquio con Malcolm X (azione musicale, E. Capriolo), Genoa, 1970; Contagio, ballet, Milan, 1971; Mister O (jazz melodrama, V. Franchini), Verona, 1996; Carmen Graffiti, ballet, Milan, 1997

GIORDANO MONTECCHI

Gaspar de Padua [Gaspare de Albertis, Gaspare bergomensis]. *See* ALBERTI, GASPARO.

Gaspardini, Gasparo (*d* ?Verona, *c*1714). Italian composer. His *Sonate* op.1 (Bologna, 1683), for two violins, cello and organ continuo, place him as *maestro di cappella* at Verona Cathedral, where he remained until 1714. The *Sonate*, while favouring a four-movement plan, indicate that the alternation of slow and fast tempos of the Corellian sonata was by no means generally accepted, several concluding with extensive slow movements. Estienne Roger published an op.2 set with the same instrumentation (Amsterdam, *c*1701).

PETER ALLSOP

Gaspari, Gaetano (*b* Bologna, 15 March 1807; *d* Bologna, 31 March 1881). Italian musicologist, bibliographer and composer. From 1820 to 1827 he studied with Benedetto Donelli at the Liceo Musicale in Bologna, where he won

first prizes in piano and counterpoint, and from 1824 to 1827 he was organist at S Martino, Bologna. From 1828 to 1836 he was conductor of the municipal orchestra and *maestro di cappella* of the Collegiata at Pieve di Cento. In 1836 he became *maestro di cappella* at Imola Cathedral. From there he was recalled to Bologna in 1839 by his teacher, who was in poor health, to replace him at the Liceo Musicale and in the direction of the *cappella* of S Petronio. But because of special circumstances connected with the reorganization of the Liceo – of which Rossini was then effectively in control – and because of local opposition, he was unjustly deprived of the succession and at first had to be content with the position of chorus master at the Teatro Comunale. He then competed for and obtained the post of *solfeggio* teacher at the Liceo and finally in 1856 won the office of librarian and professor of music history in that institution, where he had for some time been director in all but name. In 1857 he became *maestro di cappella* at S Petronio. He was also a member of the Accademia Filarmonica of Bologna.

Gaspari was admired as a composer of liturgical music and wrote many scholarly works on the history of music in Bologna, most of which appeared in the journals of the historical societies of Bologna and Modena between 1869 and 1880. He is most famous for his work in classifying the material in the superb music library that he helped to form at the Liceo and which he indexed in a handwritten *Zibaldone musicale* which formed the basis of the *Catalogo della Biblioteca del Liceo musicale di Bologna*, i–iv (Bologna, 1890–1905/ *R*), v, ed. U. Sesini (Bologna, 1943/*R*). His collected writings are published in *Musica e musicisti a Bologna* (Bologna, 1969).

FABIO FANO/R

Gasparian, Djivan (*b* Solak, Armenia, 12 Oct 1928). Armenian *duduk* player. He began to teach himself to play the *duduk* (cylindrical double-reed instrument) at the age of eight. He performed as a soloist with the State Ensemble of Song and Dance of Armenia under the direction of T'at'ul Altunyan. In 1957 he won prizes in the International Performers' Competition at the 6th World Festival of Youth and Students and the All-Union Competition for Performers of Folk Instruments held in Moscow; he began touring in the same year, subsequently performing in festivals and concerts throughout Europe, Asia, Africa, Australia and North and South America, including the Third Asian Music Rotrum of the International Music Council in 1973, organised by UNESCO where he won first prize among the best musicians of Asia and Africa. His virtuoso technique earned him the nickname 'The Magician of the *duduk*'. He also played the *zuṙna*, the *shvi*, the *blul* and the clarinet.

In 1975 he played the *duduk* and the *zuṙna* with the Armenian PO in a recording of Avet Terterian's third symphony. He has also performed with the LSO, Los Angeles PO and Zürich Tonhalle Orchestra. He was named People's Artist of Armenia in 1978 and began to teach the *duduk* at the Yerevan Komitas State Conservatory in 1982; he graduated from the Conservatory in 1985 and continued to teach there until 1993. He collaborated with the Kronos Quartet on the CD *Night Prayers* (Elektra Nonesuch 9 79346–2, 1994), and other musicians with whom he has worked include Lionel Ritchie, Graeme Revell, Peter Gabriel and Michael Brook. He contributed to the soundtracks of several films including *The Crow*, *The Russian House* and *Dead Man Walking*. Several of his recordings feature the *duduk* in genres not previously associated with the instrument, including jazz.

ALINA PAHLEVANIAN

Gasparini. Italian family of musicians.

(1) **Francesco Gasparini** (*b* Camaiore, nr Lucca, 19 March 1661; *d* Rome, 22 March 1727). Composer and teacher. In 1682 he was active as organist at Madonna dei Monti in Rome, where he probably studied with Corelli and Pasquini. He was admitted to the Accademia Filarmonica, Bologna, as a singer on 27 June 1684, and as a composer on 17 May 1685. According to Hawkins, he and his brother (3) Michelangelo Gasparini were living as pupils in Legrenzi's house in Venice in 1686, but in 1687 Francesco was taking part in *accademie* in the Roman palace of Cardinal Benedetto Pamphili, both as a violinist and as a composer of arias and cantatas to texts by Pamphili himself. In 1689 he became a member of the Congregazione di S Cecilia and also played in a revival for Pamphili of Lulier's *S Beatrice d'Este*. At this time he probably also met Alessandro Scarlatti, and the two were later to demonstrate a mutual respect: Scarlatti sent his son Domenico to Venice in 1705, where he had lessons from Gasparini, and the two exchanged cantatas in 1712. Gasparini's first known operas were *Roderico* and *Olimpia vendicata*, both produced in 1686 at Livorno. In 1695 he published a set of cantatas. He must by this time have achieved some reputation, as on 5 June 1701 he was appointed to the important post of *maestro di coro* at the Ospedale della Pietà, Venice, in which city he met Vivaldi, Legrenzi, Pollarolo and Lotti. Gasparini was very successful in this post, which involved directing all the conservatory's musical activities. He expanded the staff (he engaged Vivaldi as violin master) and by 1707 the conservatory ranked as one of the best in Italy. With the move to Venice, Gasparini's career as an opera composer also began in earnest; often he wrote three or four new works in a year, most of them first performed in Venice.

On 23 April 1713 Gasparini was given six months' leave from the Pietà. He never returned but settled again in Rome (operas produced at Florence in Carnival and autumn 1715 may indicate an extended stay there). In July 1716 he succeeded Caldara as *maestro di cappella* to Prince Ruspoli, for whom he worked until 1718, living in an apartment in the Piazza di S Lorenzo in Lucina. In 1719 he transferred to a house owned by the Borghese family, and he is described in librettos of the period as a *virtuoso* 'del principe Borghese'. In 1718 he was admitted to the Arcadian Academy, with the name Ericreo. In 1719 a marriage contract was signed between his daughter and Metastasio (one of whose sonnets is addressed to Gasparini), but for unknown reasons the engagement was soon broken off. Gasparini's production of new operas continued fairly steadily at Rome and other cities until 1720. After that only a few new ones appeared, the last in 1724. In February 1725 he was named *maestro di cappella* at S Giovanni in Laterano, but he did not take up the post until June 1786; his assistant was Girolamo Chiti.

Gasparini at his best was a composer of the first rank. Burney's description of his cantatas – which are some of the most important of his time – as 'graceful, elegant, natural, and often pathetic' can be extended to much of his other music. These qualities rested on a profound technical skill, most obvious in the easy and frequent use of complicated canonic devices in his church music but also apparent from the mastery of free counterpoint in his other works (such as the set of brilliantly written chamber duets, in *GB-Lbl*). The arias in Gasparini's earlier operas are typical of the period in using a variety of formal types, but mostly within a da capo format; some arias in the later operas, however, show homophonic textures and melodic and rhythmic traits that make them forerunners of the work of the next generation. His recitatives were praised by Padre Martini; Haas saw him as a model for Handel in his dramatic treatment of accompanied ones. His sacred music includes works both in the strict style and in the modern concerted style with independent instrumental parts. Some of the solo sacred motets are virtually indistinguishable from his secular ones in form (except for the concluding alleluia) and expressive character; but that was typical of the time.

Gasparini was highly regarded as a teacher. Besides Domenico Scarlatti his pupils included Quantz, Platti and Benedetto Marcello, who sent him his *Estro poetico-armonico* for his criticism. *L'armonico pratico* is a practical manual of figured bass accompaniment for beginners with some musical knowledge. It was used throughout the 18th century, going into numerous editions, the last in 1802, and remains an important source of information about continuo realization at that time. Other theoretical essays by him survive in manuscript.

Because of confusion with Gasparo Visconti, called 'Gasparini', it was long thought that Francesco Gasparini had visited London in the first decade of the 18th century; two of his operas were performed there in 1711 and 1712. Chamber music published by Quirino Gasparini in the middle of the century has also been wrongly attributed to him.

WORKS

music lost unless otherwise stated

OPERAS

drammi per musica in three acts unless otherwise stated: dates are of first performance unless specified as dedication dates

VC – *Venice, Teatro S Cassiano*

Olimpia vendicata, Livorno, ded. 6 Dec 1686
Roderico (G.B. Bottalino), Livorno, Dec 1686, arias *I-MOe*; rev. Rome, Pace, 25 Jan 1694, arias *D-Bsb*, *F-Pn*, *I-Rvat*

THEORETICAL WORKS

L'armonico pratico al cimbalo (Venice, 1708/*R*); Eng. trans. F.S. Stillings, as *The Practical Harmonist at the Keyboard*, ed. D.L. Burrows (New Haven, CT, 1963)
Guida, ossia Dizionario armonico, in cui si trova il modo di ben modulare (MS, *I-Bc*)
Li principii della composizione (MS, *D-Bsb*, *Hs*)

(2) Paolo Lorenzo Gasparini (*b* Camaiore, nr Lucca, 10 Aug 1668; *d* ?Rome, after 1725). Violinist and viola player, younger brother of (1) Francesco Gasparini. He

worked as a string player for Cardinal Pietro Ottoboni in Rome between 1699 and 1705 and until 1719 for Prince Ruspoli, for whom he was active also as a copyist. From 1716 to 1726 he was a member of the Congregazione di S Cecilia and took part in all the most important musical functions.

(3) **Michelangelo** [Michiel Angelo] **Gasparini** (*b* Lucca, ?*c*1670; *d* Venice, *c*1732). Composer, singer and teacher, younger brother of (1) Francesco Gasparini. He probably studied with Legrenzi in Venice, where he seems to have spent most of his career. From 1 August 1687 until December 1689, and again from 23 September 1691 until his death, he sang soprano (later alto) in the choir of S Marco; Gaetano Fracassini was elected to succeed him on 31 March 1733. In 1689 Gasparini was a founder member of the Sovvegno di S Cecilia in Venice, and in 1709 he served as the society's 'prior'. Of his seven known operas (the music of which is lost) the most successful was apparently *Amore e maestà*, performed at Pratolino, near Florence, in 1715 and revived as *Arsace* in Venice (1718), Modena (1719 and 1744), Padua (1722) and Vicenza (1731). Gasparini was also well-known as a singing teacher; his pupils included Faustina Bordoni.

DENNIS LIBBY/ANGELA LEPORE (1: text) ANGELA LEPORE (1: work-list, bibliography, 2, 3)

Gasparini, Domenico Maria Angiolo. *See* ANGIOLINI, GASPARO.

Gasparini, Quirino (*b* Gandino, nr Bergamo, 1721; *d* Turin, 30 Sept 1778). Italian composer. An abbé, he studied composition first with G.A. Fioroni, *maestro di cappella* of Milan Cathedral, then with Martini (41 letters to Martini are in *I-Bc*). According to a document in the capitular archives in Turin, he lived in Brescia, Venice (as a *maestro di cappella*) and Bologna, where in 1751 he became a member of the Accademia Filarmonica (test piece in *I-Baf*). His opera *Artaserse* was performed in Milan in 1756. From 1758 he was music master to Count D'Aziano of Vercelli, travelling in his retinue to Rome and Naples. In 1759–60 he unsuccessfully sought the post of *maestro di cappella* at S Maria Maggiore in Bergamo. In 1760 he was named *maestro di cappella* of Turin Cathedral, where he worked until his death, devoting himself mainly to the religious life of the city (the *Liber diarius* of the Carmelites refers in several places to Gasparini's contributions and in particular reports that the feast of the Madonna del Carmine in 1764 was celebrated 'with grand music at High Mass and at Vespers by the famous Abbé Gasparini, an excellent Venetian *maestro di cappella*').

In 1767 Gasparini presented in Turin his opera *Mitridate* (to the libretto later set by Mozart in Milan). A letter, dated 2 January 1771, from Leopold Mozart to Martini relates that Mozart's singers (among them the famous Antonia Bernasconi) first wanted to use some arias and the duet 'Se viver non degg'io' from Gasparini's setting; in fact an aria of his ('Vado incontro', Act 3) was in the event sung by Guglielmo d'Ettore, as Mithridates, and is included in the standard Mozart text. Later that month the two Mozarts met Gasparini in Turin; references in Leopold's travel notes from 1771 and in two letters from 1778 prove that the relationship was a good one.

Further proof of how much Gasparini was esteemed as a composer is the motet *Adoramus te* (K327/Anh.A10), which was believed to have been written by W.A. Mozart until 1922, when Hermann Spies discovered it to be a work of Gasparini (in 1962 Wolfgang Plath proved that the copy had been made by Leopold, not by Wolfgang, as had been thought). The same manuscript contains the motet *Plangam dolorem meum*, also by Gasparini, whose skilful treatment of the voices and full choral sound may have influenced Mozart's early religious music. Gasparini himself wrote texts for many of his sacred works (especially the motets), paraphrasing the scriptures. Only a few instrumental works survive, including two sets of trios published in Paris and London. An unpublished concerto for harpsichord or organ tends toward the *galant* style, but has an intensely pathetic slow movement in F minor.

GIORGIO PESTELLI

Gasparo da Salò [Bertolotti] (*b* Salò, bap. 20 May 1540; *d* Brescia, 14 April 1609). Italian maker of violins, violas and other bowed instruments. He came from a musical family that had a tradition of instrument making: his father and uncle were known as *i violini*. After his father's death, Gasparo moved permanently from Salò to nearby Brescia, a centre of bowed string and keyboard instrument making. He married Isabetta Casetti in 1564. It has been suggested that he served an apprenticeship with Girolamo di Virchi, but it is more likely that he learned his craft in his family workshop in Salò. By 1563 he was living in the via Palazzo Vecchio del Podestà, quite far from Virchi's residence. The two were friends, however, and Virchi stood as godfather to Gasparo's son, Francesco, in 1565. Gasparo settled in Contrada delle Cossere in 1575. His activities are recorded in a number of city documents from the period 1563–1609, where he is described variously as *maestro di violini*, *magister instrumentorum musicorum* and *maestro di strumenti musici*. At least three makers are known to have studied with him, in addition to his son: Alessandro di Marsiglia, G.P. Maggini and Giacomo Lafranchini, and he employed a workman named Battista.

While the 19th-century suggestion that Gasparo invented the violin is unconfirmed, it is equally difficult to find documentary evidence that the Cremonese master Andrea AMATI was the inventor. The existence of a school of bowed string instrsument making in Brescia is continuously documented from 1495–9, when a set of viols was made by an anonymous maker for Isabella d'Este Gonzaga. Gasparo is the brilliant successor of the style originated by ZANETTO DA MONTICHIARO, with whose son, Peregrino, he was probably acquainted.

Most of Gasparo's output, judging from existing instruments, took the form of tenor violas (*see* VIOLA, fig.1*a*). He also made viols of all sizes (including a bass viol held in the Ashmolean Museum, Oxford), several violins, supposedly at least one cello, at least one cittern and several double basses. His reputation for crude workmanship is largely a result of the many nondescript 16th- and 17th-century instruments that have been erroneously attributed to him: in fact his designs were always meticulous and his craftsmanship of high quality. Among his characteristics are rather elongated soundholes (foreshadowing Guarneri), noticeable undercutting in the carving of his scrolls, and sometimes two rows of purfling or an inlaid decoration. His violas, many now considerably reduced from their original size, are regarded by many players as tonally better than any other. They have a full and reedy tone quality, combined with a stronger response than many Cremonese instruments. The double basses have always been eagerly sought after, their most famous champion being Domenico Dragonetti, whose three-string Gasparo bass is now in S Marco, Venice (for a portrait of Dragonetti playing this instrument *see* DRAGONETTI, DOMENICO). It is thought that Gasparo played a major role in the development of the 16′ voice of the viol and violin families, and that he was influenced in this by the 12′ and 16′ registers already being included in organs built by the neighbouring Antegnati family. When Gasparo da Salò died his leading position as a maker in Brescia was taken over by his pupil GIO PAOLO MAGGINI, and his trade was also continued by his son Francesco until at least 1615.

CHARLES BEARE/UGO RAVASIO

Gaspar van Weerbeke. *See* WEERBEKE, GASPAR VAN.

Gasperini, Guido (*b* Florence, 7 June 1865; *d* Naples, 20 Feb 1942). Italian musicologist and composer. He studied the cello with Jefte Sbolci and composition with Guido Tacchinardi in Florence. Developing an interest in early music, he gave several public lectures in Florence (1890–1903), which he repeated elsewhere in Italy and which he published as *Storia della musica*. He held posts as professor of music history and librarian at the Parma Conservatory (1902–24) and librarian of the Naples Conservatory (1924–35). While at Parma he formed and directed a schola cantorum. He also founded the Associazione dei Musicologi Italiani (Ferrara, 1908), which in 1909 became part of the IMS but was disbanded after his death.

After two studies on the notation of 16th-century vocal and instrumental music, Gasperini published his *Storia della semiografia musicale* (1905); he was the only Italian working in this field at the time and one of few scholars who had attempted a history of notation. In 1911 he

began to edit one of the most important bibliographical tools for the study of Italian music, a catalogue of all the music in public and private libraries in the country, which, working against Italian individualism, required the collaboration of musicologists and librarians. By 1938 Gasperini had produced catalogues for 15 cities; the series was discontinued by his death. His compositions include a ballet and some chamber and vocal music from the years 1890–95.

CAROLYN GIANTURCO

Gassenhauer (from Ger. *Gasse*: 'alley' and *hauen*: 'to hew or beat', 'to walk'). A German street song or urban folksong. The term 'Gassenhauer' occurs in a musical context as early as 1517 (Aventin: '*Gassenhawer* that are played on the lute') and in a title in 1535 (Christian Egenolff's *Gassenhawerlin*). Hans Sachs mentioned the *Gassenhauer* along with other types of song (psalms, songs of love and war etc.) in the preface to a conspectus of his poems in 1567 (*Summa all meiner Gedicht vom MDXIII. Jar an bis in 1567 Jar*), implying that by that date it was a recognized category. Indeed, the word had been defined by J. Maaler in *Die teütsch Spraach* (Zürich, 1561) as 'a low song sung in the street, a street song'. Before the term 'Volkslied' became widely known (it was coined by Herder in 1773), *Gassenhauer* was often used in a broad sense to refer to popular or folk melodies, although 17th- and 18th-century usage normally indicates that the writer considered the term synonymous with nocturnal street serenades (cf the 16th-century *Kassaten*, *Gassatim* or *Gassatum*, from which are probably derived *Gassatio* and *Cassatio*: 'cassation'; Praetorius mentioned *Gassaten* in *Syntagma musicum*, iii, 1618). *Gassenhauer* is now generally but not invariably used in a pejorative sense for a song popular among city-dwellers, a usage clearly attested in J.C. Adelung's late 18th-century German dictionaries, and in T. Heinsius's *Volkthümliches Wörterbuch* (ii, Hanover, 1819, 288), where it is defined as 'a usually low [*schlechtes*] or very well-known song sung on the streets by the populace [*Pöbel*]'. The term is probably most familiar from Beckmesser's intended criticism of Sachs in *Die Meistersinger von Nürnberg*, Act 1 ('Gassenhauer dichtet er meist').

There were several attempts in Germany in the 20th century to describe and define the relationship between *Gassenhauer*, *Volkslied* and *Schlager* ('hit'), and although no general agreement was reached, the most fruitful attempts were those that sought to integrate considerations of purpose, and sociological and historical significance, with purely philological considerations. The *Schlager* (a term first used in 1881) is normally ephemeral; the *Gassenhauer*, too, usually has a rather short life, although some examples share the longevity of the *Volkslied*. Sociological considerations provide the firmest basis for a distinction between the street song and the folksong. The former is by its nature urban, the latter rural; by extension, the former is artificially promulgated, the latter naive and traditional. The social connotations of the three song types permit only certain transfers of repertory: a *Volkslied* can become a *Gassenhauer* (frequently after a process of adaptation and regularization) but a *Gassenhauer* cannot become a *Volkslied*. A *Gassenhauer* can, however, become a *Schlager*, while a *Volkslied* cannot, except at the price of loss of integrity.

Early German operas from Hamburg show many examples of the closeness of the aria or song to the *Gassenhauer*, particularly in the frankly popular style of many of the melodies in comic scenes. Keiser's preface to his *Almira* arias (1706) complains of 'students of theatrical composition who take pleasure in the invention of a *Gassenhauer* by village fiddlers, their colleagues', a reference apparently aimed at Handel. Many songs by Postel, Keiser and others found their way into the streets via broadsheets and songsheets. The songs that Bach combined in the final quodlibet of his Goldberg Variations were *Gassenhauer*, and Sperontes' immensely popular collection of songs, the four-volume *Singende Muse an der Pleisse* (Leipzig, 1736–45), contains a whole series of popular melodies, including dances, songs and instrumental numbers.

Several songs from the Singspiele of Hiller and his contemporaries likewise took on the broad familiarity of the street song, as had songs from the Viennese popular theatre of the time of Kurz-Bernardon and Philipp Hafner. There are many later examples of songs becoming *Gassenhauer* from the scores of Wenzel Müller, Kauer and other minor masters of the Singspiel, continuing at least until the time of Flotow, Lortzing and Suppé. The popular style and moralizing tone of some of these examples bring them close to the *Bänkelgesang* (fairground singers' ballads and moral tales in music).

The Bridesmaids' Chorus from *Der Freischütz*, which Weber headed 'Volkslied' in the score because it is based on a popular dance, is an example of an operatic number that rapidly became a *Gassenhauer* – as readers of Heine's *Briefe aus Berlin* (1822) will recall. Examples of coarser urban songs from the first quarter of the 19th century that achieved great popularity are *O du lieber Augustin* and *Ein Schüsserl und ein Reinerl* in Vienna; in the previous century *Malbruk s'en va t'en guerre* enjoyed widespread fame. Apart from being quoted or used as the basis for sets of variations by many composers (e.g. Mozart, Haydn, Beethoven and Hummel), these *Gassenhauer* were frequently provided with new and sometimes

absurdly unsuitable texts. The range of the street song is extremely wide, from melodies of distinction to banal and sentimental ditties in their music, and from simple, direct storytelling via satire to bathos, prurience or obscenity in their texts. Many *Gassenhauer* have a catchy refrain (in this respect they are close to the *couplet*); the *Bänkelgesang* may also have such a refrain, but its text is meant to be taken seriously, for it carries a moral message of actual relevance, while in the *Gassenhauer* story or moral is incidental, if present at all.

In the course of the 19th century industrialization and the growth of urban communities exaggerated the distinction between *Volkslied* and *Gassenhauer*. The latter continued to derive from the more popular melodies of serious composers, especially songs from Singspiele and operettas, as well as from marches and dances. Although both text and melody were occasionally taken over into *Gassenhauer*, the more usual practice was to equip the chosen melody with new words, usually either sentimental or crassly inappropriate. These fresh and often witty parodies are well represented in Lukas Richter's invaluable study of the Berlin *Gassenhauer*. Even the 20th-century use of mechanical methods of disseminating music, such as radio, gramophone and cheap sheet music, did not prevent the continuation of local *Gassenhauer* traditions – the Viennese *Gassenhauer* tended to be quite different from those of Berlin, Munich or Cologne. Perhaps the clearest distinction between the street song and the popular hit song is that the former is local and frequently nostalgic (referring to 'die gute alte Zeit'), while the latter prides itself on what may at times be a spurious modernity.

Although some research has been done into the street songs of particular cities, there is no full-scale study of the subject. In all the main centres, however, there are clear links between the *Gassenhauer* and opera or Singspiel songs, dances and marches; from the 1850s onwards the operettas of Offenbach were a particularly favourite source of street songs. The most tuneful melodies of the latest hit were equipped with racy texts that usually had no connection at all with their original situation. Although the long history of the *Gassenhauer* is probably of more interest to the sociologist than to the music historian, the best examples have a vitality, directness of expression and even memorability that compel attention.

PETER BRANSCOMBE

Gásser Laguna, Luís (*b* Barcelona, 1951). Catalan composer, lutenist and guitarist. He graduated as a guitar teacher at the Barcelona Conservatory (1974) and went on to study the lute, thereafter furthering his studies at the Schola Cantorum Basiliensis (1982–3). He completed his doctorate in musicology at the University of Stanford (1991).

The broad range of his musical interests have spanned performing, composition, teaching and musicology. At first he concentrated on the guitar, giving first performances of new works and making recordings. Since 1978 he has concentrated mainly on the instruments of the lute family. He has attended conferences and performed concerts in Europe and North America, both as a solo artist and as a member of a group.

He has composed solo and orchestral pieces and works for the computer. His compositions have been published in Spain and Germany. His research has included books on Luys Milán and Mestres Quaderny, and several articles. His varied interests enable him to transmit valuable ideas and experiences through his teaching. In 1983 he began the first lute course in Spain at the Barcelona Conservatory, where he taught guitar between 1974 and 1988. Since 1992 he has been an associate professor at Barcelona University.

FRANCESC TAVERNA-BECH

Gasser, Ulrich (*b* Frauenfeld, 19 April 1950). Swiss composer and flautist. He studied the flute at the Winterthur Conservatory, continued his studies with André Jaunet at the Zürich Conservatory, and was taught composition by Klaus Huber at the Staatliche Hochschule für Musik, Freiburg. Besides his activities as a composer he teaches at the Kreuzlingen teacher training college. He is a member of the Zürich Composers' Secretariat and since 1994 has been chairman of Schweizer Musik Edition. His name soon became known through his participation in large festivals (including Donaueschingen, Kassel, Venice and the Darmstadt summer courses) and his awards for composition in several competitions (including the first prize of the Stuttgart Bach Academy in 1985).

Gasser's compositions are consistently marked by extra-musical features, which are not motivated by a programmatic function but aim to extend the tonal language. Many of his pieces have been inspired by literary texts and by works of visual art; the 'sounding stones' of the Swiss sculptor Arthur Schneiter have featured in his work several times since the end of the 1980s. Almost half his works are on spiritual subjects, with the Passion of Christ occupying a central position, while liturgical works are more marginal. From his early works onwards Gasser has employed strict systems of composition, and since the 1980s he has applied them to consonant intervals, so that his later works often convey effects of tonal colour. He was awarded the Thurgau cultural prize in 1991 for his oratorio *Der vierte König*, from the story of the same name by Edzard Schaper.

PATRICK MÜLLER

Gassmann, Florian Leopold (*b* Brüx [now Most], 3 May 1729; *d* Vienna, 20 Jan 1774). Bohemian composer. He may have been educated at the Jesuit Gymnasium in Komotau (now Chomutov). The most reliable biographical sources name the *regens chori* at Brüx, Johann Woborschil (or Jan Vobořil), as his teacher in singing, the violin and the harp. Against his father's wish he decided to make music his profession and left home as a boy, making his way to Italy where he may have studied with Padre Martini. No details of his service under Count Leonardo Veneri in Venice are known. The first datable musical event of Gassmann's life was the production of his opera *Merope* at the Teatro S Moisè, Venice, in Carnival 1757. His operatic success in Italy led to his being called to Vienna as ballet composer and successor to Gluck (1763). During the year of mourning on the death of Franz I (1765–6) the Viennese theatres were closed, and Gassmann again visited Venice, where his opera *Achille in Sciro* was produced at the Teatro S Giovanni Grisostomo. On this trip he met Salieri and brought him back to Vienna as a pupil. To the end of his life Salieri held Gassmann in high esteem. In 1770 Gassmann wrote *La contessina*, his most popular opera, for a meeting of Joseph II and Frederick the Great in Mährisch-Neustadt; earlier in the same year he had been to Rome for the production of his opera *Ezio*.

Gassmann was the founder of the oldest Viennese musical society, the Tonkünstler-Societät, of which he was the first vice-president. His oratorio *La Betulia liberata* was written for one of the society's first public performances (29 March 1772). On 13 March 1772 he succeeded Georg von Reutter (ii) as Hofkapellmeister, immediately beginning an important reorganization of the court chapel's personnel and library. Burney, who already knew some of Gassmann's operas from productions in Italy, attended a performance of *I rovinati* in Vienna in 1772, and he published praise of the manuscript string quartets he brought back to England. Gassmann died as a result of a fall from a carriage in 1774. Empress Maria Theresa was godmother to his second daughter, born after his death.

Gassmann's music was generally highly regarded by such 18th-century musicians as Burney, Gerber and Mozart; his operas were quite popular, receiving performances in places as far apart as Naples, Lisbon, Vienna and Copenhagen. Particularly in his two most famous comic operas, *L'amore artigiano* and *La contessina*, Gassmann's orchestra carries on the music in a continuous fashion, directing the dramatic action strongly toward the ensemble finale. In Vienna, his name was closely associated with Gluck's. Several writers mention the overriding importance of the orchestra in Gassmann's operas. Although the characters and situations in his librettos (many by Goldoni) are generally stock types with links to the *commedia dell'arte*, Gassmann's music imbues them with a dramatic vividness that is far from conventional. His choices of tempo and metre, and the melodic and rhythmic design of his themes, all aim to define character and further the drama. In the early operas, Gassmann favoured tuneful, italianate melodies with simple chordal accompaniments, but in his later work the orchestra plays an increasingly important role, contributing rhythmic and melodic figures that help to delineate the dramatic action. The sinfonia of *La casa di campagna* even provides a programmatic sketch of the opera's plot. Gassmann's use of woodwind is especially varied and resourceful, and the ritornellos in the da capo arias of his *opere serie* are often extensive. Particularly in his ensembles, Gassmann turned

the relative formal freedom of *opera buffa* to dramatic effect. He often used a multi-sectional ensemble finale, for example, with sudden shifts of tempo, key and metre, to mark the stages in a dramatic crescendo. He lavished particular care on the large-scale planning of these dramatic climaxes; in *L'amore artigiano*, for instance, the finales of all three acts are greatly expanded from Goldoni's original libretto. In his memoirs, Salieri describes his own first attempt at composing an opera, remarking that he followed the procedures he had seen Gassmann employ; in composing the first finale, he claims to have spent three hours sketching the sequence of metres and keys before writing a single note.

Apart from the operas and 24 of the concert symphonies, Gassmann's works can be placed in only approximate chronological order. From the distribution of the extant manuscript copies it seems reasonable to assume that the trios come from his Italian period. Kosch believed that Gassmann wrote most of the church works during his first Viennese years. Most of the concert symphonies seem to have been written in 1765 or later, and at least some of the quartets and quintets are also late works.

Besides his operas, Gassmann's greatest achievements seem to be among his symphonies; the chamber music appears to be in a more conservative vein. The concert symphonies are divided almost evenly between three- and four-movement works, of which most of the three-movement ones are the earlier. In some respects a distinctly original composer, Gassmann experimented in his symphonies in a number of ways. His choice of keys sometimes includes rare ones (A♭ major, B minor), and one three-movement symphony in D (H7) has a middle Andante in G minor. Gassmann's experimental attitude also extended to formal designs; in a first movement, the recapitulation often occurs in the subdominant or relative minor. Among other instances of unconventional treatment, examples can be found of a first-movement coda (H86), the harmonic connection of one movement to the next (H3, 86, 157) and a fugal first movement (H65). Five concert symphonies (and the overture to *Amore e Psiche*), all written before 1770, have slow introductions to their first movements.

Gassmann's lyric gift was considerable, as can be seen from ex.1, the first theme of one of his late symphonies

Ex.1

(H85), and the similarity between the first theme of his Requiem (ex.2) to that of Mozart's is close enough to be

Ex.2

striking. In spite of his ability to write memorable melodies, Gassmann often reduced the number of themes in his expositions by means of thematic derivations, including repetitions of a fragment of the primary theme (H153), transposition with a new accompaniment (H137) or rhythmically related motifs (H161). Although rhythmically Gassmann's early works strongly reflect the influence of the Italian opera overture, his later works exhibit more rhythmic planning. For example, successive sections in the exposition of the first movement of H86 (1769) show a progressive increase in the proportion of semiquavers, resulting in heightened rhythmic tension throughout the exposition. It would perhaps be overstating the case to characterize Gassmann as a brilliant orchestrator; but he was consistently sensitive to the possibilities of the orchestral ensemble, such as giving obbligato passages to the wind or lower strings (as in H15) or dividing statement-and-answer ideas between two instruments (H1).

Gassmann's two daughters, Maria Anna Fux (*b* Vienna, 1771; *d* Vienna, 27 Aug 1852) and (Maria) Therese Rosenbaum (*b* Vienna, 1 April 1774; *d* Vienna, 8 Sept 1837), studied music with his protégé, Salieri, and became opera singers of repute. Therese was soprano soloist for the première of Haydn's *Die Sieben letzen Worte unseres Erlösers am Kreuze* in 1797, and sang the Queen of Night at the first Kärntnertortheater production of *Die Zauberflöte* in 1801. She married Joseph Carl Rosenbaum (1770–1829), a secretary to Prince Esterházy, in 1800.

GEORGE R. HILL (with JOSHUA KOSMAN)

Gassner, Ferdinand Simon (*b* Vienna, 6 Jan 1798; *d* Karlsruhe, 25 Feb 1851). Austrian composer and writer on music. In 1812, four years after moving to Karlsruhe, he became a member of the Hofkapelle, and during this time studied the violin and attended the Gymnasium. His abilities were recognized by the composers Johann Brandl, Franz Danzi and Friedrich Fesca, and in 1816 his opera *Der Schiffbruch* was performed at the court theatre. His reputation led to his appointment the same year as a violinist at the newly built National theater in Mainz, where he also became deputy kapellmeister. He studied composition with Gottfried Weber, with whom he maintained a long friendship. In 1818 he was appointed music director at the University of Giessen, where he lectured on music theory for six years. He also conducted, taught singing and founded a Gesangverein that performed oratorios at music festivals that he organized. He returned to Karlsruhe in 1826 to rejoin the Hofkapelle as violinist, and from 1829 also taught singing. In 1830 he was appointed music director and chorus director at the Hoftheater.

Gassner is best remembered for his writings and editorial work, although he also composed lieder, several cantatas and oratorios, operettas, overtures and ballets. He edited the supplementary volume of Schilling's *Encyclopädie der gesammten musikalischen Wissenschaften* (1842) as well as the one-volume version of this work, the *Universal-Lexikon der Tonkunst* (1849). He contributed many articles to music journals and newspapers, including *Cäcilia* and *Musikalischer Hausfreund* and in 1840 founded the *Zeitschrift für Deutschlands Musik-Vereine und Dilettanten* to raise the level of musical taste among the general public. He collaborated in the organization of the first Salzburg Mozart Festival in 1842, and the same year he began planning a biography of Beethoven based upon unpublished Beethoven manuscripts left to him by the music editor and publisher Anton Gräffer, a project he never completed.

SUZANNE M. LODATO

Gast, Peter [Köselitz, Johann Heinrich] (*b* Annaberg, 10 Jan 1854; *d* Annaberg, 15 Aug 1918). German composer. He came from a wealthy middle-class family and, though he began a commercial training, was allowed to attend the Leipzig Conservatory (1872–5), where he studied composition under E.F.E. Richter. In 1875 he studied philology, philosophy and the history of civilization at Basle University, where Burckhardt and Nietzsche both

taught, and he became Nietzsche's disciple, and later his friend and secretary. From 1878 Gast lived for many years in Venice; after Nietzsche's death in 1900 he set up the Nietzsche Archive at Weimar and worked there until 1910, returning then to Annaberg to compose and to edit the philosopher's letters.

Gast's music was highly praised by Nietzsche, some of whose own compositions he revised. In a letter to Overbeck (October 1882) Nietzsche called Gast 'a new Mozart', and he promoted Gast's operas as the perfect antidote to Wagner. Despite such support Gast's works hardly became known outside a limited circle of admirers. His opera *Der Löwe von Venedig* (based on the libretto of Cimarosa's *Il matrimonio segreto*, and published in vocal score in 1901) was performed at Danzig in 1891 under the title *Die heimliche Ehe*. It had a limited success and was revived, without provoking much interest, at Chemnitz in 1933; it is in the post-Wagnerian comic tradition of Humperdinck and Wolf-Ferrari and anticipated the renewal of interest in 18th-century *opera buffa*, without itself amounting to much more than a string of lyrical melodies. Gast also composed incidental music to Goethe's *Scherz, List und Rache* (1881, a light touch in contrast to Gast's earlier, unfinished Wagnerian-style music drama *William und Siegeher*, 1879), two other operas, orchestral and chamber music, choral works and about 50 songs.

ALFRED LOEWENBERG/DAVID CHARLTON/CHRISTOPHER FIFIELD

Gastatz [Gastharts], **Mathias.** *See* GASTRITZ, MATHIAS.

Gastoldi, Giovanni Giacomo (*b* Caravaggio, nr Cremona, *c*1554; *d* 4 Jan 1609). Italian composer. He is recorded for the first time at Mantua in 1572 as a sub-deacon at the Palatine Basilica of S Barbara. In the following year he was promoted to the position of deacon, a post which he held until at least 1574. At the end of 1575, shortly before being ordained, Gastoldi was granted a *mansionaria* in S Barbara. From September 1579 until August 1587 he taught counterpoint to the novices at the basilica; the records mention him as a singer for the first time in 1581. In 1582 Cardinal Carlo Borromeo requested that Gastoldi be allowed to enter his service in Milan; Duke Guglielmo Gonzaga replied that on no account would he allow himself to be deprived of Gastoldi's talents. Both in that year, and in 1585–6, Gastoldi acted as *maestro di cappella* in place of Wert, who had fallen ill; in 1588 he succeeded Wert as *maestro di cappella*, a post that he retained until his death. For the performance of Guarini's *Il pastor fido*, given in 1598, Gastoldi composed the *Ballo della cieca* (II; ii), a notoriously difficult moment in the play which had defeated earlier attempts to produce it; Gastoldi's setting was published in his *Quarto libro de madrigali* of 1602. One of his last commissions at the court was to compose music for one of the *intermedii* devised to accompany Guarini's *L'Idropica*, performed in 1608 as part of the extensive celebrations marking the marriage of Prince Francesco Gonzaga to Margarita of Savoy. In his will Gastoldi left his collection of sacred music to the chapter of S Barbara and his editions of madrigals to Fulvio Gonzaga, Marchese of Vescovato and the dedicatee of the *Messe e motetti . . . libro primo* of 1607.

Gastoldi's most popular compositions during his lifetime, and for some time after his death, were his ballettos, of which he published two sets: one for five voices and one for three. The five-voice collection, published in 1591, was reprinted some 30 times, both in Venice and north of the Alps (the last as late as 1657). The success of these works must be attributed to their simplicity and tunefulness. They are cast in two repeated sections each of which finishes with a refrain; their textures are strongly homophonic, and according to the title-page they were to be sung, played and danced. Each balletto bears a characterizing title (e.g. 'Il Piacere', 'La Bellezza', 'Amor Vittorioso'), but there is no attempt to represent these characteristics in the music, and indeed it would be hard to do so given the limitations of the genre. The book finishes with a six-voice mascherata and an eight-voice chorus; both are probably remnants of theatrical works. The three-voice ballettos, although less frequently reprinted, were still enormously popular. They are written in a style similar to that of the earlier collection (which are effectively conceived as trios with the inner parts added to fill out the texture), and like them were intended to be danced. A fondness for the lighter styles of writing is also evident in other secular publications such as the *Primo libro de madrigali a sei voci* (which concludes with another theatrical piece, the *Danza de pastori* written for two four-voice choirs) and the two books of canzonettas.

Despite the undoubted popularity of the ballettos, most of Gastoldi's efforts as a composer went into the composition of sacred music, some of which also found favour in the market. This aspect of his production, sometimes overlooked, not only reflects his career at S Barbara, but also his commitment to Counter-Reformation idealism of the kind advocated by Carlo Borromeo, with its emphasis on accessibility. The *Missarum quatuor vocibus liber primus*, for example, is designed for the resources and capabilities of a modest choir, while the *Psalmi ad vesperas in totius anni*, which was reprinted five times, relies on a mixture of homophony and simple counterpoint, and shows little interest in chromatic inflection, even in the *De Profundis*; this book includes Wert's seventh-tone *Magnificat* setting and is dedicated to the Abbot of S Barbara. Homophony also predominates in the six-voice *Salmi intieri . . . libro secondo*, sometimes fused with falsobordone passages as in Monteverdi's Vespers of 1610. Most popular of all was his *Integra omnium solemnitatum vespertina psalmodia*, settings of the most frequently encountered psalm texts, which was reprinted as late as 1705. His simplest are the two-voice psalms of 1609, a sequence of 14 settings together with a *Magnificat*, while the 1601 collection for eight voices uses double-choir and alternatim techniques; a speciality of S Barbara practice. These publications suggest that Gastoldi was aiming at a wide market which included, as something of a priority, choirs of modest ambitions. The *Messe e*

motetti, on the other hand, are explicitly described as a monument to the music performed at Porticuolo (now Portiolo). The contents are grander in manner and come equipped with an organ score.

WORKS

published in Venice unless otherwise stated

SACRED VOCAL

Sacre lodi a diversi santi con una canzona al . . . S Francesco, 5vv (1587)
Psalmi ad vesperas in totius anni solemnitatibus, 4vv (1588[7])
Completorium ad usum S Romanae Ecclesiae perfectum sacraeque; illae laudes, quibus divinum terminatur officium, 4vv (1589)
Sacra omnium solemnitatum vespertina psalmodia, cum beatae virginis cantico, alternis versiculis concinenda, 6vv (1593)
Completorium perfectum ad usum Sanctae Romanae Ecclesiae sacraeque illae laudes, quibus divinum terminatur officium . . . liber secundus, 4vv (1597)
Magnificat per omnes tonos, videlicet primus, & secundus chorus, 4vv (1597)
Integra omnium solemnitatum vespertina psalmodia, cum cantico beatae virginis, 5vv (2/1600)
Messe . . . libro primo, 5, 8vv (1600)
Tutti li salmi che nelle solennita dell'anno al vespro si cantano, con duoi cantici della Beata Vergine uno del settimo tuono, & uno del secondo tuono, che risponde in eco, 8vv (2 choirs) (1601); Magnificat ed. in AMI, ii (1897/*R*)
Missarum . . . liber primus, 4vv (1602)
Vespertina omnium solemnitatum psalmodia . . . liber secundus, 5vv (1602)
Messe et motetti . . . libro primo, 8vv, org, op.30 (1607)
Salmi intieri che nelle solennita dell'anno al vespro si cantano, con il cantico della Beata Virgine . . . libro secondo, 6vv, bc (org) (1607)
Officium defunctorum integrum, 4vv (1607)
Salmi per tutti li vespri de l'anno, commodi, & facili per introdure i figliuoli a cantare in compagnia, 2vv (1609)
Salmi per tutto l'anno, 5vv, bc (ad lib) (Bologna, 1673) [repr. of vol. now lost]
Psalm, 5vv; 2 litanies, 8vv, bc; 3 motets; 12 other works: 1592[3], 1608[13], 1614[1], 1619[6]

Missa die Jovis, 5vv; Passione secondo S Giovanni, 6vv; falsobordone: *I-MAc, Mc*

SECULAR VOCAL

Canzoni . . . libro primo, 5vv (1581)
Il primo libro de madrigali, 5vv (1588)
Il secondo libro de madrigali, . . . con un dialogo, & una mascherata, 5, 7, 10vv (1589)
Balletti, 5vv, con li suoi versi per cantare, sonare, & ballare; con una mascherata de cacciatori, 6vv, & un concerto de pastori, 8vv (1591); ed. in Le pupitre, x (Paris, 1968); ed. H.C. Schmidt (New York, 1970)
Il primo libro de madrigali, con una danza de pastori, 6, 8vv (1592); 2 ed. in AMI, ii (1897/*R*)
Canzonette, con un baletto nel fine, 3vv (1592, repr. 1595 as Canzonette . . . libro primo)
Balletti, con la intavolatura del liuto, per cantare, sonare, & ballare, 3vv (1594)
Canzonette . . . libro secondo, 3vv (1595, repr. 1615[17] incl. works by A. Savioli); ed. G. Vecchi (Bologna, 1959)
Il terzo libro de madrigali, 5, 6, 8vv (1598)
Il quarto libro de madrigali, 5, 9vv (1602); 1 ed. in *NewcombMF*
Concenti musicali con le sue sinfonie, commodi per concertare con ogni sorte di stromenti, 8vv (1604[21])
Italian texted works, 1588[11], 1588[18], 1588[19], 1590[11], 1592[11], 1592[14], 1598[6], 1604[8], 1605[12], 1606[6], G. de Wert: Il duodecimo libro de madrigali (1608)

IAIN FENLON (text, bibliography), DENIS ARNOLD/R (work-list)

Gaston Fébus, 3rd Count of Foix and 11th of Béarn (*b* 1331; *d* 1391). French patron. A relatively large number of pieces were addressed to him by 14th-century composers. In addition, he is credited with the composition of a Pyrenean folksong, but this ascription is purely traditional. He was a ruthless fighter and politician with wide interests: his passion for hunting caused him to write a book on the subject, and Froissart went to his court to read to him during the winter months. It is significant, however, that the ballades, rondeaux and virelais interpolated in Froissart's *Méliador* were what pleased the count most. In the second half of the 14th century these poems, especially in musical settings, represented the latest fashion. This is doubtless why four of the pieces addressed to Gaston are ballades. Two have his motto, 'Febus avant', in the refrain. Others (like *Phiton, Phiton*) hint more indirectly at his domain or enemies. All four appear in a manuscript (*F-CH 564*) related to the Avignon composers and those who visited the small states on both sides of the Pyrenees.

In addition, three motets were addressed to Gaston: two of them, from the Ivrea manuscript (*I-IV*), probably date from the 1360s. The third, *Inter densas deserti/ Imbribus irriguis/Admirabile est nomen tuum*, however, is unusually complex and hardly likely to have been written before 1380: it is virtually a set of variations on the short tenor, which is repeated seven times, each time with a new rhythm.

Instruments were popular with Gaston: King John I of Aragon had to beg him to return some of his minstrels who were, naturally enough, players of the principal dance instruments such as the shawm and bagpipe. Gaston also, according to Froissart, enjoyed unusual *entremets* (mimed entertainments which included music).

WORKS ADDRESSED TO GASTON

MOTETS

Altissonis aptatibus/In principes/Tenor tonans, 3vv, ed. in PMFC, v (1968)
Febus mundo oriens/Lanista vipereus/Cornibus equivocis, 3vv, ed. in PMFC, v (1968)
Inter densas deserti/Imbribus irriguis/Admirabile est nomen tuum, 4vv, H, ed. in CMM, xxxix (1965) [with solus tenor facilitating performance by 3 voices]

BALLADES

Magister Franciscus: Phiton, Phiton, beste tres venimeuse, 3vv, ed. in PMFC, xviii–xix (1981–2), CMM, liii/1 (1970)

GILBERT REANEY

Gastorius [Bauchspiess], **Severus** (*b* Öttern, nr Weimar, 1646; *d* Jena, bur. 8 May 1682). German composer. After attending the Lateinschule at Weimar, where his father taught from 1647, he went to the University of Jena in 1667. In 1670 he became the substitute for the Jena Kantor, Andreas Zöll, whose daughter he married in 1671. He became Kantor on Zöll's death in 1677 and held the post until his own early death. He is remembered primarily as the composer of the chorale *Was Gott tut, das ist wohlgetan*, which formed the basis of cantatas by, among others, Pachelbel and J.S. Bach (BWV100; he also used it in BWV98–9). According to the *Nordhausen Gesangbuch* (1687), Samuel Rodigast wrote the text for Gastorius in 1675, when the latter was severely ill. His melody first appeared, with the text 'Brich an, verlangtes Morgenlicht', in the collection *Andächtige Elends-Stimme* by C. Klesch (Jena, 1679), which contains 38 melodies by Gastorius and J. Hancke, none of them specifically assigned to either composer. He modelled his melody on a tune by Werner Fabricius that had appeared in E.C. Homburg's *Geistliche Lieder*, i (Jena, 1659). Gastorius also published five funeral motets at Jena. *Die Gerechten werden ewiglich leben* (1672), *Du aber gehe hin, biss du aufstehest in deinem Theil* (1672) and *Es ist genug, so nimm nun, Herr, meine Seele* (1674) are for five voices, *O Trauer-Fall* (1679) is for four voices and *Du aber gehe hin und ruhe* (1674) is for six voices, all with continuo. They show the influence of W.C. Briegel and J.M. Bach; towards the end of each piece a chorale cantus firmus is introduced in the highest voice.

DOROTHEA SCHRÖDER

Gastoué, Amédée(-Henri-Gustave-Noël) (*b* Paris, 19 March 1873; *d* Clamart, Seine, 1 June 1943). French musicologist. He studied the piano with Adolphe Deslandres, the organ with Alexandre Guilmant (at the Paris Conservatoire and then the Schola Cantorum), harmony with Albert Lavignac and composition with Albéric Magnard. Joseph Pothier and Charles Bordes awakened his interest in ecclesiastical chant, and in 1896 he became editor of the *Revue du chant grégorien* (until 1905). The Schola Cantorum's own journal, the *Tribune de St Gervais*, published articles by Gastoué from 1897 (he was its secretary for over 20 years), and in 1898 he began lecturing at the Schola Cantorum on chant. He was appointed precentor of the sister foundation of the Schola Cantorum in Avignon in 1899, and was able to carry out research in libraries of that area; when recalled to Paris by d'Indy he extended the scope of his lectures and publications to include later medieval music. In 1911 he became a lecturer at the Institut Catholique and succeeded Pothier as professor at the Petit Collège Stanislas, a post he held until the year of his death. He also taught at the Lycée Montaigne (1904–14) and the Ecole des Hautes Etudes Sociales, where Romain Rolland was director. From 1934 to 1937 he was president of the Société Française de Musicologie.

Gastoué's work on chant was early recognized to be of major importance, and in 1905 Pope Pius X appointed him consultant to the commission under Pothier for the new Vatican edition of liturgical books; he was made a Knight of the Order of St Gregory in 1908. His book *Les origines du chant romain* (1907) was awarded the prize of the Académie des Inscriptions et Belles Lettres; other awards included the Institut Catholique's Bernier Prize (1935) and the Légion d'Honneur (1938).

Gastoué wrote numerous manuals of practical instruction on chant and did important work on the relationship between Gregorian and older chant repertories. He was one of the first musicologists to stress the oriental rather than Hellenistic origins of Gregorian chant, making important observations, for example, on the Syrian *riš-qolo* and the development of hymnody, the chant of Gnostic sects, the Jewish origin of the *tonus peregrinus*, recitation cadence formulae, and the relationship between Gregorian, Ambrosian and synagogal traditional in the verses of graduals. Although some of his work on Byzantine music, particularly as regards transcription, has been superseded, his documentary studies were of first importance. Besides his editions of plainsong, Gastoué made modern editions of a wide range of medieval, Renaissance and Baroque music. He was also a prolific composer, particularly of sacred choral music. Of his large-scale works, an opera *Jeanne d'Arc* and an oratorio *Les mystères du Rosaire* (on his own text) were published.

DAVID HILEY/JEAN GRIBENSKI

Gastritz [Gastritzsch, Gastharts, Gastatz], **Mathias** (*d* Amberg, Bavaria, 9 Dec 1596). German composer and organist. He was appointed civic organist of Amberg on 22 December 1561. He appears to have been a difficult and contentious man, and early in 1589, following frequent lawsuits, he resigned. There are two volumes of music by him. The motets that make up the first, *Novae harmonicae cantiones ut piae, ita etiam suaves et iucundae* for five voices (Nuremberg, 1569), begin imitatively but soon become homophonic; the voices are sometimes divided into upper and lower groups, giving an impression of *cori spezzati* writing. Gastritz's other collection is *Kurtze und sonderliche newe Symbola etlicher Fürsten und Herrn, neben andern mehr schönen Liedlein … auff alle Instrument zu gebrauchen gantz dienstlich* for four to six voices (Nuremberg, 1571). This includes 16 *symbola* – settings of mottoes of prominent people – in the manner of Caspar Othmayr, which are homophonic pieces with the cantus firmus in the tenor, as well as 20 sacred songs, also homophonic and most of them in the then old-fashioned genre of the Tenorlied.

AUGUST SCHARNAGL

Gat (Hin.: 'a [manner of] going'). A term used in North Indian art music.

(1) A composition for *sitār*, *sarod* or other melody instrument in a particular rāg and tāl. Two common *gat* types for *sitār*, the *Masītkhānī* and *Razākhānī*, are distinguished by their rhythmic plucking-patterns (*see* India, §III, 6(i), and exx.4 and 5).

(2) A type of composition for the drum *tablā*, often characterized by unusual rhythmic devices (*see* India, §III, 6(iii)).

(3) A type of dance composition (*see* India, §IX).

RICHARD WIDDESS

Gatayes. French family of musicians.

(1) **Guillaume-Pierre-Antoine Gatayes** (*b* Paris, 20 Dec 1774; *d* Paris, Oct 1846). Guitarist, singer, harpist and composer. The son of the Prince de Conti and the Marquise de Silly, he was placed in a seminary, where he took the name of Abbé Vénicourt. In 1788 he escaped to pursue a career as a guitarist and composer, calling himself Gatayes. He began to compose *romances*, some of which ('Mon délire', 'Le pauvre aveugle') became extremely popular. In 1790 he published a *Méthode de cistre* and, having in the meantime learnt the harp, *Une méthode de harpe facile à conçevoir* in 1795; a *Nouvelle méthode de guitarre ou lyre* followed in 1802. Besides his *romances*, many of which remained unpublished, he wrote over 100 instrumental works, mostly for the guitar, harp and piano.

(2) **Joseph-Léon Gatayes** (*b* Paris, 26 Dec 1805; *d* Paris, 1 Feb 1877). Harpist, composer and music critic, son of (1) Guillaume-Pierre-Antoine Gatayes. He studied the harp with his father and Cousineau, and later with Labarre at the conservatoire, and became harpist at the Théâtre de l'Odéon. A virtuoso and teacher of the Erard double-action harp, he wrote music for his own performance, much of which was considered too difficult for publication. Later a friendship with Alphonse Karr drew him away from the harp into journalism and he wrote for *Chronique musicale*, *Le corsaire*, *Gazette musicale*, *Journal de Paris* and *Le ménestrel*. His interest in horsemanship produced some articles in *Journal des haras*.

(3) **Félix Gatayes** (*b* Paris, 1809; *d* ? after 1860). Pianist, composer and conductor, son of (1) Guillaume-Pierre-Antoine Gatayes. Apart from some lessons from Liszt he was self-taught as a pianist. Unsuccessful as a performer, he nevertheless gained popularity in Paris with his symphonies and overtures, and in 1842 was commissioned to write a ballet. He left Paris for Ireland before it was finished and thereafter led a wandering life for 20 years, conducting and composing in England, America and Australia. Eventually, unable to assemble orchestras to perform his works, he turned to composing for military band; his pieces include *Marche héroïque* and *Les moissonneurs*.

ALICE LAWSON ABER-COUNT

Gates, Bernard (*b* The Hague, 23 April 1686; *d* North Aston, Oxon, 15 Nov 1773). English bass, teacher and composer. His father, also named Bernard, came to England in 1688 and became Page of the Back Stairs to William III. He was a chorister at the Chapel Royal from 1697 to 1705, and thus one of Blow's latest pupils. He was appointed a Gentleman of the Chapel in 1708, and received a second place there in 1734. In 1727 he succeeded Croft as Master of the Children and as Tuner of the Regals and Organs. In 1711 he became in addition a lay vicar of Westminster Abbey, and from 1740 he was also Master of the Choristers there. For a brief period in 1714 he was also a lay clerk at St George's Chapel, Windsor. He retired from active duties in 1757, though nominally remaining a member of the Chapel Royal and Westminster Abbey choirs. He spent his later years at North Aston, near Oxford, where a memorial tablet to him was erected by his pupil T.S. Dupuis. He was buried at Westminster Abbey.

A number of leading musicians received their early training from him in the Chapel Royal, and he was thus a link between the late 17th century and members of a generation surviving into the 19th century, for example Samuel Arnold. Hawkins (*General History*, 1776) commented on his excessive use of the shake, and noted also that in his teaching he restored the method of solmization by hexachords instead of the debased English method using four syllables only.

Gates is named as a bass soloist on Handel's autographs of the *Ode on the Birthday of Queen Anne* and the Utrecht *Te Deum* and *Jubilate* (1713). He was concerned with three staged productions of Handel's *Esther* at the Crown and Anchor Tavern in the Strand in February and March 1732, in which boys from the Chapel Royal and Westminster Abbey took part. Burney (*Account of the Musical Performances in Westminster Abbey*, 1785), writing on the authority of John Randall (who as a boy had taken the part of Esther in 1732), noted that the performances at the Crown and Anchor had been preceded by a private one – possibly a full rehearsal – at Gates's own house (the date as given by Burney, 1731, is 'old style'). His last contribution as a soloist for Handel was in the Dettingen *Te Deum* in 1743, but he seems to have provided chorus (and sometimes solo) trebles for Handel's oratorio performances regularly until his retirement. Gates was a founder-member of the Academy of Vocal Music and the Society of Musicians: his withdrawal from the academy in 1734, taking his choristers with him, seems to have been a significant gesture in the musical politics of the period, and encouraged the academy's move towards 'Ancient' music. His surviving compositions comprise a Morning Service in F and six anthems (*GB-Ge*, *Lbl* (Chapel Royal Partbooks; partly autograph), *WRch*; most anthems are incomplete in the surviving sources): the anthems include substantial solo movements for his choristers. A portrait of Gates is in the Oxford Music School Collection; another portrait, depicting him at a slightly younger age, was offered for sale at Sothebys in 1990.

WATKINS SHAW/DONALD BURROWS

Gattermeyer, Heinrich (*b* Sierning, nr Steyr, 9 July 1923). Austrian composer. After military service, he attended the Vienna Hochschule für Musik (1945–50), where his teachers included Bruno Seidlhofer (piano), Ferdinand Grossman (conducting) and Alfred Uhl (composition), and the University of Vienna, where he studied German language and literature. After completing his studies, he worked as a choral conductor (1949–73), and taught in secondary schools (1946–69) and at the Hochschule für Musik (1964–90), where he was appointed professor of composition in 1977. He has also served as chair of the Austrian society of authors, composers and music publishers (AKM, 1984–90), chair of the Austrian Composers' Association (from 1992) and chair of the Music Association of the Stephansdom (from 1996). As a composer, he does not view tonality and atonality as opposites, understanding pitch organization to determine how a composition is expressed but not the content of the composition. Rhythm is a central feature of his works. He prefers a freely-organised tonality, but also works with tone rows rather in the manner of Haver. In the *Bruckner-Epitaph*, for instance, a synthesis between these techniques is sought. Immediacy is important to him, and is achieved through a sound-world which ranges from echoes of folksong and traditional dances through chorale-like writing to strict forms and aleatory procedures; all of these are combined in the stage work *Kirbisch*. His many distinctions include the Austrian Cross of Honour for Science and Art (1964), the Gold Medal of the city of Vienna (1988) and the prize of Lower Austria (1993).

WORKS
(*selective list*)

Dramatic: 38 shadow plays and TV tales (TV scores), 1965–75; Kirbisch (szenische Ballade, A. Wildgans), 1984–7, Linz, 13 May 1987; other TV and incid music

Orch: Concertino, pf, orch, 1962; Concerto grosso no.1, str, 1970; Skolion, small orch, 1970–71; Concertino, gui, str, 1972; Intention no.1, 1973; 7 Interludien, 1973 [from Der Turmbau zu Babel]; Symphonische Antithesen, 2 str orch, 1974–90; Concerto grosso no.2, 1976, rev. 1986; 5 Szenen, str, 1978; Symphonische Tanzstücke, 1980; Kirbisch-Suite, 1984–7; Symphonische Reminiszenzen, 1989; Traum und Tod, sym. poem, 1991 [after S. George]; Tripelkonzert, vn, vc, pf, str, 1991; Vn Conc., 1995; Bruckner-Epitaph, 1996

Vocal: Weihnachtsoratorium, S, A, T, B, SATB, orch, 1951; Asinus rex (Gattermeyer), solo vv, SATB, fl, cl, 2 tpt, str, perc, 1955; Missa Bernardi, TB, str, 1959; Der Turmbau zu Babel (orat), Bar, SATB, orch, 1960, rev. 1964, 1976, 1983; Te Deum, solo vv, SATB, orch, 1963; Lieder unserer Heimat, TB, 1965; Morgenlied (Gattermeyer), SATB, orch, 1970; Provokationen (orat, Gattermeyer), spkr, Bar, TB, str, perc, 1971; Trakl-Fragmente, SATB, pf, 1974; De profundis (orat, Gattermeyer), spkr, Mez, SATB, orch, 1975; Gesänge Hiobs (orat, Gattermeyer), SATB, fl, cl, pf, 1980; Missa Sancta Barbara, SATB, fl, cl, bn, 2 hn, 2 tpt, 3 trbn, perc, 1981; Die chinesische Nachtigall (H.C. Andersen), spkr, pf, 1993; Ignatius-Messe, S, T, B, SATB, hn, 2 tpt, trbn, tuba, str, 1993; many songs, 1v, pf; works for male chorus

Chbr and solo inst: Str Qt no.1, 1953; Ww Trio, 1962; Wind Qt, 1965; Duo, 2 gui, 1969; Geistliche Suite, brass, 1970; Str Qt no.2, 1970; 6 Grotesken, va, pf, 1971; Suite, chbr ens, 1971; Concertino da camera, (ob, gui, pf)/(gui, str)/(gui, ww, str), 1972; Divertimento, cl, va, pf, 1973; Kassation no.1, fl, va, gui, 1973; Serenade, str, 1978; Kammermusik, 3 tpt/hn, 2 trbn/tuba, 1979; Partie im Dialog, fl, gui, 1980; Str Qt no.3, 1981; Phantastischer Dialog, 3 tpt, 3 trbn, org, 3 perc, 1984; Perioden-Quartett, fl, vn, va, db, 1986; Englische Brass-Suite, brass qnt, 1989; Metamorphosen, cl, hn, 2 vn, vc, pf, 1993

Principal publishers: Doblinger, Universal, Edition Modern, Thomas Sessler

LOTHAR KNESSL

Gatti, Daniele (*b* Milan, 6 Nov 1961). Italian conductor. He studied at the Milan Conservatory and began his career conducting Verdi's *Giovanna d'Arco* in Milan in 1982, after which he appeared with opera companies throughout Italy until his début at La Scala with Rossini's *L'occasione fa il ladro* (1988). In 1989 he was in charge of *Bianca e Falliero* at the Rossini Festival in Pesaro. He made his US début at Chicago conducting *Madama Butterfly* in 1991. The following year he first appeared at Covent Garden, with *I puritani*, returning there for *Turandot* in 1994, after which he was made principal guest conductor. In 1995 he directed the first modern performance of Verdi's *I due Foscari* at Covent Garden. His Metropolitan début was in 1994, with *Madama Butterfly*. Orchestras he has conducted include the Vienna PO, New York PO, Cleveland Orchestra, Boston SO, Chicago SO and the Accademia di S Cecilia, Rome. Gatti was appointed music director of the RPO in 1995. His tastes range wide, from Haydn to Respighi and beyond, and he has a penchant for Italian opera of all periods. He is an instinctive rather than a didactic interpreter, emphasizing naturalness of expression and freedom of phrase, but with a tendency to the brilliant and assertive at the expense of a long view of the work in hand, all qualities found in his recordings of, among others, Mahler, Prokofiev and Respighi.

ALAN BLYTH

Gatti [Pesci], **Gabriella** (*b* Rome, 5 July 1908). Italian soprano. She studied singing after gaining a diploma for the piano, made her professional début at the Maggio Musicale Fiorentino in 1933 as Anna (*Nabucco*) and the following year sang an acclaimed Desdemona at the Rome Opera. She sang up to 1953 in all the leading Italian theatres, most often in Rome and Florence, but also at La Scala between 1938 and 1947. Her voice was lyrical in character, graceful in timbre and expression, and she stood as an example of the refined, classical style at a time when the opposite manner prevailed among Italian sopranos. She was a notable Mathilde in *Guillaume Tell* (the role of her farewell in Rome) and Desdemona in Verdi's *Otello*, though her wide repertory ranged from Monteverdi's *Orfeo* to Marie in *Wozzeck*, of which she gave the Italian première (1942, Rome).

RODOLFO CELLETTI/VALERIA PREGLIASCO GUALERZI

Gatti, Guido M(aggiorino) (*b* Chieti, 30 May 1892; *d* Grottaferrata, nr Rome, 10 May 1973). Italian musicologist, editor and administrator. He began to play the violin when he was six and the piano when he was 12, and after schooling in Chieti he studied engineering at the University of Turin (1909–14). At 20 he was made editor-in-chief of the weekly *Riforma musicale*, published in 1913–15 and briefly in 1918; concurrently he organized concerts of contemporary chamber music in Turin. He founded and edited *Il pianoforte* (1920–27), which in 1928 became the *Rassegna musicale* (later with Ronga and Mila as co-editors); after an interruption during the war (1944–6) it moved to Rome (1947), where it subsequently became *Quaderni della Rassegna musicale* (1962). He also founded *Studi musicali* (1972–3). The first Congresso Italiano di Musica (Turin, 1921) was held partly under the auspices of Gatti's journal *Rivista musicale italiana*. He was also editor of several series: I Grandi Musicisti, I Maestri della Musica, I Grandi Interpreti and Symposium. He was editor, with Basso, of *La musica* (1966–71) and music editor of the *Dizionario letterario Bompiani delle opere e dei personaggi* (1946–50) and the *Dizionario letterario Bompiani degli autori* (1956–7).

Gatti's keen musical insight, coupled with rare administrative capabilities, enabled him to realize several projects successfully: he was director-general of the Teatro di Torino (1925–31), secretary-general of the first Maggio Musicale Fiorentino (1933) and secretary-general of the international congresses of music held in Florence (1933, 1935, 1936). He was also active as administrator of Lux films (1934–66), and as music critic of the weekly *Tempo* (1951–69). His own research, generally directed towards modern music, resulted in the series 'Musicisti stranieri' (later 'Musicisti contemporanei'), consisting of articles on (3) Eugene Goossens, Malipiero, Grovlez, Casella, Castelnuovo-Tedesco, Perrachio, Debussy, Ireland, Pratella, Alfano and Bloch, that appeared in *La critica musicale* (1918–20) and the book *Musicisti moderni d'Italia e di fuori* (1920). His sympathetic appreciation of his contemporaries is also evident in the librettos he provided for Ghedini (*Gringoire*, unperf.) and Davico (*La dogaressa*), as well as the numerous compositions dedicated to him. He gave unfailing encouragement and support to young composers and musicologists; in 1950 he founded the Amfiparnaso, a theatrical enterprise in Rome which in its one brief season presented *Il turco in Italia* (with Callas) and Petrassi's *Morte dell'aria*, Dallapiccola's *Job* and Tommasini's *Il tenore sconfitto*, all specially commissioned. He served as vice-president of the Accademia di S Cecilia (1966–72), president of the Accademia Filarmonica Romana (1953–5) and president of the Società Aquilana dei Concerti (1969–73). In 1956 he received a gold medal from the Ministry of Education.

CAROLYN GIANTURCO

Gatti, Luigi (Maria Baldassare) (*b* nr Mantua, 11 June 1740; *d* Salzburg, 1 March 1817). Italian composer. He probably received his earliest musical training in Mantua, where his first opera, *Alessandro nell'Indie* was well received in 1768 and where he became a tenor at the church of S Barbara. The *maestro di cappella*, G.B. Pattoni, described him as a 'reliable tenor … as well as a good organist and composer' (29 January 1768). In 1770 he met the Mozarts, then on their first Italian journey, and copied one of Wolfgang's masses (probably K66). In 1773 he competed unsuccessfully to become Pattoni's successor and on 16 July 1779 was appointed vice-*maestro* of S Barbara. For the inauguration of the Teatro Scientifico, the private theatre of the Reale Accademia of Mantua, he wrote the cantata *Virgilio e Manto* (1769). He served the academy as *secondo maestro* until 1783, composing occasional works such as *Il certame* of 1771 (with dialogue spoken by members of the academy). Even after he left Mantua, his music was performed at the academy: his oratorio *La madre dei Maccabei* (1775), revised and enlarged, had 14 performances at the Teatro Scientifico in 1793.

In 1778 Salzburg Cathedral began negotiations with Gatti, though he did not want to leave Mantua then for more than two or three months. On 14 February 1783 he became the last Italian Kapellmeister of the Salzburg court and cathedral. Leopold Mozart had sought the post and his disparaging remarks may reflect jealousy (letter to Wolfgang, 12 October 1782). However, Wolfgang showed respect for Gatti when, on 22 January 1783, he asked his father to have Gatti procure an Italian libretto for him. In Salzburg Gatti directed the chapel boys' choir (after 1796), taught composition (his principal student was J.J. Fuetsch), composed much sacred music for the cathedral and compiled a thematic catalogue of the music in its library. He composed a mass based on Haydn's *Creation* (autograph in *I-OS*) and also adapted Haydn's oratorio for keyboard. He is mentioned in other Mozart correspondence (1782–6) and in letters of Nannerl to Breitkopf & Härtel (1801–4), when Gatti was helping her locate some of her brother's scores. Gatti also wrote letters to this publisher (1803–6), which before World War II were in their archive.

Few of Gatti's works were published in his lifetime, though a large number are extant in manuscript copies (especially in *A-Sd*, *I-OS* and *A-KR*). A good proportion of these manuscripts are autographs, frequently showing extensive revision. The works reveal a composer of great facility and assuredness. His instrumental pieces have the melodic fluidity and lyricism that would be expected of a composer whose roots lay in vocal, and especially operatic, writing. They contain considerable rhythmic flexibility, and the suavity is enhanced by frequent charming and surprising details. He composed in the forms typical of his time, but achieved a fine variety through changes of texture and rhythm so that phrases are not often repeated exactly. There are also many interesting harmonic excursions, particularly at the beginning of development sections. Gatti had a predilection for the oboe, although he was not trained on that instrument. While there is little interest in virtuosic display, *per se*, his instrumental parts are always interesting and often challenging. He did not generally explore extremes of range, but his F major oboe quartet (dating from about 1806) takes the oboe part up to g‴ and is one of the earliest such passages written for the instrument.

WORKS

OPERE SERIE

Alessandro nell'Indie (P. Metastasio), Mantua, Ducal, 24 Jan 1768, *P-La*, 1 aria *I-MAav*
Nitteti (Metastasio), Mantua, Ducal, spr. 1773, arias *GB-Lbl*, *D-Dl* (2), *D-WRtl*, *I-Bc*, *Gl*, *OS*, *S-Skma*
Armida (G. de Gamerra), Mantua, Ducal, 29 Jan 1775, 2 arias *D-Dl*, 1 aria *I-Mc*
Olimpiade (Metastasio), Salzburg, Hof, 30 Sept 1775, arias *I-Gl*, *OS**, *Tf*, *P-La* (Act 1 only), duet *D-WRtl*
Antigono (Metastasio), Milan, Scala, 3 Feb 1781, with some music by Anfossi; *F-Pc*, arias *I-Mc*, *OS**, *P-La* (Act 3 only)
Demofoonte (Metastasio), Mantua, Ducal, 12 May 1787, arias *I-Rsc*, *S-Skma*, quartetto *Skma*, ?duetto *I-MAav*

Arias in: *A-Wgm*, *Sca*, *D-Dl*, *I-Gl*, *MAav*, *Mc*, *OS*; 1 pubd (London, n.d.)

ORATORIOS

La madre dei Maccabei, Mantua, Scientifico, 2 April 1775; rev. Mantua, Scientifico, 27 Feb 1793; *I-OS**, copies *Pca*, *Gl*, aria, duet, trio *MAav*, aria *Mc*
Il martiro dei SS. Nazario e Celso, Brescia, for completion of church of S Nazarius and S Celsus, 1780; score, pts, *Pca**
Il voto di Jefte, 1794, collab. V. Benatti, L. Caruso; *OS**
Abel's Tod (after Metastasio), Salzburg, 23 July 1806, possibly perf. in It., Mantua, 1788; *OS**, copies *A-Wn*, *I-Gl*
Il trionfo di Gedeone, *Fc*

OTHER WORKS

Ballets: Germanico in Germania (I. Gambuzzi), Milan, Interinale, 27 Dec 1777; Il ratto delle Sabine (S. Gallet), Mantua, April 1780; La grotta di Merlino, Salzburg, 1808
Cants. and occasional works: Virgilio e Manto, Mantua, Scientifico, 3 Dec 1769; Il certame, Mantua, Scientifico, 1771; Cantata (G.B. Bugnanza), Mantua, Scientifico, for the wedding of Archduke Ferdinand, June or early July 1775; Cantata in lode del Principe Arcivescovo di Olmütz, Mantua, Scientifico, 8 March 1778, *I-OS**; L'isola disabitata (cant., Metastasio), Salzburg, 19 Jan 1783; Per il gloriosissimo anniversario del … ingresso … in Salisburgo di … l'Arciduca Ferdinando (cant.), Salzburg, *c*1804, *A-Sca*; Cantata per le nozze dell'imperatore Francesco I con Luigia d'Este, 1808, *I-OS**; Ino (Ger. text), 1v, pf, Salzburg, 1812; Cantata per il giorno dell'Epifania, *Fc**; Ah! se a me fosse concesso (cant.), S, orch, Mantua, *MAav*; Christus verurtheilet, 4vv, ?Salzburg, *OS**; German cant. for Hyeronimus Coloredo, *OS**; Il sacrificio ad amore (cant.), *OS**; arias in *CH-E*, *D-Dl*, *HR*, *WRtl*, *HR-Zha*, *I-MAav*, *Mc*, *Tf*
Sacred: 11 masses: 5 in *A-KR*, 3 in *D-HR*, 1 in *D-KZa*, 1 in *OB*, 1 in *I-OS** (based on Haydn's Creation); 1 Requiem, *A-KR*; ?4 requiem settings, *KR*; Ave Maria, 4vv, orch (Florence, n.d.); Ave maris stella, 4vv, *HR-Zha*, *I-PEd*, *PEsl*; Beatus vir, *A-KR*; Ecce sacerdos magnus, *KR*; Laudate Dominum, *KR*; lit, *HR-Zha*; 2 lits, *A-KR*; Mane nobiscum Domine, *Imf*; Meditabor in mandatis, *KR*; O Jesu mi dulcissime, *MS*, *KR*, *HR-Zha*; O Maria alma, *A-KR*; O

quam suavis est, *HR-Zha**, *A-KR*; O salutaris hostia, *CH-E*; Offertorium de SS Sacramento, *A-FK*; Pange lingua, *CH-E*; Quis Deus magnus, *A-KR*; Stabat mater, *HR-Zha*, *A-KR*; Stupendum, *KR*; TeD, ed. SVEN HANSELL/T. HERMAN KEAHEY

Gatti, Theobaldo [Teobaldo] **di** [Théobalde] (*b* ?Florence, *c*1650; *d* Paris, 1727). French composer, bass viol player and teacher of Italian birth. According to Titon du Tillet it was the impact on him of some of Lully's music that he heard in Florence that prompted him to move to Paris. He did so about 1675, was granted letters of naturalization by Louis XIV and was generally known in France simply as 'Théobalde'. He made his name in Paris as a teacher of the viol, and he played the bass viol in the orchestra of the Académie Royale de Musique. He seems to have enjoyed the protection of the Dowager Princess Conti (an excellent musician who was taught by François Couperin and d'Anglebert). He published a *Recueil d'airs italiens* (Paris, 1696), a set of ten solo songs and two duets that helped to create a demand for Italian music in France. Two stage works by him are also known: *Coronis*, a heroic pastoral to a libretto by Chappuzeau de Beaugé that was given in Paris in 1691 (manuscripts in *F-Pn*, *Po* and *GB-Cfm* where it is incorrectly attributed to Lully), and *Scylla*, a *tragédie lyrique*, with a libretto by Duché de Vancy (performed and published in Paris in 1701). The style of these works has much in common with that of Lully, but its more individual and lyrical elements are closer to that of Campra: indeed *Scylla* to some extent foreshadows the latter's *Tancrède* (1702).

MAURICE BARTHÉLÉMY

Gatti-Aldrovandi, Clelia (*b* Mantua, 30 May 1901; *d* Rome, 12 March 1989). Italian harpist. Her early musical training was at the Liceo Musicale Giuseppe Verdi in Turin. She made her professional début in Vienna and Berlin in 1921, receiving artistic advice from Busoni. She encouraged many important composers to write for solo harp. Casella, Hindemith and Tommasini dedicated sonatas to her and among works with orchestra she inspired concertos by Mortari, Pizzetti, Rota, Vlad and Zafred, and a Concertino for harp and six instruments by Castelnuovo-Tedesco. She was married to the critic and writer Guido Gatti.

ANN GRIFFITHS

Gatti-Casazza, Giulio (*b* Udine, 3 Feb 1869; *d* Ferrara, 2 Sept 1940). Italian impresario. He succeeded his father as head of the board of directors of the Teatro Comunale in Ferrara, 1893, and was later director of La Scala, Milan (1898–1908). In conjunction with the young Toscanini, he revitalized La Scala during his tenure; with Toscanini, he was engaged by the Metropolitan Opera, New York, in 1908. Until 1910 he shared directorial control with Andreas Dippel and from 1910 to 1935 was sole general manager, the longest tenure in the history of the Metropolitan. The years until Toscanini's resignation (1915) are generally considered the finest in the history of the house.

Gatti-Casazza brought a thorough-going professionalism to the Metropolitan, in terms of singers, staging and design, managing an incredibly large repertory of between 40 and 50 operas in the short season. Under his aegis, the performance of opera in the original language became normal. He introduced, though with little success, American operas and ballets. From Caruso to Flagstad (who appeared first in his final season), Gatti-Casazza's roster included major singers and the Metropolitan became the principal showcase for the designer Josef Urban.

As time wore on, however, a sameness of vision became ever more evident, and the Depression years exposed the financial and artistic shakiness of Gatti-Casazza's cumbersome repertory policies. From 1935 he lived in retirement in Italy. He was married first (1910–28) to the soprano Frances Alda and from 1930 to the ballerina Rosina Galli. His *Memories of the Opera* (New York, 1941; trans. and ed. H. Taubman) cover the years to 1933.

PATRICK J. SMITH

Gatto, Simone [Simon] (*b* Venice, 1540–50; *d* ?Graz, before 1 Feb 1595). Italian composer, trumpeter and trombonist, active also in Austria. In 1565–6 he served as a trombonist at Padua Cathedral. Leaving Venice, where presumably he had been trained, he went to the court at Munich, where from 1568 to 1571 he was active as a trombonist and in 1568 helped to improvise a comedy with Lassus, Massimo Troiano and others. Apparently he then returned to Venice but soon went as trombonist and trumpeter to the court of Archduke Karl II at Graz, where he pursued

a successful career. By 1577 he had become superintendent of the court instrumentalists and on 1 August 1581 was appointed Kapellmeister in succession to Annibale Padovano (who had died six years earlier). He recruited singers in Venice (e.g. Giovanni Battista Galeno in 1584) and was responsible for the purchase of instruments. After the death of Archduke Karl in 1590 he was entrusted with the effects of the court band, which was dispersed until the accession in 1595 of Archduke Ferdinand (who in 1590 was still a minor). He was also selected in advance to direct the band when it was re-formed, but his evidently unexpected death prevented his doing so; his successor Pietro Antonio Bianco was appointed on 1 February 1595. Lodovico Zacconi, a singer in the court chapel from 1585, included a laudatory reference to him in his autobiography.

Gatto's surviving music is almost exclusively sacred and is varied in character: as with Annibale Padovano, who influenced him, there are works written in traditional imitative counterpoint and others clearly influenced by Venetian music in their sonority and use of double choirs. Music of the latter kind was ideally suited to the instrumental forces at Graz, which he helped to develop. The *Missa 'Scarco di doglia'* for five voices (1579) is a good example of his work in the older, Netherlandish style; it may have been inspired by a mass of the same name by Lassus, based on the same well-known madrigal by Rore. Venetian influence is apparent in the *Missa 'Andrà la nave mia'*; it is written for two four-part choirs, and the melodic line no longer dominates. The dialogue principle of the seven-part *Magnificat 'Alma se stata fossi'* is derived from the dialogue by Bartolomeo Spontone on which it is based. In both this work and the *Magnificat 'Domine Dominus noster'* (based on a motet by Lassus), Gatto treats the order of voices in a freer manner within a pseudo-polyphonic texture. Like Annibale Padovano, Gatto did much to italianize music at the Graz court, which was the first important centre of Venetian music in Austria.

WORKS

3 masses, 5, 6vv (Venice, 1579); contains 'Scarco di doglia', 5vv, ed. H. Federhofer, DTÖ, xc (Vienna, 1954); 'Hodie Christus natus est', 5vv; 'Dont vient cela', 6vv

Motectorum ... noviter collectorum, 4–8, 10, 12vv (Venice, 1604); 1 ed. in MAM, xlvii (1979)

Obsecro vos fratres, 8vv, 1611[1]; 1 madrigal, 5vv, 1569[19]

Missa 'Veni Domine et noli tardare', 6vv, *A-Wn*; Missa 'Aller mi fault', 5vv, *SI-Lng*; Missa 'Stabunt iusti', 5vv, *Lng*; Missa 'Andrà la nave mia', 8vv, *A-Gu*; Missa, 15vv, *Wn*

Magnificat 'Alma se stata fossi', 7vv, *Gu*; Magnificat 'Domine Dominus noster', 6vv, Magnificat primi toni, 5vv, both *SI-Lng*, ed. in DTÖ, cxxxiii (1981); Asperges me, 5vv, *A-Wn*

HELLMUT FEDERHOFER

Gatzmann, Wolfgang. *See* GETZMANN, WOLFGANG.

Gaubert, Philippe (*b* Cahors, Lot, 5 July 1879; *d* Paris, 8 July 1941). French flautist, conductor and composer. The most celebrated student of Paul Taffanel, he won a *premier prix* for flute at the Paris Conservatoire in 1894. He also studied composition and won second prize in the Prix de Rome in 1905. He joined the orchestras of the Paris Opéra and Société des Concerts du Conservatoire in 1897 and was renowned as a soloist. Encouraged by Taffanel he also pursued a parallel career as a conductor from 1904 when he became assistant at the Société des Concerts. In 1919, after active service in World War I, he was appointed principal conductor of the Société des Concerts and professor of flute at the Conservatoire. The following year he also became principal conductor at the Opéra, and in 1931 artistic director. Gaubert was a prolific composer, not only of flute music, but also of operas, ballets, orchestral works and songs. In style his music is somewhere between Fauré and Dukas – colourful in harmonic language, with elegant melodic lines and brilliant, rhapsodic passagework. The supple and expressive artistry of his playing can be heard on a series of recordings for the French Gramophone Company in 1919. He collaborated with Taffanel on a *Méthode complète* for flute (Paris, 1923).

EDWARD BLAKEMAN

Gauci, Miriam (*b* Malta, 3 April 1957). Maltese soprano. She studied in Malta and Milan, winning international prizes at La Scala, Treviso and Bologna, where she made her début in Poulenc's *La voix humaine* in 1984. Her well-managed voice, of moderate volume and fine quality, fitted her well for the lyric Italian repertory and she was soon in demand throughout Europe and the USA. At Santa Fe in 1987 she made her US début as Butterfly, the role with which she has become most closely associated. Later that year she appeared as Mimì in *La bohème* with Domingo on the opening night of the season at Los Angeles. In 1992 her recording of *Madama Butterfly* and a solo recital aroused wide interest and speculation that here might be a successor to Mirella Freni. Her career has continued successfully, and though her stage presence was sometimes felt to lack colour she can be deeply touching in roles such as Verdi's Desdemona and Puccini's Sister Angelica. In 1997 she appeared at the Vienna Staatsoper singing both Margherita and Elena in Boito's *Mefistofele* and was re-engaged for performances of *Don Carlos*, *Pagliacci* and Verdi's Requiem under Muti.

J.B. STEANE

Gaucquier, Alard du. *See* DU GAUCQUIER, ALARD.

Gaudeamus Foundation. Dutch organization. It was founded in 1945 by Walter A.F. Maas, a Jewish émigré from Mainz, at Bilthoven in the Netherlands. It is based in the Huize Gaudeamus, a villa built in the shape of a grand piano by the composer Julius Röntgen (i), and its aim is the promotion of new music, particularly that of Dutch composers. From 1947 it held an annual music week of Dutch compositions and national and international weeks were held alternately until 1959, when they became fully international. From 1960 the foundation organized concerts of Dutch music abroad, including tours by the Gaudeamus Quartet, and in 1963 the International Gaudeamus Competition for Interpreters of Contemporary Music was inaugurated. More recently the foundation has held a biannual International Composers' Workshop, a workshop for young musicians from France, Germany and the Netherlands, and a number of festivals. The monthly bulletin *Gaudeamus informatie* was published from 1965 and the bi-monthly *Gaudeamus Information* for international readers from 1967. In 1970 the foundation joined the Dutch section of the ISCM. □

Gaudentius (*fl* 3rd–4th century CE). Writer on music. He was the author of a *Harmonic Introduction* (*Harmonikē eisagōgē*), an eclectic mixture of Aristoxenian and Pythagorean theory, together with a treatment of notation. The statesman and writer CASSIODORUS knew his treatise in a Latin translation credited to Mutianus (otherwise unknown). He cites Gaudentius both at the very beginning of the section on music (*Institutiones*, ii.5) and at the end, where he singles him out for special praise: 'if you read him over again with close attention, he will open to you the courts of this science' (*quem si sollicita intentione relegatis huius scientiae vobis atria patefaciet*). Cassiodorus clearly made significant use of Gaudentius's treatise in his own treatment of consonances.

The treatise is transmitted in 31 manuscripts, the earliest of which is *I-Rvat* gr.2338 (RISM, B/XI, 234), dating from the late 12th century or early 13th. Its eclecticism is unusual: it begins as if Gaudentius were an Aristoxenian, moves abruptly in the middle section to the story of Pythagoras's discovery of harmonic phenomena, returns to a discussion of the various species of consonant intervals and concludes with a section devoted to a description of ancient Greek musical notation. This last section breaks off in the middle of the Hypoaeolian *tonos*, but it is probable that the treatise originally included all 15 *tonoi* of the 'younger theorists' in each genus. As the treatises survive today, only the tables of ALYPIUS – an author also mentioned by Cassiodorus – provide a more complete representation of ancient Greek notation. The consistency of the notational symbols as they appear in surviving pieces of Greek music and in the treatises of Alypius, ARISTIDES QUINTILIANUS, BACCHIUS as well as Gaudentius attests the importance of musical notation in antiquity.

The treatments of various topics in Gaudentius's treatise parallel for the most part treatments found in other treatises, but there are a few unique or unusual features. His definition of paraphonic notes (§8) is distinct from the definitions of Bacchius and THEON OF SMYRNA; and he recognizes (§19) the possibility of 12 different species of the octave through the various combinations of the individual species of the 4th and the 5th, although he concludes that only the traditional seven species of the octave are 'melodic and consonant' (*emmelē kai sumphona*). Gaudentius regards the 11th as a consonance (§§9–10); while this is not unprecedented, it is unusual in a treatise showing some adherence to the Pythagorean tradition. Finally, his incisive explanation (§20) of the purpose of musical notation and the reason why there cannot be just a single sign for each note-name (e.g. *proslambanomenos*, *hypatē hypatōn* etc.) is not found in any other treatise.

Gaudentius must have been known throughout the Middle Ages only as a shadow in the references of Cassiodorus. In the 16th century, however, the treatise was known to Giovanni Del Lago, Gioseffo Zarlino (*Istitutioni harmoniche*, iii.5), Girolamo Mei, Francisco de Salinas (*De musica*, ii.9) and others. Meibom included the treatise in his collection of 1652, after which it became generally known.

THOMAS J. MATHIESEN

Gaudibert, Eric (*b* Vevey, 21 Dec 1936). Swiss composer and pianist. After training at the Lausanne Conservatoire (where he studied the piano with Denise Bidal and composition with Hans Haug) he continued his studies at the Paris Ecole Normale de Musique (Alfred Cortot, Jules Gentil and Jeanne Blancard, piano; Nadia Boulanger and Henri Dutilleux, composition). From 1972 to 1975 he directed the musical activities of the Maison de la Culture in Orléans. Since returning to Switzerland in 1975 he has worked as a freelance composer, and has also taught the piano, analysis and composition at the Geneva Conservatoire and analysis at the Neuchâtel Conservatoire.

The various influences marking his early works also give a close idea of the style of his mature and independent compositions: he has adopted sound patterns with strong tonal colour from Dutilleux, physicality of sound from Bartók, modal (and polymodal) thinking from Messiaen, and rigorous development of his material from Stockhausen. The open character of his tonal language enables him to integrate different techniques, and passages in conventional, experimental and aleatory notation quite often occur in close proximity. Between 1969 and 1976 he also wrote some electro-acoustic works at the Geneva Centre de Recherches Sonores of Suisse Romande radio. Since the 1980s a restriction of tonal material has been evident in his compositions. His use of quotations (from composers including Stravinsky, Schumann and Machaut) and his critical re-reading of familiar genres and forms shows his interest in the historical dimension of music. In 1989 and 1995 he received prizes from the Association Suisse des Musiciens and the city of Geneva for his work as a composer.

PATRICK MÜLLER

Gaudio, Cavalier **Antonio dal** [del] (*b* ?Rome; *fl* 1669–82). Italian composer. According to La Borde he was of Roman origin, but the libretto of his *L'Eudosia* (performed Mantua, 1669, text by di Mileto; music lost) describes him as being from Naples. In 1675, when he wrote the music for *Almerico in Cipro* (text by G. Castelli; scores in *I-Vnm* and, according to its catalogue, *Nc*), performed at the Teatro S Moisè, Venice, he was in the service of Prince Gonzaga, Duke of Sabbioneta (presumably Gian Francesco II, Duke of Bozzolo). He also composed *Ulisse in Feaccia* (performed Venice, 1681; text anon., not by Filippo Acciaiuoli; music lost), signing the dedication of the libretto for the Naples performance on 28 January 1682. His only other known works are a duet for two sopranos and continuo, *Ti lascio, anima mia* (in *Bc* and *Bsp*), and a cantata, *Mentre oppresso* (in *Nc*). The score of *Almerico in Cipro* includes most of the aria types common in Venice in the 1670s but is more than usually stereotyped, repetitive and lacking in invention.

THOMAS WALKER/R

Gauk, Aleksandr Vasil'yevich (*b* Odessa, 3/15 Aug 1893; *d* Moscow, 30 March 1963). Ukrainian conductor and composer. After studying at the Petrograd (St Petersburg) Conservatory with Glazunov (composition) and Nikolay Tcherepnin (conducting), he became conductor at the Petrograd Music Drama Theatre (1917), and at the State Opera and Ballet Theatre, now the Kirov (1923–31). He was then chief conductor successively of the Leningrad PO, 1930–34, of the USSR State SO in Moscow, 1936–41, and of the All-Union RSO, 1953–63. During this period he gave several first performances of works by Khachaturian, Myaskovsky, Shaporin, Shostakovich and others, and his conducting was distinguished by his sense of orchestral ensemble and perception of style. He taught at the conservatories of Leningrad (1927–33), Tbilisi (1941–3) and Moscow (1939–63), and his pupils included Mravinsky, Melik-Pashayev, Rabinovich and Svetlanov. His compositions include a symphony, concertos for piano and harp, and works for strings and solo piano, and he made orchestral arrangements of works by Tchaikovsky and Musorgsky (including the latter's unfinished opera, *The Marriage*). He also reconstructed the score of Rachmaninoff's Symphony no.1 from the parts found in the Leningrad Conservatory library, and in 1945 restored the work to the concert repertory for the first time since its initial failure in 1897. Chapters from his memoirs were published as a collection, *Masterstvo muzïkanta-ispol'nitelya* ('The mastery of a musician-performer', Moscow, 1972).

I.M. YAMPOL'SKY

Gaul, Alfred (Robert) (*b* Norwich, 30 April 1837; *d* Birmingham, 13 Sept 1913). English organist, conductor and composer. He was a chorister in Norwich Cathedral from 1846 and was afterwards articled pupil and assistant to Zechariah Buck. He became organist at Fakenham and then settled in Birmingham, where he was organist first at St John's, Ladywood, and later at St Augustine's, Edgbaston. He took the degree of MusB at Cambridge in 1863. He was appointed conductor of the Walsall Philharmonic Society in 1887 and taught harmony and counterpoint at the school of music attached to the Birmingham and Midland Institute, and elsewhere.

Gaul's compositions, whose superficial fluency won them a wide popularity, include an oratorio and about a dozen cantatas, many psalm settings, anthems, hymns, partsongs and piano pieces, some of them pedagogic works. The most important of his cantatas were all published in London: *Ruth* (1881), his best-known work *The Holy City* (1882), *Joan of Arc* (1887), *The Ten Virgins* (1890), *Israel in the Wilderness* (1892), *Una* (1893) and *The Prince of Peace* (1903). (Obituary, *MT*, liv (1913), 661)

J.A. FULLER MAITLAND

Gaultier [Gautier, Gaulthier], **Denis** (*b* Paris, 1597 or 1603; *d* Paris, 1672). French composer and lutenist. To distinguish him from his cousin, ENNEMOND GAULTIER, he was often referred to as 'Gaultier le jeune'; he was also known as 'Gaultier de Paris'. He was a pupil of Charles Racquet, on whose death he wrote a *tombeau*. Married in 1635 to Françoise Daucourt, he had one son, Philippe Emmanuel, who became adviser to the king. Unlike Ennemond, he held no official court appointment, despite the high esteem in which he was held by the king and certain of his musicians. He practised his art in the city of Paris and in the salons, including that of Ninon de L'Enclos. Until 1631, when Ennemond left Paris, his career was so closely linked with his cousin's that writers of the time refer to them without attempting to distinguish between them. Both had dealings with Blancrocher and L'Enclos and enjoyed a fame at least equal to that of the lutenists Dufaut, Dubut *le père*, Jacques Gallot and Charles Mouton, who were influenced by them and with whom they were united in expressions of general admiration.

Denis and Ennemond Gaultier are also confused in many French and foreign printed and manuscript collections of lute music; a number of pieces are signed simply with the surname. Moreover, it is sometimes impossible to be certain about the authorship of pieces attributed to 'Vieux Gaultier', 'Denis Gaultier', 'Gaultier de Paris' or 'Gaultier le jeune' since the same pieces are sometimes ascribed to both in different collections. *La rhétorique des dieux* and *Pièces de luth sur trois différens modes nouveaux*, which according to the title-pages consist only of works by Denis Gaultier, include pieces attributed elsewhere to Ennemond. The *Livre de tablature*, which Denis Gaultier began and which was completed after his death by his pupil Montarcis, does however contain an almost equal number of pieces clearly attributed either to Denis or to Ennemond.

Pièces de luth (*c*1669) and the *Livre de tablature* (*c*1672) both begin with brief instructions on how to play the lute. *La rhétorique des dieux* (*c*1652), a sumptuous manuscript compiled under the patronage of Anne de Chambré, is divided into 12 parts, each named after one of the Greek modes, and is illustrated with engravings after Le Sueur, Abraham Bosse and Robert de Nanteuil. His output (and that of Ennemond too), which was originally entirely for lute, comprises principally dances, some of which are indicated by subtitles selected from mythology. The two composers developed the *tombeau*, which in fact they pioneered in lute music. Their use of tonality is often more adventurous than that of their predecessors. Froberger was one of several composers of keyboard music who found inspiration in the style of their music, not least the textures; some compositions by the Gaultiers indeed were transcribed for harpsichord in the 17th century. Perrine also used pieces by them when he experimented about 1680 with the writing of lute music in staff notation.

MONIQUE ROLLIN

Gaultier [Gautier, Gaulthier], **Ennemond** (*b* Villette, Dauphiné, 1575; *d* Nèves, nr Villette, 11 Dec 1651). French composer and lutenist. To distinguish him from his cousin DENIS GAULTIER, he was often referred to as 'le vieux Gaultier'; he was also known as 'Gaultier de Lyon' (Lyon is the nearest important city to his birthplace). He was page to the Duchess of Montmorency in Languedoc. He then served as *valet de chambre* to Henri IV's queen (the former Maria de' Medici) from the beginning of her reign in 1600 until her exile in 1631. During these years he won fame at court as a lutenist and teacher of the lute; about 1630 he was sent to England, where he played before Charles I, Queen Henrietta Maria and the Duke of Buckingham. He retired to Dauphiné in 1631: presumably this is why none of his works, which were widely admired, were published during his lifetime.

Lack of publication is one of the factors that have made it so difficult to separate Ennemond Gaultier's music (all originally for lute) from that of his cousin Denis, with whom he was so closely identified: the question is discussed more fully in the article on Denis Gaultier, as is the nature of their music. They were the most important French lutenists of the 17th century, and their works are the most significant French contribution to the lute music of the period.

WORKS

For solo lute unless otherwise stated, and ed. with complete sources and concordances in G; the list includes some works possibly by Denis Gaultier.

Gaultier de Marseille. *See* GAUTIER, PIERRE (ii).

Gauntlett, Henry John (*b* Wellington, Shropshire, 9 July 1805; *d* London, 21 Feb 1876). English organist, composer and critic. He was the son of a well-known evangelical clergyman, Henry Gauntlett, who was curate of Olney, Buckinghamshire, from 1811 and vicar from 1815. The vicar appointed his son organist at the age of ten, and he held the post for ten years. But in spite of the boy's remarkable talent and Attwood's wish to take him as a pupil, his father had him articled to a London solicitor in 1826. He became a solicitor in 1831, and practised law successfully for 15 years. Meanwhile he became organist of St Olave's, Southwark, in 1827, and took further lessons from Samuel Wesley. He soon became recognized as a brilliant organist. From about 1836 he began his ultimately successful campaign to introduce the C organ compass long preferred on the Continent; at Christ Church Newgate Street, where he was evening organist, the transformation was made in time to allow Mendelssohn to play some of Bach's larger organ works in autumn 1837. In 1846 he was chosen by Mendelssohn to play the organ part in the production of *Elijah* at Birmingham, which he did from the full score, to the composer's entire satisfaction.

Thistlethwaite lists 20 organs designed by Gauntlett between 1838 and 1849, mostly built by William Hill, which 'may be said to have delineated the principal features of the mature Victorian organ'. It was Gauntlett's imagination and energy that established the 'German' organ design and compass that made possible both the

accompaniment of a reformed style of congregational singing and the effective performance of the works of Bach. Gauntlett also took out a patent for electric action in 1852. After resigning his post at St Olave's in 1846, he later held other organists' posts, notably at the Union Chapel, Islington, from 1853 to 1861: while there, he collaborated with the minister, the Rev. Dr Henry Allon, in the production of the influential *Congregational Psalmist* (1858). In 1842 he had been given the degree of Doctor of Music by the Archbishop of Canterbury.

From 1839 until the end of his life Gauntlett was constantly engaged in the compilation of hymnbooks and in the composition of hymn tunes and chants; his own tunes probably exceed 1000 in number. They are generally of the plainer type, free from the sensuous chromatics of Dykes and Barnby; many have remained popular, above all 'Irby' (1849), which, linked with Mrs Cecil Frances Alexander's carol *Once in royal David's city*, is a permanent part of Christmas to millions of people. Gauntlett's musical tastes were wide-ranging, from the popular vein of melody found in many of his hymn tunes to the choral music and organ fugues of Bach. He was an enthusiastic advocate of Gregorian plainsong, though he did not necessarily hold Tractarian views in other matters.

Although his work as performer and composer was concerned with church music alone, as a lecturer and critic he revealed wider musical sympathies. Much of his literary work is hidden away in musical periodicals and in the prefaces to unsuccessful hymnbooks. He was a frequent contributor to, and for a time editor of, the *Musical World* in 1836–7; an article by him on the 'Characteristics of Beethoven', treating the composer's late style sympathetically, attained a more than temporary celebrity. He also contributed articles to the *Sun*, *Morning Post*, *Morning Chronicle*, *Christian Remembrancer*, *Notes and Queries*, *Orchestra* (intermittently, 1864–73), and *British Quarterly Review* (on Rossini, 1869), and in 1850–51 he founded and edited a monthly called the *Church Musician*. (An earlier attempt at founding a serious music journal, said by Gauntlett to have secured promised contributions from Moscheles, Klingemann, A.B. Marx, Schumann and Chorley among others, failed in 1840.) In the last year of his life he was writing articles for the newly founded *Concordia*. He was also a notable collector of early music: his library, which he sold as early as 1847 and in 1849, included some extremely rare early theory books (Diruta, Gaffurius and Salinas among them) and two large 16th-century manuscripts of organ music. Gauntlett's outspoken views and theories, however, and his eagerness to achieve recognition, disaffected some of his fellow critics. Holmes and Davison, for example, considered him pretentious and pedantic. But Mendelssohn had a more positive opinion, according to an obituary in *The Athenaeum*:

> His literary attainments, his knowledge of the history of music, his acquaintance with acoustical laws, his marvellous memory, his philosophical turn of mind, as well as practical experience, render him one of the most remarkable professors [i.e. professional musicians] of the age.

NICHOLAS TEMPERLEY

Gaussin, Allain (*b* St Sever, Calvados, 6 Nov 1943). French composer. He abandoned his scientific studies at the age of 20 to devote himself to studying music at the Paris Conservatoire (1966–76), where he won a first prize for composition (in Messiaen's class). He also studied electro-acoustic music with Pierre Schaeffer (1973–5). Between 1981 and 1992 Gaussin taught composition and orchestration at the Schola Cantorum in Paris. He has been professor of composition and orchestration in the Paris municipal conservatories since 1991. He won the SACEM prize in 1983 and 1989, and the Grand Prix du Disque for *Irisation-rituel*, *Camaïeux* and *Arcane* in 1995. He held bursaries from the Académie de France in Rome between 1977 and 1979, from the DAAD in Berlin in 1985, and from the Villa Kujoyama in Kyoto in 1994.

Gaussin also writes poetry, and sees his composition as an essential part of a vast poetic project going beyond craftsmanship, using sound as a material. His music makes its mark through its particularly energetic concept of sound (*Colosseo*, *Eclipse*, *Irisation-rituel*), its distinctive melodic sense (*Ogive*) and its use of striking gestures to clarify structure (*Chakra*, *Arcane*, *Mosaïque céleste*). An independent spirit, Gaussin is not aligned with post-serialism, spectral music or the use of technology in his music, but affirms his individuality in a free synthesis of various techniques.

IVANKA STOÏANOVA

Gauterius de Castello Rainardi [Gauthier of Châteaurenard (Bouches-du-Rhône)]. Composer. He is known only from the 12th-century Calixtine manuscript (*E-SC*), which credits him with two-part settings of the *Kyrie Cunctipotens genitor* and a *Benedicamus domino* as well as the discant of a conductus, *Regi perhennis glorie*. A monophonic version of the conductus appears elsewhere in the manuscript, notated a 4th higher and ascribed to 'a certain Gallican doctor'. Gauterius has sometimes been identified circumstantially with Galterus, a cantor at the Cathedral of Notre Dame in the 12th century.

SARAH FULLER

Gautier, Denis. *See* GAULTIER, DENIS.

Gautier, Ennemond. *See* GAULTIER, ENNEMOND.

Gautier, (Jean-François-)Eugène (*b* Vaugirard, Paris, 27 Feb 1822; *d* Paris, 1 April 1878). French composer, teacher and critic. At the Paris Conservatoire he studied the violin with Habeneck and composition with Halévy, winning the Second Prix de Rome in 1842. He played first violin at the Opéra (1838) and the Société des Concerts du Conservatoire (1846), and became assistant conductor at the Opéra-National (1847–8). His association with opera continued at the Théâtre Italien, where from about 1849 to 1852, and again from 1863 to 1864, he was *chef des choeurs*. The Opéra-National, later the Théâtre Lyrique, presented most of Gautier's early operas. His most popular work there, the *opéra comique Flore et Zéphire* (1852), had 126 performances as a curtain-raiser. Though some critics found the harmony complicated and the orchestration too rich, Berlioz praised the score's freshness and skilful orchestration, and the elegant and lively style of the melodies. Gautier's greatest success came with another light one-act opera, *Le mariage extravagant* (1857, revived in 1871), presented 175 times by the Opéra-Comique. Its score includes an overture whose orchestral style comes close to that of Auber. The most remarked-upon piece, given an encore at the première, consists of light, catchy *couplets* for the madman Darmancé, a comic bass. Gautier was appointed professor of harmony at the Conservatoire in 1864, and largely gave up composing for the theatre, although in 1866 he provided translations of *Don Giovanni* and *Der Freischütz* for the Théâtre Lyrique; in 1872 he became professor of music history. As a music critic he occasionally wrote articles for *Le ménestrel*, the *Grand journal* and *Le constitutionnel*, and from 1874 he wrote regularly for the *Journal officiel*. He also wrote a book: *Un musicien en vacances* (Paris, 1873). At his death his writing was described as 'a bit virulent' as well as 'not always kindly nor very scrupulous in questions of scholarship'; he was, however, generally regarded as a skilful composer of second rank who continued Auber's tradition. At their best his *opéras comiques* show sparkling orchestration, clean phrasing and good taste.

LESLEY A. WRIGHT

Gautier, François. *See* FRANZ, PAUL.

Detail of a portrait, thought to be of Jacques Gautier, by Anthony van Dyck, 1630s (Museo del Prado, Madrid)

Gautier [Gaultier], **Jacques** [Gwaltier, James] (*b* late 16th century; *d* before 1660). French lutenist and composer. He was sometimes known as 'Gautier d'Angleterre'; he was probably not related to Denis and Ennemond Gaultier nor to Pierre Gautier (i) and certainly not to Pierre Gautier (ii). He left France in 1617 after being involved in a murder and fled to England, where he was attached to the court from 1625. He is mentioned in court records until about 1649, and his post was given to John Rogers at the Restoration in 1660. In 1627 he was imprisoned in the Tower of London and tortured for making scandalous remarks about King Charles I, his patron the Duke of Buckingham and Queen Henrietta Maria, whom he taught the lute. He seems to have been restored to favour by about 1629, when he sat for the portraitist Ian Lievens, probably at court. He went to the Netherlands in 1630 and later to Madrid, where he performed before the court; he may at that time have been Van Dyck's model for a portrait now in the Prado (see illustration). He took part in the masque *The Triumph of Peace* in 1634 and in *Britannia triumphans* in 1637. Contemporaries praised his brilliant, accurate and smooth playing; for example Constantijn Huygens, who corresponded with him, complimented his playing in 1622. A few of Gautier's compositions are found in manuscripts (*D-ROu*, *GB-En*).

MONIQUE ROLLIN

Gautier, Judith (*b* Paris, 25 Aug 1845; *d* St-Enogat, Britanny, 26 Dec 1917). French author and writer on music. She was the daughter of Théophile Gautier and Ernesta Grisi, a cousin of the dancer Carlotta Grisi and sister of Giulia and Giuditta Grisi. Already an ardent partisan of Wagner at 16 (during the interval at the first performance of *Tannhäuser* in Paris she had rebuked Berlioz for his obvious delight in Wagner's humiliation), she married his leading French spokesman CATULLE MENDÈS in 1866. They visited Wagner at Triebschen in 1869; they were separated in 1874.

Two years later Gautier went to Bayreuth, where she began a liaison with Wagner himself; its importance to him during the composition of *Parsifal* is reflected both in his letters to her and in the opera itself. In 1893 she established a marionette theatre in Paris, at which she directed a production of *Parsifal* in her own French translation.

BRUCE CARR

Gautier [Gaultier], **Pierre (i)** (*b* Orleans, 1599; *d* after 1638). French composer and lutenist, active in Italy. He was sometimes called 'Gautier d'Orléans' and 'Gautier de Rome'; he was not related to Denis and Ennemond Gaultier, Jacques Gautier and Pierre Gautier (ii), but he may be identified with Pierre Gautruche, a Jesuit from Orléans who was a teacher at Caen from 1640 and the author of some pedagogical works in Latin. Among these, *Philosophiae ac mathematicae totius institutis* (Vienna, 1661) includes an important section *Musica* inspired by Mersenne's *Harmonie universelle* (1636–7); it appeared in numerous new editions in France and abroad up until the beginning of the 18th century. Pierre Gautier's *Oeuvres* (Rome, 1638) consists of lute pieces arranged according to their keys; it is dedicated to Prince Johann Anton d'Eggenberg, Duke of Crumau, who was the imperial ambassador extraordinary to Pope Urban VIII in 1638.

MONIQUE ROLLIN

Gautier, Pierre (ii) [Gaultier de Marseille] (*b* La Ciotat, ?1642; *d* at sea nr Sète, 1696). French composer, opera director, organist and teacher. He probably studied in Paris. In 1682 he was in Marseilles as organist and teacher of the organ, harpsichord and composition. On 8 July 1684 he received permission from Lully to establish an academy of music there: this was Lully's first authorization of an opera house in the provinces. The first performance, on 28 January 1685, was *Le triomphe de la paix*, with libretto as well as music by Gautier; it was performed successfully several times a week until the beginning of Lent. Later in 1685 Gautier was in Paris to hire new performers. The 1685–6 season met with equal success, with performances of Lully's *Le triomphe de l'amour*, *Phaëton* and *Armide*. On 5 February 1687 Gautier's opera *Le jugement du soleil* was performed before an audience of over 1000 on the terrace of the home of the superintendant of the galleys to celebrate Louis XIV's successful recovery from an operation. During the summer and autumn of 1687 the company performed *Phaëton* and *Armide* in Avignon with great success. At Marseilles early in 1688 Gautier successfully produced Lully's *Atys*, which he took in June to Avignon, where he also prepared Lully's *Bellérophon* for two private performances at the residence of the Marquess of Blauvac. On 4 September of that year he was imprisoned for debt and was forced to sell all his company's properties in both Avignon and Marseilles.

Released on 10 September, Gautier left for Lyons, where one of his dancers, Jean-Pierre Legnay, had gone the previous year to organize an opera company; he was now hired as co-manager and conductor. On 16 March 1689 he resigned the post of co-manager but remained as conductor until the company was dissolved in 1692. In 1693 the privilege of giving operas in Marseilles was sublet to his brother Jacques, a sculptor employed as a set designer in Lyons, who became director-in-chief of the academy of music at Marseilles. The performances began successfully in January 1694. The company performed at Aix-en-Provence in the spring of 1695 and at Toulon during the summer. They performed Lully's *Alceste* at Marseilles in 1696 and in May of that year were at Aix, at Avignon in October, at Arles in November and at Montpellier in December. At the end of December Gautier embarked with his brother, some of the company and all his equipment on a return voyage by sea for reasons of economy. The ship was lost in a storm.

As an opera director Gautier was concerned with the quality of his repertory, mostly *tragédies en musique*, in which he showed himself to be a representative of French classicism. He was concerned too with the quality of the performance and staging: a number of singers and dancers from Paris, including some from the Académie Royale, followed him to Marseilles. He also paid reasonable salaries to his artists, to the extent of leaving his other debts unpaid.

As a composer he wrote, according to Brossard's *Dictionaire de musique* (1703), 'dans le style et à l'imitation de Lully'. Yet his surviving works are not those of a mere imitator: his published *airs* and dances (for flute or violin and continuo) are spirited and carefully composed; his use of descending melodic patterns is individual, his imitative writing varied, his bass lines expressive, his rhythms lively, and his use of instrumental colour evocative.

WORKS

Le triomphe de la paix (P. Gautier), 1685, lost; ov., *F-Pn*

MARCEL FRÉMIOT

Gautier, Théophile (*b* Tarbes, 30 Aug 1811; *d* Paris, 23 Oct 1872). French poet, novelist and theatre critic. In musical circles, Gautier is best known as the poet of *Les nuits d'été*, the creator of several mid-century ballets, and a critic of dance and opera. He made his début as theatre critic of *La presse* in July 1837, sharing the post with Gérard de Nerval until June 1838 (hence the combined signature 'G.G.'); he remained with *La presse* until the end of March 1855, thereafter working almost exclusively for government papers: the *Moniteur universel* (later *Journal officiel du soir*) until 1871, and finally the *Gazette de Paris*. From 1855 to 1864 the presence of Pier Angelo Fiorentino (A. de Rovray) as music and theatre critic for the *Moniteur universel* prevented Gautier from writing on those subjects. From 1850 to 1855, Ernest Reyer gave technical help in the preparation of music reviews.

Though Gautier lacked formal musical training, his writings in all genres are suffused with musical references, and his music criticism is valuable for its incisiveness and its sensitivity to socio-cultural context. Unable to describe music in technical terms, he had a gift for interdisciplinary simile, often employing anachronism to make his point. His ballet criticism was biassed, his music criticism more open-minded. Gautier's taste was eclectic, embracing various Asian musics (which he experienced at first hand), Mozart, and contemporary Western composers on both sides of critical divides. He prized originality and, like many of his contemporaries, spontaneity of musical expression. For him, Meyerbeer's *Les Huguenots* was an uncomfortable mixture of calculation and expressive writing; by contrast, Bellini's *Norma*, for all its composer's limitations in harmony and orchestration, inspired admiration. Gautier remained equivocal about Meyerbeer's compositional talent, but collaborated with him on the prologue to *Struensée* (1846). In 1838 he defended *Benvenuto Cellini* on the grounds that Berlioz was upholding an extreme position during a time of cultural and political compromise. Despite becoming increasingly Wagnerian, Gautier remained supportive of Berlioz throughout the composer's lifetime, writing a generous obituary for the *Journal officiel*.

Gautier first heard Wagner's music in 1850, and soon counted himself a Wagnerian. His Wagnerism was counterbalanced by a longstanding appreciation of Verdi as the head of a new Italian school of opera, but became dominant in the 1860s. In 1857 Gautier was invited with other French critics to *Tannhäuser* at Wiesbaden: disconcerted by the opera's traditionalism in relation to what he knew of Wagner's (later) theories, he likened it to a modern painter's imitation of Van Eyck. By 1869 his view of early Wagner had changed, and his study of *Rienzi* (to

coincide with the French première) claimed the composer as a genius and hero. Gautier's attitude towards Wagner was undoubtedly influenced by his daughter Judith and her husband Catulle Mendès, both of whom were prominent Wagnerians.

Contact with Félicien David and Ernest Reyer allowed Gautier to find musical expression for his love for the East. He admired David's *Le désert* of 1844, collaborating with him the following year on a sequence of three Arab-inspired songs. His most fruitful collaborations with Reyer were the *symphonie orientale Le sélam* (1850), inspired by Gérard de Nerval, and the *ballet-pantomime Sacountalâ* (1858). Gautier's travel diaries illustrate his anthropological sensitivity to exotic musics. In the final version (1865) of his diary of a trip to Algiers in 1845, he was dismissive of second-hand academic evaluations of Eastern repertories as 'barbaric', finding instead in Bedouin music a sinuous complexity which he compared to the white threading in Venetian glass.

Within his literary output, music appears as the central subject (the *nouvelle* entitled *Le nid de rossignols*); as a dramatic episode (the dialogue concerning Wagner's merits in *Spirite*); or as an allusive reference (the abstract poem *Symphonie en blanc majeur* from *Emaux et camées*, which presents a set of variations on the word 'white', ending 18 virtuoso stanzas with a surprise modulation to the word 'pink'). A follower of Hoffmann in his *contes* and *nouvelles fantastiques*, Gautier was an important contributor to the establishment of a Romantic vision of music in France.

KATHARINE ELLIS

Gautier de Châtillon. *See* WALTER OF CHÂTILLON.

Gautier de Coincy (*b* Coincy-l'Abbaye, 1177 or 1178; *d* Soissons, 25 Sept 1236). French trouvère. He was the author of the *Miracles de Nostre-Dame* and of a number of religious chansons, some of which he seems to have set to music. His date of birth is known from the *Chronicum S. Medardi Suessonensis*: 'In the year 1193 Gautier de Coincy became a monk, and was 15 or 16 years old at the time'. In August 1214 he became prior of the monastery at Vic-sur-Aisne, about 16 km west of Soissons. He returned to St Médard in Soissons as abbot on 19 June 1233, where he remained until his death. The extensive learning revealed in his work and his obvious familiarity with contemporary secular song has led some writers to speculate that he spent time at the University of Paris before 1214, but this cannot be supported by documentary evidence.

The *Miracles de Nostre-Dame* is a massive verse narrative, some 30,000 lines in length, recounting the numerous miracles associated with the Virgin. Gautier explained that he found these stories in a Latin manuscript. No such source now survives, however, thus making it impossible to trace the origins of all the material contained in the work. It was written in two large sections, the first between 1214 and about 1222, the second between 1222 and 1233. Gautier identified himself in the work as 'Li prior de Vi' (Vic-sur-Aisne), indicating that his literary activities were probably confined to the years between 1214 and 1233. The popularity and importance of *Miracles* is attested by the fact that it survives in over 80 sources (22 with music) and inspired numerous imitations.

Perhaps following the example of the contemporary *Roman de la rose*, Gautier incorporated a number of songs with music into his narrative. These are set in two larger groups and one smaller one at various places in the text and are, in the majority of cases, new poems in praise of the Virgin set to pre-existent melodies from a variety of sources. The manuscripts in which *Miracles* is extant also include a number of similar songs (some without music) that are not part of the cycle but which nevertheless may be Gautier's work. Gautier left no doubt about his intention of including songs within the narrative. In the text preceding the first group he said: 'We should sing of the Virgin both day and night as the angels do. All those who sing sweetly enchant the devil and lull him to sleep. Now listen as I sing'.

Gautier is important to the music historian largely for two reasons. First, his work represents the earliest substantial collection of sacred and, above all, Marian songs in the vernacular – songs that were widely imitated in France and elsewhere throughout the later Middle Ages (e.g. *Pour conforter*). This is in sharp contrast to the almost exclusively secular repertory of the worldly trouvères who were his contemporaries or near-contemporaries. Second, the large number of contrafacta that use contemporary trouvère melodies would seem to indicate that Gautier made a conscious effort to put secular melodies to sacred or at least devotional use – he 'sang sweetly' to 'enchant the devil and lull him to sleep'. This concern finds a parallel in the Latin verses of Gautier's contemporary, Philip the Chancellor, who likewise set most of his poems to melodies of secular origin.

Eight of Gautier's poems are set to trouvère melodies, the largest number being contrafacta of songs by Blondel de Nesle (*Amours dont sui*, *Je pour iver*, *Qui que face*); a further five draw on various other musical sources: two are based on the same conductus by Perotinus (*De sainte Leocade*, *Entendez tuit*), two on anonymous monophonic conductus (*Ma viele*, *Talens m'est pris*), one on a motet (*Hui matin*) and one on a sequence (*Hui enfantés*). Three songs that use borrowed melodies survive in one or more sources in two-part polyphonic form (*Amours dont sui*, *De sainte Leocade*, *Entendez tuit*), including a unique two-part setting of Perotinus's *Beata viscera*. Gautier was, however, no mere musical parodist: a number of the songs that are certainly by him are set to melodies elsewhere unknown; most notable, perhaps, is the very beautiful strophic lai *Roine celestre*.

WORKS

Edition: *Les chansons à la vierge de Gautier de Coinci*, ed. J. Chailley, PSFM, xv (Paris, 1959) [complete edn except for doubtful works]

nm – *no music*

Amours dont sui espris (De chanter), 1/2vv, R.1546 [contrafactum of: Blondel de Nesle, 'Amours dont sui espris (m'efforce)', R.1545] (melody also used for three conductus: 'Procruans odium', 2vv – duplum = R.1546; 'Purgator crimium', 3vv; 'Suspirat spiritus', 1v)
Amours qui set bien enchanter, R.851 [contrafactum of: 'Sour cest rivage'] (two melodies)
De sainte Leocade, 1/2vv, R.12 [contrafactum of: Perotinus, 'Beata viscera']; ed. in Gennrich (1948), 230
D'un amour coie et serie, R.1212 [contrafactum of: Gilles de Maisons, 'Je chant, c'est mout mauvais signes', R.1356]
Entendez tuit ensemble, et li clerc et li lai, 1/2vv, R.83 [contrafactum of: Perotinus, 'Beata viscera']; ed. in Gennrich (1948), 230, Gennrich (1960), 28 (three melodies)
Esforcier m'estuet ma vois, R.1836
Hui enfantés, R.9246 [contrafactum: sequence, 'Letabundus']
Hui matin a l'ajournee, R.491a [contrafactum of: 'Hier matin a l'enjournee', motet 764]
Je pour iver, pour noif ne pour gelee, R.520 [modelled on: Blondel de Nesle, 'Li plus se plaint d'Amours mai je n'os dire', R.1495]
Las, las, las, las, par grant delit, R.1644
Ma viele, R.617a [contrafactum: monophonic conductus, 'O Maria, o felix puerpera']
Mere Dieu, vierge senee, R.556 (two melodies)
Pour conforter mon cuer et mon courage, R.20 [textual contrafactum of Guilhem de Cabestanh, 'Mout m'alegra douza vos', PC 213.7; model for: Alfonso el Sabio, 'Como Deus é comprida Trinidade']
Pour la pucele en chantant me deport, R.1930 [modelled on: Pierre de Molins or Gace Brulé, 'Chanter me fet ce dont je crien morir', R.1429; anon., 'Destroiz d'amours et pensis sans deport', R.1932] (two melodies)
Pour mon chief reconforter, R.885 [contrafactum of: Walter of Châtillons 'Sol sub nube latuit'; Thibaut de Blason, 'Chanter et renvoisier seuil', R.1001] (R.885 and 'Sol sub nube latuit' share a refrain which is missing in R.1001)
Puis que voi la flour novele, R.600 [contrafactum of: Gautier de Dargies or Gontier de Soignies, 'Au tens gent que reverdoie', R.1753]
Quant ces floretes florir voi, R.1677 [contrafactum of: Vielart de Corbie, 'De chanter me semont Amours', R.2030]
Qui que face rotruenge novele, R.603 [contrafactum of: Blondel de Nesle, 'Bien doit chanter cui fine Amours adrece', R.482] (three melodies)
Roine celestre, R.956; ed. in *MGG1*
Sour cest rivage, a ceste crois, R.1831 [contrafactum of: 'Armours qui set'] (on the rediscovery of the relics of St Leocadia in 1219)
Talens m'est pris orendroit, R.1845 [contrafactum: monophonic conductus, 'Ave virgo sapiens']

ROBERT FALCK

Gautier de Dargies (*b c*1165; *d* after 1236). French trouvère. His forebears had participated in the First Crusade in 1099, and he himself took part in the Third Crusade (1189). His name appears as witness or principal in documents of 1195, 1201, 1206 and 1236. These mention also a wife named Agnes and three brothers, Rainaut, Drogo and Villardus. Gautier's father, Sagalo de Dargies, was either a younger son or a descendant of a younger son. Thus the trouvère's arms, shown in miniatures in the Manuscrit du Roi (*F-Pn* fr.844) and the Chansonnier d'Arras (*F-AS* 657: see illustration), display martlets of

Gautier de Dargies: miniature, and music for the song 'Quant li tens pert sa chalour', from the Chansonnier d'Arras, c1278 (F-AS 657, f.133)

gules rather than of sable, the latter colouring being indicative of the main branch of the family. The hamlet of Dargies is in the département of Oise, Beauvais arrondissement.

The chansons *Ainc mais ne fis chançon* and *Desque ci ai tous jours chanté* are dedicated to Gace Brule, mentioned also in *Or chant novel. A vous, messire Gautier* is a *tenso* addressed to Gautier de Dargies by a certain Richart, while *Amis Richart* is one addressed to Richart de Fournival by a certain Gautier; presumably the same pair of participants is involved in both. It is possible that Gautier was also acquainted with other trouvères active in the third crusade, including the Chastelain de Couci, Conon de Béthune, and Hugues de Berzé.

In addition to the customary *chansons courtoises* and the two *tensos*, Gautier de Dargies wrote three descorts (*De celi me plaing, J'ai par maintes fois* and *La douce pensee*), the earliest known works of this genre. His themes and imagery derive for the most part from the fashionable stock of his time, but these materials are handled very skilfully. Greater originality is evident in the treatment of poetic form; several works depart from the average by virtue either of asymmetrical design (*Chançon ferai, Desque ci ai, Maintes fois*) or of greater than normal length of strophe (*Autres que je ne suel fas, Bien me cuidai, En icel tens* and *Hé Dieus*).

Individuality of form is present also in the melodies. While bar form remains the norm, *Hé Dieus* has *pedes* of three phrases each, and *Bien me cuidai* uses *pedes* of four phrases each. Four melodies are non-repetitive (*Ainc mais ne fis chançon, Chançon ferai, Desque ci ai* and *La gent dient*), and *Haute chose* repeats later phrases rather than the customary opening ones. Highly unusual are the late settings of *Chançon ferai* and *Maintes fois* in the Chansonnier d'Arras; in these, the phrase lengths (defined by repetition patterns) often differ in length from the poetic phrases, creating a complex interplay. A similar technique, carried out more subtly, is present in the main setting of *Maintes fois*. The descorts, containing 47, 63 and 85 verses, are normally analysed as falling into six, seven and nine strophes respectively, no two being structurally identical in the same poem. Most musical phrases are grouped in twos, each group being stated two, three or four times. There are also groups of three phrases as well as twofold and threefold statements of single phrases. A few strophes conclude with one or two phrases not part of a larger repetition.

Gautier's melodies move vigorously. None is restricted to less than an octave, and examples covering a 10th, 11th or 12th are common. The late setting of *Se j'ai esté* in the Manuscrit du Roi spans an extraordinary two octaves and a 2nd, a range made possible by an early use of the G clef on the lowest line of a four-line staff. (If octave transposition for this clef were used in order to keep the melody within a smaller span, leaps which are highly uncharacteristic of the style would result at the two points of transition; the range of an octave and a 7th in the Noailles reading of *De celi me plaing* seems, however, to result from transpositions which represent a late – and perhaps unintended – revision of the original.) Modal organization is frequently individual also, and often varies from one reading to another. In several works there is important use of notes below the final. In the reading of *Bien me cuidai* in the Manuscrit du Roi, for example, the final is a 7th above the lowest note. In general, Gautier favoured modes with a major 3rd above the final. In most melodies the final is a tonal centre of importance; some, however, reach an unexpected final while others display little sense of tonal gravitation.

The late setting of *Chançon ferai* in the Manuscrit du Roi is given in fully mensural notation and is cast in the 2nd rhythmic mode. The applicability of this information to the florid original setting is, however, doubtful. The ligatures used in the main setting of *Autres que je ne suel fas* are disposed in patterns that invite the use of the 2nd mode, but there is little other evidence of such regularity.

On the contrary, the irregular and often highly ornate settings appear quite inappropriate to the use of modal rhythm. The individuality of form, combined with breadth of motion and richness of rhythmic design, show Gautier's melodies to be among the more forceful creations of their kind.

THEODORE KARP

Gautier de Lille. *See* WALTER OF CHÂTILLON.

Gautier d'Espinal [Epinal] (*b* before 1220; *d* before July 1272). French trouvère. He is generally assumed to have been a member of the family of the seigneurs of Epinal; identification has been based on this and on the dedication of *Quant voi iver* to the Count of Bar. A Gautier d'Espinal is mentioned in documents of 1232 to 1272. Some scholars feel, on the other hand, that the style of Gautier's works points to an author active earlier in the 13th century.

A few of the chansons attributable to Gautier survive in more than six sources, but several are in no more than three. The opening strophes of *Aïmans fins* and *Desconfortés et de joie parti* were quoted by Girart d'Amiens in his roman *Méliacin*. While the imagery of the poems remains wholly within the stock vocabulary of the *chanson courtoise*, Gautier handled his material with considerable skill. Most strophes contain the same number of syllables per line – generally ten, though sometimes seven or eight. *Partis de doulour*, *Tout esforciés* and *Comencement de douce saison*, however, are of elaborate construction. Gautier did not depend as heavily as most on the standard *abab* rhyme pattern for the opening of the strophe; this in turn is reflected in the formal freedom of a number of melodies.

While bar form still constitutes the norm, *Puis qu'en moi a recouvré* and *Par son dous comandement* are non-repetitive, and *Tout autresi* concludes an otherwise through-composed setting with a variant of the third phrase. *Aïmans fins* presents an irregular pattern of repetition using variation. The structure of *Ne puet laissier fins* is unusual: the rhyme scheme suggests a strophic division into groups of four lines plus three, while the syntactical grouping of the first strophe is three plus two plus two: the melody, on the other hand, may be described as *ABCA′B′C′D*. With regard to melodic construction, Gautier favoured the G modes; a trait characteristic of many of his melodies is the use of one or more tonal centres that exert a force equal to that of the final. In *Tout esforciés* the repeated use of the opening leap of a 5th, *d–a*, forms a strong counterbalance to the final, *g*, while a similar function is filled by the contrast of the chain of 3rds, *a–c′–e′*, against the *g* final in *Aïmans fins*. Strong centres on the fourth degree and on the subfinal are found in *Amours et bone volenté* and *Quant voi iver*. None of the melodies survives in mensural notation and there are apparently no regular patterns of rhythmic construction. In general, there is an increase in rhythmic activity as the phrases progress towards the cadences. The validity of modal rhythm in his works seems dubious.

THEODORE KARP

Gauzargues, Charles (*b* Tarascon, *c*1725; *d* Paris, 1799). French theorist and composer. He trained as a choirboy in Tarascon; after being ordained as a priest he became *maître de chapelle* at Nîmes and later at Montpellier. According to Laborde he went to Paris in 1756 to submit his compositions to Rameau. He acted as *sous-maître* of the royal chapel from 1758 to 1775, when he retired to Saint-Germain. He seems to have returned to Paris for the last years of his life. He is credited with having written 40 motets, though only two are extant: *In te Domine speravi* (*F-AIXm*) and *Cantate Domine* (published in the *Traité de composition*).

He published two treatises. The *Traité d'harmonie* (Paris, n.d., ?2/1798) adheres to Rameau's theory of the fundamental bass, and a clear and methodical presentation of chordal nomenclature is emphasized. He uses Rameau's original terminology for dissonance treatment, cadence types and supposition chords, yet incorporates concepts from post-Ramist theorists such as d'Alembert and Roussier. Most notably, he makes a distinction between an invertible 7th chord on the second scale degree and a fundamental 6-5 chord on the subdominant, and he discusses augmented 6th chords in modulatory passages involving dominant chords. In the *Traité de composition* (Paris, 1797) he provides musical examples to show how theoretical rules of chordal harmony apply to actual practice. He concludes the work with a discussion of fugue and includes his own five-voice composition as a model.

CYNTHIA M. GESSELE

Gavaldá, José (*b* Vinaroz, nr Tortosa, 2 Oct 1818; *d* Madrid, 21 April 1890). Spanish bandmaster. At the age of nine he was chosen to be a choirboy at Tortosa Cathedral. After five years' study with the *maestro de capilla*, Juan Antonio Nin (1804–67), he was named organist of the church of S Blas in that city. Drafted into the army during the Carlist wars, he was stationed at Morella and at 22 held the rank of *músico mayor* in the Guardia Real. At 25 he was sent to Galicia and at 31 became director of music at the Colegio Militar in Toledo. In 1856 he moved to Madrid, where he started the periodical for army bandmasters *El eco de Marte*. In 1867 he sold this highly successful magazine and the copyright of all his military band compositions to the firm of Romero Andía. His other compositions include two symphonies, a six-voice mass with military band accompaniment, written for the Toledo Colegio de Infantería, and a five-voice orchestral *Salve regina*. (*LaborD*)

ROBERT STEVENSON

Gavaldá, Miguel Querol. *See* QUEROL GAVALDÁ, MIGUEL.

Gavaux, Pierre. *See* GAVEAUX, PIERRE.

Gavazzeni, Gianandrea (*b* Bergamo, 27 July 1909; *d* Bergamo, 5 Feb 1996). Italian conductor, composer and writer. He studied at the Accademia di S Cecilia, Rome, and with Pizzetti at the Milan Conservatory. His conducting début was in 1940, after his own opera *Paolo e Virginia* had been well received in 1935, but in 1949 he abruptly gave up composition and refused to allow further performances of his works. From 1948 he was associated with La Scala, Milan, where he was artistic director (1965–8) and continued to conduct into the 1990s. He was a perceptive exponent of the *verismo* school, both in performance and in print, and his edition of Mascagni's *Le maschere* was staged at the Florence Maggio Musicale in 1955 and several times revived elsewhere. His British début was at the 1957 Edinburgh Festival in *Il turco in Italia* with the company from the Piccola Scala, and the same year he conducted *La bohème* at the Chicago Lyric Opera. He conducted the Bol'shoy Opera at Moscow in 1964 and appeared at the Glyndebourne Festival in 1965 (*Anna Bolena*) and at the Metropolitan in 1976 (*Il trovatore*). He recorded several operas by Rossini, Verdi, Mascagni and Puccini, wrote music criticism for *Il corriere della sera*, and published studies of Bellini, Donizetti, Mascagni, Pizzetti, Musorgsky and Janáček, as well as guides to the operas of Mozart and Wagner.

LEONARDO PINZAUTI, NOËL GOODWIN

Gaveau. French firm of piano and harpsichord makers. Joseph Gaveau (*b* Romorantin, 1824; *d* Paris, 1893) founded the firm in 1847, working with his employees in a small shop at the rue des Vinaigriers in Paris; the workshop and the offices were later transferred to the rue Servan. The firm established an excellent reputation for its small upright pianos, and by the 1880s the business was producing about 1000 pianos a year, achieving a degree of success due to commercial acumen rather than intrinsic quality. Joseph was succeeded by his son Etienne Gaveau (*b* Paris, 7 Oct 1872; *d* Paris, 26 May 1943), who organized the construction of a larger new factory at Fontenay-sous-Bois and, following the example of other well-known piano makers, in 1907 opened a new concert hall, the Salle Gaveau, in the rue la Boëtie, Paris. This street also housed the offices of the firm from 1908.

Arnold Dolmetsch joined the firm in 1911, and under his direction it produced spinets and small unfretted clavichords along historical principles; this continued after his departure in 1914. The firm undoubtedly hoped to capture part of the new market for plucked keyboard instruments and clavichords from its great rivals, Pleyel. Etienne's sons Marcel and André Gaveau succeeded their father in running the firm. In December 1959 Gaveau joined ERARD to form Gaveau-Erard S.A. In 1971 the production of Gaveau pianos was taken over by the German firm Schimmel, but since 1994 the instruments have been made by the French manufacturer Rameau.

MARGARET CRANMER

Gaveaux [Gavaux, Gaveau], **Pierre** (*b* Béziers, 9 Oct 1760; *d* Charenton, nr Paris, 5 Feb 1825). French singer and composer. At the age of seven he became a choirboy at Béziers Cathedral, where he was a soloist for nearly ten years. Intended for the clergy, he studied Latin and began philosophical studies while working at composition with the cathedral organist, Abbé Combès. On the death of the Bishop of Béziers he accepted a post as first tenor at St Séverin, Bordeaux. He continued his musical studies under the direction of Franz Beck and his early success as a composer of motets decided his vocation. He abandoned his clerical plans and was engaged as a conductor and tenor at the Grand Théâtre de Bordeaux. In 1788 he was active in Montpellier and toured in the south of France, and the following year was called to Paris to sing in the Théâtre de Monsieur, which at that time was in the Tuileries. His light and agreeable voice had a fine timbre so that he could sing such major roles as Floresky in Cherubini's *Lodoïska* in 1791 and Romeo in Steibelt's *Roméo et Juliette* in 1793. He was, moreover, an excellent musician and an intelligent actor, and was highly valued as a member of the company because of his competence and dynamism. He remained with the company when it moved to the Théâtre Feydeau, where he began his career as a composer of dramatic works with minor *opéras comiques*; these remained fashionable from his *Le paria, ou La chaumière indienne* (1792) to *Le traité nul* (1797).

Meanwhile, in 1793 Gaveaux founded with his brother Simon a music shop, 'A la Nouveauté', in the Passage Feydeau, in which he published his own works. During the Revolution he wrote a number of patriotic songs, including *Le réveil du peuple*, first sung on 19 January 1795, six months after the fall of Robespierre. This hymn prompted unrest at every performance and was prohibited by the Directory on 8 January 1796.

Gaveaux produced his finest works, *Sophie et Moncars* (1797) and, particularly, *Léonore, ou L'amour conjugal* (1798), during a period in which the nature of the *opéra comique* was becoming diversified. Dalayrac and Cherubini were writing veritable *drames lyriques* on affecting subjects, and the influence of German music was imposing a new style (similar to Singspiel) on the genre; but the traditional form, with its characteristic mixture of airs and spoken dialogue, was retained. *Léonore*, a *fait historique* with a libretto by Bouilly, later provided Beethoven with the subject of *Fidelio*. It enjoyed considerable success; Gaveaux himself sang the part of Florestan and Mme Scio that of Leonore. *Ovinska, ou Les exilés de Sibérie* (1800) and *La rose blanche et la rose rouge* (1809) suffered from mediocre librettos, but *Le bouffe et le tailleur* (1804) and *Monsieur Deschalumeaux* (1806) were more successful and were revived several times during the 19th century.

When the companies of the Théâtres Favart and Feydeau merged in 1801, Gaveaux remained a member, but he took only secondary roles as his voice was losing its grace and it was becoming difficult for him to keep up with such rivals as Elleviou or Martin. In 1804 he was appointed a singer in the imperial chapel. He was affected by mental illness and left the stage in 1812. Apparently cured, he resumed his publishing activities, directing the shop in the Passage Feydeau himself from 1813 to 1816. He wrote one more *opéra comique, Une nuit au bois, ou Le muet de circonstance* (1818). In 1819 he retired to a mental asylum.

Gaveaux's older brother, Simon Gaveaux (*b* Béziers, 1759), was a répétiteur and music prompter at the Théâtre Feydeau. He managed (with Pierre) the publishing company in the Passage Feydeau until 1812 and from 1813 to 1829 directed a new shop in the rue Feydeau by himself. He was probably the author of a *Nouvelle méthode pour le flageolet suivie de petits airs*, though the title-page attributes it to a G. Gaveaux *l'aîné*.

WORKS

STAGE

unless otherwise stated, all are opéras comiques, first performed in Paris, Théâtre Feydeau (to 1801) and OC (after 1801), and published in Paris shortly after first performance

L'amour filial, ou Les deux Suisses (opéra, 1, C.A. Demoustier), 7 March 1792, later as L'amour filial, ou La jambe de bois
Le paria, ou La chaumière indienne (opéra, 2, Demoustier), 8 Oct 1792
Les deux ermites (opéra, 1, B. Planterre), 17 April 1793
La partie carrée (opéra-bouffe, 1, L. Hennequin), 26 June 1793, unpubd
La famille indigente (fait historique, 1, Planterre), 24 Mar 1794
Sophronime, ou La reconnaissance (opéra, 1, Demoustier), 13 Feb 1795
Delmon et Nadine (2, E.-J.-B. Delrieu), 11 June 1795
Le petit matelot, ou Le mariage impromptu (opéra, 1, C.-A.-G. Pigault-Lebrun), 28 Dec
Lise et Colin, ou La surveillance inutile (opéra, 2, E. Hus), 4 Aug 1796
La gasconnade (1, Leroi), 10 Oct 1796
Tout par hasard (1, Monnet), 22 Oct 1796
Céliane (opéra, 1, J.M. Souriguière de Saint Marc), 31 Dec 1796
Le mannequin vivant, ou Le mari de bois (1, R.C.G. de Pixérécourt), 1796, unperf.
Le traité nul (com., 1, B.J. Marsollier des Vivetières), 23 June 1797
Sophie et Moncars, ou L'intrigue portugaise (op. vaudeville, 3, J.-H. Guy), 30 Sept 1797
Léonore, ou L'amour conjugal (fait historique, 2, J.-M. Bouilly), 19 Feb 1798
Le diable couleur de rose, ou Le bonhomme misère (opéra bouffon, 1, G. Lévrier-Champrion), Arts, 23 Oct 1798
Les noms supposés (com., 2, J.-B. Pujoulx), 11 Dec 1798, rev. as Les deux jockeys, 17 Jan 1799
Le locataire (OC, 1, C.-A. Sewrin), 26 July 1800
Le trompeur trompé (OC, 1, B. Valville), 2 Aug 1800
Ovinska, ou Les exilés de Sibérie (3, Bidon de Villemontez), 20 Dec 1800
Le retour inattendu (1, Valville), 29 March 1802
Un quart d'heure de silence (OC, 1, P. Guillet), 9 June 1804
Le bouffe et le tailleur (1, P. Villiers and A Gouffé), Paris, Montansier, 21 June 1804

PAULETTE LETAILLEUR

Gaviniés [Gaviniès, Gaviniez, Gavigniès, Gavignès, Gabignet and other variations], **Pierre** (*b* Bordeaux, 11 May 1728; *d* Paris, 8 Sept 1800). French violinist and composer. He was Leclair's successor as leader of the French violin school. The esteem with which he was regarded is indicated by his inclusion in Fayolle's *Notices sur Corelli, Tartini, Gaviniés, Pugnani et Viotti* (Paris, 1810) and by Viotti's having labelled him (according to Pipelet) 'the French Tartini'. He was admired as a performer, composer, teacher and philanthropist.

Gaviniés was the son of François Gaviniés, a violin maker, and Marie Laporte. Accurate information about his early training is limited, though his talent was undoubtedly nurtured by the artists who frequented his father's violin shop. By 1734, possibly to further Pierre's musical education, his father moved the family and business to Paris. At the age of 11 he appeared in private concerts, and at 13 he made a successful Concert Spirituel début, performing a Leclair duet with L'abbé *le fils*, a pupil of Leclair; there is no evidence to suggest that Gaviniés was also one of his pupils. Later in 1741 he performed 'Spring' from Vivaldi's 'Four Seasons' at the Concert Spirituel, after which his activities are not known for several years; some believe that he was employed by the Duke of Orleans during this period. From 1748 Gaviniés performed frequently at the Concert Spirituel, playing both alone and with others, including the violinist Guignon, the flautist Blavet and the singer Marie Fel. His whereabouts from 1753 to 1759 remain a mystery except for the fact that one year was spent serving a prison sentence for an illicit affair with a young countess. In prison he composed his famous 'Romance' – a work which appeared in numerous versions during his lifetime. In 1759 he returned to the Concert Spirituel, and on 6 November 1760 his *Le prétendu*, an *intermède* in three acts, was presented by the Comédie-Italienne.

The early 1760s were perhaps the apex of Gaviniés's career. He published three sets of sonatas for violin and basso continuo, one set for two violins and six concertos. Several symphonies were performed at the Concert Spirituel, where he conducted the orchestra from his position as leader. In the winter of 1763–4, the Mozart family attended some of his concerts. After 1765 he performed little, perhaps because of his envy of Antonio Lolli, a phenomenal virtuoso who had become popular for a novel effect involving scordatura. Between 1769 and 1772, Gaviniés organized five benefit concerts for a free school of design. With Simon Leduc and Gossec, he directed the Concert Spirituel from 1773 to 1777, during which time the orchestra was enlarged and the quality of performance improved remarkably. After this he remained in Paris but seldom played in public. A wealthy benefactress bequeathed him an annuity of 1500 livres in 1788; the annuity may not have survived the Revolution, however, for Gaviniés took a position playing in the orchestra of the Théâtre de la rue de Louvois in the 1790s.

When the Paris Conservatoire was established in 1795, Gaviniés accepted the position of violin professor. He is reported to have been an enthusiastic and well-liked teacher. Although physical infirmities eventually forced him to remain in his home, his fabulous technique was not affected and he remained active until his death. In 1800 (or possibly 1794) he published his famous *Vingt-quatre matinées*, a series of difficult études.

Gaviniés was a charming and affable humanitarian. He never married, but he had numerous female admirers and friends. He was a friend of J.-J. Rousseau and other French writers. Partly due to his generous nature – he favoured pupils who were less affluent, in some cases giving them free lessons or even supporting them – he died in relative poverty. The most valuable belongings that he left were several manuscripts of unpublished works and some musical instruments. He was given a grand and dignified funeral, attended by pupils and friends; the cortège included F.-J. Gossec, E.-N. Méhul and Cherubini.

Gaviniés was best known to his contemporaries as a violinist; nearly every aspect of his playing was praised. He was most profusely complimented for his expressiveness, for the purity and dimension of his tone and for the remarkable flexibility of his bowing. His improvisations were admired and his sight-reading ability was renowned. His own études reflect an interest in the development of dexterity of the left hand and a supple bow technique. Among his many famous pupils were Baudron, Capron, M.-A. Guénin, Simon Leduc, Moria and L.H. Paisible.

Gaviniés's works for the violin, comprising sonatas, duos, concertos and études, reveal something of his own virtuosity. All of the sonatas and duos have three movements. Many of the slow middle movements are *romances*. In the early works, some of the finales take the

form of a moderate theme and variations or a minuet. The first movements of the second set of sonatas usually have two strongly contrasting themes. The entire range of the violin is exploited, with unusual emphasis on the lower register. Double stopping is employed in various ways and there is much ornamentation, despite the broad, sweeping, melodic curves. Gaviniés was extremely explicit regarding dynamics and articulation, although fingerings were added infrequently. In the duos, the violins have parts of equal importance.

The concertos, perhaps the best of Gaviniés's works, share many traits with the sonatas but demand greater virtuosity. Broken chords, flourishes of notes in one bowstroke, pedal points, wide melodic leaps and extensions to the upper register abound. The solo part has no separate theme. Some critics detect influence from the Mannheim school, and some believe that Gaviniés's concertos were precursors of the Romantic concerto. Wyzewa and Saint-Foix felt that Gaviniés's influence was apparent in Mozart's violin concerto K211.

The études in the *Vingt-quatre matinées* represent the acme of 18th-century violin technique. Even more difficult than the works of Tartini, they remained unsurpassed until the advent of Paganini. Although the extreme upper register is avoided, enormous leaps and complex passages in the fourth to seventh positions are characteristic. The études vary in style from archaic to progressive and, unlike the studies of many contemporaries, display various moods and technical problems within each piece.

WORKS

printed works published in Paris

Le prétendu (intermède, 3, A.-F. Riccoboni), Paris, Comédie-Italienne, 6 Nov 1760 (after 1760)

Vocal: 'Qu'il est doux, qu'il est charmant' [Romance de Gaviniés], *c*1755, pubd in many arrs.; 'On craint un engagement' [Romance from Le prétendu]; 'Vous dittes toujours maman', romance, *F-Pn*; arrs. and songs in contemporary anthologies, incl. 'La chute imprévue', the possible origin of 'Der vorgegebene Zufall', an 'operette' attrib. Gaviniés by Gerber

Orch: 6 concs., solo vn, str, 2 ob, 2 hn, op.4 (1764); Dernière étude en concerto, solo vn (1805), lost; ?3 syms., perf. *c*1762, lost; 2 vn concs., *Pc*; 1re suite sur des noëls, vn, 2 orch, *Pc*; 2me suite sur des noëls, *Pc*; Chaconne, composed as interlude for perf. of Rameau: Hippolyte et Aricie, 1767, lost

Gavioli. Italian family of mechanical instrument makers, later active in France. Giacomo Gavioli (*b* Cavezzo, nr Modena, 16 Feb 1786; *d* Paris, 1875) began as a maker of horse-drawn cabriolets. In 1818 he went to Modena to work for the county watch repairer. In 1828 he advertised as a 'manufacturer and retailer of carillons and organs'. He became Modena's leading watch and clock-maker; his clock for the Palazzo Comunale is still in use there.

His son Lodovico [Louis] Gavioli (i) (*b* Cavezzo, 5 Aug 1807; *d* Paris, 1875) began to show his mechanical genius in his early innovations in clock design. During the 1830s he began making mechanical or self-playing instruments, including a harp-playing android *David* (1838). He also made a mechanical orchestra called the Panarmonico. He undertook repairs to small mechanical instruments (barrel pianos and organs) for street musicians, and eventually mastered their manufacture. At the 1845 Triennial Exhibition in Modena he was awarded a prize for a street organ of his own design, as a result of which he decided to manufacture the *armonico a mano* as his main source of income. He also built a barrel recital organ for Queen Isabella II of Spain. In 1854 he moved to Paris and set up as a maker of mechanical orchestras, taking over the old Pleyel piano and harp factory in Faubourg Saint-Antoine. The Italian king allowed Gavioli to use the Austro-Estense coat of arms on his factory. The following year he received a gold medal at the Paris Exposition for a mechanical flute-playing android; he also took out an English patent for the Clavi-accord, a portable reed organ. Lodovico and his sons Anselmo [Anselme] (1828–1902) and Claudio [Claude] (1831–1905) began making street pianos, and later made fairground and dance organs. The firm's reputation, however, was based on the building of the Stratarmonica, the first true street organ; this was a large barrel organ on wheels with moving figures in its prospect.

Anselmo took over the management of the firm in 1863, but suffered a setback when his factory was destroyed during the Franco-Prussian War in 1870. With financial backing from Prosper Yver and Leonce Julaguier, in 1871 he reorganized the company under the name of Gavioli & Cie. In 1876 Anselmo patented an improvement in pipe construction called the *frein harmonique*, or harmonic bridge. This consisted of a piece of metal positioned in front of the mouth of a narrow-scaled pipe to stabilize the wind curtain at the languid, allowing the pipe to be blown at high pressure without overblowing, an innovation soon used by makers of church and concert-hall organs as well. Until almost the end of the 19th century all street organs had been operated by pinned barrels (*see* BARREL ORGAN). In 1892, using the principle of the Jacquard loom, Anselmo invented the 'keyframe and music book' system, in which a long series of hinged perforated cards (the 'book') is fed through the keyframe mechanism for playing. The advantages of the system were the compactness of the music programme, the simplicity of the method of preparing 'the book' (the holes were punched out on a treadle-operated machine) and, above all, that the music played could be much longer and more complex. This invention, together with Anselmo's two-pressure system, patented in 1891 (low pressure for the pipes, high pressure for the action), heralded the beginning of a new era for street and fairground organs. Anselmo's son and successor Lodovico (ii) (1850–1923) excelled in arranging music, and this period in the company's history marked the high point in

its musical superiority over other fairground organ makers. The firm produced some of the finest mechanical instruments of the age: around the turn of the century Claudio invented a book-playing 'mechanical band' called the Coelophone Orchestre but it seems to have had limited production, and none is now known to exist.

The Gavioli firm did not benefit as it should have done from these and other inventions. Financial problems plagued Lodovico (ii) and shortly after his father's death his foreman Charles Marenghi left, with others trained by Gavioli, to start a rival business. Despite this setback, the firm went on to develop what many consider its masterpiece, the large 110-key Gavioliphone, which, after six years of design work, was put on the market in 1906 and seems to have been particularly popular in England. The centre of book-organ building was shifting from Paris to Belgium, where thriving builders such as Mortier and Hooghuys were capitalizing on a new interest in organs for dance halls. Gavioli tried to counter this, opening a branch factory in Waldkirch where a small number of 'German Gavioli' organs were made to suit the different demands of a German market. The firm might have held its lead in the industry, had it not tried to produce an even more ambitious 112-note keyless instrument (using paper rolls) with an experimental action and wind system. Patented in 1907, this new instrument was beset with mechanical problems, and purchasers sued Gavioli for damages under the terms of their guarantee. This, along with the fact that Mortier was infringing Gavioli's patents, is probably what prompted the sale of the business to LIMONAIRE Frères in 1910.

Gavotte (Fr.; Old Eng. gavot; It. *gavotta*). A French folkdance still performed in Brittany in the mid-20th century; also a French court dance and instrumental form popular from the late 16th century to the late 18th. The courtly gavotte was a lively duple-metre successor to the 16th-century branle; it often had a pastoral affect in the 18th century, and frequently appeared as a movement of a suite, usually after the sarabande.

'Gavotte' is a generic term covering many types of folkdance from the area of Basse-Bretagne in France, but it is used also in Provence and the Basque areas. J.-M. Guilcher's study of the gavotte in Brittany (1963) revealed great variety in modern practice, especially in the type of steps used, floor patterns and formations and musical accompaniment. Gavottes in some areas are accompanied by singing, with a soloist alternating either with a group or with another soloist; in other areas gavottes are accompanied by instruments such as the violin, drum, bagpipe or a kind of shawm. Various metres are used, including 4/4, 2/4, 9/8 and 5/8. Gavottes written in the 20th century are thought to derive from 19th-century practices and thus are probably not related to the court dances that gained popularity in the late 16th century.

The earliest description of the gavotte as a court dance appeared in Arbeau's *Orchésographie* (1588). Apparently the gavotte was a set of branle *doubles* or variations. Arbeau described it as a relatively new form of the branle, consisting of the same sideways motion by a line or circle of dancers. Unlike the branle, in which sideways motion was achieved by the dancer's continually bringing the feet together, the gavotte required crossing of the feet twice in each step pattern, and each step was followed by a hop. Various pantomimic motions, such as the choice of a leader for the next dance, usually formed part of a gavotte performance. The gavotte was mentioned as a popular court dance related to the branle by other writers as well, including Michael Praetorius (*Terpsichore*, 1612), F. de Lauze (*Apologie de la danse*, 1623), Mersenne (*Harmonie universelle*, 1636), and even by Pierre Rameau as late as 1725 (*Le maître à danser*). No further information as to steps and movements was given by any of these writers: Lauze wrote that 'the steps and actions are so common that it will be useless to write of it'; Rameau described the gavotte as a regular part of the ceremonial of formal court balls, but as he failed to describe the steps it is not certain how much the dance may have changed by his time.

Ex.1 shows how the steps mentioned by Arbeau might fit with one of the gavottes included in Praetorius's *Terpsichore*. Like the example, most 17th-century gavottes were in duple metre and consisted of repeated four- and eight-bar phrases, and most were uncomplicated by counterpoint, syncopation or attempts at musical relationships between successive strains. Apparently a wide variety of rhythmic figures was possible within the duple metre, one of the most common being frequent use of dotted crotchet–quaver figures at the beginnings of bars. Occasionally, as in a collection of ballets performed at the Vienna court in the 1660s and 1670s (see DTÖ, lvi, 1921/*R*), phrases had an odd number of bars. A ballet by J.H. Schmelzer in that collection includes five consecutive gavottes, each titled as though it represented the national gavotte of a different country (e.g. 'gavotte tedesca', 'gavotte anglica' etc.); the national titles probably referred to costumes worn during the dances for which the music was written, rather than to any particular national traits in the music. Ex.2 shows two of the opening strains of these national gavottes. Other sources for the 17th-century gavotte include the Kassel Manuscript (Ecorcheville), a collection of 17th-century dances now in Uppsala (*S-Uu* Imhs.409), and G.M. Bononcini's op.1 (Venice, 1666).

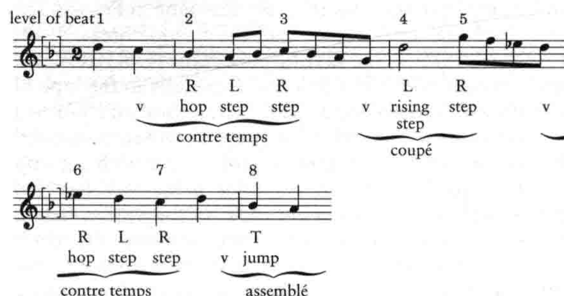
(b) *Gavotta bavarica*



Another type of dance called gavotte, whose relationship to the branle-gavotte is unclear, was one of the French court dances introduced during the reign of Louis XIV, probably in the 1660s or earlier. At least 17 actual choreographies are extant in the Beauchamp-Feuillet notation, all dating from after 1700 (see Little and Marsh). Most are social dances, although two (Little and Marsh, nos.4220 and 4520) are for theatrical performance. Ex.3 (Little and Marsh, no.4880) shows the opening phrase of a typical social gavotte, a couple dance (rather than a circle or line dance) popular in aristocratic circles in the early 18th century. The dance phrases, like those of the branle-gavotte, are generally four bars long as seen here, with a rhythmic point of arrival at the beginning of the fourth bar. The phrase of music that accompanies it, which begins one minim beat earlier than the dance phrase, is eight minims long, divided into two groups of four, with rhythmic point of arrival strongest on the fourth and eighth beats. In practice dance and music form counter-rhythms, and the tension is released only at the common point of arrival at the beginning of the fourth bar. A characteristic step pattern of the couple gavotte was the *contretemps de gavotte* followed by an *assemblé*, which may be abbreviated as 'hop–step–step–jump'; the second half of ex.3 shows how it fitted the music (the landing on both feet in the jump occurs on the first beat of the fourth bar). Gavotte step-units were widely used in the contredanse.

Gavottes were popular in ballets and other theatrical works. Lully set 37 titled gavottes in his stage works, beginning as early as 1655 in the *Ballet des plaisirs*. Later French ballet composers, including Campra, Destouches and Rameau, continued this practice, Rameau in particular using it more than any other dance in his stage works (e.g. in the prologue to *Hippolyte et Aricie*, 1733, in Act 2 of *Les Indes galantes*, 1735, and in the prologue and Act 4 of *Castor et Pollux*, 1737). Other productions including danced gavottes were Handel's *Amadigi* (1715) and *Il pastor fido* (2nd version, 1734), Grétry's *Céphale et Procris* (1773) and Mozart's *Idomeneo* (1781).

Like most Baroque dances, the gavotte was used as both an instrumental and a vocal air as well as for dancing. The stylized gavotte, like the dance, had a time signature of 2 or ₵, a moderate tempo, phrases built in four-bar units and a performing style often characterized by quavers executed as *notes inégales*. Mattheson claimed that the gavotte expressed 'triumphant joy', but most others thought the affect to be one of moderate gaiety – pleasant, tender, avoiding extremes of emotional expression. It was often considered a pastoral dance, an association emphasized in J.S. Bach's settings of gavottes in the first two English suites for keyboard, both of which have a drone bass that may be intended to imitate the sound of a musette (ex.4; note also the drone in Schmelzer's *Gavotta bavarica*, ex.2*b*). The tempo varied according to the character of the piece and the amount of ornamentation. J.-J. Rousseau (1768) wrote that the gavotte, while usually a 'gay' dance, could also be slow and tender. Unlike the more serious Baroque dances such as the allemande and courante the gavotte never lost its

R = right foot
L = left foot
T = both feet together
v = *plié* (bend knee)

Ex.4 J.S. Bach: Gavotte II from English Suite no.6 in D minor

relative simplicity of texture and clear phrasing. Gavottes were most often written in binary form, or as a set of variations, or as a rondeau (*see* RONDO). Occasionally two gavottes occurred consecutively in a suite, the first then repeated da capo.

Gavottes and gavotte rhythms abound in French vocal music, not only in brunettes and other songs but also in secular and sacred ensemble music. As early as 1668 Bacilly spoke of 'enchanting' French songs that were gavottes, including suggestions for their performance (*Remarques curieuses sur l'art de bien chanter*, i, chap.11). Sung gavottes may be found in the works of L'Affilard (*Principes*, 5/1705) and in cantatas by André Campra and Montéclair.

In the first half of the 18th century the gavotte was one of the most popular instrumental forms derived from a dance, frequently forming part of keyboard and instrumental suites, where it usually appeared after the more serious movements (allemande, courante, sarabande), along with other popular dances like the minuet and the bourrée. Gavottes for keyboard were composed by D'Anglebert, Blow, Purcell, J.C.F. Fischer, Johann Krieger, Lebègue, Gaspard Le Roux and François Couperin. Gavottes were also used in music written for small ensemble (e.g. solo and trio sonatas), such as G.B. Vitali's *Sonate da camera* op.14 (1692), Marin Marais' *Pièces de violes* (1711; gavotte 'La petite') and Couperin's *Les nations* (1726). Instrumental gavottes appeared in both French and Italian styles. The Italian style, characterized by a fast tempo, contrapuntal texture and virtuoso performance techniques without the use of *notes inégales*, was popular in violin music. Examples abound in the works of Corelli, and include pieces entitled 'Gavotta' which begin on the bar, not before it (op.4 no.5), and pieces entitled 'Tempo di gavotta' (op.2 no.8). Several gavottes by Bach also illustrate this style (e.g. the orchestral suites BWV1066 and 1069, most of the gavottes for solo string instruments and the 'Tempo di gavotta' in the sixth keyboard partita BWV830), as do the famous 'Harmonious Blacksmith' variations by Handel (keyboard suite no.5, 1720), although they are not so titled. A gavotte aria, 'Sehet in Zufriedenheit', closes Bach's wedding cantata *Weichet nur, betrübte Schatten*, accompanied by strings and the pastoral oboe, and a choral gavotte, 'Love and Hymen, hand in hand', forms part of a wedding scene in Handel's *Hercules*.
